REPORT

OF THE

STATE HOME AND INDUSTRIAL SCHOOL FOR GIRLS.

To the Eleventh General Assembly, State of Colorado:

As directed by law, we respectfully submit this, our first biennial report for the two years ending November 30, 1896, of the work done in the State Home and Industrial School for Girls.

The Home opened October 1, 1895, with thirty-seven inmates. It has been supported by the different counties of the state, a full account of which you will find in the following report.

We are fast outgrowing our present quarters. It must be evident to the most casual observer that we need ground and buildings of our own. We cannot do our best work for these girls as we are now situated. Ground is needed that they may spend more of their time in the open air. The change from sewing, school room and kitchen will go far toward making their lives brighter and better. We think gardening should be one of the important features of our Industrial School.

All the best energies of the school should combine and the best facilities given to educate and train the inmates so that they may be able to go into good families competent and capable, and with good physical development, be able to take their places and earn for themselves an honorable living.

No argument is necessary to prove the real importance of maintaining such an institution as this. A state is wise that properly cares for its unfortunates. When a girl takes her place in society, a respectable, self-supporting citizen, the state is reimbursed ten-fold.

We would most respectfully call the attention of your honorable body to our needs for the coming biennial period. We earnestly petition that we may be granted an appropriation of \$50,000 for ground, buildings and maintenance.

We feel that this report would not be complete without a few words in regard to our staff of officers. The superintendent, Mrs. Hattie S. Hauser, has proven herself well adapted to the place, a good disciplinarian, a careful manager and a pleasant lady. She has taken a kindly interest in the inmates and has labored patiently for their reform. She has wrought a most wonderful improvement in the Home.

The matron, Mrs. Martha J. Kinkade, has filled the position very acceptably, and by her motherly and kindly manner has won the esteem and affection of all the girls.

Of our teachers, Mrs. Jennie F. Tidball, a well and favorably known teacher in the public schools of Denver for years, little need be said. We feel that we were very fortunate in securing her services. Under her instruction a marked improvement has been noted.

Miss Mary Harris is a young lady very much interested in her work of teaching the younger girls. She is a good instructor, and by her pleasing manner has won the confidence of all.

Of the housekeeper, Miss Lizzie Cumberland, we can only say it would be hard to fill her place. By her quiet, sympathetic manner the girls are led to perform their duties cheerfully and well.

In fact, we take delight in speaking well of all the officers of the Home.

Our ideal of the Home is that it should be as far removed from a prison as possible and maintain strict discipline.

This is being done as nearly as possible under present circumstances.

We include a consolidated report of Mrs. Sadie M. Likens, former superintendent of the State Home and Industrial School for Girls, from October 1, 1895, to June 30, 1896. This is compiled from her monthly reports to the board of control.

The Home opened on the above date with thirty-seven inmates.

Books to the amount of \$70 were procured in November from The American Book Company, Chicago, Ill. This enabled the superintendent to open the school according to law, two

sessions of school being held each day, a part of the inmates attending in the morning, the others in the afternoon. The girls are also being taught household duties.

Mrs. Foote made the girls very happy Christmas time. Many little toys and good things to eat were received and greatly enjoyed. Drs. Beaver, Love and Gale are the physicians in charge and attendance.

In reviewing the work of the nine months since the Home opened, much has been accomplished, but the work has just begun. I leave the Home with much regret.

SADIE M. LIKENS.

SUPERINTENDENT'S REPORT.

To the Honorable Board of Control, State Home and Industrial School for Girls:

I herewith submit the following report from July 1, 1896, to November 30, 1896, inclusive.

Since taking up the work here, in all my efforts and plans for the improvement of the Home, I have been heartily supported and ably assisted by the board and the officers associated with me.

The average number of inmates present for the five months has been fifty-five, ranging in age from ten to eighteen years. The greater number are bright, active, intelligent girls, diligent, industrious and painstaking, willing to be directed for the right, while there are others whose influence is not for the best, and these we have placed on the third floor and kept separated from the others as much as possible with our present conditions.

We are greatly hampered by not having a building adequate to the needs of such a school, but trust in the near future all this will be righted.

There are five women employed in the Home. The work is done by the girls under direction of the officers in the different departments; two of these officers are teachers. One division of the inmates attends school for three hours in the morning, the other, for three hours in the afternoon.

Great interest is taken in the school room work, and many appreciate the opportunities given them. They have two literary clubs that meet weekly and afford a source of pleasure and profit to the members.

They are instructed in all kinds of general housework and plain sewing, besides many kinds of fancy work. Many of them do nicely with the needle and are very neat in all they attempt to do.

During the past five months, the girls, under the direction and assisted by the matron, have made for the use of the Home, forty-four dresses, thirty-five night dresses, twenty pairs of drawers, thirty-four work aprons, fifteen sheets, eight pairs of pillow cases, twenty-five towels, six napkins, draperies for thirty windows, also all the mending of the house.

After I came to the Home in July and had them well arranged in order and method according to my idea of work, we began to create what we called our dictionary fund, that was to make and sell different articles and with the proceeds to purchase a first class dictionary. We began and worked in good earnest, and by the first week in September, when we counted the profit, we had enough to get the dictionary and a large clock for the hall. Since the first week in September each girl that makes an article, when it is sold, gets the profit; half to spend as she wishes, the balance to go into a general fund to buy the things needed in the Home.

By means of this kind of work, together with the household duties, and the three hours daily that they must attend school, we manage to keep them busy and contented.

The following is a list of the articles made by the girls and placed on sale in the past four months:

Forty-nine checked gingham aprons, worked in patterns, with cotton; fourteen white aprons, tucked and hemstitched; two sateen aprons; thirteen dust bags; four stocking bags; thirteen hemstitched and drawn work handkerchiefs; thirteen Turkish towel wash cloths, with crochet edge; fifteen yards of chocheted lace, and also four pairs of crochet slippers.

They have also knitted and donated seventeen pairs of mittens to the boys in the Brightside home.

The one thought with us is to keep the mind and body so busy that there will be no time for evil thought or deed. We try in every way we can to instill good, sound moral principle, upon which to build a Christian character for future usefulness. We feel that a good work is being done, the uplifting is slow, but we can see the improvement day by day. We have faith that many will go out from this Home to become good women, so strengthened that they can resist the many temptations that will come to them.

The girls in the Home are allowed no communication with the outside. All letters and packages sent out, or those received, are opened and read or examined before being sent out

or given to the inmates. All friends who visit the girls are only allowed to talk with them in the presence of an officer of the Home. This rule is strictly enforced.

There has been no critical illness in the Home for the five months. The health of the inmates is remarkably good.

In our work we have been greatly aided by the kindly interest and sympathy shown by many ladies who have become interested in the good work being done.

We are sincerely grateful to the ladies of the Flower Mission, who so kindly remembered us each week during the flower season.

We are under many obligations to Mrs. Robert Rubidge, Mrs. N. C. Hughes, Mrs. Lillian Root, Miss Jennie Sharp and Miss Sarah E. Miller, who have so ably assisted us in the work of our Sunday school, which was organized in August and has become such a helpful feature in our Home.

Another pleasure to which the girls look forward is the Thursday evening entertainment brought to them each week through the kindness of Mrs. Margaret True, Mrs. F. G. Nagle and their friends.

We are indebted to many others for their encouragement in word and deed, and for the many donations of clothing and other articles so much needed in the Home.

We wish to make especial mention of the enjoyment and profit given to the Home by Miss Mabel Leonard and Miss Jessie Root in the hours spent on Saturday afternoon in reading and explaining to the girls books that tend to create a desire for pure literature. The influence for good from these young friends is beyond telling.

In regard to the needs, general management and discipline of the Home, the board is fully advised.

The tabulated statements are self explanatory.

Very respectfully,

HATTIE S. HAUSER.

MEDICAL DEPARTMENT REPORT.

Denver, Colo., January 6, 1896.

To the Board of Control, State Home and Industrial School for Girls:

Ladies—I have the honor of submitting the following report of the medical department of the Home for the quarter ending December 31, 1895.

This department was organized in September, 1895, and began regular supervision of work October 1. Dr. Minnie Love, Dr. Eleanor Lawney, Dr. Milligan and Dr. Alice Jafferey have been appointed, each to serve three months during the year. Dr. M. Jean Gale has been appointed oculist for six months, and we hope to have a regular dentist appointed shortly. Dr. Barker Bates consulting physician. It will readily be seen that with the above efficient staff the health of the girls will be carefully looked after.

During the first part of the quarter, owing to the severe and sudden changes of weather, the defective heating arrangements and insufficient clothing of the inmates, there were a good many demands for the doctor, but, happily, no serious cases of illness.

Dr. Love, who has been the attending physician during the quarter, reports as follows:

Total number of cases treated during the quarter.....	296
Number of prescriptions compounded in dispensary.....	149
Number local treatments given.....	142
Surgical cases.....	2
Operation	1

The prevailing disorders have been sore throats, colds and bowel troubles. In regard to the latter I wish to state that I made a careful inspection of the milk and food supply and am happy to state I found both excellent; the food was of good quality, abundant and well cooked. The fact that there is no sewer connection, and that the cesspool is so near and so closely connected with the house, I believe to be a constant

menace to the inmates of the institution. It is to be regretted that there are no better facilities for out-of-door exercise, but I believe the superintendent is doing all for the girls in that direction that she can under the circumstances.

I would respectfully call attention to the fact that the desks in the school room are so placed that if sufficient light be admitted to the room for study, it would be highly injurious to the eyes of the pupils. If the windows in front are shaded, the side light is insufficient and from wrong direction. If it meets with the approval of the Board, I will see that the desks and seats are properly changed without any expense to the board.

I have pleasure in reporting that through solicitations from this department, we have received the following donations:

From the Needlework Guild, new garments.....	64
From private sources, bundles worn garments.....	4
From Howe's pharmacy, tablet triturations, amount.....	\$10.00
From J. Durbin, instrument dealer, instruments.....	5.00
From W. H. Medill, M. D., gouge and instruments.....	4.00
From Riethmann & Co., cotton and glycerine.....	2.50
From Denver Instrument Company, stethoscope and re- pairing	3.00
From Parke, Davis & Co., Detroit, drugs.....	10.00
From I. N. Beaver, curtain rods, douche pan, drugs, etc....	10.00

Besides the above gifts I have promised cash \$35, but possibly the promise is easier to obtain than the money.

I am arranging a series of simple lectures on physiology and hygiene for the girls, to be given by several lady physicians not on the staff.

Owing to lack of funds, I have not been able to arrange for the training school for nurses, but hope to be able to do so in the near future.

In conclusion, I would add that too much praise can not be given Dr. Love for the faithful and efficient manner in which she has accomplished her work during the quarter. Coming as she did in the beginning of the work at the Home, she had harder work and probably greater difficulties to overcome than at present. Under her care the girls have steadily improved, and all are now in general good condition. She has promptly responded to every call and added much to the comfort and well being of the institution.

Respectfully submitted,

IDA NOYES BEAVER,
President Medical Staff.

PHYSICIAN'S REPORT.

FOR QUARTER ENDING AUGUST 31, 1896.

Service of Dr. Josephine L. Peavey.

Cases treated by Dr. Peavey, eighteen.

Visits made by Dr. Peavey, twenty-five.

One visit and extraction of teeth by Dr. May Townsend.

One surgical operation for hemorrhoides and one surgical operation for removal of growth on foot by Dr. Lawney.

Visits by Dr. Lawney, ten.

There have been no contagious (other than venereal) or epidemic diseases.

The following cases of chronic disease may be noted:

Georgie Summers, thyroid disease (exapthalinic goitre).

Lizzie Callahan, chronic Bright's disease.

Josie Monahan, chronic Bright's disease.

ELEANOR LAWNEY,

Chief of Medical Staff.

McPhee Building,

Denver, Colorado, August 31, 1896.

FOR QUARTER ENDING NOVEMBER 30, 1896.

Cases treated by Dr. Love, twenty-five.

Visits made by Dr. Love, twenty-four.

One surgical operation for in-growing toe nail by Dr. Love.

One case of acute hysterical mania sent to private hospital.

Cases of eye, ear, nose or throat disease treated by Drs. Peavey and Gale, twenty-one.

Visits by Dr. Peavey, sixteen.

Visits by Dr. Gale, three.

Visits by Dr. Lawney, one.

Respectfully submitted,

ELEANOR LAWNEY, M. D.,

Chief of Staff.

317 McPhee Building,

Denver, Colorado, December 8, 1896.
