

Analysis & Background

REVISED

Expected Revisions to Colorado Nonfarm Payroll Jobs

Important note: The Statewide by Industry Sector and Metropolitan Statistical Area tables which accompany the Analysis & Background have undergone some formatting changes to aid in the interpretation and evaluation of these data. The time periods have been changed to chronological order. Explanatory column headers have been added. And the Over the Year Change column has been altered to allow direct comparison of growth rates for the modified and official series.

Second quarter 2015 Quarterly Census of Employment and Wages (QCEW) results indicate Colorado total nonfarm payroll jobs estimates will be revised up for this period with the release of benchmarked estimates in March 2016. June 2015 estimates are expected to be revised up by about 12,800 or five-tenths of a percentage point and April and May 2015 estimates are expected to be revised up by about seven-tenths and six-tenths of a percentage point, respectively.

Applying these results through October 2015 brings estimated total nonfarm payroll jobs in October to 2,545,900. This change brings over the year payroll job growth estimates through October 2015 to 52,100 or 2.1 percent.

The final March 2016 benchmarked series are expected to vary from these estimates due to new seasonal adjustment factors and new estimates of nonfarm payroll jobs not covered by the unemployment insurance program.

Industry sectors expected to undergo the greatest upward revisions to payroll jobs estimates in the 2nd quarter include professional and business services (~11,000), trade, transportation and utilities (~9,500), information (~3,100), other services (~2,600) and government (~2,600). Second quarter 2015 QCEW results indicate payroll jobs estimates for manufacturing and financial activities may also be revised up.

The industry sectors expected to undergo a downward revision to payroll jobs estimates in the 2nd quarter are construction (~6,000), leisure and hospitality (~6,000), mining and logging (~3,900), and education and health services (~1,100).

Total nonfarm payroll jobs estimates for the Denver Metropolitan Statistical Area are expected to be revised up in the 2nd quarter of 2015 by about 13,300. Estimates for the Colorado Springs (~6,100) and Boulder (~1,300) Metropolitan Statistical Areas are also expected to be revised up. Payroll jobs estimates for the Pueblo Metropolitan Statistical area may be revised up.

Payroll jobs estimates for the Greeley (~2,300) and Grand Junction (~1,400) Metropolitan Statistical Areas are expected to be revised down. Payroll jobs estimates for the Fort Collins Metropolitan Statistical area may also be revised down.

###

Expected Revisions to Colorado Nonfarm Payroll Jobs based on 3rd quarter 2015 QCEW data will be released Wednesday, February 24, 2016.

###

Every month of the year other than February the Colorado Department of Labor and Employment, in cooperation with the U.S. Bureau of Labor Statistics, releases estimates of Colorado nonfarm payroll jobs for the previous month based on results from a survey of business establishments. Estimates for Colorado are produced by the Bureau of Labor Statistics for total nonfarm payroll jobs and specific industry sectors or groups of sectors across the entire state, and for the seven metropolitan statistical areas.

In February of each year these survey based estimates are compared to and adjusted in a process called “benchmarking” based on administrative records available since the release of the survey estimates. The results of that comparison are released in March.

For instance, at the beginning of the 2016 calendar year Colorado nonfarm payroll jobs estimates for the 4th quarter of 2014 and all of 2015 will be benchmarked based on information available from the QCEW program for the 4th quarter of 2014 and the first three quarters of 2015. These updated estimates will be released in March 2016.

The source of these administrative records for the QCEW program are unemployment insurance reports Colorado employers are required to file quarterly with the Colorado Department of Labor and Employment. Among other information, employers include the number of people employed at the firm for each month of the quarter for which the report is being filed. Although only firms with employees covered by the Colorado Unemployment Insurance program are required by state and federal law to submit these reports, this quarterly census of employment covers about 98 percent of all nonfarm payroll jobs and about 88 percent of total employment in Colorado.

Aggregated by industry, the QCEW data are more closely aligned with the definition of nonfarm payroll jobs than with total employment. This is because an individual holding more than one job is counted only once in the total employment estimate but multiple times in both QCEW and the nonfarm payroll jobs estimates. Total employment estimates are by place of residence while both QCEW and payroll jobs are by place of business.

Though the official nonfarm payroll jobs estimates are benchmarked only once a year, data from QCEW are available quarterly and, once available, can be compared to the official series to see by about how much the official statistics will be adjusted.
