REPORT OF WARDEN

TO THE HONORABLE EDWIN C. JOHNSON, GOVERNOR,
STATE OF COLORADO AND THE THIRTY-FIRST GENERAL ASSEMBLY:

It is my privilege and pleasure to submit herewith the thirtieth Biennial Report during the period December 1, 1934, to November 30, 1936, of the activities of the Colorado State Penitentiary.

The information and recommendations contained herein, together with accompanying statements and reports from various departments, will, I trust, give you the necessary data to enable you to anticipate the Institution's requirements for the ensuing Biennium.

IMPROVEMENTS AND REPAIRS

Among the various improvements and repairs made during the period were the following:

The Knitting Plant has been installed and is producing underwear, socks, stockings, sweaters and any type of knit goods that may be required by all State and tax-supported Institutions. This plant is located on the second or top floor of building number four. Together with this plant is our Tailor Shop where all garments such as shirts, trousers, overalls, aprons, etc., are made for the entire Institution. On the same floor is our Shoe Repair Department. To this department has been added a Landis Stitching machine which is quite an acquisition. This machine has been instrumental in reclaiming worn-out shoes for further use.

There are employed in the above departments sixty-eight (68) inmates.

The Automobile License Plate factory was installed in 1934 and is located in the basement of building number four. This plant has completed its third set of license plates which are now being distributed to complete the 1937 contract.

Together with this industry there has been installed on the same level, the Road Sign plant which is capable of making any road sign under Federal specification. All new road signs purchased by the State Highway Department in the past year have been made in this plant. Several hundred old signs have been reclaimed and repainted and put in use, saving the Highway Department a considerable sum of money.

Employed in these two industries are fifty-four inmates.

Owing to the lack of space for shop schools a new building has been erected 52x487 feet. It was necessary in the erection of this structure to build a wall on the north side five hundred

feet long; the stone used being quarried in our rock quarry as was also the stone used in the building itself.

This was built entirely by convict labor under the direction of our Superintendent of Construction and at a minimum cost, in as much as all that had to be purchased for its completion was window sash and glazing, cement for the floors, iron girders to lay foundation for roof; the latter being constructed of two inch tongue and grooved, end matched, Oregon pine, covered with four-ply asbestos roofing.

All in all this is a very substantial building and affords an abundance of light and ventilation. This structure is subdivided and the following departments are housed therein:

- (1) At the west end is the Canteen and Curio Shop which employs eight inmates.
- (2) Isolation cells wherein are housed incorrigibles and those condemned by the courts for execution.
- (3) The appropriation of \$17,500.00 for a new laundry was expended to good advantage. However, this amount did not enable us to purchase sufficient equipment for the ever-increasing population of the institution and it will be necessary to add to this two additional washers and one drier or extractor. This industry employs forty-two inmates.
- (4) In addition to the laundry there is a dressing room and shower room which afford a very convenient and efficient system for bathing purposes.
- (5) The Soap Plant was purchased in February, 1936, was installed in October and is now producing all kinds of soaps, insecticides and many other items too numerous to mention. This plant, like the Knitting Plant, is capable of supplying all State and tax-supported institutions with supplies in this line. There are twenty-eight inmates employed in this industry.
- (6) Plumbing Repair Shop—Sheet Metal or Tin Shop—Electric Shop. Employing twenty inmates who do all the necessary plumbing, sheet metal and tin work, and electrical work for the entire institution.
- (7) Blacksmith Shop, where seventeen inmates are busily employed in blacksmithing and iron working.
- (8) Gymnasium, where all athletic equipment is kept and being adjacent to the athletic grounds affords a very convenient location for same.

East of this building thousands of tons of dirt and rock have been removed, a new tower was erected and a natural wall extended approximately 375 feet was made to join the north end of the east wall where is situated tower number 6-A. In excavating for part of this building there was discovered a vein of limestone

and approximately 100,000 tons of limestone was taken out and stored to be used as required for lime and building purposes.

On March 2, 1936, an unfortunate happening occurred when two inmates commandeered a truck and, under fire from tower number 6, smashed through the east gate, which resulted in immediate capture on prison premises by Deputy Warden Vincent Donahue and Officer Keil O'Neil. It was necessary on that same evening to rebuild this breach in the wall, to replace the large gate which afforded entrance for trucks, by a small double gate approximately 4x7 feet, the remainder of the opening being filled in by stone and made part of the wall.

This incident reflected a weakness at the west end of the institution where a railroad and wagon gate were located. Immediately the northerly or wagon gate was eliminated and walled up and a new gate, conforming to railroad specifications, was built of heavy iron as an entrance for railroad cars for loading and unloading purposes. In addition to this the entire area from the west gate to the stores was concreted; the latter being very necessary on account of protection of sewer lines, water mains and waste tile which conveys flood waters to the main ditch, converging at this point.

Several hundred feet of twenty-four-inch tile had to be installed, together with traps, to corral the cloudburst flood waters raging from the north wall or hill. This water may now be systematically conveyed to the main ditch running through the institution.

For convenience, a new gate similar in construction to that of the railroad gate, mentioned above, was installed midway in the inside north wall, directly east of the new industrial building, which enables trucks with high loads too large for entrance through the west gate to be brought inside the penitentiary proper, and unloading and draying from the railroad cars.

The roofing problem presented a serious situation. Inasmuch as no appropriation had been allowed it became necessary to finance out of the scant available funds the reroofing of cell houses 1, 2 and 6 and the central building.

With the exception of cell house 1, which is the oldest building in the institution and is now tottering on its foundation, having been condemned some years ago and must be replaced by a new cell house, which will be discussed under appropriations for the coming biennial, a built-up roof with a twenty-year guarantee has been placed on the above-mentioned buildings, which should solve the roofing problem of these buildings for many years to come.

Appropriation of \$12,000.00 was granted by the Thirtieth General Assembly to improve the antiquated hydro, thirty-cycle electric plant. This money was expended in bringing this plant up-to-date and changing it to sixty-cycle, synchronizing with the the Southern Colorado Power Company, from which several hun-

dred dollars' worth of electricity is purchased monthly. In addition to this change, the wiring from the plant to the institution and all the wires therein were changed from overhead to underground wiring. This particular installation has numerous advantages, the primary one being the prevention of tampering with wires and throwing the entire institution into darkness, which instance occurred in the riot of 1929. It also lends to the efficiency of the conveying of electricity and reflects on the insurance rate, bringing about a reduction of the fire insurance rate, a saving of \$712.00 annually.

In addition to the above, three transformer houses were erected. Therein were placed the necessary banks of transformers, one being on the east wall, one at the west wall and one centrally located north and east of central building, thereby giving a more balanced distribution of electricity.

In our Bake Shop we were confronted with a problem, the necessary installation of new ovens. After considerable investigation in the pursuance of efficiency and economy it was decided to purchase and install two electric ovens, which have proved entirely satisfactory. There are eight inmates employed here.

During the past two years the interiors of all cell houses and office buildings were repainted and redecorated.

In order to increase the efficiency of the steam system all pipes throughout the institution were covered with asbestos pipe covering.

South of the new Female building a house, of Spanish style, was erected of rock foundation and dobie walls for the Deputy Warden, Mr. Donahue.

Many other improvements and repairs, together with the general repair and upkeep of the institution, were made but are too numerous to mention at this time.

RANCHES AND GARDENS

RANCH FIVE

The appropriation of \$15,000.00 for Ranch Five made it possible to clear its indebtedness. It allowed us also to make the necessary improvements in order to take care, in part, of the housing problem of the increasing population. In this connection a dormitory was built with stone foundation and dobie brick, the former being quarried and the latter being made on our Ranch One. This building houses thirty inmates.

Activities on this ranch, which are principally the growing of fruit, met with several reverses. In 1935 a cherry crop of forty-two tons was harvested, while in 1936, due to climatic conditions, the entire crop was a failure.

The apple crop of 1935-1936 was about 50 per cent of normal

yield. This is in part attributed to the trees being old and will have to be replaced by younger ones.

An added industry to this ranch is that of sheep. This, however, is very modest and small in scope as the object in view is to use our orchard pasture and stimulate the breeding and raising of pure-bred stock.

RANCH ONE

An appropriation of \$15,000.00 granted for the building of a dormitory on this ranch. This was completed and equipped in the latter part of 1935 and houses eighty-three inmates.

In addition to the above one hundred and fifty feet of sheds were built for housing farm machinery, together with corrals, horse barns capable of taking care of twenty-five head of work stock, over which is the hay barn with a capacity of 100 tons.

Due to the increased activities and population, and additional ground being broken for farming purposes, the present water system was insufficient. A thorough investigation and engineering survey disclosed the necessity of a larger water line and in accordance therewith there has now been purchased and will be installed within the next thirty days 3,200 feet of four-inch water pipe and a centrifugal pump with capacity sufficient to satisfy the demand for years to come.

On the northeast section of this ranch is a dry arroya which collects flood waters and could prove a menace to thirty acres of land in that section. At a very small expense an erosion project was started, now practically completed, which will prevent this land from being washed away by heavy rains or cloudbursts so prevalent in that district. This will also have a tendency to arrest such waters from overflowing or breaking the dam completed a few years ago.

The appropriation of \$4,000.00 was paid on the second mortgage of this ranch, which leaves a balance of \$18,000.00, which is discussed under heading "Appropriations for the Next Biennial."

Stone quarry and gravel pits located on this ranch are still supplying the requirements for building purposes and road building and repair. Recent survey discloses an endless supply.

The dobie brick industry has been very active and has been of material assistance in the building program throughout the institution.

Many other minor improvements have been made, fencing, wall building, road building, etc. These, together with the other improvements, have enhanced the value of this ranch, which can now be compared favorably with some of the best ranches in this district.

A blacksmith shop was also installed for the convenience of repairing farm machinery and the shoeing of horses and mules.

The turkey industry established on this ranch in 1933 has

made considerable progress and with the growth of the flock, which now numbers twenty-three hundred turkeys annually, additional sheds and granaries were constructed to properly house them.

POULTRY FARM

The Poultry Farm, as explained in our last biennial, was completely renovated, new houses were built and a new breed of poultry purchased. Necessary fencing was erected and the results, compared with previous periods, have shown a great improvement.

CANNING PLANT

The Canning Plant owned by the State and operated as one of the prison industries has not shown the profit of previous years. This is entirely due to the enforcement of the Hawes-Cooper Bill, which curbs the activities this plant has enjoyed in the past.

RECOMMENDATIONS

My recommendations in connection with the financial requirements for the Colorado State Penitentiary during the biennial period beginning July 1, 1937, and ending June 30, 1939, are as follows:

Maintenance	\$501,150.56		
Guards' Uniforms.....	5,000.00		
Repairs and Improvements	20,000.00	\$526,150.56	
Personal Services.....		468,600.00	\$ 994,750.56
Electric Power Plant.....	\$ 75,000.00		
Farm Equipment	7,500.00	\$ 82,500.00	
New Cell House	\$386,842.00		
Remodel Cell House No. 7..	85,176.00		
Purchase Ranch One.....	18,000.00		
Officers' Quarters.....	25,000.00		
Hospital Addition Tuber- cular Quarters.....	10,000.00		
Bullet Proof Glass.....	3,500.00		
Fireproofing and Roofing Storeroom Building....	10,000.00		
Real Estate	5,000.00		

Remodel Front Gate and			
Purchase Electric Eye.	\$ 15,000.00		
Office Furniture and Fix-			
tures	253.00		
Household and Institu-			
tional Requirements....	22,874.60		
Motor Vehicles.....	9,466.32		
New Boiler	7,500.00	\$598,611.92	\$ 681,111.92
<hr/>			
Total of All Appro-			
priations Re-			
quested			\$1,675,862.48

In connection with the budget outlined above I herewith offer discussion and recommendations.

REGULAR APPROPRIATIONS—COMING BIENNIAL PERIOD

Maintenance

In computing the amount required for maintenance for the two years ending June 30, 1939, it is necessary to take into consideration the increase in prison population, the advance in prices of commodities, over the two years 1935-1937. This also applies to personnel services and should be given very kind and due consideration. I am requesting the sum of \$974,750.56.

Repairs and Improvements

The amount requested for this appropriation is \$20,000.00. This fund is used for repairs of equipment and buildings resulting from ordinary wear and tear. There are many items that need immediate attention. Some of the cell houses are in need of new plumbing, lavatory replacements, which are very essential at this time; I therefore urgently recommend that the amount requested be appropriated.

Electric Power Plant

As already mentioned in this report, the Hydro Plant has now been brought up-to-date by the change over from 30 to 60 cycle. The size of this plant is inadequate to anywhere come near taking care of the consumption of electricity for the light and power purposes and at the present time we are purchasing from the local power company an average of \$10,000.00 worth of electricity annually.

We have availed ourselves of a complete survey by an electrical engineer for a further installation to the present plant. Should the unforeseen happen and we have a breakdown it would be necessary to purchase our entire electrical supply from the Southern Colorado Power Company, which would cost at this

time \$1,700.00 per month. Therefore, in order to avoid such a calamity and evade the present annual outlay I strongly recommend that the sum of \$75,000.00 be appropriated for this purpose.

Farm Equipment

The prison at the present time is operating four farms or garden tracts on which farm machinery is used. Due to the absence of funds being appropriated for the purchase of farm machinery, our present equipment is in very poor condition and considerable replacements will be needed to carry on farm activities this coming year. I strongly urge an appropriation of \$7,500.00 to provide the machinery needed.

New Cell House

Words cannot express the great necessity of a new cell house. I have repeatedly brought this matter before the Legislature and Executive Council, but to no avail. It now becomes absolutely necessary to care for the overcrowded condition, the increasing population, and the evacuation of cell house 1. The latter, if not torn down, will fall down of its own accord and cause considerable damage and perhaps loss of life. I am, therefore, resting the matter and responsibility with this, the Thirty-first General Assembly, for an appropriation of \$386,842.00 for the erection of a new cell house. These figures are based on a recent survey made and which I am prepared to produce if called upon to substantiate my statements. I therefore urge and beg that the appropriation of \$386,842.00 be granted.

Purchase Ranch One

Among the many other things I have taken over with my present position as Warden of the Colorado State Penitentiary I inherited an obligation made by my predecessor of \$35,000.00 on prison ranch one. Since 1932 this loan has been reduced by \$17,000.00, \$4,000.00 of which was appropriated by the Thirtieth General Assembly, the other \$11,000.00 being paid from maintenance and for which no allowance is made in the compilation of maintenance requirements. This mortgage is held by A. E. Carlton and the Federal Land Bank of Wichita, Kansas. The present indebtedness is \$18,000.00 and I respectfully request that this amount be appropriated if for no other purpose than to discontinue the interest that is being paid on this loan.

Officers' Quarters

The appropriation of \$25,000.00 is again requested for the erection of quarters for special reserve officers. These officers are subject to call at all times and it would prove a convenience if they were housed at the institution. An adjoining piece of

property is available, the purchase of which is requested later in this report. With our present supply of stone and dobie brick such quarters could be built very inexpensively.

Hospital Addition Tubercular Quarters

The present overcrowded conditions in the small space allotted in our hospital building make it impossible to properly care and treat those afflicted with tuberculosis. Our prison physician has repeatedly called this matter to my attention. In order that we may systematically take care of this properly and curb the spreading of this dreadful disease I request that the sum of \$10,000.00 be appropriated to enable us to build a balcony on the south side of building to take care of these unfortunates.

Bullet Proof Glass

The amount of \$3,500.00 is requested at this time for the installation of bullet proof glass in towers. We are requesting this from a humanitarian standpoint and for the protection of our guards and the efficiency of the penitentiary.

Fireproofing and Roofing Storeroom Building

Storeroom or warehouse where the entire supplies of the institution are kept is covered with a shingle roof at the present time. From an insurance rate standpoint, protection of the building, safeguarding its contents, I urge an appropriation of \$10,000.00 be allowed for the reroofing of this building.

Real Estate

As aforesaid in this report for the erection of special quarters for reserve officers, I request the appropriation of \$5,000.00 for the purchase of a piece of property adjoining the institution. This property will greatly convenience the penitentiary inasmuch as these special officers referred to are subject to call at all times and it would greatly facilitate matters if such homes were adjacent and it is for this purpose that I recommend the sum of \$5,000.00.

Remodel Front Gate and Electric Eye

Notwithstanding all the efforts that are made in the searching of visitors entering the prison, and likewise inmates, certain articles of destruction have been smuggled into the institution, as was evidenced last June when two guns were discovered within the walls of the institution. Should the intention of the recipients of these firearms have been carried out it would have ultimately resulted in loss of life. I therefore, as a protective measure for the lives of employees and the protection of property, earnestly request the appropriation of \$15,000.00 for the installation of electric eyes, the use of which need no introduction at this

time, and the remodeling of the front gate of the Administration Building, which I consider is one of the weakest and the most strategic points of the entire institution.

Office Furniture and Fixtures; Household and Institutional Requirements

For the purchase of office furniture and fixtures I am requesting the sum of \$253.00, and for household and institutional requirements the sum of \$22,874.60. The former request is for the replacement of typewriters and general office equipment and the latter for beds, bedding, and towels for inmate use. I therefore request that the sum of the aggregate, namely \$23,127.60, be appropriated for such purpose.

Motor Vehicles

I request the appropriation of \$9,466.32 for the replacement of cars and trucks now in use, many of which are quite old and will have to be replaced during the coming biennial period.

New Boiler

The present boiler capacity aggregates 500 horsepower. It is comprised of one 200 horsepower boiler and two 150 horsepower boilers. The latter are in very poor condition and have been patched. The boiler inspector informed me that they are on the verge of condemnation, that further use of these boilers may cause serious damage, should they blow up. I therefore urge the appropriation of \$7,500.00 for the installation of one new large boiler to take the place of the two small ones above mentioned.

In General

In making the request for appropriations to operate and handle the affairs of the Colorado State Penitentiary I am mindful of the perplexing financial problems in this State and therefore desire to cooperate with the budget commissioner, the Legislature and State officials.

I have refrained from listing in the budget many items that are necessary and should be included, but believe we can get along without.

The appropriations requested are only those which are absolutely essential.

To His Excellency, Edwin C. Johnson, Governor of the State of Colorado, I wish to express my appreciation and thanks for his kind and helpful cooperation in all the undertakings of this institution during the past two years.

To His Excellency, Teller Ammons, Governor-Elect of the State of Colorado, I pledge the same loyalty in the exercise of my duties as Warden as I have given in the past.

Respectfully submitted,

ROY BEST, Warden.

REPORT OF THE CHIEF CLERK'S OFFICE

HONORABLE ROY BEST, Warden,
Colorado State Penitentiary,
Canon City, Colo.

Dear Sir:

I herewith submit, for your consideration and approval, the financial and statistical report of the Colorado State Penitentiary, together with tabulated statements and other data, for the two years ended November 30, 1936.

Respectfully submitted,

D. G. HAYES, Chief Clerk.

REPORT OF THE MATRON

HONORABLE ROY BEST, Warden,
Colorado State Penitentiary,
Canon City, Colorado.

Dear Sir:

I desire to submit herewith for your consideration the Bien-nial Report as Matron for the two years ending November 30, 1936.

During this period we have received thirty-one prisoners from the State of Colorado and four from the State of Wyoming.

I wish to express my sincere appreciation for the cooperation and assistance rendered me at all times by the officials of the institution.

Respectfully submitted,

SARAH HOLDEN, Matron.

REPORT OF PRISON PHYSICIAN

November 30, 1936.

HON. ROY BEST, Warden,
The Colorado State Penitentiary,
Canon City, Colorado.

Dear Sir:

Once more I am able to submit a report as Prison Physician reflecting a continued progressive administration. Never before in the history of the institution have the inmates received so much or so well-planned medical attention as they have in this biennial period ending November 30, 1936.

In spite of the more and better service we have been delivering, by compounding a great many of our own preparations and doing all of our own technical work, we still have been able to keep our operating cost at a minimum.

During the past winter we had an excessive number of pneumonia cases, practically all of which were given supplementary oxygen treatment with the aid of our new oxygen tent.

The dental department is still functioning well and each inmate is given proper dental care, which includes teeth extractions, fillings, and new dentures.

Our venereal disease campaign has produced very satisfactory results, and should we be given the facilities for the proper care and handling of the criminally insane inmates I am sure we could do equally as well for them.

Our present facilities for the isolation and care of our increasing number of tubercular inmates has been entirely inadequate for several years and now more than ever I wish to stress the pressing need of a building program for this purpose.

In the past several biennial reports I have also been urgently recommending the consideration of a sterilization law affecting special types of criminals and I trust these two recommendations will have your favorable consideration at this time.

Respectfully submitted,

R. E. HOLMES, Prison Physician.

CHAPLAIN'S REPORT

HONORABLE ROY BEST, Warden,
Colorado State Penitentiary,
Canon City, Colorado.

Dear Sir:

In presenting this, my fourth Biennial Report, I am deeply conscious of the contrast my report shows when compared with the others contained in this volume. Of necessity, the Biennial Report deals with facts and figures for the most part, whereas the work of Chaplain, just as that of any pastor in a normal congregation, deals largely with intangible factors.

The activities of the Chaplain are chiefly concerned with the spiritual life of the institution, although the other two departments of education and recreation are not neglected. During the past two-year period over eighty public services of worship have been conducted in the chapel for which I was mainly responsible. Other services, some twenty-five in number, have been conducted by the Reverend Albert Schaller, Roman Catholic Chaplain. Special speakers and special music are frequently featured at the chapel services. The chapel hour is from nine until ten every Sunday morning. Members of the female department regularly attend. And here I wish to mention a very fine piece of work that has been started in the women's department. This consists of a program of entertainment and sociability undertaken at intervals by various organizations in the local Canon City churches. The plan was conceived by the Girls' Friendly Society of the Episcopal Church and is now enthusiastically sponsored by many other groups of young people in the various congregations. Mrs. Roy Best and the matrons of this department have been most generous in giving their time and supervision to make this work possible.

Pastoral work among the men forms a much larger portion of the work of Father Schaller and myself. This is more particularly true when there are condemned men who need ministrations. There are many letters to be written and a good deal of outside calling, charity work and investigations. At the present time a prison Bible class is being conducted with gratifying results.

Under the personal direction of Mr. Earl A. Stowe our prison library has grown to a considerable extent. Card index system is used, which is based upon a modified form of the Dewey plan

so widely used in small libraries. The following table gives statistical information:

TABLE SHOWING THE NUMBER OF BOOKS IN THE LIBRARY
NOVEMBER 30, 1936

Fiction	2,795	Poetry	63
Biography	145	Drama	15
Religion	181	Short Stories.....	45
Sociology	59	Essays	20
Language	60	Humor	15
Science	152	Classics (Harvard).....	70
Useful Arts.....	196	Travel	185
Literature	112	History	95
References	179	School Books.....	820
Philosophy	80		
Selected Literature.....	180	Total	5,467

LIBRARY CIRCULATION JANUARY TO NOVEMBER 30, 1936

Fiction	22,063	Magazines (Weekly and	
Non-Fiction	4,726	Monthly)	14,227
Religious	236	Total	41,252

Books are issued to the cell houses three days a week, whereas men in hospital or condemned men have daily access to the books.

The Prison Band has won wide acclaim for its fine musical programs. Concerts are given on the front balcony of the Administration Building every Sunday afternoon during the warm weather. Large numbers of people attend these pleasant occasions, many coming long distances. The music is of a very high standard and the number of instruments totals about 34. There is also a ten piece orchestra which is very much in demand for other types of occasions. Entire musical jurisdiction is in the able hands of the leader, Mr. Earl A. Stowe.

Wholesome and clean sports of almost every type are used during the year to entertain and keep those who are athletically minded in condition. These sports include boxing, wrestling, football, basketball, baseball, etc. All these endeavors contribute to the good morale now found at the Institution. Entertainments and movies in the auditorium also find a place on numerous occasions, principally Sunday afternoons and holidays. The centrally controlled radio system now in force at the prison brings to the inmates good programs of the right type and also helps to brighten many otherwise lonesome hours in the cells.

Splendid cooperation on the part of officers and others has been a great factor in making possible such measure of success and encouragement in this work as exists. Whole-hearted appreciation is extended to those who have given of themselves to assist with this work.

Respectfully submitted,

REV. L. A. CRITTENTON,
Chaplain.
