BIENNIAL REPORT

6414 of the

Commissioners and Warden

of the

Colorado State Reformatory

REPORT OF THE BOARD OF COMMISSIONERS.

Buena Vista, Colo., Nov. 30, 1908.

To His Excellency,

HENRY A. BUCHTEL,

Governor of Colorado.

Sir:—The Board of Commissioners of the Colorado State Reformatory present this report for your information and consideration, covering the period from December 1, 1906, to and including November 30th, 1908.

We subjoin and make part of this report the reports of the Warden and other officers.

The wisdom of the men who conceived and gave form to the idea of the industrial Reformatory, is fully justified, probably beyond their expectations, in the splendid results such institutions have achieved in winning wayward boys back to moderate and sensible habits of life.

Prior to December 1st, 1908, the courts have sentenced to this institution two thousand one hundred and eighty-three prisoners and public opinion, in our judgment, is rapidly tending toward this newer idea in penology, so that provision should be rapidly made for the increased number that we are bound to receive in the future.

The early equipment in this institution for the purpose of carrying out the industrial training feature is a matter of great moment and we refer you to the Warden's report, where that matter is dealt with in more detail.

We are pleased to report that we were able at the close of the term to meet all our obligations, although at the expiration of the first half of this term we thought a deficiency could not be avoided. The appropriation for maintenance made by the last Legislature was insufficient, although they gave us what we asked for within a thousand dollars. We have always been very careful at this institution in only requesting appropria tions from the Legislature which were absolutely necessary and only such amounts as we thought were sufficient to meet our expenses after economical administration.

The population of the institution is steadily increasing and will continue to do so, both on account of the increase in the population of the State and on account of the courts sending to the Reformatory a larger percentage of those who are con-

victed than has formerly been the practice.

We have given considerable thought and study to the necessity of new buildings and the most economical methods of construction consistent with good results, and we are quite convinced that the plan as initiated and is now being carried out by the Warden, is the one of most advantage and benefit, both to the State and to the prisoners. We have now in course of construction, and will probably complete within the next four months, three buildings. All the labor has been performed by the prisoners under competent and patient instructors, thus giving the State a return in value of about two and one-half times the amount appropriated for building purposes. The greatest advantage, however, is in the opportunity it affords to teach the different trades to the prisoners. As suggested in the Warden's report, we need a number of new buildings for various purposes. We deem it of the most immediate necessity and therefore advisable to construct a new cell house, and administration building and what we term the Central Building, and we ask sufficient appropriation to buy the necessary materials for this purpose.

For the purposes as set forth above, we recommend the fol-

lowing appropriations:

 Maintenance
 \$95,000.00

 Building
 14,500.00

From the appropriation for maintenance we pay all of the expenses incident to the running of the institution, including improvements (other than new building), general repairs, painting, school, farm and lawn, new machinery and so forth, for which separate appropriations are commonly asked.

The last Legislature passed an act creating a Parole Officer for this institution and the Penitentiary. This officer has been of material aid and advantage to us in looking after our paroled prisoners and we urge the advisability of a sufficient and proper appropriation for salary and expenses in keeping with this office and its duties.

We commend the Warden and his corps of assistants for their efficient services and devotion to duty and we beg to express our earnest appreciation of the active interest Your Excellency has at all times taken in the affairs of the Reformatory and for the many courtesies shown us.

Respectfully submitted,

CHARLES MUNN,
GEORGE STRACY,
R. L. TAYLOR,
Commissioners.

WARDEN'S REPORT.

Buena Vista, Colo., Nov. 30, 1908.

To the Honorable Board of Commissioners:-

I have the honor to submit to your honorable body my fourth biennial report as Warden of this institution, covering

the period of two years immediately preceding this date.

We expended for maintenance account for all purposes the sum of \$91,122.04, which shows the gross daily per capita cost to be \$.763. It costs us to maintain the prison proper \$67,806.37, showing the net daily per capita cost to be \$.568; although materials and supplies have advanced in price, we have been able to decrease the per capita cost to a point lower than in any previous term. As the population of the institution increases the per capita cost can be further decreased.

We expended from the building fund the sum of \$21,199.56. Comparison of the figures in the financial tables hereto appended, with those of any other previous term, or any other similar institution similarly situated, should be conclusive evidence that the strictest economy consistent with our conditions

has been exercised.

OFFICER

Our officers receive salaries as follows:

Deputy Warden	\$1,200.00 per annum and sustenance
Clerk	900.00 per annum and sustenance
Stenographer	480.00 per annum and sustenance
School Teacher	720.00 per annum and sustenance
Engineer	900.00 per annum and sustenance
Blacksmith	780.00 per annum and sustenance
Stonemason	900.00 per annum and sustenance
Carpenter	840.00 per annum and sustennace
Shoemaker	780.00 per annum and sustenance
Stonecutter	780.00 per annum and sustenance
Guards	720.00 per annum and sustenance
Chaplain	400.00 per annum
Physician	. 40 per month for each prisoner and officer

Amounts

We do not raise all of the farm products that we consume, and having plenty of labor and teams, we should purchase additional acreage. We now cultivate nearly two hundred acres, and it would be of considerable financial advantage to cultivate double that amount.

We have purchased additional horses until now we have twenty-three head of reasonably good horses, which is sufficient to do all the necessary work.

SANITARY DAIRY BARN.

We have a good dairy herd, being mostly pure bred Holstein Freisian, and from this herd we are able to furnish nearly all the milk and butter we use.

Our swine herd numbers about three hundred head and is a source of profit to us.

Another advantage to be derived from our live stock is the opportunity it affords to learn something of animal husbandry to our boys, it being under the charge of a competent and trained man.

The following bills-of-fare for the last week in May and November of each year will show about the average fare given to our prisoners:

BILL OF FARE.

FOR WEEK ENDING MAY 25, 1907.

Breakfast. Dinner. Supper.

SUNDAY-

Oatmeal, with milk and Roast beef.

sugar. Brown gravy.

Minced brown potatoes. Mashed potatoes.

Salt, pepper and vinegar on tables at all times.

The average daily per capita cost for food was \$.105. The vegetables, fruits, etc., raised on our own farm and garden are charged in this amount.

The average daily per capita cost for clothing for our prisoners was \$.041.

Our second grade uniform is made from a cadet gray woolen cloth, and ticking shirt, and our first grade uniform is made from the same materials with the addition of black braid and a blue shirt, instead of the one from ticking.

SECOND GRADE PICTURE.

FIRST GRADE PICTURE.

We make all our clothing and shoes.

There was one death in the institution during the time covered by this report.

Last year we had a number of cases of scarlet fever, and we found ourselves severely handicapped from lack of proper buildings and facilities for handling contagious diseases; with these exceptions the health of the prisoners has, on the average, been good. The average daily per capita cost for medicines and professional attendance was \$.017.

Our prisoners have been employed in the regular routine work necessary to the institution, on the farm, garden and grounds, in the different shops, stone quarry, and in the construction of buildings. Our plan requires that every prisoner be at some labor or in school every day except Sundays and holidays, unless he is sick. The larger percent take an active interest in the tasks assigned them, and consider ita privilege to work, while in others the ambition has to be cultivated. The most serious detriment to discipline in prison life is the lack of opportunity to keep the prisoner employed.

There is sufficient labor at this institution to employ all of our population for a number of years in the construction of the buildings, which will be necessary to carry out the Reformatory plan. Any legislation, therefore, which would take the labor away from the Reformatory would be ill-advised, both for the reason here given and also for the harmful effect it would have on our discipline, and for other good and sufficient reasons.

Our school system as at present carried on, places within the reach of each prisoner an opportunity to get a good start toward an education. At the présent we compel each prisoner to attend school who is under the sixth grade, and when we get into our new building we will take those of the higher grades. In an institution of this character great stress should be laid upon the necessity of a good knowledge of the branches of a common school and we aim to make this one of the most important branches of our institutional work.

Under the indeterminate sentence those should be paroled whose record and surrounding circumstances carries the presumption that the terms of a conditional release would be observed. We have released on parole four hundred twenty-one during the time covered by this report, most of whom are doing well and observing the requirements of their parole contract. The average time of detention was 284.3 days, which is far too short. Prisoners sentenced to a reformatory should stay there a sufficient length of time to get a common school education, learn some useful trade, and cultivate habits of industry, study and cleanliness. The old idea of detention for punishment has properly been supplanted by the idea of detention for correction and reformation, and this cannot be successfully done unless the prisoner is detained a sufficient length of time to reach the standard of the Reformatory.

For a detailed report of the population and its movement I refer you to the statistical tables hereto attached. We have had two escapes this term. In this respect, we have been exceptionally fortunate, when considering the number we have employed on work outside of the yard.

There has been a steady improvement in the discipline of the institution for several years past, owing in part at least to the most excellent system of merits and grading as provided in our prisoners' manual. The more serious breaches of discipline have been few and have been measurably met by good sense, firmness and tact on the part of our officers. This improvement indicates to some degree, that the prisoner, when released on parole and is left to work out his own future possibilities in his own way, will have a more thoughtful regard for law, authority and the rights of society.

The physical condition of our plant is good, and the buildings are in good repair. We have painted all of our buildings this term and we are now in position to devote our energies to the completion of the new buildings now in course of construction and to the proposed new buildings.

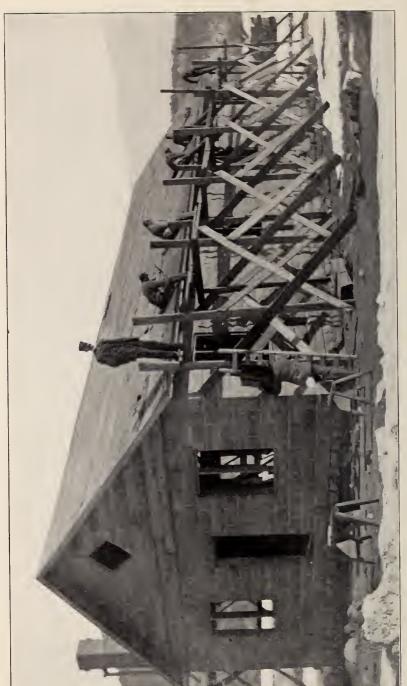

The masonry-work of the building that has occupied us for the past four years is done, and now we have but to put the roof on and do the necessary inside finishing. This will take probably about four months. There is adequate space in this building for a chapel, two school rooms, dining hall, bakery and kitchen, to care for a population four times our present one. The cement chicken house we have been building is all complete except the floor and partitions. This building is 28 ft. x 60 ft. We are also building a cement and steel modern sanitary dairy barn, 38 ft. x 110 ft., two stories high. Weather permitting, we can complete this building within ninety days and when completed will be a very valuable addition to our plant.

Our cell capacity must be enlarged as soon as possible, and I would recommend that a cell-house containing two hundred cells be next constructed, running at an angle of twenty-two degrees northwest from our proposed central room. This central room will be built of ruble with but very little ashler, and we can build this room together with the Administration building at the same time we are building the cell-house.

The cell-block in the present cell-house is very poorly constructed, and is not now and never can be a sanitary and safe cell-block, and should be torn out. Both the cells and the corridor are too small, and by constructing this cell-block with concrete instead of brick, we can add about twenty-five per cent. to size of the cells, and about one foot to the width of each corridor.

We also need other buildings to be used as hospital, storeroom, bath house, manual training quarters and shops for industrial training, but it is quite imperative that the first three mentioned should be built first in order to care for our in-

CEMENT CHICKEN HOUSE.

creasing population. We can build these three within the next two years.

The industrial and manual training features are an important part of the reformatory plan, and we should enlarge on our present practices as fast as buildings can be built for these purposes. The operation of the Reformatory plan is wholesome and sound and should be extended and perfected as rapidly as possible.

In my report of 1906 I made the following recommendation, but the Legislature failed to act upon it, and I now make the same recommendation and urge its enactment:

"Sections 4157 and 4158 of Mills' Annotated Statutes provide for the transfer, under certain conditions, of prisoners from the Reformatory to the Penitentiary and vice versa. This law should be so amended that when a prisoner is so transferred from one institution to the other the authority to release on parole will be vested in the management of the institution to which such prisoner is so transferred. The reason for this is apparent. When a prisoner from this institution is transferred to the Penitentiary we do not see much, if anything, of him after such transfer, and we are thus incompetent to judge when he should be released on parole.

"It is not possible for courts to always know of the former life of a convicted person, and it frequently occurs that prisoners are sent to this institution who are detrimental to other inmates here, and should be sent to the Penitentiary, but it is not advisable to transfer from one of these institutions to the other, to the extent that otherwise would be advisable so long as that law is defective and incomplete."

The Civil Service Law has only been in operation a short part of the time covered by this report, but judging from our experience so far we are quite convinced that we will be able to have a higher standard of efficiency and character in our employes. It naturally takes some little time to get the necessary rules which will tend to serve the best purposes, but our experience with the Civil Service Commission has been very pleasant and beneficial.

The last Legislature enacted a Law creating the office of Parole Officer for this institution and the Penitentiary. I want to attest to the amount of assistance and help we have received from this officer, and I urge the advisability of a sufficient appropriation to continue and enlarge on this work.

I take this opportunity to publicly acknowledge our obligations to the State Board of Charities and Corrections, and the Colorado Prison Association for the aid and assistance they have both rendered us on many occasions.

The officers are all to be commended for their loyalty and efficient services in aiding me to carry out my plans and methods.

With grateful acknowledgment of the active interest and many courtesies extended to me both by the Governor and yourselves, I respectfully submit this report.

ARTHUR C. DUTCHER, Warden.

PHYSICIAN'S REPORT.

Buena Vista, Colo., November 30, 1908.

Hon. A. C. Dutcher, Warden Colorado State Reformatory, Buena Vista, Colo.

Sir:—I herewith submit my report for the biennial period ending November 30, 1908. During the period of time covered by this report we have had but little serious sickness. A slight epidemic of scarlet Fever in the fall of 1907 was promptly controlled and completely eradicated.

We have been entirely free from typhoid fever; pneumonia and diphtheria were each represented once, and the usual num-

ber of cases of acute tonsilitis materially reduced.

After deducting the cases of disease with which inmates were affected, upon entering, we find little illness in the institution, despite the increase in the daily average.

The surgical cases were but few, considering the number of inmates employed in the handling of rock in the construction

of the new building.

One death occurred in the past two years. On November 12th, 1907, No. 1900 died from general syphilitic infection. His condition was serious upon entry to the institution, and despite diligent treatment and careful nursing, he passed away in three months after admission.

All officers have been most hearty in their co-operation with me in my endeavors to prevent disease, as well as in its treatment when it arose. To you I wish particularly to tender my thanks for many acts of kindness and assistance rendered me.

SCHOOL TEACHER'S REPORT.

Buena Vista, Colo., November 30, 1908.

Hon. A. C. Dutcher, Warden Colorado State Reformatory.

Sir:—As teacher in this institution I have the pleasure of submitting to you my report on the educational achievements of the institution for the past two years ending November 30, 1908.

It has been well said "that education is the only safe anchorage for a democracy." In accordance with this idea we make it compulsory and boast that it is one of the fundamental principles of our economy that every child shall be given a certain amount of elementary education.

Bilogically as well as in many other ways, the first years of one's life are supremely important and the stability and character of one's future make up depends in a large measure upon the affectionate care bestowed upon those preceding years. The opinion is prevalent among all that the periods of infancy and youth are periods of extreme plasticity and at no other time in his life is the individual so susceptible to the influence of surrounding forces as during the early years of his existence.

It has long been a psychological question as to whether heredity or environment is the prime factor in moulding one's life for good or evil. In the various treatises on this subject there does not seem to be a consensus of opinion as to the importance environment has in affecting the life of the individual, but it is freely acknowledged that environment does play a very important part and it should not be denied that weighty consideration which is certainly due it.

If an inmate of this institution has inherited the tendency to commit offenses against the laws of the State, it is an extremely difficult task for that to be remedied, but if this environment has caused his downfall and he has been sentenced to a term's imprisonment in this place, it should be the earnest endeavor of all those having authority over him to try to remedy those defects of character which were caused by such environment. The last proposition is also a very difficult one to solve, but there is no doubt but what it can be accomplished if an interest is manifested in his welfare.

Within the short time that I have been a teacher in this institution I am prone to believe that there is much that can be

done that will be of inestimable value in helping those who leave this institution to be better and more capable citizens when they are again permitted to take upon themselves the responsibilities of that most honorable station. The more I have to do with them the more convinced am I that what they desire most is confidence in their every action and an interest in their personal welfare. Convince a man that you put confidence in him and you are in a favorable position to be his benefactor.

The object of this institution is to teach the prisoner some occupation which will be of remunerative value to him when he regains his freedom.

It is our most intense desire to couple with this a valuable amount of mental training which will aid him in executing his trade to the best advantage.

No doubt it is true that the education which is offered here is not far advanced, but it is sufficient to instill in them a desire for a higher and more liberal education which can be obtained on the outside by a little effort.

However, we do contend that the little schooling which they do receive, reinforced by the good books in the library, to which all the inmates have access, will in no small degree contribute towards helping them live up to that standard which is expected of them.

The greater share of those who attended school were denied or scorned those opportunities which were proffered them for obtaining a suitable education while on the outside. These, needless to say, are those who pursue their studies with an eagerness and resolve that would convince the most tireless public school student that he had done his studies a most unfaithful injustice.

As in public schools, those who bear an earnest attitude towards the tasks assigned, giving them the most zealous and eareful consideration and at the same time being in hearty cooperation with the teacher and his efforts, are the ones most

likely to profit by the advantages given them.

During the last two years school has been in session three hundred and thirty-five half days. These may be rightly termed full school days, as those attending the morning session are employed at their various occupations during the afternoon and vice versa, the forenoon sessions extending over three and three-fourths hours and the afternoon sessions over three and one-half hours each day. School is in session six days per week. According to the above figures, it will be readily seen that the forenoon classes receive twenty-two and one-half hours and the afternoon classes twenty-one hours' schooling each week, which is nearly equal to that received by the students in our public schools. The average attendance per day has been 40 and per half day 20, which is twenty-five and ninety-six one hundredths per cent. of the total population.

Another fact worthy of special consideration is that the general average may be said to have easily qualified for a third grade inspection, while a very insignificant percentage are close to or may be classed as illiterates.

Each boy immediately upon entering the institution is given an examination of the common English branches, so as to ascertain his educational equipment. If he fails to pass the fifth grade he is retained in school until he is able to do so. Those passing the fifth grade are exempt from school, not because his is considered a sufficient education for the average individual, but because the facilities of the institution are such that it is an impossibility to carry them any farther.

It is to be hoped that after the new building is completed (said building now being on a fair road to completion) that this hindrance will be overcome by better conveniences and

that a higher educational standard will be required.

Respectfully submitted,

EMERY A. OWEN, A. B., Teacher.

CHAPLAIN'S REPORT.

Buena Vista, Colo., November 30, 1908.

Hon. A. C. Dutcher, Warden Colorado State Reformatory.

Dear Sir—I hereby submit my report as Chaplain of the Colorado State Reformatory for the biennial period ending November 30th, 1908.

GENERAL STATEMENT.

I desire to state first of all that my experience in connection with the institution has been very satisfactory to myself for the reason that yourself and your officers have spared no pains to make my work pleasant, and to render any assistance necessary to make my work to some degree successful.

I therefore thank you for your counsel in the things vital to the interest of the work of the Chaplain; also thanks to all the officers for their assistance which has always been freely

given when needed.

VISITS.

It has been my aim to make one or two visits to the institution each week, in order to meet the men and talk to them. I have not been able to have a considerable time with many of them at any one time, but it has given me the opportunity of helping them to some degree by a word of sympathy and encouragement.

In this feature of my work I have been gratified with the kindly response and courteous treatment on the part of the men. I have tried to find out wherein they have failed, then

help them to make amends.

My experience has shown me that there are far too many of the young men of our country in the institution due to the existence of so many of the places in our land where intoxicating liquors and harmful drugs are sold, many of them attributing their downfall to these sources.

DIVINE SERVICE.

Divine services have been held every Sunday afternoon at two o'clock conducted by the Chaplain or some visitors. The service consists usually of song service, entered into by almost all the audience, followed by the prayer and sermon. The attendance upon this service varies from time to time, though usually about as many as can well be accommodated in our small chapel. It is my impression that about ninety per cent. of the inmates attend service one time or another, and that over half of them attend every service. This estimate includes those who are on duty at the hour of worship.

In my public administration of the sacred work and in private contact I have tried to make no distinction as to the religious persuasion of the inmates, but that all alike are to be helped on the one common ground of the Fatherhood of God,

and the Brotherhood of Man.

The class for the study of the Sunday school lesson meets immediately after the service every Sunday afternoon. The class has ample supply of Sunday school quarterlies for the study of the lesson during the week. The interest taken in the study of the Word by many of the men is quite gratifying.

I am pleased to say that only once have we been called together to pay the last respects to the dead. Just one death.

We are very thankful that there were no more.

CONCLUSION.

In conclusion I wish to say that my expressions relative to the ultimate results of the effort of the institution upon the life of an inmate, from the spiritual, moral, physical and industrial standpoints are not lost, as some assert. We are the seed sowers. We can't tell what the harvest may be from any of these sources:

"In the morning sow thy seed, and in the evening withhold not thine hand, for thou knowest not whether shall prosper, either this or that, or whether they both shall be alike—good

(Eccl., 11-6).

The men going from the institution with the impression that the standard of life ought to be higher than they thought when they came, and with the kindly hand of Christian people, the assistance of the Prison Aid Society, and kindred helps, ought to bring some fruit. The good things done are not wholly lost.

Yours very respectfully,

(Signed) GEO. F. BROCK, Chaplain.

PAROLE OFFICER'S REPORT.

Buena Vista, Colo., November 30, 1908.

Hon, A. C. Dutcher, Warden Colorado State Reformatory.

Sir:—I submit as my biennial report as State Parole Officer for term December 1st, 1906, ending November 30, 1908, as follows:

Paroled during two years		421
Discharged from parole	114	
Died while on parole	3	•••
Returned for violation of parole	19	
Re-sentenced while on parole	3	
On parole and parole violators, Dec. 1, 1908	282	•••
	421	421

This statement refers only to those who were released on parole during this term and does not include any one who was on parole prior to December 1st, 1906.

In the above, as in my report to the Warden of the State Penitentiary, so here I have included the biennial period covered by your report, although my term of office did not begin until May 15th, 1907.

While the duties of my office have occupied the whole of my time and as stated in my report to Warden Cleghorn, "I have found the work most interesting," yet it is proper to add in my report to you that on account of the youth of those subject to parole from the State Reformatory the work under you has aroused such a deep heart interest that is has been a pleasure to discharge every duty. While matured men on parole yearn for someone to counsel, understand and help them, the parole subjects under you are most susceptibly subject to influences for good or bad.

Many of those you have sent out on parole are mere boys in years, and while they have been imbued with the idea of self reliance under you, they are peculiarly grateful for your policy to be followed out in the supervision of the parole officer. It is not possible in an official report to give the public an adequate idea of the great need for care, discretion, firmness and

sympathy to guide and save the boys you have started upon a reformed life. Nor will any salary or pride of position equal the satisfaction that comes to a man in this work from the gratitude of those who have been so helped that they stand alone.

Reference has been made in my report to Warden Cleghorn of the miles traveled by me. There is scarcely a city, town or village in the State that I have not visited and the mere fact that I was there has brought visitors in almost every instance of some one paroled or a near relative or friend of some one paroled from the institution which you supervise, and invariably such visitors have told me of the good work that had been done in the State Reformatory and that they were delighted that the State had a special officer to look after the work outside.

In fact, the work, while well done in the Reformatory, has only been started, and much remains to be accomplished to make law abiding and manly men of those who go out on parole. They have to learn that the world really keeps a record in an indefinite sort of way and yet in the general average the works of merit count. To the youth it has meant a vast helpfulness that we have been able to shield them from unjust accusations. Even to a greater extent than in the case of parole from the Penitentiary, the police and peace officers of the towns and cities have arrested, without proper regard to the facts, young men on parole from the State Reformatory. The work has been two-fold; on the one hand to investigate the facts on behalf of the paroled subjects, and on the other to educate the arresting officers in the care and discrimination due in such cases. I have found it a desire on the part of the police officers to co-operate, and from our work I may fairly conclude that there is growing among the newspapers more and more a desire to help in the work instead of catering to a morbid idea of sensational news. Our visits and strong personal interests of the State in the paroled subjects have aroused a considerable spirit to aid in the uplift.

It has been our aim to keep in close communication with paroled subjects and when in any community to learn the facts about them from others, whether or not there was any special reason for so doing. We have labored always to provide the paroled subjects with clean, wholesome and congenial employment and to convince them they must do their very best wherever placed and receive their advancement by merit. Thus I have been placed in especially close relations with employers. The managers of large industrial enterprises have been most kind and helpful in the work. The agents of the State Free Employment Agencies have also been especially interested in helping us to secure positions. The cold figures tell a splendid story of restored and wage earning young men to the one who reads it understandingly, but in fact the real story of these paroled subjects is full of heart interest and reflects honor upon

the wisdom of the law makers in contriving a system that tends to aid the reform of the individuals.

The trips beyond the State have had a most wholesome effect, since it has demonstrated that the State means in fact to retain supervision over paroled prisoners until the term of parole has been fully complied with. No doubt closer supervision will thoroughly convince the paroled prisoners that the former expedient of leaving the State to resume a life of crime is useless. Again, closer supervision not only aids in reformation, but saves much expenditure of public funds to arrest and convict where there is a return to crime.

If this work can be continued, it is safe to say that a saving can be made over the old system of paroles and discharges, and advancement made in reforming those convicted of crimes. The knowledge that a parole officer has constant watch and care over paroled prisoners is of itself of immense moral influence, and the means at hand to enable such officer to travel and frequently see the paroled prisoners gives them confidence in the power of the State to do its work. Our work has been hampered by lack of sufficient funds.

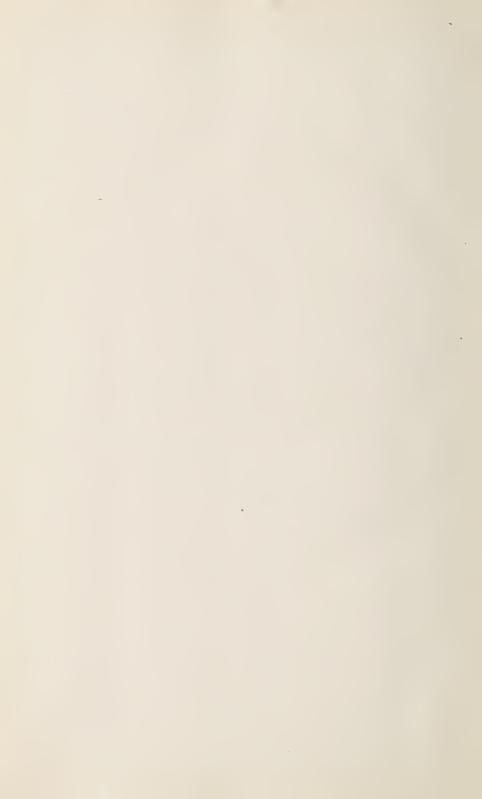

Whatever may be the future of my own official life in this work, I must not close without urging you to present the real condition so forcefully to the Legislature that adequate appropriation be made for this work, so full of good results in the beginning, in order that it may be carried on successfully and systematized as an enlightened method of reformation.

Respectfully submitted,

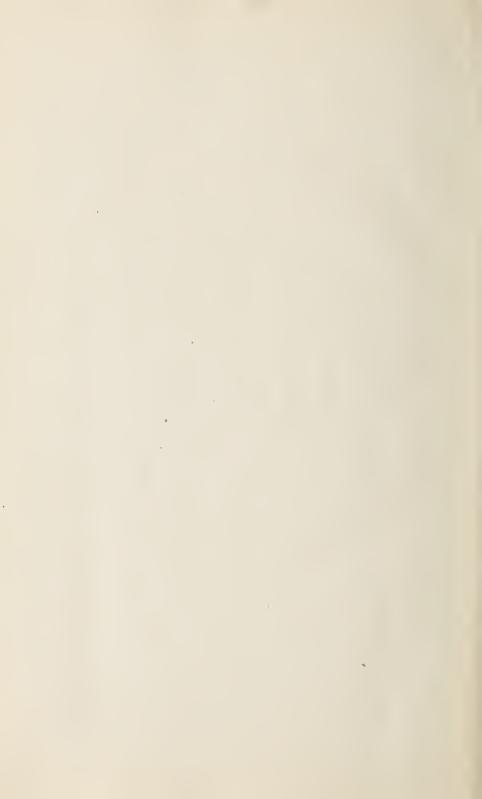

A. H. SMITH, Parole Officer.
