A Brief History of the Colorado Insane Asylum

An act to establish the Colorado Insane Asylum, and providing for its location, was approved February 8, 1879.

Immediately after the passage of this act, under the provision of this law, the governor appointed the superintendent and board of commissioners. The commissioners were appointed for terms of two, four, and six years, and the superintendent for six years.

On the eleventh day of June, 1879, the board of commissioners organized by electing Theodore Brown president and James McDonald secretary.

Prior to this meeting the commissioners had given notice to the public when this meeting would be held, in order that donations of land might be made for a site, which, when selected, would be conveyed to the state.

Several sites of forty acres were presented to the board as a gift to the state for asylum purposes, and a site of forty acres, west of Pueblo, was accepted through Hon. George M. Chilcott.

This site contained a brick building, that was remodeled and repaired, and opened for the reception of patients in October, 1879; and at the same time a one-story frame cottage was erected for women. These quarters were occupied until such time as new and substantial buildings could be erected.

In 1880 the General Assembly appropriated \$60,000 for the erection of buildings and the purchase of land—\$55,000 for buildings and \$5,000 for additional land.

In April, 1881, plans for a new building were submitted to, and adopted by, the commissioners. It was understood and agreed that the building should not exceed in cost the appropriation, but, owing to the fluctuation in prices of material, the appropriation was not sufficient to finish the work; therefore an additional appropriation was made by the General Assembly in 1882, and the building was started in April, 1881, was finished and occupied November 20, 1883. This building made room for 220 men patients, and the quarters formerly occupied by men were utilized for women until such time as permanent buildings would be erected for their accommodation.

In 1888 money was appropriated for the erection of a wing of a permanent building for women, and in 1892 an appropriation was made for an administration building to be joined to the

aforesaid wing, thus completing one wing and administration building, and accommodating 185 women patients.

In 1904 the remaining wing—accommodating 100 more women—was added by means of an appropriation that was made for the purpose by the Fourteenth General Assembly.

In 1894 a two-story cottage for men, accommodating seventy patients, was completed at a cost of \$40,000.

A law was passed in 1893 providing that all new or additional buildings erected upon the asylum grounds must be of moderate size and on the cottage plan; each building to be designed to accommodate not less than fifty patients and not more than one hundred.

In 1904 two cottages were completed, accommodating 200 men patients and costing \$98,000.

In 1908 one cottage, costing \$50,000, was erected for the accommodation of 100 women patients.

In 1909 and 1910 three cottages were erected for the accommodation of 300 patients—200 men and 100 women. The cost was \$150,000.

Thus it will be observed that the property has grown from 1879, when it accommodated only fifty patients, until the present time, when it takes care of 1,200.

All of the cottages are modern in design and equipment, and one of the latest ones is fireproof.

Each succeeding year of the existence of the institution has shown improvement in the design of the buildings and in the management, and the property at the present time is as good as the average similar institution.

This institution has had only two superintendents. Dr. P. R. Thombs was elected in 1879, and served until August 31, 1899. He was succeeded by Dr. A. P. Busey, on September 1, 1899. Dr. Busey is still superintendent at this date, November, 1912.

Three members constitute the board of commissioners, one member dropping out every two years. He is succeeded by a man elected for a term of six years.

In reference to conditions of admission, discharges, and so forth: All cases are committed by a jury trial and court order, and are discharged or paroled only by order of the superintendent. There is a statutory provision for voluntary admission by written application of the patient, but no patient has ever been received under this law.

DR. A. P. BUSEY
Present Superintendent

Seventeenth Biennial Report
OF THE
State Board of Lunacy
Commissioners

FOR THE
BIENNIAL PERIOD ENDING
NOVEMBER 30, 1912

To His Excellency,

JOHN F. SHAFROTH,

Governor of the State of Colorado,

and the Nineteenth General Assembly.

Gentlemen: In the further discharge of our official duties, we, the Board of Lunacy Commissioners, beg to submit for your consideration the seventeenth biennial report of the Colorado State Insane Asylum, the same being for the period beginning December, 1910, and ending November 30, 1912.

Following our report will be found the reports of the superintendent and steward, which show in detail the working of the asylum for the years 1911 and 1912, a statement of expenses and disbursements for its maintenance and improvement, together with a recital of the pressing needs of the asylum for the ensuing two years.

Dr. A. P. Busey, our superintendent, continues to preside over the institution in his usual, thoroughly efficient manner. He is ably assisted in this work by Drs. H. A. La Moure, Le Roy Gullick, and Nellie Binford, and Steward Ernest Weinhausen.

We take great pleasure in reporting that we have invariably found everything connected with the institution and grounds, including the farm, in a neat and orderly condition. The halls, dining-rooms, wards, bed-rooms, kitchens, and sun-rooms are models of neatness and cleanliness. We have been especially pleased with the attractive state of the grounds within the asylum enclosure, and with the efforts constantly made to keep these in the best possible condition.

IMPROVEMENTS

While no new buildings have been erected during the past two years, several important improvements have been made, and, with the funds in hand, the institution has been maintained in good condition.

An appropriation of \$35,000 was granted to us by the Eighteenth General Assembly for the purchase of eighty-eight lots lying east of the present premises, between Martin and San Francisco Streets on the east, Fifteenth Street on the north, and Eleventh Street on the south. This property has been acquired by condemnation proceedings. A ten-foot stone wall has been put up on the eastern boundary line of the same, the grading has been done, and, in the spring, lawns and trees will be put in on this addition.

Electricity as motive and heating power has been installed in the laundry, instead of steam and gas.

A large central hot-water heater has been installed in the boiler-house, to take the place of several now in use, situated in the basements of the various buildings.

FARM

There is probably little need of our saying much regarding a farm, as you are fully aware of its need. However, the question of increased accommodations for patients at the present site would be influenced somewhat if we were sure of the farm. Could 150 or 200 male patients be placed on a farm, we could probably get through the next two years without increasing our capacity here for male patients. With the removal of our empty houses, and the erection of a few more cheap frame buildings, we think the above number could be accommodated.

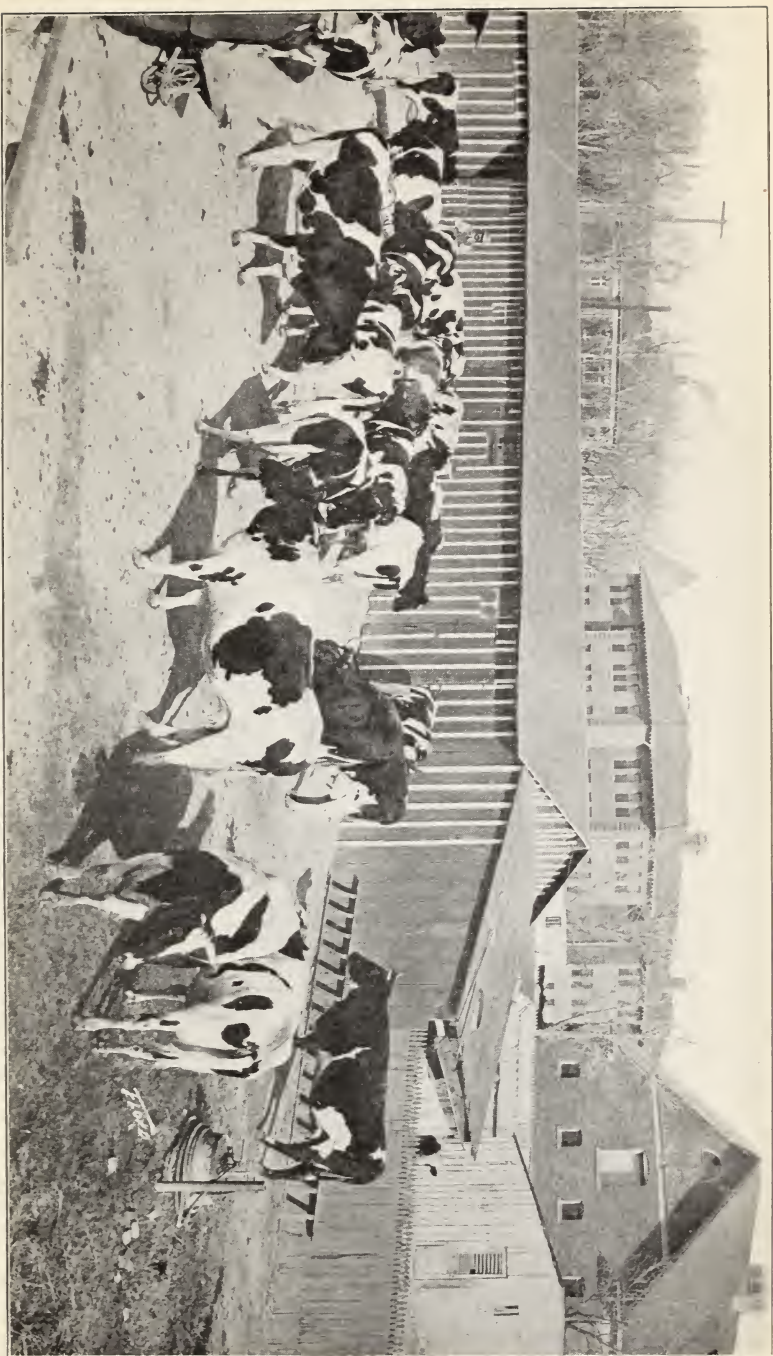

NEW BUILDINGS COTTAGES

We shall have to have one or two cottages for female patients. At the present writing we have reached the limit of our capacity for women.

We would suggest that one cottage for male and one for female patients be erected as reception cottages, in which all cases shall be placed when first admitted, where they could be kept under observation for some time before being assigned to a regular ward. These cottages should be equipped with hydrotherapeutic apparatus, and have rooms fitted for the proper examination of patients, as well as an operating-room. In connection with at least one of these should be a well-equipped laboratory, where diagnostic and pathological work could be done. In a modern institution these reception buildings are considered the most important feature.

ADMINISTRATION BUILDING

This building is very much needed, as we have not sufficient office-room, and the living-quarters for the officers are a disgrace to an institution of this character and size. An administration building, having suitable living-rooms on the upper floor for officers and ample office-room on the first floor, should be the center of the institution, and all officers, both male and female,

HOLSTEIN DAIRY HERD

should have their office-room there, instead of being scattered all over the property.

KITCHENS

A new kitchen for the female department is one of our greatest needs. The present one is in a basement, and is so hot that it is not a fit place to force anyone to work.

A building to include a kitchen, storeroom, and employes' dining-room for the male department has been asked of several legislatures, but has never been granted. It is greatly needed.

BOILER-HOUSE AND LAUNDRY

The engineer reports that, if new buildings are erected, the boiler capacity will have to be increased. We do not see how our present boiler-house could be enlarged, and it seems that we shall have to build either a new one or a new laundry. With our laundry run by electricity, we do not see the necessity for its being near the power-house, and our opinion is that a new laundry could be built much more cheaply than a new boiler-house. Then the present laundry could be utilized for the extension of the power-house. If a new laundry is erected, it should be two stories, so that the ironing would not have to be done on the same floor as the washing.

REPAIRS

We recommend that an appropriation of \$25,000 be made to cover repairs. It is a question if this is enough to put the property into the condition in which it should be kept. We mention the following important items:

The floors in the east wing of the main building in the female department should be replaced with new, as well as two wards in the main building of the male department.

The front of the main building, owing to the settling of the foundation, is in bad shape and should be repaired.

The piping of the irrigation system running through our lawns is practically worn out and will have to be replaced.

We also wish to call the attention of your honorable body to the dangerous condition of the old administration building. This is the oldest building on the premises, and, owing to the presence of a great quantity of alkali in the soil, its foundation has been badly eaten away, and, as a consequence, the building has settled to such an extent that it is absolutely dangerous, and an appropriation of \$10,000, in addition to that recommended above for repairs, must be made at this time; for the building is likely to collapse and cause the loss of several lives.

MISCELLANEOUS

Funds should be asked sufficient to properly lay out, grade, and park the new lots, and to employ a landscape gardener for this purpose.

If the storeroom building, previously mentioned, is granted,

then the present storeroom in the basement of the recreation building should be fitted up as a clubroom for employes, with bowling-alleys, pool, billiard, and card-tables.

NEEDS

The Eighteenth General Assembly gave us an appropriation of \$40,000 for the purchase of a farm, but, owing to a lack of funds, it was not available, and, as a consequence, we are still without this much-needed improvement. For an intimate study of this subject we refer you to the superintendent's report. However, we wish to emphasize the fact that this farm has become an absolute necessity to the proper housing and care of the inmates of this institution. If the Nineteenth General Assembly will give us the money asked for in this report for the purchase and improvement of this farm, together with two cottages for one hundred patients each—one for males, the other for females—we have no hesitancy in saying that this institution will take care of all the insane in the state for the next two years.

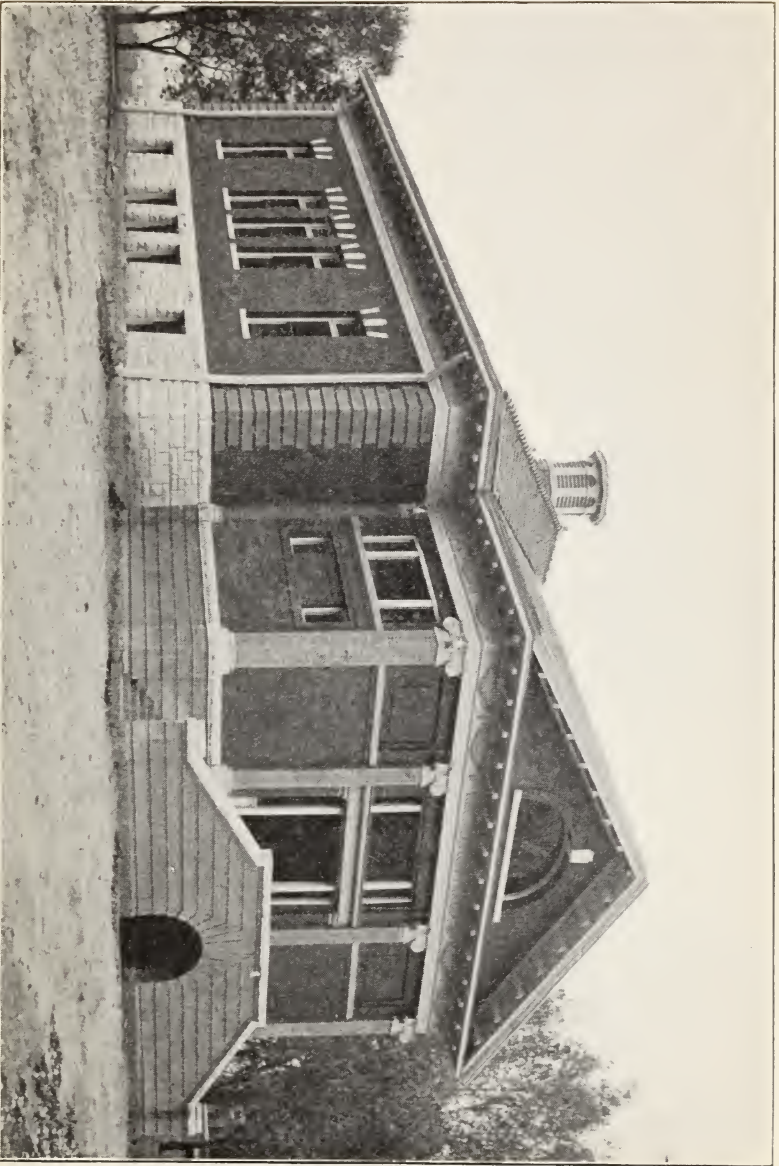

APPROPRIATIONS FOR THE INCOMING BIENNIAL PERIOD

For maintenance (this does not include the 1/5 mill levy.....)	\$250,000.00
One artesian well.....	5,000.00
Repairs (including old administration building).....	35,000.00
Farm and improvements thereon.....	65,000.00
Laundry and boiler plant.....	30,000.00
Storeroom	20,000.00
Kitchen	10,000.00
Laundry equipment	3,000.00
Two cottages	125,000.00
Tunnel	10,000.00
Library and amusements.....	1,500.00
Laboratory and Pathologist.....	5,000.00
New administration building.....	50,000.00
Furnishing two new cottages.....	10,000.00

In conclusion, we desire to express our appreciation of Dr. A. P. Busey, superintendent, as his unselfish devotion to the cause of the poor unfortunates committed to his care arouses the admiration of all thinking persons who come in contact with him.

We also wish to express our confidence in and esteem for Dr. H. A. La Moure, who was acting superintendent during Dr. Busey's absence.

It is also our desire to express our sincere appreciation of the earnest and kindly co-operation of His Excellency, Governor John F. Shafroth; the Attorney General, Hon. Benjamin Griffith; the Auditor, Hon. M. A. Leddy; and the Treasurer of the State, Hon. Roady Kenehan; and we thank them for their as-

RECREATION HALL.

sistance during the past two years in the management of the institution.

Republican governors have been elected in this state, and Democratic governors have served their time; but be it said to the honor of both, as well as to the credit of the state, that they have never allowed politicians to jeopardize the interests and welfare of the poor unfortunates of this institution by injecting politics into its management, and we hope no governor ever will be elected who will do so.

Respectfully submitted,

HON. A. T. STEWART,

President;

DR. LOUIS HOUGH,

Secretary;

J. W. FINKBINER, D.D.;

Board of Lunacy Commissioners.

SUPERINTENDENT'S REPORT

To the Board of Lunacy Commissioners of the Colorado Insane Asylum:

Gentlemen: It is a pleasure to submit for your consideration a report of the affairs of the State Insane Asylum for the biennial period ending November 30, 1912.

No new buildings have been erected during this period, but we have been able to accommodate all who have applied for admission, with the exception of Denver County, and a great many have been taken in from that county.

MOVEMENT OF POPULATION

There were remaining in the institution at the end of the last biennial period a total of 1,131—676 men and 455 women.

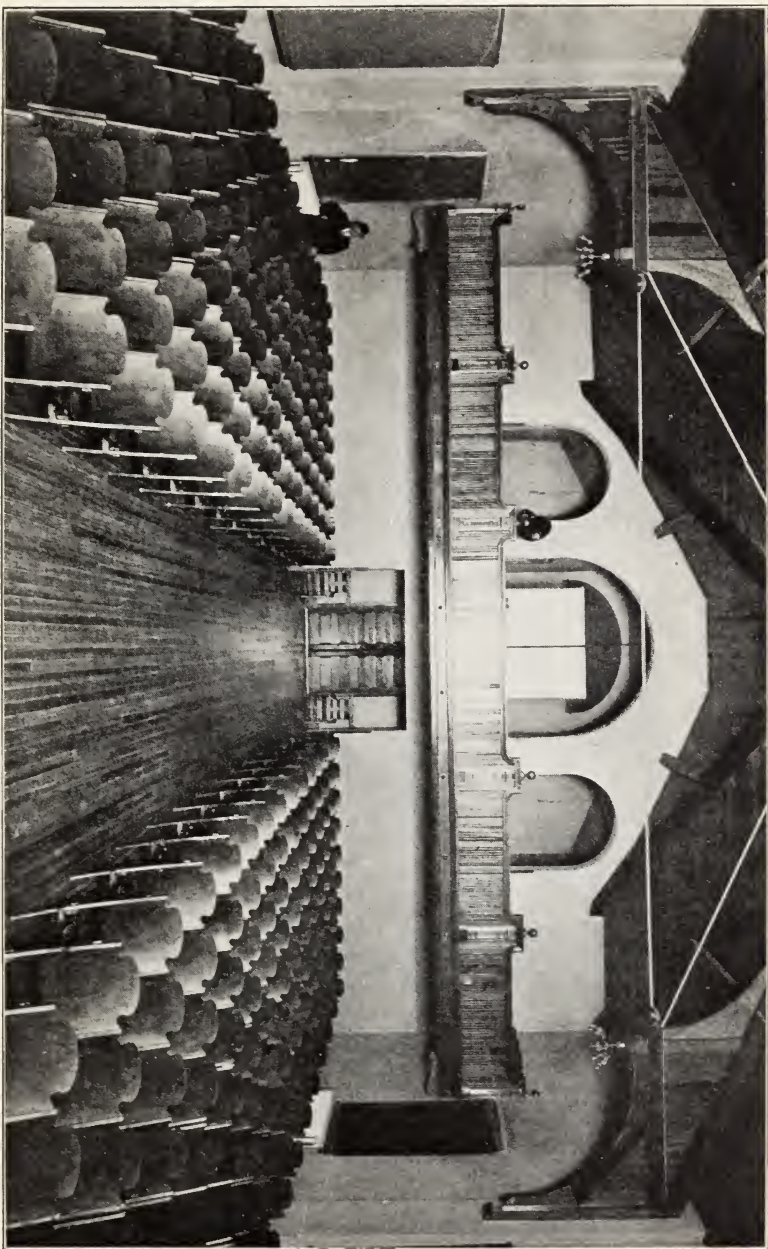

There have been admitted during the period: men, 251; women, 133; total, 384. Whole number under treatment, 1,515.

The discharges have been as follows: Recovered: 46 men, 28 women; total, 74. Improved: 32 men, 14 women; total, 46. Unimproved: 18 men, 3 women; total, 21. Died: 136 men, 65 women; total, 201. Not insane: 5 men, 3 women; total, 8. Leaving at the end of the period, November 30, 1912: 690 men, 475 women; total, 1,165.

There is a scarcity of room at the present time, as usual. At no time in the history of the institution has there been sufficient room to accommodate all the insane in the state; therefore, scarcity of room is not a new condition. The rapid development and settling-up of the state, as heretofore mentioned, has caused an influx of people that have brought their insane with them, and in this way crowded our institution to its full capacity; and more buildings will be required to accommodate the insane that will apply for admission during the next two years.

The health of the patients for the period has been good; very few cases of typhoid fever, and no epidemics of any kind. The death-rate for the period has been a little in excess of that of the previous period, due in a measure to the admission of a great many senile and paretic cases, and to transfers from other institutions when they were not physically able.

We have two hospital wards, of fifty beds each, which are constantly filled with bedridden subjects, none of whom can hope to recover, as most of them are cases of paresis, senile dementia, and other forms of hopeless mental troubles. These cases, however, have the very best of care in our hospital wards, nursed by experienced hospital nurses, and their lives are prolonged by careful nursing and good attention.

INTERIOR OF RECREATION HALL.

The tendency of many people of the present day and age seems to be to want to put into the asylum the old, decrepit members of their families, apparently in order to get rid of the care of them. Consequently, they are declared insane and committed. The number of this old, helpless class increases year by year, and many more of them are found in asylums than formerly. We have cases ranging in age from eighty to ninety, and, of course, death comes to all such in the course of a short time. This only adds to our death list, not one of these cases having any chance of improvement on account of his age.

Our recovery rate has been fully as good as we could expect, considering the hopeless class admitted. The great majority admitted are transferred from other institutions—poor-houses, jails, etc.—after their cases have become chronic. The recovery rate exceeds that of the preceding period, notwithstanding the class admitted.

We have to record two suicides during the period and one accidental death, the latter the result of an attack made on nurses by a homicidal inmate. A coroner's inquest was held, and a jury exonerated the nurses.

The number of escapes has been less than for the period preceding and far less than the average for a similar institution. Considering the amount of freedom we give our patients and the long hours they are in the open every day, it is surprising that we have so few escapes, and it is not an uncommon thing for a patient who has escaped voluntarily to return to the institution.

We continue to employ as many patients as possible in all industrial pursuits, such as working on the farm, in the garden, laundry, kitchens, lawn, carpenter-shop, dairy, stables, etc. The more work he does, so long as it is suitable, the better the patient feels. It is not only conducive to good health, but, if the patient is susceptible to restoration, labor brings about a rapid recovery. No curse is so great to the insane as idleness, and one of the most difficult and perplexing problems with which an institution meets is to know how best to do away with idleness or find employment for the large number cared for.

We continue to amuse our patients by weekly dances, moving pictures, phonographs on the wards, card games, dominoes, and other diversions. Divine services are held every Sunday afternoon, and Catholic early service once or twice a month for all Catholic patients who wish to attend. The choir music is usually very good, furnished from the city by the minister rendering the service.

The state fair withheld its usual courtesy this year and refused to grant our patients free admission, but many of the patients were sent anyway and seemed to enjoy the exhibits.

CRIMINAL INSANE

I have always mentioned this class of insane in my report, and wish to reiterate what I have before said, that it is very in-

jurious to the civil insane to be compelled to mingle with the criminal class, and this mingling should be avoided. The criminal class should be cared for in the penitentiary inclosure, in an especially constructed building for this class, where they could not escape and where the public would not be molested by them.

Beginning with the new year, we shall adopt the Kraeplin classification of the insane, which seems to be becoming more universally popular year after year in the different institutions throughout the country. Also, we will introduce the card-index and folder system of keeping records, and do away with the book system that we have used for so many years past, though in some respects the book system is desirable.

We will increase the number on the medical staff and add a dentist to the list, as the population is growing so large that a great deal of dental work is necessary to be done. We hope also to be able to employ a pathologist who will devote his time to important work in his line, as the field here now is very large for such work.

REPAIRS AND IMPROVEMENTS

A great deal of repair and improvement work has been done during the period covered by this report.

No new buildings have been erected, because no appropriation was made by the Eighteenth General Assembly for any.

Improvements have been made, such as changing the hot-water system throughout the entire property, by putting in a large hot-water tank at the boiler-house and laying a pipe line to the different buildings, connecting each with the hot-water tank, thus enabling us to draw hot water in any part of the property day or night. This tank is kept hot by the exhaust steam at the plant, and we are able to do away with the Tobey and all other heaters heretofore used. This arrangement will result in a great saving of fuel, besides being a great comfort and convenience to the entire property.

The boilers and boiler settings have been overhauled and made as good as new. The boiler-room floor was cemented throughout by a patent, and the work was first-class. A shower-bath was put into the engine-room for the benefit of the engineer and firemen.

Two dozen fire-extinguishers have been added to the number already in use. A fire wagon and harness, bought from the city of Pueblo, has been installed in our barn ready for use, should it ever be needed. New hose wherever needed, inside and out, has been bought and put in the place of the old, defective hose.

The carpenter made an extension to the chief engineer's workshop by putting in a new floor in an adjoining building. A very fine lathe has been installed in this shop, together with drills and other machinery—all of which is operated by electric motors—enabling the institution to have all its own work done without having to send it to a machine-shop in the city.

OLD ADMINISTRATION BUILDING

One additional steam washer was put into the laundry during the period.

A moving-picture machine has been installed, which was a gift from some unknown benefactor, and it has been a great source of pleasure to the patients. As many as six hundred patients in an afternoon have been able to attend the performance.

The cottage occupied by employes has been enlarged by removing the carpenter-shop to the warehouse and converting the space formerly used for the carpenter-shop into additional rooms. The same has been painted inside and out, adding to the appearance of the property.

A new dining-room for employes has been made upstairs over the kitchen, and is a great improvement over the old one in the basement, which was dark and gloomy.

The Eighteenth General Assembly appropriated \$35,000 for the purchase, grading, and fencing of eighty-eight lots lying east of Martin Street to San Francisco Street and from Eleventh to Fifteenth Street. I am glad to say these lots have been acquired by condemnation proceedings, and the institution is now in possession of the same. A stone fence has been erected along the east line of these lots, and a wire fence from each end of the stone fence west to our present line, thus inclosing the new ground. A landscape gardener and an engineer were employed to lay off and stake out the grounds for improvement. Grading of drives and walks has been done by contract let by the board, as far as the balance in the fund would admit; trees will be planted; grass and flowers will be grown, and in time the addition will be in keeping with the rest of the grounds, and will not only be very beautiful, but will add greatly to the usefulness of the grounds, as it will give us more room for exercise for the large number of patients we carry.

A toilet system in the basement of the men's building was torn out, and a system to take its place was built on the outside.

Repair work in all parts of the property that is usually carried on daily by the engineer, carpenter, and painter has been kept up, and the property of the state you will find in good condition—with the exception of the old administration building. It has a bad foundation, and for twenty years past it has been settling, until the building is badly cracked in places, and it will either have to be torn down and rebuilt, or the building will have to be underpinned and a new foundation put under it; otherwise in time it would become a wreck.

FARM AND GARDEN

The garden has been a source of profit to the institution and a benefit to the patients who have worked in it. A large quantity of all kinds of garden truck has been raised, and all used by the inmates. The yield of the variety of vegetables has been abundant, considering the limited space we allot to gardening.

RECOMMENDATIONS

I would suggest that the Nineteenth General Assembly be urged to appropriate money sufficient to underpin and build a new foundation under the present administration building, and to erect a new and larger administration building, commensurate with the increasing business of the institution. Our population has grown so large that the present set of offices in the old administration building is no longer adequate to carry on the work, and new quarters should be built. The board in its part of this report will furnish an estimate of the appropriation needed to erect a suitable building.

COTTAGES

Two more cottages—one for women and one for men—will be needed to accommodate 200 more insane during the coming two years. These cottages, together with the number that can be cared for at a farm we hope the legislature will give us, will make ample provision for all the insane in the state, and do away with any further feeling on the part of some localities that they are discriminated against, which has never been true at any time. Colorado has never yet furnished sufficient room at any one time to accommodate all of her insane, and the result has been a feeling of dissatisfaction about room from different counties throughout the state. So I am anxious to see ample and proper provision made for all the insane and to do away with this feeling, for which no one in particular is responsible. A farm of 200 acres would enable us to colonize the chronic harmless class there, and farm on an extensive scale, which would not only be profitable to the state, but would at the same time be conducive to the health and happiness of the patients. We could have a very large dairy, piggery, poultry yard, and varied industries, thus giving employment to a large body of patients, who would be happy in the work and would enjoy the freedom such a life would give them. The Eighteenth General Assembly appropriated \$40,000 for this farm, but, unfortunately for the institution, it was by enactment put into the fifth class, and, of course, was not available for lack of revenue. Therefore we received no farm. It is to be hoped this appropriation will be made again this winter and put into the second class, where it will be available, and that we shall be able to have a farm we have needed and been trying to obtain for so many years past.

COLD STORAGE AND ICE MACHINE

For many biennial periods past we have tried to obtain an appropriation for a plant for manufacturing our own ice and cold storage, but so far have nothing of the kind. We need about \$10,000 for this improvement.

INTERIOR OF MAIN OFFICE

BUILDING FOR STOREROOM, DINING-ROOM, AND QUARTERS FOR HELP

We have needed and asked for this building repeatedly, but never have had an appropriation for it. The sum of \$20,000 will be required to build it, as it should be fireproof.

ARTESIAN WELL

At least one artesian well should be had to furnish drinking-water for the patients, as they have had to drink unfiltered Arkansas River water for many years. This has caused more or less typhoid among them. An amount of \$5,000 would be required to sink this well.

NEW BOILER-HOUSE

If an appropriation of \$25,000 could be made for a new boiler plant, we could utilize the present boiler-house for an extension of our laundry, which is so badly needed. The laundry is overcrowded, and with an increase of population it will be utterly impossible to take care of the laundry work in our present building.

LIBRARY FUND

We should like to have \$1,500 again this period for library and amusements for the patients. This is quite essential for pleasure and diversion, and I hope it will be granted.

TUNNEL SYSTEM

A tunnel system underground, for the conveyance of steam pipes, electric cables, and large enough for food-car and other conveyances during bad weather, is something we need badly, and I hope to see \$10,000 allowed for the same.

REPAIR FUND

Ten thousand dollars should be appropriated to make all necessary repairs required on a property of this kind. Repair work is constantly required and absolutely necessary, to keep it in good condition, and the necessary work cannot be done for a less amount than \$10,000.

HYDROTHERAPEUTIC BUILDING AND EQUIPMENT

Fifteen thousand dollars is the least possible amount that would build and equip a suitable property for this purpose. It was granted last period, but was vetoed for lack of revenue.

We need a kitchen for the women's division of the institution, as we have never had a kitchen and have always cooked in the basement. Ten thousand dollars would be required for this building, which should be made fireproof and on the ground-floor level.

LABORATORY

We should have about \$5,000 for a laboratory equipment and employment of a pathologist. This property has grown to such an extent that this is an indispensable necessity, and I hope this appropriation will be granted.

OFFICIAL CHANGES

G. F. Patrick, who was appointed a member of the board in 1909, was removed in 1911, and Senator A. T. Stewart was appointed for the unexpired term.

Dr. W. W. Grant's term expired as a member of the board July, 1910, and, Dr. Grant refusing reappointment, Dr. Louis Hough was appointed.

Dr. W. H. Kuegle, assistant superintendent, resigned January, 1911, to accept an appointment in Nebraska. Dr. H. A. La Moure was appointed January 16, 1911, to take the place of assistant superintendent.

Dr. Lane resigned, on account of illness, after a brief service. She was succeeded by Dr. Pierson, who served only about a year. The vacancy thus caused has not yet been filled.

Dr. Gullick has been added to the staff.

J. R. Holt, steward, resigned July, 1912, and Ernest Weinhausen, who had formerly served so long and well as steward, was reappointed.

FINANCES

An itemized statement of all receipts and disbursements, appended to this report, sets forth a clear statement of the financial condition of the institution, which, I am glad to say, does not show a deficit, but, on the contrary, will show a balance to our credit sufficient to carry us through the month of December—the first month of the next biennial period.

You will observe that our per capita cost for the period averaged 40½ cents per day.

The legislature, when it convenes in January, should be requested to give us an emergency fund of \$50,000.00 out of the long

CHANGE OF NAME

I asked years ago in my report to have the name of the Colorado Insane Asylum changed to "State Hospital," for the benefit of the inmates. I hope to see this change made by the assembly. appropriation, to tide us over until such a time as it may be ready to make the long appropriation to carry us through the next two years.

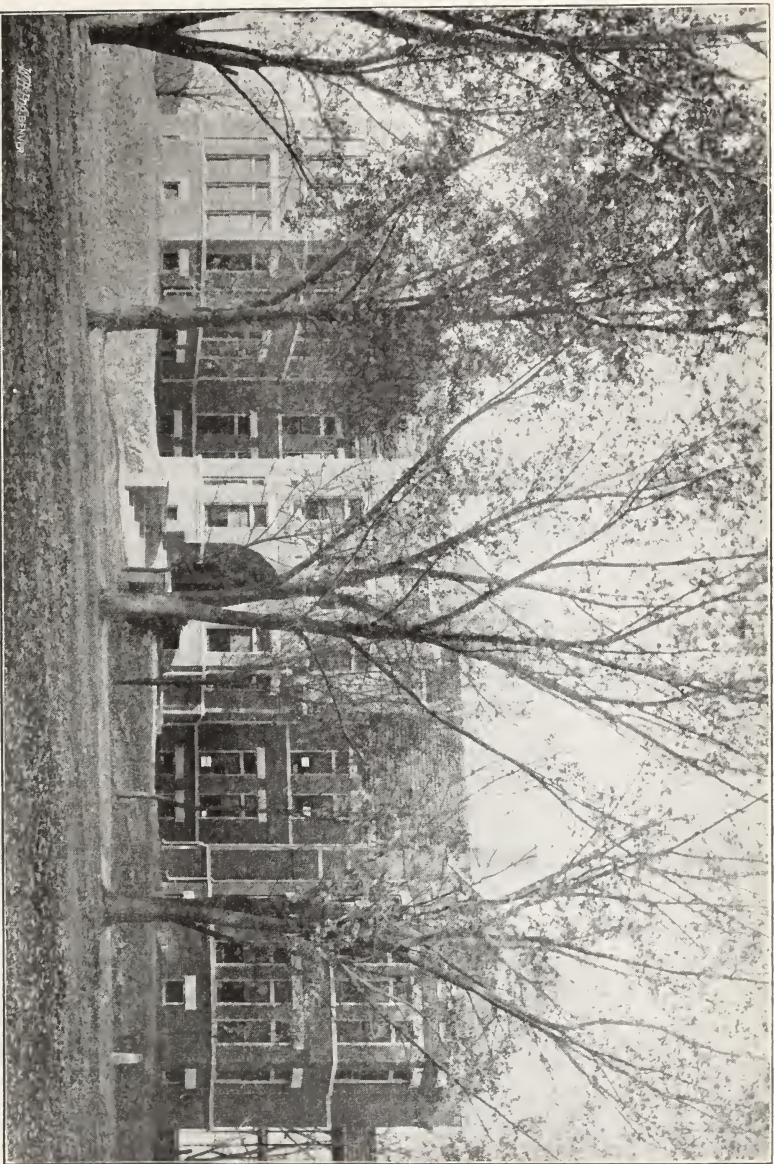

ACKNOWLEDGMENTS

Governor Shafroth visited us several times during the period covered by this report; likewise different members and the secretary of the Charity Board frequently visited and inspected the property and patients.

We are under obligations to Dr. Corwin for services from time to time, whenever we called upon him.

Literature of various kinds has been contributed from persons thoughtful and considerate of the unfortunates.

The contribution started several years ago by the late E. G. Stoiber has been kept up regularly year after year by Mrs. Stoiber

COTTAGE NO. 2

Rood; this consists of nearly all the leading magazines and mining journals, as follows:

Country Life in America, Collier's Weekly, Ladies' Home Journal, Black and White, Sketch and Illustrated London News, Harper's Monthly, Puck, Frank Leslie's Weekly, Field and Stream, Forest and Stream, American Art Studio, Scientific American, Mining and Engineering Journal, Mining and Scientific Press, Scribner's, Review of Reviews, Cosmopolitan, Century, McClure's, Popular Science Monthly, Atlantic Monthly, World's Work, Harper's Weekly, Forum, Strand, Lippincott's.

The public library continues to remember the institution by giving it cast-off books that are no longer useful to the library. We are always glad to get the donation.

I am under renewed obligation to all officers and employes who have been faithful to duty, and who have done the best they could to promote the welfare of the institution and the patients.

I thank the Board of Lunacy Commissioners for the confidence reposed in me, and for aiding me in conducting this institution to the interest of the state and the unfortunate people who inhabit it.

Respectfully submitted,

A. P. BUSEY, M. D.,
Medical Superintendent.

TABLE NO. I

SHOWING MOVEMENT OF POPULATION FOR THE BIENNIAL PERIOD
ENDING NOVEMBER 30, 1912.

	Men	Women	Total
Number of patients in the institution at date of last report	676	455	1,131
Admitted during the period.....	251	133	384
Whole number treated during the period.....	927	588	1,515

DISCHARGED DURING THE TERM AS FOLLOWS:

STEWARD'S REPORT

To DR. A. P. BUSEY,
Medical Superintendent,
Colorado Insane Asylum.

Dear Sir: Again it becomes my duty as steward of the Colorado Insane Asylum to hand you my report for the biennial period just closed.

Appended you will find a list of tables setting forth in detail the value of the state's property under your charge, the cost of the institution for the past two years, and how the money has been expended.

In conclusion, I wish to thank you for your kindly advice and valuable help extended to me at all times.

Respectfully submitted,

ERNEST WEINHAUSEN,
Steward.
