The Mesa County Job Vacancy Survey

The Spring 2006 Mesa County Job Vacancy Survey (JVS) was conducted from April 6th through the 13th, 2006. The goal of the survey is to provide current information on the demand for workers. This information can serve as input into the decision making process for employers, job seekers, economic developers, educators, and workforce centers in the region.

Over the survey period, all large and government employers as well as a random sample of private employers with five or more employees were contacted. Employers were asked if they were actively hiring, and the number of positions they were seeking to fill.

The Mesa County Job Vacancy Survey is conducted twice a year to provide frequent and useful analysis of the demand for labor.

A total of 1,073 employers, representing 59 percent of the region's total employment, responded to the survey. Of these, 49 are government agencies, 50 are large employers and 974 are small to mid-size employers. The survey has a response rate of 90 percent. The margin of sampling error for the overall vacancy estimate is plus or minus 0.1 percent.

Job Vacancy Survey Regions

Findings of the Survey:

- ◆ An estimated 1,653 jobs were available for hire during the survey period, more than double the 629 vacancies found a year ago.
- ◆ Trade, transportation and utilities has the highest number of estimated vacancies (373), followed by leisure and hospitality (286) and professional and business services (263).
- ◆ All groups of supersectors, with the exception of health care and social assistance, report more vacancies in this survey than a year ago.
- ◆ Small to mid-size companies provide the most vacancies with 1,048. However, since there are more small to mid-size firms, there are actually fewer vacancies per employer compared to large employers and government entities. There are 8 vacancies per large private company and 4 openings per government employer compared to an average of one vacancy per employer for small to mid-size firms.
- ◆ Twenty-five percent of surveyed employers reported at least one job vacancy.

Job Vacancies

Mesa County Employers and Employees, 2nd Quarter 2005

Estimated Vacancies by NAICS Supersectors

The North American Industry Classification System (NAICS) classifies organizations into different industries based upon how the organization produces goods and services. The 20 NAICS sectors have been combined into twelve groups of supersectors for this survey as shown in the chart on this page.

Trade, transportation and utilities, which had the second most estimated vacancies in last spring's survey with 112, offers the most openings this year with 373. Health care and social assistance supplied the most job opportunities last year and the seventh most this survey. The top three supersectors—trade, transportation and utilities, leisure and hospitality, and professional and business services—make up over 56 percent of Mesa county's estimated vacancies. All groups of supersectors, except health care and social assistance, report more job openings this survey compared to last spring.

Estimated Vacancies by Employer Size

Employer Sizes:

Small to Mid-Size = Firms with fewer than 100 employees

Large = Firms with 100 or more employees
