REPORT OF BOARD OF CORRECTIONS

Pueblo, Colo., Dec. 20, 1922.

Re: COLORADO STATE HOSPITAL

To His Excellency,
OLIVER H. SHOUP, *Governor*,
Denver, Colorado.

Sir:

The Colorado Board of Corrections herewith presents for your consideration the biennial report of the Colorado State Hospital for the period ending November 30, 1922, together with certain recommendations concerning the needs of the institution; all of which are imperative and necessary. The Board urges the following appropriations:

For the addition of an eastern wing to the nurses' home.....	\$ 50,000
For the erection of a staff house.....	50,000
For new cottages to accommodate increased population.....	160,000
For enlargement of recreation hall.....	25,000
For repairs and improvements.....	35,000
For additional furniture and furnishing.....	20,000
For additional boiler and stoker.....	15,000
For new and additional laundry equipment.....	10,000
For repairing and extending the pipe line irrigation system and for additional parking	15,000
For improvements at the state farm.....	5,000
For the library and amusements.....	3,500
For insurance	25,000
For an institutional water supply.....	10,000

All the above needed appropriations have been thoroughly discussed by the Board and the head of this institution, and the hospital can only maintain its present record of efficiency and economy by doing the things which ought to be done at this time. The welfare of the patients is being administered to in a thoroughly satisfactory manner so far as their care and treatment is concerned, but the efforts of the officials are greatly handicapped by the lack of proper facilities and accommodations, which can be remedied, however, if the appropriations above are made. The Board refers you to the report of the superintendent for a more detailed explanation of the various needs of the institution, and respectfully asks your favorable consideration and that of the General Assembly in connection with the appropriations asked for.

The Board desires to commend the superintendent, Dr. H. A. La Moure, and the efficient organization under him, for the eco-

nomical manner in which this institution is conducted and for the splendid service rendered the patients committed to the care of this institution.

The Board also desires to thank your Excellency for the commendable interest you have always shown in the welfare of this institution and the hearty co-operation you have given the Board in all matters pertaining to it.

Respectfully submitted,

C. J. MOYNIHAN,

FRANK S. HOAG,

MRS. H. L. GRENFELL,

Colorado Board of Corrections.

REPORT OF SUPERINTENDENT

To the Colorado Board of Corrections:

I submit herewith a report of the conduct of the Colorado State Hospital for the biennial period ending November 30, 1922.

The following tables show the movement of population for this period:

1920-1921			
	Men	Women	Total
Population December 1, 1920.....	1,130	878	2,008
Admitted	287	193	480
Total cared for.....	1,417	1,071	2,488
	Men	Women	
Discharged: Recovered	15	24	
Improved	37	13	
Unimproved	24	3	
Died	128	90	
	204	130	334
Remaining November 30, 1921.....	1,213	941	2,154

1921-1922			
	Men	Women	Total
Population December 1, 1921.....	1,213	941	2,154
Admitted	275	167	442
Total cared for.....	1,488	1,108	2,596
	Men	Women	
Discharged: Recovered	22	46	
Improved	44	28	
Unimproved	48	3	
Died	121	66	
	235	143	378
Remaining November 30, 1922.....	1,253	965	2,218

In general the health of the patients has been very good. Sixty-two major operations have been performed by members of our consulting staff. A blood Wassermann is made of every case admitted. Fifty-nine cases of beginning paresis and cerebral spinal syphilis have been treated with neosalvarsan with marked improvement in over half the cases, some to the extent that it was possible to send them home in apparently normal mental condition.

I desire to call your attention to the overcrowded condition of this institution, our population now being two thousand two hundred eighteen patients, in addition to which approximately two hundred employes also reside on the grounds, which include less than one hundred twenty-five acres. It appears to me to be

imperative that radical steps be taken at this time either to obtain more property adjacent to the institution to enable us to expand, or that a second State Hospital be established. It is my opinion that the latter course would be the better owing to the fact that the only land lying adjacent to us is rather undesirable, is limited in amount and the cost would be excessive. Further, I feel that a majority of those who have had years of experience in this work will bear me out in saying that an institution of over two thousand is too large to be properly handled. It is also the consensus of opinion that the ratio of land to patient should be at least one-half acre to each inmate, and it would be utterly impossible to ever reach this average at Pueblo. I would suggest that if a new State Hospital is established, it be located in the northern part of the state and that a tract of land be obtained at once large enough to accommodate the future growth of such institution.

I would also recommend that legislation be enacted toward the enlargement of the State Home and Training School for Mental Defectives at Grand Junction and also to enable the transfer to this institution of the feeble minded and epileptic now inmates here. This would relieve us of between two to three hundred cases.

The disastrous flood which visited Pueblo June 3, 1921, did comparatively little damage to the institution proper other than to put us to many inconveniences. For several days we were without heat, lights and gas. The crops on the farm and garden were entirely destroyed. The garden has now been fully restored and the ground, if anything, is more productive than previous to the flood, owing to the deposit of silt after the water receded, but on the other hand, it will take from two to three years work to restore the farm so that it can be cultivated.

The special appropriations made by the last General Assembly were expended as follows:

The west wing of the Nurses' Home has been completed and occupied for almost one year.

The water softener has been installed and has proved to be one of the most valuable improvements ever made at the institution. Our boilers are now always in good shape as shown by the reports of the inspectors. The amount of coal used has been materially reduced and in our laundry, both the work produced and the decrease in the cost of running proves the advantage of the use of soft water.

The hospital for tubercular cases has also been completed and occupied for some time. This building has been connected with the main line of buildings by an underground tunnel for which appropriation was also made. The building is one story in height with center and two wings. The center contains sitting rooms, serving rooms and diet kitchen. The two wings are each an open ward with large sun porches. At the further extremity of each wing are three single rooms with bath and toilet, and this section can be entirely excluded from the rest of the building and in emergency be used for contagious cases.

The cow barn, for the erection of which appropriation was made, has been completed. This building is two hundred twenty-five feet in length, thirty-five feet in width with a small addition to the center for the handling of milk. It has stanchions for one hundred cows, also pens for two cows, one bull and six calves. All the equipment is of the most modern.

The appropriation for water supply for the farm has been expended in running a pipe line to connect with the city water system, the purchase of pipe for lines to the buildings and for cement and lumber for the building of a storage reservoir.

The appropriation for electric generator and switch board has given us an installation which furnishes us sufficient light and power for all our uses.

The appropriations for repairs, furniture and furnishings, kitchen utensils, improvements to grounds, library and amusements and insurance have all been expended for the purposes for which they were granted.

NEEDS OF THE COLORADO STATE HOSPITAL

Nurse's Home—east wing.....	\$ 50,000.00
Staff House	50,000.00
New Cottages	160,000.00
Recreation Hall—enlargement of	25,000.00
Repairs and Improvements.....	35,000.00
Furniture and Furnishings.....	20,000.00
Boiler and Stoker.....	15,000.00
Laundry Equipment	10,000.00
Irrigation System for lawns and additional parking.....	15,000.00
Improvements to Farm.....	5,000.00
Library and Amusements.....	3,500.00
Insurance	25,000.00
Water Supply	10,000.00

Nurses' Home: The east wing of this building for which an appropriation of fifty thousand dollars is requested should be built at once in order to complete the original plans. The center and west wing now in use accommodates only the married nurses and the single female nurses, while the single male nurses are still housed here and there on the different wards. The east wing should be built for the purpose of furnishing decent living quarters for the single male nurses.

Staff House for the Physicians: The need of this building should be apparent to any one acquainted with the institution. The accommodations for officers of this character are extremely poor, most of them occupying single rooms about eight by fourteen feet in size. It is almost imperative that we increase the size of our staff and it is impossible to do so unless further accommodations are provided as there is not at present a single room left in the institution which could be used for this purpose.

New Cottages: In case that my suggestion that a new institution be established should not be carried out, it would be absolutely necessary that at least two cottages to accommodate two hundred fifty patients be allowed us. Based on an architect's estimate, their erection will cost one hundred sixty thousand dollars.

Recreation Hall: For the last twelve years the Legislative Assembly has been appealed to for an appropriation for the enlargement of our recreation hall. The present building was erected when the population of the institution was about eight hundred. Two years from now our population will be three times this number and it should be apparent that the present building is absolutely inadequate and the majority of our patients are denied the privilege of enjoying the amusements afforded.

Repairs and Improvements: I wish to especially call attention to our request for thirty-five thousand dollars for ordinary repairs and improvements. Two years ago the sum of twenty thousand dollars was granted us. If you will refer to the report of the steward you will see that, not only was this expended, but for the same purposes there was also taken from the maintenance fund eighteen thousand sixty-one dollars and fifty-nine cents. It must be borne in mind that this is an immense property and that it is used by a class of people more or less destructive. It does not seem right that we should be compelled to divert nearly twenty thousand dollars from a fund intended to be expended entirely for the care of patients, to other purposes for which ample special appropriation should be made.

Furniture and Furnishings: This is to be expended for beds and bedding to meet our regular increase in population, also to furnish new cottages and the east wing of the nurses' home as well as to replace worn out and broken pieces.

Boiler and Stoker: If any additional buildings are erected it will be necessary to add one boiler and stoker as our present equipment would not be adequate.

Laundry Equipment: This is a very necessary request as a large part of our present machinery is not only badly worn out but of an obsolete type and it is almost impossible to get out the amount of work necessary with our present equipment.

Irrigation System for Lawns and Additional Parking: The appropriation made two years ago was entirely too small to either finish the parking contemplated or to renew our present irrigation system for the lawns. The portion of the grounds that still remains unparked lies almost immediately in front of the administration group and is seen by every one entering the grounds. We sincerely hope that we will be given sufficient funds to do away with this unsightly view. The irrigation system has been worn out for many years and only by constant and expensive repairs have we been able to preserve our lawns.

Improvements to Farm: This request is for the purpose of clearing off the rock, gravel and sand deposited by the flood waters, for rebuilding irrigation ditches and digging a drainage ditch in order that the land may be again put in shape to cultivate.

Library and Amusements: We are asking for an additional five hundred dollars above the amount received two years ago as this was found to be inadequate, it being necessary to expend the sum of five hundred twelve dollars from the maintenance fund for this purpose. It will be necessary to purchase a new moving picture machine as our present one, which has been in use for many years, is practically worn out.

Insurance: This is for the renewal of policies covering the entire property, all of which expire in March, 1923.

Water Supply: Up to the present time we have obtained all water used at the institution, except for the irrigation of our garden, from the North Side Water Works of the City of Pueblo. The cost of this water has become excessive, approximately almost ten thousand dollars per year. To ascertain if it were possible to obtain a suitable supply from any other source, an engineer was employed and a survey of the situation made by him. His report shows the feasibility of obtaining a sufficient supply from either dug or driven wells on our own grounds. While it may not prove to be possible to use this water for every purpose, the installation of our own system would in any event result in an immense saving. Another most important reason for installing this system at this time is the fact that by a recent decision of the State Supreme Court, the West Pueblo Ditch and Reservoir Company, from whose ditch water for our garden has been obtained, has been deprived of practically all its water rights so that we cannot place any dependence on this ditch for any water.

I would call your attention to the report of the steward as to the financial condition of the institution. This shows that we closed the period with a balance of thirteen thousand four hundred fifty-seven dollars and one cent. It also shows that the per capita cost per year was two hundred dollars and forty-five and one-half cents. I am sure that there are few institutions in the country with a lower per capita than this. To give you some idea of the difference between the per capita cost of this institution and that of other similar institutions throughout the United States, I would say that in 1920, during which year our per capita cost was two hundred twenty-three dollars and fifteen cents, the average per capita for seventy-two state hospitals was three hundred fifteen dollars and twenty-eight cents. These figures are taken from a table contained in a report of comparative statistics published by the National Committee for Mental Hygiene. I also have before me another table for the year of 1921 covering statistics from nineteen similar institutions for which period our per capita cost was two hundred twenty-one dollars and ninety-five cents and their average was two hundred ninety-seven dollars and twenty cents. While I feel that we can be justly proud of the work accomplished with the means at our disposal, still it would appear that this low per capita cannot but cast a reflection upon the state for its lack of proper care of its dependent insane. To attempt to put this institution on a par with those in other states would be absolutely impossible unless

further funds are supplied to enable us to do the work which we should be doing. The idea of attempting to keep the per capita cost as low as possible is an obsolete one. To quote from a report on the reorganization of state hospitals of Missouri, "The question has now become, how well, not how economically can they be treated." We are fully aware that we are not doing as much for our patients as we should but we are also aware that we cannot do any more unless our income is increased, and with this knowledge in mind, I would recommend that the mill levy be increased at least five one-hundredths of a mill.

Changes in Staff: Miss Grace B. Logan, dietitian, resigned and Miss Hattie E. Brooks was appointed in her place. Dr. Julian L. Rosenbloom has been recently added to the staff.

I wish to extend my sincerest appreciation to the members of our consulting staff who have ever been ready to answer calls for assistance. I wish to thank the members of the Board of Corrections for their ever-ready support, advice and co-operation in all matters pertaining to the institution and also all officers and employes for their loyalty and assistance.

Most respectfully yours,

H. A. LA MOURE,
Superintendent.

REPORT OF STEWARD

DR. H. A. LA MOURE,
Medical Superintendent,
Colorado State Hospital.

Sir:

In accordance with the rules of the Colorado State Hospital, I hand you herewith a report of the business department of this institution for the biennial period 1921-1922.

You will find appended a list of tables setting forth the value of the state's property, the financial condition of the institution, receipts and disbursements of all funds either collected from taxes, etc., or appropriated by the Twenty-third General Assembly, for the support and maintenance of the patients, as well as all other funds appropriated for special purposes. Also you will find a list of tables showing the income from the dairy, piggery, farm and the garden, and all work done in the sewing and linen rooms.

Respectfully submitted,

E. WEINHAUSEN,
Steward.

APPROXIMATE VALUE OF THE COLORADO STATE HOSPITAL AT THE CLOSE OF THE BIENNIAL PERIOD
