Thanks to the staff members listed above for their hard work in collecting the data. A special thank you to all of the Colorado employers that provided data to us and whose participation made this program possible. OES and other LMI data are available free to all on our website www.colmigateway.com.

Introduction

Colorado Occupational Employment Statistics (OES)

May 2019

The Occupational Employment Statistics (OES) program is a Federal-State cooperative program that provides estimates of employment and hourly and annual wages for over 800 non-military detailed occupations in 22 major occupational groups. In Colorado, 3,638 businesses were initially surveyed beginning in November of 2018 and 3,628 were initially surveyed beginning in May of 2019. After excluding establishments that were out of business or out of scope, a total of 79.7 percent of 6,952 businesses provided information on the job titles and wages of their employees. These data were combined with responses from the previous two years (four biannual surveys) to produce the May 2019 occupational estimates contained in this document. A detailed description of methodological aspects of the OES program can be found in the **Technical Notes and Methodology** section beginning on page 77.

This section will briefly describe cross-industry occupational employment and wage dynamics in statewide Colorado and its sub-State areas. Tables and charts provide details of the cross-industry occupational statistics. Industry-specific employment and wage tables are also included.

Highlights

- **The list of 20 top-earning occupations in Colorado (Table 6) continues to be dominated by health/medical-related occupations**, while nearly half of the lowest-earning 20 occupations are in food preparation and serving-related (Table 7).
- **Colorado's average hourly wage (\$27.73) is \$2.01 higher** than the national average (\$25.72).
- **The average hourly wage in 2019 was \$0.89 higher** than the average hourly wage in 2018 (\$26.84) and \$1.74 higher than the average hourly wage in 2017 (\$25.99) (Table 3).
- **There are more Coloradans working as retail salespersons (82,750) than in any other occupation**, accounting for 3.0 percent of total covered employment (Table 5).
- The **health care and social assistance, accommodation and food services, and retail trade** industries employ the most people (890,940) among the 20 industry groups surveyed, accounting for 33.3 percent of total employment (Table 2).
- **Where you work matters:** The Boulder Metropolitan Statistical Area has the highest average (\$32.29) and median (\$24.77) wages in Colorado, while the Eastern and Southern Colorado Balance of State Area has the lowest average (\$20.50) and median (\$16.74) wages (Table 9).
- The occupation **atmospheric and space scientists** is nearly six times as prevalent in Colorado as it is in the US as a whole (Table 12a).

Employment Distribution by Occupation

Total covered employment in Colorado was 2.68 million, increasing by 57,850 over May 2018. Table 1 and Figure 1 show the distribution of employment and list average hourly wages among major occupational groups. The top three major groups (**office and administrative support, sales and related, and food preparation and serving related**) account for 32.5 percent of total employment in the state. Major groups with average hourly wages below the overall average of \$27.73 comprise 73.4 percent of total employment.

Table 1. Employment Distribution and Average Hourly Wage in Major Occupational Groups (Colorado, May 2019)

SOC Major Occupational Group	Average Hourly Wage	Employment	Percent of Total Employment
Total all occupations	\$27.73	2,678,490	100.0%
Office and administrative support	\$20.65	325,200	12.1%
Sales and related	\$24.35	287,130	10.7%
Food preparation and serving-related	\$13.81	259,440	9.7%
Business and financial operations	\$39.11	207,380	7.7%
Transportation and material moving	\$20.22	195,980	7.3%
Healthcare practitioners and technical	\$40.64	144,680	5.4%
Educational instruction and library	\$27.04	143,990	5.4%
Construction and extraction	\$24.76	143,530	5.4%
Computer and mathematical	\$47.23	123,040	4.6%
Management	\$64.75	118,210	4.4%
Production	\$20.38	105,080	3.9%
Installation, maintenance, and repair	\$25.21	104,660	3.9%
Healthcare support	\$16.42	95,560	3.6%
Building and grounds cleaning and maintenance	\$15.56	84,190	3.1%
Personal care and service	\$16.53	70,150	2.6%
Architecture and engineering	\$45.23	64,100	2.4%
Protective service	\$24.69	60,210	2.2%
Arts, design, entertainment, sports, and media	\$27.25	42,270	1.6%
Community and social services	\$24.96	40,810	1.5%
Life, physical, and social science	\$38.67	32,050	1.2%
Legal	\$56.93	23,830	0.9%
Farming, fishing, and forestry	\$16.10	7,010	0.3%

Figure 1. Employment Distribution and Average Hourly Wage in Major Occupational Groups (Colorado, May 2019)

Occupational Employment Distribution in Colorado and the US

The distribution of employment among major occupational groups in Colorado and the US is shown in Figure 2. With the exception of **production** occupations, which account for 6.2 percent of occupational employment nationwide but for only 4.0 percent in Colorado, differences between the State

and the country as a whole were small. Colorado had higher proportions of employment in **computer and mathematical** (4.7 percent versus 3.1 percent nationwide), **construction and extraction** (5.5 percent versus 4.2 percent), **business and financial operations** (7.9 percent versus 5.6 percent), and **sales and related** occupations (11.0 percent versus 9.8 percent) and a smaller share of **transportation and material moving** (7.5 percent versus 8.5 percent) and **management** occupations (4.5 percent versus 5.5 percent). All other occupational groups differed by less than one percentage point.

Figure 2. Employment Distribution in Major Occupational Groups, Colorado vs United States (May 2019)

Employment Distribution by Industry

As shown in Table 2 and Figure 3, five industries account for half of employment in Colorado, with more than 200,000 workers each: **health care and social assistance, accommodation and food services, retail trade, educational services, and professional, scientific, and technical services.** On the other end of the scale,

the six smallest industries are **arts, entertainment, and recreation; real estate and rental and leasing; management of companies and enterprises; mining; utilities; and agriculture, forestry, fishing, and hunting.** These employ less than 60,000 workers each and, when combined, account for 7.1 percent of total employment.

Figure 3. Employment Distribution and Average Hourly Wage in Major Industry Groups (Colorado, May 2019)

**Table 2. Employment Distribution and Average Hourly Wage
in Major Industry Groups (Colorado, May 2019)**

NAICS Sector	Average Hourly Wage	Employment	% of Total
Total all industries	\$27.73	2,678,490	100.0%
Health care and social assistance	\$27.97	335,570	12.5%
Accommodation and food services	\$14.35	279,500	10.4%
Retail trade	\$17.72	275,870	10.3%
Professional, scientific, and technical services	\$45.66	230,160	8.6%
Educational services	\$27.92	229,790	8.6%
Public administration	\$31.25	184,850	6.9%
Construction	\$27.81	176,880	6.6%
Administrative and support & waste management and remediation services	\$21.59	162,010	6.0%
Manufacturing	\$28.45	149,360	5.6%
Finance and insurance	\$35.43	112,230	4.2%
Wholesale trade	\$32.64	107,760	4.0%
Transportation and warehousing	\$26.10	93,310	3.5%
Other services (except public administration)	\$22.46	77,890	2.9%
Information	\$41.28	73,420	2.7%
Arts, entertainment, and recreation	\$19.90	54,210	2.0%
Real estate and rental and leasing	\$25.29	52,400	2.0%
Management of companies and enterprises	\$47.33	44,290	1.7%
Mining	\$37.24	28,490	1.1%
Utilities	\$42.11	7,200	0.3%
Agriculture, forestry, fishing and hunting	\$17.56	3,300	0.1%

Historical Employment and Wages

Total and major occupational group wages and employment from the 2009 through 2019 surveys are shown in Tables 3, 4a, and 4b. Since the composition of the OES sample changes from year to year, these are properly interpreted as a series of snapshots of employment and wages over the years rather than as a time series. Tables 4c and 4d show major occupational groups ranked by net percentage change in employment and mean hourly wage in 2019 versus 2009. In order to better compare wage changes over time, an adjusted 2009 wage was calculated using the BLS Employment Cost Index (ECI) that is computed for the entire country and varies by industry and year (Table 4e). The ECI employed in this analysis is a general national index (not geography- or goods-specific) and was created by the US Department of Labor.

Historical Wage Growth

For unadjusted hourly wages in all occupations combined, 2019 shows an average wage more than 25 percent higher and a median wage 22 percent higher than the average and median seen in 2009 (Table 3).

A comparison of changes in adjusted hourly mean wage by occupational group (Table 4e) indicates that “real” wage increases of 3 percent or more occurred in the relatively higher-paying **management** (4.05 percent) and **legal** (3.08 percent) occupational groups. **Personal care and service** (2.61 percent), **community and social service** (2.46 percent), **food preparation and serving related** (2.45 percent), **building and**

**Table 3. Employment and Hourly and Annual Wages,*
All Occupations (Colorado, 2009-2019)**

Year / Survey Panel	Total Employment	Average Hourly Wage	Median Hourly Wage	Average Annual Wage	Median Annual Wage
2009 May	2,234,250	\$22.11	\$17.44	\$45,993	\$36,267
2010 May	2,157,690	\$22.48	\$17.72	\$46,767	\$36,851
2011 May	2,179,060	\$22.85	\$17.82	\$47,522	\$37,068
2012 May	2,226,160	\$23.09	\$17.83	\$48,035	\$37,093
2013 May	2,295,000	\$23.52	\$18.04	\$48,923	\$37,521
2014 May	2,367,780	\$23.97	\$18.28	\$49,851	\$38,024
2015 May	2,451,480	\$24.60	\$18.65	\$51,177	\$38,801
2016 May	2,507,680	\$25.34	\$19.09	\$52,714	\$39,712
2017 May	2,555,300	\$25.99	\$19.65	\$54,049	\$40,879
2018 May	2,620,640	\$26.84	\$20.34	\$55,818	\$42,307
2019 May	2,678,490	\$27.73	\$21.28	\$57,686	\$44,254

**Unadjusted historical data*

grounds cleaning and maintenance (1.77 percent), and **farming, fishing, and forestry** occupations (1.26 percent) experienced modest increases.

The remaining 15 major occupational groups lost ground in adjusted wages with decreases ranging from 0.37 percent (**sales and related**) to 9.63 percent (**healthcare support**).

Table 4a. Employment in Major Occupational Groups (Colorado, 2009-2019)

*Wages adjusted using national Employment Cost Index (ECI) factors.

Historical Employment Gains and Losses

The 2019 Colorado OES estimates indicate an overall employment increase of 444,240 compared to the 2009 estimates. This increase was not linear; table 3 shows that total covered employment in Colorado decreased from 2,234,250 in 2009 to 2,157,690 in 2010 before increasing to an all-time high of 2,678,490 in 2019.

When comparing 2019 employment with that in 2009, the **business and financial operations** category showed the largest absolute employment increase of any group with a net gain of 75,740 (+57.5 percent), followed by **transportation and material moving** (+71,340, +57.2 percent), **food preparation and serving related** (+52,660, +25.5 percent), and **healthcare support** occupations (+45,710, +91.7 percent) (table 4a).

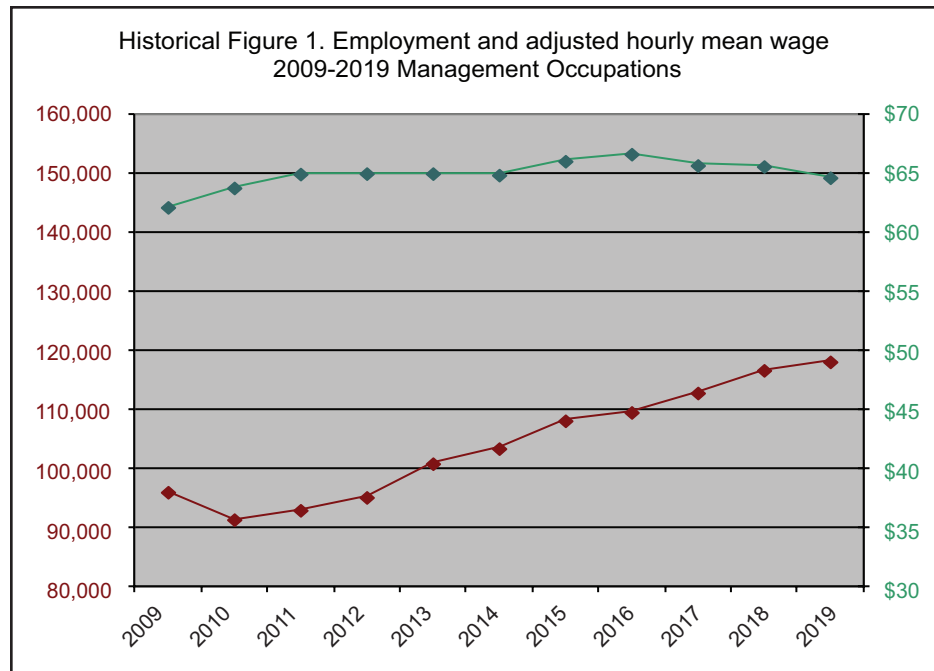

The largest percentage increase was seen for **farming, fishing, and forestry** occupations at 118.4 percent (+3,800), followed by **healthcare support, business and financial operations, and transportation and material moving** occupations. Only one occupational group lost employment over the same period: **office and administrative support** (-43,420, -11.8 percent).

Historical Wage and Employment Changes

There is no obvious relationship between overall wage changes and employment changes during 2009-2019. Comparison of adjusted wage and employment changes for all major occupational groups over the 10-year period yielded no relationship (correlation coefficient of -0.20).

Within major occupational groups, negative correlations between employment change and wage change were observed for **protective service** (-0.90); **educational instruction and library** (-0.89); **production** (-0.88); **business and financial operations** (-0.87); **life, physical, and social science** (-0.82); **installation, maintenance, and repair** (-0.72); **transportation and material moving** (-0.56); and **architecture and engineering** (-0.52) (tables 4a and 4b and historical figures 1-22). **Building and grounds cleaning and maintenance** (+0.67), **food preparation and serving related** (+0.60), and **management** occupations (+0.53) showed positive correlations between employment and wage changes.

Historical wage and employment changes by SOC major group are shown in Historical Figures 1-22.

Top 20 Occupations by Employment

The group of 20 occupations that employ the largest number of workers is similar to that seen in previous years, with some minor changes in ranking.

The largest change was seen for **software developers** which jumped up seven places from number 15 to number 8. **Personal care aides** dropped off the top 20 this year to make way for **elementary school teachers, except special education**.

Bottom 20 Occupations by Wage

Among occupations with at least 500 workers statewide, those with the lowest average hourly wages are dominated by occupations in the food preparation and serving related group: **dining room and cafeteria attendants and bartender**

helpers, dishwashers, fast food cooks, fast food and counter workers, and food preparation and serving related workers, all other are all among the ten lowest-earning occupations.

Table 7. Bottom 20 Occupations by Wage (Colorado, May 2019)*

Percentile Hourly Wages by Major Occupational and Industry Groups

Table 8a and Figure 4a show percentile hourly wage distributions in occupational groups; Table 8b and Figure 4b show percentile hourly wage distributions in industry groups. In addition to the professional occupational groups, **construction and extraction** and **installation, maintenance, and**

repair workers also had median wages higher than the overall median of \$21.28.

As expected, the **utilities** sector had the highest median wage among industry groups, followed by **management of companies and enterprises; professional, scientific, and technical services; information; and mining.**

Regional Employment and Wages

The Denver-Aurora-Lakewood Metropolitan Statistical Area (MSA), with more than five times the employment of any other region of the State, ranks second in terms of both average and median wages (Table 9 and Figure 5).

The Boulder MSA, third largest in terms of employment, ranks first, while the Eastern and Southern Colorado Balance of State (BOS) Area, with the third-lowest employment, ranks last in wages. Denver and Boulder both have average and median wages higher than the statewide average and median.

* OES does not collect information on whether an individual wage is entry or experienced level. The estimate of an "entry" wage is the mean of the lower one-third and the estimate of an "experienced" wage is the mean of the upper two-thirds of the wage distribution.

Regional Employment and Wages in Major Occupational Groups

Tables 10a and 10b show employment and average hourly wages for the major occupational groups in each of the seven MSAs and three BOS areas.

The amount of variability in wages between regions is highest for occupations in the **management, legal, and computer and mathematical**

groups. With some exceptions, these groups tend to have higher wages in the Boulder, Denver, and Colorado Springs MSAs and lower wages in the Pueblo MSA and in the Eastern and Southern Colorado and Southwest Colorado BOS areas. Occupational groups showing relatively little variation by region include **construction and extraction, healthcare support, food preparation and serving related, and building and grounds maintenance and cleaning.**

Regional Employment Distribution in Major Occupational and Industry Groups

The top five occupational groups and industry sectors (by employment) for each MSA and BOS area are shown in Figures 6a-j and 7a-j, respectively. Employment distribution and average hourly wages for major occupational and industry groups for each MSA and BOS area are shown in Figures 8 through 17. Percentile wages for major industry groups in each region are included in Tables 13 through 22.

The **office and administrative support, sales and related, and food preparation and serving related** occupational groups were consistently included in the top five occupational groups for almost all areas. Occupational groups also ranking in the top five across multiple areas included **construction and extraction, business and financial operations, healthcare practitioners and technical, and educational instruction and library**. Groups that consistently have relatively lower employment across most regions include **farming, fishing, and forestry; legal; community and social services; life, physical, and social sciences; and arts, design, entertainment, sports, and media** occupations.

Top 5 Occupational Groups, 2019

With regard to major industry sectors, **retail trade**, **health care and social assistance**, **educational services**, and **accommodation and food services** are consistently among the top five employers in most if not all Colorado regions. **Public administration** is a relatively more important employer in the three BOS areas and the Pueblo and Grand Junction MSAs and is the largest or second-largest industry in terms of employment in the Eastern and Southern Colorado and Southwest Colorado BOS areas, partly due to the presence of correctional facilities in these locations. The **manufacturing** industry is one of the top five employers in the Boulder, Fort Collins-Loveland, and Greeley MSAs.

Industries employing relatively fewer workers in most areas include **utilities**, **management of companies and enterprises**, and **agriculture, forestry, fishing, and hunting**. Industries for which employment is relatively more prominent (in the top ten) in just one or two areas include **mining** in the Greeley MSA and **construction** in the Greeley MSA and Northwest Colorado BOS area.

State and Regional Location Quotients (LQs)

Location quotients in OES describe the concentration of an occupation in a specific area relative to the nation as a whole. Reflecting the importance of the extraction industry and the presence of national atmospheric and environmental laboratories, the State of Colorado has higher than expected concentrations of mining occupations (**mining and geological engineers, hydrologists, cartographers and photogrammetrists, geoscientists, wellhead pumpers,**

service unit operators, roustabouts, and petroleum engineers) in addition to **atmospheric and space scientists, conservation scientists, physicists, environmental scientists and specialists, and aerospace engineers** (location quotients ranging from 1.57 to 5.72).

The ten occupations with the highest location quotients statewide and in each region are shown in tables 12a and 12b. Location quotients for detailed occupations are included in tables 23-33.

Table 12a. Statewide Location Quotients (Colorado, May 2019)

Area	SOC CODE	SOC TITLE	EMPLOYMENT	LQ
Colorado	19-2021	Atmospheric and space scientists	970	5.72

Technical Notes and Methodology

May 2019 OES Estimates

Scope of the survey

The Occupational Employment Statistics (OES) survey is a semiannual survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in the United States. OES data available from BLS include cross-industry occupational employment and wage estimates for the nation; over 580 areas, including states and the District of Columbia, metropolitan statistical areas (MSAs), nonmetropolitan areas, and territories; national industry-specific estimates at the NAICS sector, 3-digit, most 4-digit, and selected 5- and 6-digit industry levels; and national estimates by ownership across all industries and for schools and hospitals.

The OES survey is a cooperative effort between BLS and the State Workforce Agencies (SWAs). BLS funds the survey and provides the procedures and technical support, while the State Workforce Agencies collect most of the data. OES estimates are constructed from a sample of about 1.1 million establishments. Each year, two semiannual panels of approximately 180,000 to 200,000 sampled establishments are contacted, one panel in May and the other in November. Responses are obtained by mail, Internet or other electronic means, email, telephone, or personal visit. The May 2019 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2019, November 2018, May 2018, November 2017, May 2017, and November 2016. The unweighted sampled employment of 83 million across all six semiannual panels represents approximately 57 percent of total national

employment. The overall national response rate for the six panels, based on the 50 states and the District of Columbia, is 71 percent based on establishments and 68 percent based on weighted sampled employment.

The occupational coding system

The May 2019 OES estimates contain nearly 800 occupational categories based on the Office of Management and Budget's Standard Occupational Classification (SOC) system. Together, these occupations make up 22 of the 23 SOC major occupational groups. Major group 55, Military Specific Occupations, is not included. The major groups are as follows:

- Management occupations
- Business and financial operations occupations
- Computer and mathematical occupations
- Architecture and engineering occupations
- Life, physical, and social science occupations
- Community and social services occupations
- Legal occupations
- Educational instruction and library occupations
- Arts, design, entertainment, sports, and media occupations
- Healthcare practitioner and technical occupations
- Healthcare support occupations
- Protective service occupations
- Food preparation and serving related occupations
- Building and grounds cleaning and maintenance occupations

- Personal care and service occupations
- Sales and related occupations
- Office and administrative support occupations
- Farming, fishing, and forestry, occupations
- Construction, and extraction occupations
- Installation, maintenance, and repair occupations
- Production occupations
- Transportation and material moving occupations
- Military specific occupations (not surveyed in OES).

For more information about the SOC system, please see the BLS website at www.bls.gov/soc/.

The industry coding system

The May 2019 OES estimates use the 2017 North American Industry Classification System (NAICS). For more information about NAICS, see the BLS website at www.bls.gov/bls/naics.htm.

The OES survey excludes the majority of the agricultural sector, with the exception of logging (NAICS 113310), support activities for crop production (NAICS 1151), and support activities for animal production (NAICS 1152). Private households (NAICS 814) also are excluded. OES federal government data include the US Postal Service and the federal executive branch only. All other industries, including state and local government, are covered by the survey.

Survey sample

The OES survey draws its sample from state unemployment insurance (UI) files. Supplemental sources are used for rail transportation (NAICS 4821) and Guam because they do not report to the UI program. The OES survey sample is stratified by metropolitan and nonmetropolitan area, industry, and size.

To provide the most occupational coverage, larger employers are more likely to be selected than smaller employers. A census is taken of the executive branch of the federal government, the US Postal Service, and state government.

Concepts

Occupational employment is the estimate of total wage and salary employment in an occupation. The OES survey defines employment as the number of workers who can be classified as full- or part-time employees, including workers on paid vacations or other types of paid leave; workers on unpaid short-term absences; salaried officers, executives, and staff members of incorporated firms; employees temporarily assigned to other units; and employees for whom the reporting unit is their permanent duty station, regardless of whether that unit prepares their paycheck. The survey does not include the self-employed, owners and partners in unincorporated firms, household workers, or unpaid family workers.

Wages for the OES survey are straight-time, gross pay, exclusive of premium pay. Base rate; cost-of-living allowances; guaranteed pay; hazardous-duty pay; incentive pay, including commissions and production bonuses; and tips are included. Excluded are overtime pay, severance pay, shift differentials, nonproduction bonuses, employer cost for supplementary benefits, and tuition reimbursements.

OES receives wage rate data for the federal government, the US Postal Service, and most state governments. For the remaining establishments, the OES survey data are placed into 12 intervals. The intervals are defined both as hourly rates and the corresponding annual rates, where the annual

rate for an occupation is calculated by multiplying the hourly wage rate by a typical work year of 2,080 hours. The responding establishments are instructed to report the hourly rate for part-time workers, and to report annual rates for occupations that are typically paid at an annual rate but do not work 2,080 hours per year, such as teachers, pilots, and flight attendants. Other workers, such as some entertainment workers, are paid hourly rates, but generally do not work 40 hours per week, year round. For these workers, only an hourly wage is reported.

The 12 wage intervals used to collect data are as follows:

<i>Wage Intervals used for the May 2019 OES Survey</i>		
Interval	Hourly Wages	Annual Wages
Range A	Under \$9.25	Under \$19,240
Range B	\$9.25 to \$11.74	\$19,240 to \$24,439
Range C	\$11.75 to \$14.74	\$24,440 to \$30,679
Range D	\$14.75 to \$18.74	\$30,680 to \$38,999
Range E	\$18.75 to \$23.99	\$39,000 to \$49,919
Range F	\$24.00 to \$30.24	\$49,920 to \$62,919
Range G	\$30.25 to \$38.49	\$62,920 to \$80,079
Range H	\$38.50 to \$48.99	\$80,080 to \$101,919
Range I	\$49.00 to \$61.99	\$101,920 to \$128,959
Range J	\$62.00 to \$78.74	\$128,960 to \$163,799
Range K	\$78.75 to \$99.99	\$163,800 to \$207,999
Range L	\$100.00 and over	\$208,000 and over

Estimation methodology

The OES survey is designed to produce estimates by combining six panels of data collected over a 3-year period. Each OES panel includes approximately 180,000 to 200,000 establishments. Recent OES survey panels have a reduced sample; see the “Changes to the May 2019 estimates” section below for more information. The full six-panel sample of nearly 1.1 million establishments allows the production of estimates at detailed levels of geography, industry, and occupation.

Wage updating. Significant reductions in sampling errors are obtained by combining six panels of data, particularly for small geographic areas and occupations. Wages for the current panel need no adjustment. However, wages in the five previous panels need to be updated to the current panel’s reference period.

The OES program uses the BLS Employment Cost Index (ECI) to adjust survey data from prior panels before combining them with the current panel’s data. The wage updating procedure adjusts each detailed occupation’s wage rate, as measured in the earlier panel, according to the average movement of its broader occupational division.

Imputation. Some establishments do not respond for a given panel. For most employers, a “nearest neighbor” hot deck imputation procedure is used to impute missing occupational employment totals. A variant of mean imputation

is used to impute missing wage distributions. In some cases, data for nonrespondents are available for earlier panels. In those cases, the older data may be used and aged to represent the current reference period.

Weighting and benchmarking. The sampled establishments are weighted to represent all establishments for the reference period. Weights are further adjusted by the ratio of employment totals (the average of November 2018 and May 2019 employment) from the BLS Quarterly Census of Employment and Wages to employment totals from the OES survey.

Reliability of the estimates. Estimates developed from a sample will differ from the results of a census. An estimate based on a sample survey is subject to two types of error: sampling and nonsampling error. An estimate based on a census is subject only to nonsampling error.

Nonsampling error. This type of error is attributable to several causes, such as errors in the sampling frame; an inability to obtain information for all establishments in the sample; differences in respondents’ interpretation of a survey question; an inability or unwillingness of the respondents to provide correct information; errors made in recording, coding, or processing the data; and errors made in imputing values for missing data. Explicit measures of the effects of nonsampling error are not available.

Sampling error. When a sample, rather than an entire population, is surveyed, estimates differ from the true population values that they represent. This difference, the sampling error, occurs by chance and its variability is measured by the variance of the estimate or the standard error of the estimate (square root of the variance). The relative standard error is the ratio of the standard error to the estimate itself.

Estimates of the sampling error for occupational employment and mean wage rates are provided for all employment and mean wage estimates to allow data users to determine if those statistics are reliable enough for their needs. Only a probability-based sample can be used to calculate estimates of sampling error. The formulas used to estimate OES variances are adaptations of formulas appropriate for the survey design used.

Confidentiality

BLS has a strict confidentiality policy that ensures that the survey sample composition, lists of reporters, and names of respondents will be kept confidential. Additionally, the policy assures respondents that published figures will not reveal the identity of any specific respondent and will not allow the data of any specific respondent to be inferred. The most relevant statute which governs BLS confidentiality is the Confidential Information Protection and Statistical Efficiency Act (CIPSEA). Each published estimate is screened to ensure that it meets these

confidentiality requirements. To further protect the confidentiality of the data, the specific screening criteria are not listed in this publication. For additional information regarding confidentiality, please visit the BLS website at www.bls.gov/bls/confidentiality.htm.

Changes to the May 2019 estimates

With the May 2019 estimates, the OES program has begun implementing the 2018 Standard Occupational Classification (SOC) system. Each set of OES estimates is calculated from six panels of survey data collected over three years. Because the May 2019 estimates are based on a combination of survey data collected using the 2010 SOC and survey data collected using the 2018 SOC, these estimates use a hybrid of the two classification systems that contains some combinations of occupations that are not found in either the 2010 or 2018 SOC. These combinations may include occupations from more than one 2018 SOC minor group or broad occupation. Therefore, OES will not publish data for some 2018 SOC minor groups and broad occupations in the May 2019 estimates. The May 2021 estimates, to be published in Spring 2022, will be the first OES estimates based entirely on survey data collected using the 2018 SOC.

In addition, the OES program has replaced some 2018 SOC detailed occupations with SOC broad occupations or OES-specific aggregations. These include home health aides and personal care

aides, for which OES will publish only the 2018 SOC broad occupation 31-1120 Home Health and Personal Care Aides.

More information on the occupational classification system used in the May 2019 OES estimates is available at www.bls.gov/oes/soc_2018.htm and in the OES frequently asked questions at www.bls.gov/oes/oes_ques.htm#qf10.

The OES sample has been reduced in recent survey panels. The May 2019 OES survey panel had a sample of approximately 183,000 establishments. The November 2017, May 2018,

and November 2018 survey panels each had a sample of approximately 186,000 establishments. The May 2017 panel sample consisted of approximately 195,000 establishments, and the November 2016 panel sample consisted of approximately 202,000 establishments.

For more information

Answers to frequently asked questions about the OES data are available at www.bls.gov/oes/oes_ques.htm.

Definitions

Covered Employment

Employment covered by state unemployment insurance laws or, for federal workers, covered by the Unemployment Compensation for Federal Employees program.

Establishment

A business, usually at a particular physical location, that engages in one or more types of economic activity; for example, a factory, mine, store, or office. Generally a single establishment produces a single good or provides a single service. An enterprise (a private firm, government, or non-profit organization) could consist of a

single establishment or multiple establishments. A multi-establishment enterprise could have all its establishments in one industry (ie, a chain), or could have various establishments in different industries (ie, a conglomerate). Some establishments, such as construction firms, may have a small fixed base but perform the bulk of their economic activity at various jobsites.

Occupation

A set of activities or tasks employees are paid to perform. Employees that perform essentially the same tasks are in the same occupation, whether or not they are in the same industry. Some occupations are concentrated in a few particular industries; other occupations are found in the majority of industries.
