## Introduction

# Colorado Occupational Employment Statistics (OES)

May 2015

The Occupational Employment Statistics (OES) program is a Federal-State cooperative program that provides estimates of employment and hourly and annual wages for over 800 non-military detailed occupations in 22 major occupational groups. In Colorado, 3,863 businesses were initially surveyed beginning in November of 2015 and 3,815 were initially surveyed beginning in May of 2015. After adjustments, a total of 74.9% percent of 7,224 businesses provided information on the job titles and wages of their employees. These data were combined with responses from the previous two years (four biannual surveys) to produce the May 2015 occupational estimates contained in this document. A detailed description of methodological aspects of the OES program can be found in the Technical Notes and Methodology section beginning on page xx.

This section will briefly describe cross-industry occupational employment and wage dynamics in statewide Colorado and its sub-State areas. Tables and charts provide details of the cross-industry occupational statistics. Industry-specific employment and wage tables are also included.

## Highlights

- **The list of 20 top-earning occupations in Colorado continues to be dominated by health/medical-related occupations** while nearly half of the lowest-earning 20 occupations are in food preparation and serving.
- **Colorado's average hourly wage (\$24.60) is \$1.37 higher** than the national average (\$23.23).
- **The average hourly wage in 2015 was \$0.63 higher** than the average hourly wage in 2014 (\$23.97) and \$0.88 higher than the average hourly wage in 2013 (\$23.52).
- **There are more Coloradans working as retail salespersons** (81,470) than in any other occupation, accounting for 3.3 percent of total covered employment.
- The **health care and social assistance, retail trade, and accommodation and food services** industries employ the most people (811,510) among the 20 industry groups surveyed, accounting for over 33 percent of total employment.
- **Where you work matters:** The Boulder Metropolitan Statistical Area has the highest average (\$27.90) and median (\$21.33) wages in Colorado, while the Eastern and Southern Colorado Balance of State Area has the lowest average (\$18.02) and median (\$14.67) wages.

## Employment Distribution by Occupation

Total covered employment in Colorado was 2.451 million, increasing by 83,700 over May 2014. Table 1 and Figure 1 show the distribution of employment and list average hourly wages among major occupational groups. The top three major occupational groups (**office and administrative support, sales and related, and food preparation and serving-related**) account for 35.8 percent of total employment in the state. Major groups with average hourly wages below the overall average of \$24.60 comprise 69.0 percent of total employment.

## Occupational Employment Distribution in Colorado and the U.S.

The distribution of employment among major occupational groups in Colorado and the US is shown in figure 2. With the exception of **production** occupations, which account for 6.6 percent of occupational employment nationwide but for only 4.2 percent in Colorado, differences between the State

and the country as a whole were small. Colorado had higher proportions of employment in **computer and mathematical** (4.0 percent versus 2.9 percent nationwide), **construction and extraction** (5.3 percent versus 4.0 percent nationwide), and **business and financial operations** occupations (6.8 percent versus 5.1 percent nationwide) and a smaller share of **transportation and material moving** occupations (5.6 percent versus 6.9 percent nationwide). All other occupational groups differed by one percentage point or less.

**Figure 2. Employment Distribution in Major Occupational Groups, Colorado vs United States (May 2015)**

## Employment Distribution by Industry

As shown in table 2 and figure 3, five industries account for half of employment in Colorado, with more than 200,000 workers each: **health care and social assistance, retail trade, accommodation and food services, educational services,**

and **professional, scientific, and technical services.** On the other end of the scale, the six smallest industries are **arts, entertainment, and recreation; real estate and rental and leasing; management of companies and enterprises; mining; utilities;** and **agriculture, forestry, fishing, and hunting.** These employ less than 50,000 workers each and, when combined, account for 7.1 percent of total employment.

## Historical Employment and Wages

Total and major occupational group wages and employment from the 2005 through 2015 surveys are shown in tables 3, 4a, and 4b. Since the composition of the OES sample changes from year to year, these are properly interpreted as a series of snapshots of employment and wages over the years rather than as a time series. Tables 4c and 4d show major occupational groups ranked by net percentage change in employment and mean hourly wage in 2015 versus 2005. In order to better compare wage changes over time, an adjusted 2005 wage was calculated using the BLS Employment Cost Index (ECI) that is computed for the entire country and varies by industry and year (table 4e). The ECI employed in this analysis is a general national index (not geography- or goods-specific) and was created by the US Department of Labor.

### Historical Wage Growth

For unadjusted hourly wages in all occupations combined, 2015 shows an average wage 27 percent higher and a median wage 20 percent higher than the average and median seen in 2005 (table 3).

A comparison of changes in adjusted hourly mean wage by occupational group (table 4e) indicates that “real” wage increases of 3 percent or more occurred in the relatively higher-paying **management** (+\$4.77, +8.8 percent), **architecture and engineering** (+\$1.90, +4.7 percent), **legal** (+\$1.70, +3.6 percent), and **healthcare practitioners and technical** occupational groups (+\$1.22, +3.3 percent). **Food preparation and serving-related, computer and mathematical, and**

*\*Unadjusted historical data*

**farming, forestry, and fishing** occupations showed minimal gains (+\$0.09 to \$0.21, 0.7 to 1.9 percent).

The remaining 15 major occupational groups lost ground in adjusted wages with decreases ranging from -\$0.01/-0.1 percent (**transportation and material moving**) to -\$2.09/-8.0 percent (**arts, design, entertainment, sports, and media**).

## Historical Employment Gains and Losses

The 2015 Colorado OES estimates indicate an overall employment increase of 299,960 compared to the 2005 estimates. It is important to note that this increase was not a linear trend. Table 3 shows that total covered employment in Colorado rose from 2,151,520 in 2005 to 2,302,340 in 2008, decreased to 2,157,690 in 2010, and then recovered to an all-time high of 2,451,480 in 2015.

When comparing 2015 employment with that in 2005, the **business and financial operations** category showed the largest absolute employment increase of any group with a net gain of 59,170 (+55.0 percent), followed by **food preparation and serving-related** (+40,910, +21.0 percent) and **healthcare practitioners and technical**

occupations (+34,470, +35.9 percent) (table 4a). The largest percentage increase was seen for **business and financial operations** at +55.0 percent (+59,170) followed by **healthcare support** at +51.5 percent (+20,510). Only four occupational groups lost employment over the same period, with **office and administrative support** at 9,500 losses (-2.6 percent) followed by **production** with a loss of 790 jobs (-0.8 percent), **construction and extraction** (-460, -0.4 percent), and **farming, fishing, and forestry** (-90, -1.8 percent).

## Historical Wage and Employment Changes

There is no obvious relationship between overall wage changes and employment changes during 2005-2015. Occupational groups that increased salary over the time period were not necessarily

those with increases in employment. Comparison of adjusted wage and employment changes for all major occupational groups over the 10-year period yielded no relationship (correlation coefficient of -0.21).

Within major occupational groups, negative correlations between employment change and wage change were observed for **protective service** (-0.83), **personal care and service** (-0.75), **production** (-0.72), and **life, physical, and social science** (-0.71), and **sales and related** occupations (-0.58). Positive correlations were observed for **healthcare practitioners and technical** (0.75), **legal** (0.68), and **transportation and material moving** occupations (0.65) (tables 4a and 4b and historical figures 1-22).

## Top 20 Occupations by Employment

The group of 20 occupations that employ the largest number of workers is the same as that seen in previous years, with only some minor changes in ranking. **Cashiers, registered nurses, and laborers and freight, stock, and material movers, hand** each moved up one place to supplant **secretaries**

**and administrative assistants, customer service representatives, and sales representatives, wholesale and manufacturing, respectively. Office clerks, general** moved up three places to 10, while **cooks, restaurant** moved up two places to 16. **Software developers, applications** remained in 20th place.

## Bottom 20 Occupations by Wage

Among occupations with at least 1,000 workers statewide, those with the lowest average hourly wages are dominated by occupations in the food preparation and serving-related group: **dining room and cafeteria attendants, combined food preparation and serving workers, dishwashers, fast food cooks, waiters**

**and waitresses, and hosts and hostesses** are all found in the ten lowest-earning occupations. **Food preparation and serving related workers, all other** moved up six places to number 7 while **counter attendants** dropped nine places to number 17. **Parking lot attendants** and **packers and packagers, hand** dropped off the list and **food servers, nonrestaurant** and **cleaners of vehicles and equipment** entered at positions 19 and 20, respectively.

## Percentile Hourly Wages by Major Occupational and Industry Groups

Tables 8a and 8b and Figures 4a and 4b show percentile hourly wage distributions in occupational and industry groups. In addition to the professional occupational groups, **installation, maintenance, and repair; protective service; and construction and extraction** workers all had median wages higher than the overall median of \$18.65.

As expected, the **utilities** sector had the highest median wage among industry groups, followed by **management of companies and enterprises, information, and professional, scientific, and technical services**. Median wages were lower than the overall figure for workers in **accommodation and food services; retail trade; arts, entertainment, and recreation; agriculture, forestry, fishing, and hunting; administrative and support & waste management and remediation services; other services; and real estate and rental and leasing**.

May 2015 OES Data Estimating Area and Component Counties

# Colorado — Occupational Employment Statistics (OES) Regions

## Regional Employment and Wages

The Denver-Aurora Metropolitan Statistical Area (MSA), with more than five times the employment of any other region of the State, ranks second in terms of both average and median wages (table 9 and figure 5). The Boulder MSA, third largest in terms of employment, ranks first, while the Eastern and Southern Colorado Balance of State (BOS) Area, with the eighth-highest employment, ranks last in wages. Denver and Boulder both have average and median wages higher than the statewide average and median.

Part of the fallout from nationwide changes to MSAs in 2005, which were occasioned by the 2000 census, was that the Colorado BOS Area known as Central Colorado was reduced from seven to three counties (three of its original counties were appropriated by the Denver MSA and one by the Colorado Springs MSA). This meant fewer employment and wage estimates in that area due to its small size. In 2013, when states were given the opportunity to redesign their BOS areas, Colorado chose to re-combine counties into a more efficient configuration. Colorado now has three, rather than four, BOS areas: Eastern and Southern Colorado, Southwest Colorado, and Northwest Colorado. (Regional definitions can be found in the **Technical Notes and Methodology** section and on the map on page 18.)

\* OES does not collect information on whether an individual wage is entry or experienced level. The estimate of an "entry" wage is the mean of the lower one-third and the estimate of an "experienced" wage is the mean of the upper two-thirds of the wage distribution.

## Regional Employment and Wages in Major Occupational Groups

Tables 10a and 10b show employment and average hourly wages for the major occupational groups in each of the seven MSAs and four BOS areas.

The amount of variability in wages between regions is highest for occupations in the **management, legal, computer and mathematical, architecture and**

**engineering, and life, physical, and social science** groups. With some exceptions, these groups tend to have higher wages in the Boulder, Denver, and Colorado Springs MSAs and lower wages in the Grand Junction and Greeley MSAs and in the Eastern and Southern Colorado BOS area. Occupational groups showing relatively little variation by region include **food preparation and serving-related, building and grounds maintenance and cleaning, and construction and extraction.**

## Regional Employment Distribution in Major Occupational and Industry Groups

The top five occupational groups and industry sectors (by employment) for each MSA and BOS area are shown in figures 6a-k and 7a-k, respectively. Employment distribution and average hourly wages for major occupational and industry groups for each MSA and BOS area are shown in figures 8 through 18. Percentile wages for major industry groups in each region are included in tables 11 through 21.

The **office and administrative support, sales and related, and food preparation and serving-related** occupational groups were consistently included in the top five occupational groups for most areas. **Education, training, and library** and **construction and extraction** occupations also ranked relatively high in employment across multiple areas. Occupations that consistently have relatively few workers across most regions include **farming, fishing, and forestry; legal; community and social services; life, physical, and social sciences; and arts, design, entertainment, sports, and media.**

With regard to major industry sectors, **retail trade, health care and social assistance, educational services, and accommodation and food services** are consistently among the top five employers in most if not all Colorado regions. **Public administration** is a relatively more important employer in the three BOS areas than in the seven MSAs and is the largest industry in terms of employment in the Eastern and Southern Colorado and Southwest Colorado BOS areas, partly due to the presence of correctional facilities in these locations. The **manufacturing** industry is one of the top five employers in the Boulder, Fort Collins-Loveland, and Greeley MSAs.

Industries employing relatively few workers in most areas include **utilities, management of companies and enterprises, and agriculture, forestry, fishing, and hunting**. Industries for which employment is relatively more prominent (in the top ten) in just one or two areas include **mining** in the Grand Junction and Greeley MSAs and the Southwest Colorado BOS area and **real estate and rental and leasing** in the Northwest Colorado BOS area.

## Technical Notes and Methodology

### Scope of the survey

The Occupational Employment Statistics (OES) survey is a semiannual mail survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. OES data available from BLS include cross-industry occupational employment and wage estimates for the nation; over 650 areas, including states and the District of Columbia, metropolitan statistical areas (MSAs), metropolitan divisions, nonmetropolitan areas, and territories; national industry-specific estimates at the NAICS sector, 3-, 4-, and selected 5- and 6-digit industry levels; and national estimates by ownership across all industries and for schools and hospitals.

The OES survey is a cooperative effort between BLS and the State Workforce Agencies (SWAs). BLS funds the survey and provides the procedures and technical support, while the State Workforce Agencies collect most of the data. OES estimates are constructed from a sample of about 1.2 million establishments. Each year, forms are mailed to two semiannual panels of approximately 200,000 sampled establishments, one panel in May and the other in November. May 2015 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2015, November 2014, May 2014, November 2013, May 2013, and November 2012. The overall national response rate for the six panels is 73.5 percent based on establishments and 69.6 percent based on employment. The unweighted employment of sampled establishments across all six semiannual panels represents approximately 57.9 percent of total national employment. (Response rates are slightly lower for these estimates due to the Federal shutdown in October 2013.)

### The occupational coding system

The OES survey categorizes workers into 821 detailed occupations based on the Office of Management and Budget's 2010 Standard Occupational Classification (SOC) system. Together, these detailed occupations make up 22 of the 23 SOC major occupational groups. Major group 55, Military Specific Occupations, is not included. The major groups are as follows:

- Management occupations
- Business and financial operations occupations
- Computer and mathematical occupations
- Architecture and engineering occupations
- Life, physical, and social science occupations
- Community and social services occupations
- Legal occupations
- Education, training and library occupations
- Arts, design, entertainment, sports, and media occupations
- Healthcare practitioner and technical occupations
- Healthcare support occupations
- Protective service occupations
- Food preparation and serving related occupations
- Building and grounds cleaning and maintenance occupations
- Personal care and service occupations
- Sales and related occupations
- Office and administrative support occupations
- Farming, fishing, and forestry, occupations
- Construction, and extraction occupations
- Installation, maintenance, and repair occupations
- Production occupations
- Transportation and material moving occupations

- Military specific occupations (not surveyed in OES).

For more information about the SOC system, please see the BLS website at [www.bls.gov/soc/](http://www.bls.gov/soc/).

### The industry coding system

The May 2015 OES estimates are based on the 2012 North American Industry Classification System (NAICS). For more information about NAICS, see the BLS website at [www.bls.gov/bls/naics.htm](http://www.bls.gov/bls/naics.htm).

The OES survey excludes the majority of the agricultural sector, with the exception of logging (NAICS 113310), support activities for crop production (NAICS 1151), and support activities for animal production (NAICS 1152). Private households (NAICS 814) also are excluded. OES federal government data include the U.S. Postal Service and the federal executive branch only. All other industries, including state and local government, are covered by the survey.

The OES survey covers all full- and part-time wage and salary workers in nonfarm industries. The survey does not include the self-employed, owners and partners in unincorporated firms, household workers, or unpaid family workers.

## Survey sample

The OES survey draws its sample from state unemployment insurance (UI) files. Supplemental sources are used for rail transportation (NAICS 4821) and Guam because they do not report to the UI program. The OES survey sample is stratified by metropolitan and nonmetropolitan area, industry, and size.

To provide the most occupational coverage, larger employers are more likely to be selected than smaller employers. An annual census is taken of the executive branch of the federal government, the U.S. Postal Service, and state government.

## Concepts

Occupational employment is the estimate of total wage and salary employment in an occupation. The OES survey defines employment as the number of workers who can be classified as full- or part-time employees, including workers on paid vacations or other types of paid leave; workers on unpaid short-term absences; salaried officers, executives, and staff members of incorporated firms; employees temporarily assigned to other units; and employees for whom the reporting unit is their permanent duty station, regardless of whether that unit prepares their paycheck. The survey does not include the self-employed, owners and partners in unincorporated firms, household workers, or unpaid family workers.

Wages for the OES survey are straight-time, gross pay, exclusive of premium pay. Base rate; cost-of-living allowances; guaranteed pay; hazardous-duty pay; incentive pay, including commissions and production bonuses; and tips are included. Excluded are overtime pay, severance pay, shift differentials, nonproduction bonuses, employer cost for supplementary benefits, and tuition reimbursements.

OES receives wage rate data for the federal government, the U.S. Postal Service, and most state governments. For the remaining establishments, the OES survey collects wage data in 12 intervals.

The wage intervals used to collect data in May 2015, November 2014, May 2014, and November 2013 are as follows:

<i>Wage Intervals used for the May 2015 OES Survey</i>

For each occupation, respondents are asked to report the number of employees paid within specific wage intervals. The intervals are defined both as hourly rates and the corresponding annual rates, where the annual rate for an occupation is calculated by multiplying the hourly wage rate by a typical work year of 2,080 hours. The responding establishments are instructed to report the hourly rate for part-time workers, and to report annual rates for occupations that are typically paid at an annual rate but do not work 2,080 hours per year, such as teachers, pilots,

and flight attendants. Other workers, such as some entertainment workers, are paid hourly rates, but generally do not work 40 hours per week, year round. For these workers, only an hourly wage is reported.

### Estimation methodology

The OES survey is designed to produce estimates by combining six panels of data collected over a 3-year period. Each OES panel includes approximately 200,000 establishments. The full six-

panel sample of nearly 1.2 million establishments allows the production of estimates at detailed levels of geography, industry, and occupation.

**Wage updating.** Significant reductions in sampling errors are obtained by combining six panels of data, particularly for small geographic areas and occupations. Wages for the current panel need no adjustment. However, wages in the five previous panels need to be updated to the current panel's reference period.

The OES program uses the BLS Employment Cost Index (ECI) to adjust survey data from prior panels before combining them with the current panel's data. The wage updating procedure adjusts each detailed occupation's wage rate, as measured in the earlier panel, according to the average movement of its broader occupational division.

**Imputation.** About 25 percent of establishments do not respond for a given panel. A "nearest neighbor" hot deck imputation procedure is used to impute missing occupational employment totals. A variant of mean imputation is used to impute missing wage distributions. In some cases, data for current panel nonrespondents are available for earlier panels. In those cases, the older data may be used and aged to represent the current reference period.

**Weighting and benchmarking.** The sampled establishments are weighted to represent all establishments for the reference period. Weights are further adjusted by the ratio of employment totals (the average of November 2013 and May 2015 employment) from the BLS Quarterly Census of Employment and Wages to employment totals from the OES survey.

**Reliability of the estimates.** Estimates calculated from a sample survey are subject to two types of error: sampling and nonsampling. Sampling error occurs when estimates are calculated from a subset (that is, a sample) of the population instead of the full population. When a sample of the population is surveyed, there is a chance that the sample estimate of the characteristic of interest may differ from the population value of that characteristic. Differences between the sample estimate and the population value will vary depending on the sample selected. This variability can be estimated by calculating the standard error (SE) of the sample estimate. If we were to repeat the sampling and estimation process countless times using the same survey design, approximately 90 percent of the intervals created by adding and subtracting 1.645 SEs from the sample estimate would include the population value. These intervals are called 90-percent confidence intervals. The OES survey, however, usually uses the relative standard error (RSE) of a sample estimate instead of its SE to measure sampling error. RSE is defined as the SE of a sample estimate divided by the sample estimate itself. This statistic provides the user with a measure of the relative precision of the sample estimate. RSEs are calculated for both occupational employment and mean wage rate estimates. Occupational employment RSEs are calculated using a subsample, random group replication technique called the jackknife. Mean wage rate RSEs are calculated using a variance components model that accounts for both the observed and unobserved components of the wage data. The variances of the unobserved components are estimated using wage data from the BLS National Compensation Survey. In general, estimates based on many establishments have lower RSEs than estimates based on few establishments. If the distributional assumptions of the models are violated, the resulting confidence intervals may not reflect the prescribed level of confidence.

Nonsampling error occurs for a variety of reasons, none of which are directly connected to sampling. Examples of nonsampling error include: nonresponse, data incorrectly reported by the respondent, errors in the administrative data used to create the sampling frame, mistakes made in entering collected data into the database, and mistakes made in editing and processing the collected data. Every attempt is made to minimize nonsampling error through survey methods such as data editing, imputation methods, and benchmarking of data to current employment totals.

### Changes and special procedures for the May 2015 estimates

With the issuance of data for May 2015, the OES program has incorporated redefined metropolitan area definitions as designated by the Office of

Management and Budget. OES data are available for 394 metropolitan areas, 38 metropolitan divisions, and 167 OES-defined nonmetropolitan areas. A listing of the areas and their definitions can be found at [www.bls.gov/oes/current/msa\\_def.htm](http://www.bls.gov/oes/current/msa_def.htm).

The Quarterly Census of Employment and Wages program, from which the OES sample is drawn, has recently begun coding some establishments that were historically found in NAICS 814110 Private Households to NAICS 624120 Services for the Elderly and Persons with Disabilities. Private households are out of scope for OES, so this shift caused a scope increase for OES in NAICS 624120. Because this scope increase affected only the most recent (May 2015) of the six survey panels used to produce the May 2015 OES estimates, the units that shifted industries were removed from the survey data and not used in estimation.

## Definitions

### Covered Employment

Employment covered by state unemployment insurance laws or, for federal workers, covered by the Unemployment Compensation for Federal Employees program.

### Establishment

A business, usually at a particular physical location, that engages in one or more types of economic activity; for example, a factory, mine, store, or office. Generally a single establishment produces a single good or provides a single service. An enterprise (a private firm, government, or non-profit organization) could consist of a single

establishment or multiple establishments. A multi-establishment enterprise could have all its establishments in one industry (ie, a chain), or could have various establishments in different industries (ie, a conglomerate). Some establishments, such as construction firms, may have a small fixed base but perform the bulk of their economic activity at various jobsites.

### Occupation

A set of activities or tasks employees are paid to perform. Employees that perform essentially the same tasks are in the same occupation, whether or not they are in the same industry. Some occupations are concentrated in a few particular industries; other occupations are found in the majority of industries.
