REPORT OF BOARD OF CORRECTIONS

Pueblo, Colorado, December 20, 1920.

To His Excellency,
 OLIVER H. SHOUP, *Governor*,
 Denver, Colorado.

Re: COLORADO STATE HOSPITAL

Sir:

The Colorado Board of Corrections herewith presents for your consideration the biennial report of the Colorado State Hospital for the period ending November 30, 1920, together with certain recommendations concerning the needs of the institution, and a few brief comments concerning its financial condition.

The Colorado State Hospital is in splendid condition, with the exception of being handicapped on account of the failure of the last General Assembly to give the institution the special appropriations asked for to provide the institution with necessities required to enable it to more completely render its inmates the service to which they are entitled.

Briefly, these and other appropriations now urged are as follows:

NURSES' HOME (to complete a partly erected building).....	\$100,000.00
TUBERCULOSIS HOSPITAL (to complete the building).....	20,000.00
TUNNEL (to be constructed to connect hospital with main line of buildings and present tunnels).....	8,000.00
ELECTRIC GENERATOR	15,000.00
NEW SWITCHBOARD (for use with the new generator).....	2,500.00
WATER SOFTENING PLANT.....	20,000.00
IMPROVEMENTS TO GROUNDS.....	15,000.00
REPAIRS AND IMPROVEMENTS.....	25,000.00
LIBRARY AND AMUSEMENTS.....	3,000.00
FURNITURE AND FURNISHINGS.....	10,000.00
BARNs AND HOG HOUSES.....	8,000.00
KITCHEN UTENSILS	5,000.00
ADDITIONAL MILCH COWS.....	10,000.00
AMUSEMENT HALL ENLARGEMENT.....	20,000.00
ADDITIONAL WATER SUPPLY FOR FARM.....	10,000.00

All of these appropriations have been thoroughly discussed. Their need is imperative, for the institution can only reach the high state of efficiency planned for it by the superintendent and the board when the aid asked for is granted.

The welfare of the patients is now being administered in a satisfactory manner, in so far as their care and treatment is concerned.

The board refers you to the report of the superintendent for a more detailed explanation of the needs of the institution, and in which the board unanimously concurs, and respectfully asks your favorable consideration and that of the General Assembly in connection with the appropriations asked for.

The board desires to commend the superintendent, Dr. H. A. La Moure, and the efficient organization under him, for the economical manner in which it is conducted and for the splendid services rendered the patients committed to the care of the institution.

The board desires to thank your excellency for the commendable interest you have at all times shown in the welfare of the patients and for the splendid co-operation you have given the board in all matters pertaining to the institution.

Respectfully submitted,

C. J. MOYNIHAN,
MRS. H. L. GRENFELL,
FRANK S. HOAG,
Colorado Board of Corrections.

REPORT OF SUPERINTENDENT

To the Colorado Board of Corrections:

I submit herewith a report of the conduct of the Colorado State Hospital for the biennial period ending November 30, 1920.

The following tables show the movement of population for this period:

1918-1919

	Men	Women	Total
Population December 1, 1918.....	994	747	1,741
Admitted	272	185	457
Total cared for.....	1,266	932	2,198
	Men	Women	
Discharged: Recovered	13	11	
Improved	6	8	
Unimproved	2	0	
Died	144	88	232
Remaining November 30, 1919.....	1,101	825	1,926

1919-1920

	Men	Women	Total
Population December 1, 1919.....	1,101	825	1,926
Admitted	261	190	451
Total cared for.....	1,362	1,015	2,377
	Men	Women	
Discharged: Recovered	22	39	
Improved	29	40	
Unimproved	17	6	
Not Insane.....	6	3	
Died	144	61	205
Remaining November 30, 1920.....	1,144	866	2,010

At the close of the last biennial period we were in the midst of the first epidemic of influenza. This epidemic continued during the months of December, 1918, and January, 1919, with a total of two hundred eighty cases, and thirty deaths, including four employes and twenty-six patients. The second epidemic of influenza, during the winter of 1919 and 1920, was very mild as compared to that of the preceding winter. In addition to the epidemics of influenza, we had, during each winter, a few cases of small pox, all mild in character but necessitating our keeping the institution under partial quarantine for a considerable portion of the biennial period.

During the period, three suicides have occurred. Two of these were accomplished by hanging, and the other patient jumped from a second-story window, receiving a fracture of the skull, from which he died. Another patient died as a result of a suicidal attempt made previous to his admission.

There are now cared for in this institution about three hundred cases of epilepsy and feeble-mindedness. While the majority of these cases are adults, still we have several children, even as young as seven years of age. These cases should rightfully be placed in the State Home and Training School for Mental Defectives, and as I understand that the branch of the latter institution, located at Grand Junction, is soon to be opened, I would suggest that some legislative action be taken that the cases here be given preference in line of admission to the Grand Junction institution. This would give us room for the admissions which will come during the next two years without undue crowding.

The appropriations made by the last Legislative Assembly for additions and improvements have been expended as follows:

A small farm of approximately seventy-two acres, and located two miles west of the institution, was purchased early in 1920, and recently an additional eleven acres, lying adjacent to this farm, were also purchased. Situated on this tract of land was one large brick house, which has been repaired and to which has been added a dining room and two bath rooms. The purchase of this land gives us an additional fifty acres of tillable soil and is the first step in procuring for the institution a sufficient tract of land to enable us to raise sufficient crops for the support of cows and other stock.

For the nurses home our request for \$125,000 was reduced to \$50,000. With this we have been able to erect only the center section. This home, in architecture and materials, corresponds to the buildings in the administrative group just south of which it is located. We expect to occupy this building within a very short time and will employ it for housing the female nurses. The building is three stories in height and contains two small suites, one for the superintendent of nurses, the other for the matron in charge of the home; a large sitting room and rooms to accommodate about fifty nurses by placing two in each room. There is a large bath and toilet on each floor and hot and cold water in each room.

The appropriation for the hospital for tuberculars was found to be too small to complete a building sufficiently large to accommodate this class. It was, therefore, felt to be best to start this building as contemplated and erect it as far as the funds would allow, with the hopes that the next Legislative Assembly will appropriate further funds for its completion. As a result, owing to the high prices of building materials, we have only been able to erect the shell of the building.

The same conditions pertained regarding the erection of the cow barn, the appropriation being too small to cover the cost of materials and erection both, and it was, therefore, expended for

the purchase of materials and equipment, and we hope to erect this barn within the coming year. This will be located at the farm recently purchased.

The appropriation for improvements to grounds was expended in completing the grading east of the administration building, putting in lawns in this section of the grounds, also setting out trees along the new roads and trimming the trees in the old section of the grounds, quite a number of which it was deemed advisable to remove, as they were so close together as to retard the growth of those near them.

The addition to the power house, for which \$10,000 was appropriated, has been erected almost entirely by patients' labor. Otherwise the funds would not have been sufficient to complete it. This will provide ample room for our electric plant, as well as storage for pipe and other accessories, an office for the chief engineer, and wash rooms for employees and patients who work about the power plant.

The appropriation of \$15,000 for boilers and dynamos was found to be insufficient to cover both items, and as additional boiler capacity was considered the most important, the funds were expended for this purpose, and a large Badenhausen water tube boiler, equipped with a Green chain grate stocker, was installed.

Through an error of the transcribing clerk, the item of \$25,000 for repairs and improvements, which was granted by the last Legislative Assembly, was omitted from the bill signed by the Governor, but was re-appropriated at the special session of the Legislature. At this special session we were also granted an appropriation of \$10,000 for the sinking of an artesian well in order to procure a supply of pure water for the institution. After having a survey made by an engineer it was discovered that the artesian water found in this locality would not be of sufficient quantity or of proper character for our uses. It was, therefore, decided that it was to the best interest of the state to refrain from expending this money and to allow the appropriation to lapse at the close of the period, with the hope that the same amount will be re-appropriated to develop a water supply for the farm.

The appropriation for furniture and furnishings, library and amusements, laundry and laundry machinery, and insurance, have all been expended for their respective purposes as the needs of the institution demanded.

RECOMMENDATIONS

Nurses' Home: An appropriation of \$100,000, based upon an architect's estimate, is needed for the completion of this building. I do not believe that the need of this appropriation requires any explanation. The center of this building, already erected, will accommodate less than one-half of our nurses by placing them two in a room. The contemplated wings are planned to accommodate:

one, the female nurses, and one, the male nurses, while the center is intended for married couples, the rooms here being somewhat larger than the rooms in the wings will be.

Hospital for Tuberculars: The sum of \$20,000 will be needed to fully complete and equip this building. The necessity of special accommodations for this class of people should be apparent to all, as, under existing conditions, it is impossible to segregate them as they should be. In order to place this building in use it will be necessary to construct a tunnel through which to convey the pipe lines for heating and carrying water. This tunnel would connect with the one now running from the boiler house to the male department. An appropriation of \$8,000 would be needed for the construction of this tunnel and the installation of the necessary pipe lines.

Electric Generator: The institution has practically doubled in size since any addition was made to the electrical plant. The present generators are running to capacity and should one or the other break down, we would be placed in a very serious position. An appropriation of \$15,000 is needed for the installation of a 150 KW unit. I consider that this item is absolutely necessary for the safety of the institution. In conjunction with this generator it will be necessary to install a new switch board, which will require an appropriation of \$2,500.

Water Softener: For the purchase and installation of an apparatus to soften the water for the boiler house and the laundry we will need the sum of \$20,000. This institution uses water delivered from the North Side Water Works of the city of Pueblo. The hardness of this water varies from seven grains during the summer months to twenty-two grains during the winter. The result is that the deposit of scale in our boilers and pipe lines is exceedingly detrimental to their efficiency. It is necessary to keep from one to two boilers out of commission constantly in order that the scale may be removed from the tubes, and some of our pipe lines have to be renewed about every five months. With a soft water, such as can be obtained by the use of this contemplated apparatus, the deposit of scale would be practically eliminated, resulting not only in a saving on the expense of replacing pipe lines and cleaning boiler tubes, but also in a very material increase in the efficiency of the boilers and a large decrease in the amount of coal consumed. In the laundry the use of soft water would effect a saving of approximately 75 per cent in the quantity of soap used, and 50 per cent in the life of the goods washed.

Improvements to Grounds: An appropriation of \$15,000 is requested for this purpose. This is to cover the completion of the parking of the grounds east of the administrative group and the installation of a new irrigation system throughout the greater portion of the grounds. Our present irrigation system has been in operation for from fifteen to twenty years. The pipe lines are

practically worn out, and for years have required almost constant repair work. The result has been that the water has been shut off many times when needed and our lawns and trees have not received the proper amount of irrigation.

Repairs and Improvements: We are requesting the same amount, namely, \$25,000, as was granted us for the last period. When it is considered that this fund covers all repairs needed in a property valued at one and a half million, and housing a class of people of rather destructive tendencies, I do not think that anyone could consider the amount asked for excessive.

Library and Amusements: For the past several biennial periods there has been furnished the sum of \$2,500 for the purpose of furnishing amusements for the patients and adding to our library. This year we are requesting the sum of \$3,000 for this purpose. The additional \$500 being to cover the increase in cost of music and all items which come under this head.

Furniture and Furnishings: For the purpose of furnishing the nurses' home, the hospital for tuberculars and the necessary beds and bedding for the probable increase in population, the sum of \$10,000 is asked.

Barns and Hog Houses: As has been stated before, we have on hand all the material for the erection of the cow barn. The appropriation of \$8,000 asked under this head, is for the purpose of erecting this barn and the purchase of what further material may be necessary for the hog houses and their erection also.

Kitchen Utensils: We are asking for an appropriation of \$5,000 for the purpose of replacing several of our steam kettles which have become worn beyond repair, and for the purchase and installation of more apparatus needed because of the increase in population.

Stock: It should be apparent to anyone that an institution of this character would naturally require a large amount of milk. Our present herd furnishes less than half the amount which we should use, necessitating the purchase, at a large expense, of either fresh milk or condensed. The appropriation of \$10,000 asked for is for the purpose of adding such cows to our herd that we may be able to supply the institution entirely with fresh milk.

Enlarging of Amusement Hall: On many occasions we have called the attention of the Legislature to the fact that the present amusement hall of this institution was entirely inadequate for its purpose. The population of this institution at the time of its erection was less than half of its present population. In order that the patients who appreciate the amusements provided, can enjoy them, we are forced to crowd the hall to a dangerous extent. An appropriation of \$20,000 should be made to increase the capacity of this building.

Water Supply for Farm: As mentioned previously, we hope that the Legislature will appropriate the sum of \$10,000 for the purpose of sinking wells, building a reservoir, putting in the necessary pumping equipment and pipe lines at the farm, in order that we may have an adequate water supply and fire protection for the buildings and stock located thereon.

CHANGES IN STAFF

Dr. Nelson H. Young resigned to accept another position. Dr. A. J. Dooner resigned his position as dentist and was succeeded by Dr. R. J. Clark. Miss Josephine Fortier, superintendent of nurses, returned from her work with Base Hospital No. 29 and has resumed her duties. Mrs. Maude L. Dascomb, dietitian, resigned, and the position has been filled by the appointment of Miss Grace B. Logan. Drs. Charles A. Swanson and Alta E. Bordner were appointed assistant physicians. Dr. Swanson resigned after a short service to accept a position in another state. Dr. A. L. Smiley was appointed assistant superintendent.

FINANCES

The Steward's report appended hereto, shows the income and expenditures of the biennial period. While this shows an apparent deficit of approximately \$9,000, still, in reality, we have no deficit. The apparent showing of one is due to the fact that during some months of the year, the income from the mill levy is very small, with the result that at times during the period a deficit appears which is wiped out during months when collections are larger. In May, 1919, the Board decided that it was only proper that the relatives of patients legally responsible for their support, and who were financially able to do so, be made to pay for the care and maintenance of their relatives who are inmates of this institution. This plan has been followed since that time and has enabled us to add to our income approximately \$2,000 per month.

OFFICIAL VISITORS

The institution has been visited by His Excellency, Governor Shoup, by Mr. C. A. Lemmers, Budget Commissioner, by Mrs. James Williams, President of the State Board of Charities and Corrections, by Mr. Victor E. Keyes, Attorney General, and by Mr. James R. Noland, Secretary of State.

In closing I wish to thank the members of the Board of Corrections for their continued interest in the institution and for their advice and assistance in carrying on our work. I also wish to express my appreciation of the work of all officers and employees connected with the institution.

Most respectfully yours,

H. A. LA MOURE,
Superintendent.

REPORT OF STEWARD

DR. H. A. LA MOURE,
Medical Superintendent,
Colorado State Hospital.

Sir:

In accordance with the rules of the Colorado State Hospital, I hand you herewith a report of the business department of this institution for the biennial period 1919-1920.

You will find appended a list of tables setting forth the value of the state's property, the financial condition of the institution, receipts and disbursements of all funds either collected from taxes, etc., or appropriated by the Twenty-second General Assembly, for the support and maintenance of the patients, as well as all other funds appropriated for special purposes. Also you will find a list of tables showing the income from the dairy, piggery, farm and the garden, and all work done in the sewing and linen rooms.

Respectfully submitted,

E. WEINHAUSEN,
Steward.

INVENTORY OF THE COLORADO STATE HOSPITAL
