## REPORT OF WARDEN

TO HIS EXCELLENCY TELLER AMMONS, GOVERNOR,  
STATE OF COLORADO, AND THE HONORABLE  
THIRTY-SECOND GENERAL ASSEMBLY:

I have the honor and singular pleasure to present for your consideration the Thirty-first Biennial Report embracing the period from December 1, 1936 to November 30, 1938. This report reveals that the affairs and conduct of the institution are well exemplified in the fields of economy.

The past two years has not developed or revealed any conditions or situations of untoward consequences, except that the continuance of the large number of commitments presents the accompanying problems of overcrowdedness as a chronic factor, insomuch that the increase of 16.18% over the close of last biennial period, numbering at that time 1,205, bring the present number of inmates to 1,400. While this subject is a prevalent topic and has been discussed at length in the past, I consider it my duty to again acquaint and impress you with the situation relating to the future, as it is my firm conviction that an increase rather than a decrease in the number of malefactors, whom society has found it necessary to segregate for the violation of its laws, will accrue. The problems relating thereto naturally are of grave importance.

In the study of modern penology we have learned that there are two major obstacles in the path of successful and efficient administration of penal institutions. They are, namely, overcrowding and unemployment. The former will, in a measure, be taken care of temporarily when the new cell-house, now under construction, is completed, and the latter, I am gratified to state, through the avenues of our Industrial Vocations and Farming activities, each and every able bodied inmate is engaged in gainful occupation. The advantages are manifold and the results paramount in enabling many unfortunates to reestablish themselves in society. This is perhaps better evidenced in that which has been accomplished.

The general health condition of the inmates is exceptionally good, and most particular attention is stressed in this connection. Each inmate upon entering the institution is subjected to a rigid physical examination by the prison physician, and when medical attention is necessary the Doctor's instructions are strictly adhered to in a competent manner. The Board of Health on a recent tour of inspection were most complimentary on the subjects of our splendid medical and surgical treatments as

well as the strict observance of sanitation in general throughout the institution.

Special consideration has been given to the feeding and clothing of the inmates. The food is diversified, properly cooked, seasoned and served cafeteria fashion, and always in sufficient quantities. The cost has been remarkably low considering the quality and quantity. The average daily per capita cost of feeding throughout the period was .1743 and this computation includes the market cost of all produce received from the institution's gardens and ranches. All inmates are required to wear prescribed uniform clothing, manufactured in the penitentiary tailoring and knitting departments.

### IMPROVEMENTS AND REPAIRS

The major improvements within the institution are as follows: Five towers, numbered 7, 8, 16, Midway and 9-A, which locations are of vital importance within the institution, were rebuilt and equipped, when necessary with bullet-proof glass. All buildings throughout the prison were redecorated and painted. The section of buildings formerly housing the blacksmith shop, laundry, etc., lying north and directly east of the west gate, comprising an area of 351x21 feet, is being reconditioned and refinished to house industrial training shops.

In the first or more westerly section will be placed an electric eye, which was recently purchased from the Illinois Testing Laboratories of Chicago, Illinois. This installation will be an indispensable acquisition to the institution and will greatly facilitate operations and the handling of inmates at the west gate.

The problem of electrical distribution was a source of great concern and to obviate possible involvements it became necessary to make an expenditure of \$6,686.27 for transformers and wire to forestall any probable emergency.

Flowing through the penitentiary grounds in a northeasterly direction is a canal owned by the Canon City Hydraulic Ditch Company. To insure dry foundations in both the new cell-house, under construction, and the hospital building it was imperative to relay about 650 feet of this canal. This work required the removal of 3,500 cubic yards of dirt, and the lining for same with rock and cement necessitated the use of 350 tons of rock and 1,100 sacks of cement.

### NEW CELL HOUSE

Under the provisions made by the Thirty-first General Assembly the Penitentiary Building Program has progressed rapidly. The ever increasing population stimulated the necessity

to further the completion of the cell-house as soon as possible. The dimensions of this building are 190 feet long, 73 feet wide and  $35\frac{1}{8}$  feet high, and it will accommodate 512 single cells. Owing to the shale formations it was necessary to excavate 18 to 23 feet before a satisfactory foundation was found. The sub-structural work was started in September, 1937. The building is of reenforced concrete. The roof is supported by steel girders having a full steel deck of latest type and construction and placed thereon is an asbestos composition roofing material bearing a fifteen year guarantee, which will fortify against any roof trouble for time to come. All window openings and light vents are of steel sash with a sub-ceiling of Magnalite glass, which eliminates diffusion and affords an abundance of light and ventilation. An analysis of this building portrays the highest efficiency in sound construction and economy.

### **BOILERS**

The special appropriation of \$26,000.00 for the installation of new boilers relieved the heating and steam situation to a great extent, but we are still confronted with the problem of an emergency situation, which we have discussed in our requirements. The contract for the new boilers was let to Hendrie & Bolthoff Manufacturing & Supply Company, Denver, Colorado. They furnished and installed two Union Iron Works Type L, 3 Drum Low Head Bent Tube Water Tube Boilers, each having a capacity of 2,510 square feet of heating surface, equivalent to 251 actual horse power each, and built strictly in accordance with the Code of the American Society of Mechanical Engineers. This installation is satisfactory in every respect. Summarizing the installation, the allotted appropriation of \$26,000.00 did not suffice and an additional sum of \$6,236.35 was necessary to complete the project.

### **ROCK QUARRIES**

On the rock quarries directly north of and inside the walls of the institution some 365 men are at work daily getting out rock and finishing same for constructional services.

### **INDUSTRIES**

The biennial period just closed has been one of the most prosperous and satisfactory in the history of the institution. The introduction of a coining press for the manufacture of tokens for the State was installed in 1937 and has been a contributing factor to help solve the employment problem. The industrialization of the penitentiary, which I introduced to the Honorable Legislators of the Twenty-ninth General Assembly has grown to my entire satisfaction and from an appropriation of \$20,000.00

made at that time now represents a capital investment of \$130,000.00 without any cost to the taxpayers other than the original appropriation. The intrinsic value of these industries are incomparable with the results obtained in the field of rehabilitation and education. Table No. 11 portrays their financial benefits.

### RANCHES AND GARDENS

The Prison Farm consists of approximately 2,000 acres of land, four hundred of which are under cultivation, the remainder is grazing and hilly, rocky country, which fits into the general policy and penal value in improving the farms by proper methods of soil conservation and culture. The development of improved livestock by using pure bred sires and increase the number of registered animals as fast as reasonable selection will permit. The soil constituency is of such a nature that certain grains and vegetables cannot be grown, and we are, therefore, compelled to purchase same. However, the activities of the ranches are better explained by the summary contained in the following table:

#### SUMMARY OF REVENUE AND EXPENDITURES BIENNIAL PERIOD ENDING NOVEMBER 30, 1938

Commodity	Revenue 23 Months, Nov., 1938	Expenditures 23 Months, Nov., 1938
Feed and Forage.....	\$ 8,187.00	\$ 6,320.00
Dairy Products .....	29,567.00	18,067.00
Poultry and Products.....	12,580.00	10,950.00
Vegetables .....	4,700.00	2,160.00
Fruit .....	8,570.00	5,091.00
Hogs .....	7,165.00	4,030.00
Sheep .....	2,201.00	1,612.00
Totals .....	\$72,970.00	\$48,230.00

Improvements are constantly being made on the ranches, and among the major improvements in the last two years are: Ranch One, a new hay shed now under construction, the dimensions of which are 36x104 feet. A new cottage for the officer in charge has been built, and additional corrals, 70x120x6 feet were added to the present corral adjoining the horse barn. Watchman's house or turret, water tank and new pump house were erected at the Gardens, together with a new horse barn, and in addition to this a new bunk house to care for 30 additional men, also new gateway entrance and poultry shed. At Ranch Five a new horse barn and storage shed was built together with turret for watchman, new gateway and gateman's house were also erected. All these buildings are constructed from stone quarried on the ranches and adobe brick of which some 50,000 were made at Ranch One.

**RECOMMENDATIONS**

Personal Services.....	\$ 475,878.56
Contractual Services.....	42,394.61
Supplies and Materials.....	490,449.97
Current Charges.....	20,347.60
Current Obligations.....	2,194.98
Equipment.....	59,300.00
New Structures.....	10,000.00
Land and Non-structural to Land.....	22,290.74
	<hr/>
Total of All Appropriations Requested.....	\$1,122,856.46

The detail of the above requests are enumerated on Table No. 13 and cover only the bare necessities of the requirements of the institution needs with a few exceptions.

The increase in personal services is imperative and absolutely necessary for the safety and security of the institution. This requires additional guard force to care for the added population, which automatically makes more squads or working gangs in the quarries. The new cell-house, which will be ready for occupancy in the early summer of 1939, in itself will necessitate fifteen more guards, hence the additional amount in the request.

Under land and non-structural, I request \$22,290.74. This amount or obligation represents the balance owing on a mortgage of \$25,000.00 contracted in 1931 for the purchase of a ranch. I have repeatedly requested that this indebtedness be paid off and avoid the enormous interest which has to be paid annually from maintenance. This method of payment is by virtue of an amortization loan made at the time of purchase and in accordance therewith the State Penitentiary has paid \$8,705.91, of which \$5,996.25 represents interest or 68.87% of the amount paid as against 31.13% on the principal or \$2,709.26. I beseech that every effort be made to appropriate \$22,290.74 to clear off this obligation.

Under the heading of equipment there is included a request for an additional unit or boiler to be added to the present set up in the boiler house as the appropriation of two years ago only took care of the requirements in part. Should a breakdown occur to the auxiliary boiler now in use, and, which incidentally will be condemned within the ensuing two years, we would be seriously incapacitated. I, therefore, urge the sanction of \$20,000.00 for same.

As heretofore mentioned I could enter into a long discourse on each and every one of the requests, but I feel that with the breakdown each one is self-explanatory and respectfully request the entire appropriation be allowed.

### CONCLUSION

In conclusion, I wish to state, I am mindful of the financial problems of the State and I have, therefore, refrained from requesting only the absolute requirements.

To His Excellency Teller Ammons, Governor of the State of Colorado, I wish to express my deep appreciation for the many courtesies, helpful advice and assistance extended to me at all times.

To His Excellency Ralph L. Carr, Governor-elect of the State of Colorado, I pledge the same cooperation in the exercise of my duties as warden as I have given in the past.

Respectfully submitted,

ROY BEST, Warden.

**REPORT OF THE CHIEF CLERK'S OFFICE**

HONORABLE ROY BEST, Warden,  
 Colorado State Penitentiary,  
 Canon City, Colorado.

Dear Sir:

I herewith submit, for your consideration and approval, the financial and statistical report of the Colorado State Penitentiary, together with tabulated statements and other data, for the two years ended November 30, 1938.

Respectfully submitted,

D. G. HAYES, Chief Clerk.

**REPORT OF THE MATRON**

HONORABLE ROY BEST, Warden,  
Colorado State Penitentiary,  
Canon City, Colorado.

Dear Sir:

I desire to submit herewith for your consideration the Biennial Report as Matron for the Two Years ending November 30, 1938.

During this period we have received twenty-six prisoners from the State of Colorado, three prisoners from the State of Utah and six prisoners from the State of Wyoming, also one parole violator from the State of Colorado. Thirty-one prisoners have been paroled, five discharged and one transferred to the State Hospital at Pueblo, Colorado.

I wish to express my sincere appreciation for the cooperation and assistance extended me at all times by the officials of the institution.

Respectfully submitted,

SARAH L. HOLDEN, Matron.

**REPORT OF THE PRISON PHYSICIAN**

November 30, 1938.

HONORABLE ROY BEST, Warden,  
Colorado State Penitentiary,  
Canon City, Colorado.

Dear Sir:

It gives me pleasure to be able to submit a very satisfactory report for the Biennial Period ending November 30, 1938. The numerous problems presenting themselves demand more and varied treatment.

Our Autoclav, purchased a good many years ago, has become almost unserviceable and should be repaired. In addition we have use for and should be allowed to purchase a Basal Metabolism Testing Machine, a short wave Diathermy and an X-ray Stereoscope.

The increased prison population at times, taxes our hospital facilities and staff to the limit, especially is this true in trying to properly care for the criminal insane. These unfortunate inmates should be housed in a separate building located here or at the State Hospital in Pueblo as might seem best to properly administer necessary psychiatric treatment and care. Under present conditions these inmates have insufficient mental classification and no psychiatric care.

Tubercular inmates are increasing with the Prison population and the facilities for their isolation and care have never been adequate. I wish to stress the pressing need for a building program for this purpose.

My recommendation for a Sterilization Law affecting a certain class of criminals I trust will have your favorable consideration.

Respectfully submitted,

R. E. HOLMES, Prison Physician.

**CHAPLAIN'S REPORT**

HONORABLE ROY BEST, Warden,  
Colorado State Penitentiary,  
Canon City, Colorado.

Dear Sir:

This, my fifth Biennial Report, shows the work of this department to be in wholesome condition, with the various phases of the work showing satisfactory progress, and the morale attendant upon Chapel services and pastoral contacts good. The Reverend Albert Schaller, taking care of the Roman Catholic constituency, continues to make a most valuable contribution to this highly important work.

Our most serious loss during the period of the past two years was the withdrawal of Mr. E. A. Stowe who, because of ill health, was forced to relinquish his position. A well deserved tribute should here be paid to Mr. Stowe for his many years of effort with the band, choir and library, which departments reached an enviable peak of development during his tenure. His place is being admirably filled by Mr. Earl A. Gilbert who continues upholding all the best traditions of the Prison band, emphasizing the weekly Sunday afternoon concerts.

During the past two years one hundred and four Chapel services, with an average attendance of 300, have been conducted, Father Schaller officiating once each month. Many especially fine programs have been made possible through the generous and hearty cooperation of local and other pastors. Of these many contributors to our Chapel program I should like to mention in particular two splendid programs from the Pueblo C. F. I. and a series of Chapel programs and Bible Classes sponsored by Mrs. C. B. DeBoer of Denver. Mrs. DeBoer deserves special commendation for her services which never fail to provide inspiring speakers and attractive music.

Through the winter months for the past two years very heartening progress has been made with the mid-week Bible classes for men and women. These classes conducted separately for the men and women, are producing increasing interest and are well attended.

The prison library continues to function efficiently and the following statistics speak for themselves:

TABLE SHOWING THE NUMBER OF BOOKS IN THE LIBRARY  
NOVEMBER 30, 1938
