Colorado Department of Local Affairs Mission: Strengthening Colorado Communities

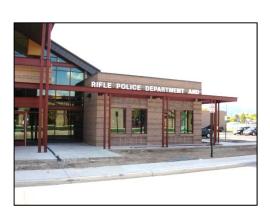

The Energy and Mineral Impact Assistance
Program has been helping to improve the lives of
Colorado citizens since 1977. Grants and lowinterest loans are directed to those communities
socially and economically impacted by the
development, processing or energy conversion of
mineral and fuel resources.

Examples of projects that benefit from the Energy and Mineral Impact Assistance Program pictured at left: The interior of the Johnstown town hall, the Hudson sewer plant and Rifle Police Station.

On the front cover: A drilling site located in Garfield County. Projects supported by the Energy and Mineral Impact Assistance Fund program include, but are not limited to, local water and wastewater improvements, planning, local road improvements, public safety facilities, municipal and county facilities and public libraries.

EXHIBIT D: Origins and History of the Program

Message from Reeves Brown, Executive Director

Since 1977, the Energy and Mineral Impact Assistance Program has been helping communities improve lives. This program embodies the Department of Local Affairs mission, "Strengthening Colorado Communities," by addressing the social and economic impacts of energy and mineral production throughout the state.

Projects funded by the program have helped with a wide variety of community development efforts and improvements including planning, infrastructure, public safety facilities and services, roads and water and wastewater

treatment facilities. Understanding industry volatility and the tremendous responsibility associated with the administration of this fund, the Department of Local Affairs works in partnership with community leaders, legislators, industry representatives and other organizations, to determine the most effective and relevant methods for maximizing the results of fund investment.

During fiscal years 2009-2014, the Colorado General Assembly redirected the grant portion of the Energy and Mineral Impact Assistance Fund (approximately 2/3rds of the Fund) to help meet the state's constitutional obligation to balance the state budget. During this time, the portion of these impact funds which is directly distributed to communities by formula (approximately 1/3rd of the Fund) continued in place. In May of 2012, Governor Hickenlooper and the Colorado General Assembly approved the restoration of the Energy and Mineral Impact Assistance Fund grant program. Our ability to award grants going forward will now be met with a substantial backlog of demand for public improvements in energy impacted communities. In addition to the financial assistance that we are able to make available to communities with these funds, we will continue to provide the unparalleled technical assistance and customer service that is the foundation of our partnerships with local communities.

With this great news, it gives me pleasure to announce that DOLA anticipates awarding Tier 1 grants (grants up to \$200k) in February 2013 and Tier 2 grants (grants up to \$1M) in April 2013. Based on forecasts, we anticipate we will have three grant cycles per year with about \$20M available each cycle and application deadlines of December 1, April 1 and August 1.

We're so excited this funding is now available to communities impacted by energy and mineral development. I know how critical this program is for local governments.

On behalf of the staff here at DOLA, I want to thank the members of the Energy and Mineral Impact Advisory Committee for their ongoing service and for all of their help in raising awareness about the strengths of this program.

Sincerely,

Reeves Brown
Executive Director

Thirty-sixth Annual Report - FY2012 Local Government Energy and Mineral Impact Assistance Program Page 4

Overview

There are two channels by which DOLA administers Energy Impact dollars to local governments: a competitive grant program and a direct distribution allocation of funds based on criteria established by the General Assembly.

The creation of the fund is outlined in C.R.S. 34-63-102 (Federal Mineral Lease) and C.R.S. 39-29-101 (Severance). This report is being submitted according to C.R.S. 39-29-110(3).

The purpose of the Energy and Mineral Impact Assistance Program is to assist political subdivisions that are socially and/or economically impacted by the development, processing, or energy conversion of minerals and mineral fuels. Funds come from the state severance tax on energy and mineral production and from a portion of the state's share of royalties paid to the federal government for mining and drilling of minerals and mineral fuels on federally-owned land. The program was created by the legislature in 1977.

Historically, the largest distribution of funds through the Energy and Mineral Impact Assistance program had occurred in the form of discretionary grants and loans to municipalities, counties and other political subdivisions socially or economically impacted by the development, processing or energy conversion of minerals and mineral fuels. The diversion of funds during FY 2009 – 2012 to offset General Fund shortfalls had suspended the discretionary grant program, creating an even greater demand for DOLA's technical assistance services.

The reinstatement of the Energy and Mineral Impact Assistance Fund will greatly support DOLA's goal to improve local governments' capacity. We anticipate we will have three grant cycles per year with approximately \$20M available each cycle. Application deadlines are December 1, April 1 and August 1, with hearings held in March, July and November. Demand in 2012-2013 is expected to far outpace the \$20M available for each grant cycle. In the December application cycle there were 111 applications submitted with requests totaling \$42.8M.

The direct distribution of Federal Mineral Lease proceeds and State Severance Tax revenues is

mandated by Colorado statute and administered by DOLA. Two separate statutes allocate state

proceeds generated from the production of mineral resources in Colorado to local governments.

Portions of the distribution are allocated based on formulaic calculations and result in the "Direct

Distributions" to Colorado counties, municipalities, and school districts. C.R.S. § 39-29-110(1)(b); 34-

63-102(5.4)(c).

In August 2012, over \$61 million in annual Severance Tax and Federal Mineral Lease funds were

distributed to 502 Colorado counties, municipalities and school districts. The direct distributions

combined total was \$61,940,250. The amount in Severance Tax Direct Distribution that went to local

communities in 2012 was \$26,687,870 and the total for Federal Mineral Lease Direct Distribution was

\$32,490,673. School districts received a total of \$2,761,707 in Federal Mineral Lease Direct

Distribution.

Generally described, the factors used in the distribution are measures of resident energy employees,

mining and well permits, amount of mineral production, population and miles of road.

In 2012, the Department assisted local communities in achieving their goals by providing, in an efficient

and timely manner, technical assistance services and distribution of revenues from state and federal

sources. The Department's network of Regional Managers was key in facilitating this accomplishment.

For additional information please see the Department's website at:

http://www.colorado.gov/cs/Satellite/DOLA-Main/CBON/1251594715231

The map on the following page illustrates the active and inactive mineral mines and oil and gas wells

subject to severance tax in Colorado.

2012 Revenues

Fiscal Year 2012 revenues to the combined Local Government Energy and Mineral Impact Assistance Program decreased as a result of 2009 natural gas prices declining from the spike in prices in 2008.

As shown in the chart below, the revenues to the grants program have varied considerably over the years with the mineral industry business cycles.

Availability of Funds

For FY2009 through FY2014, the total Energy and Mineral Impact Assistance Fund dollars reallocated is more than \$260 million. At the close of the 2012 legislative session, there were no bills further appropriating Energy and Mineral Impact Assistance Funds to the State General Fund.

Continually Striving for Excellence

As part of its ongoing commitment to improve the Energy and Mineral Impact Assistance Fund grant

program, prior to 2012, DOLA implemented changes and adopted Sustainability Criteria, to help better

address the needs of communities.

The number of grant cycles held is based on the availability of funds. The grants program has been

divided into three categories; small, medium and large (also referred to as Tier I, Tier II and Tier III,

respectively). Matching contributions by the applicants are required.

• Tier I grants are available for projects up to \$200,000 and will be administratively approved

by the department's Executive Director following an evaluation of the grant criteria by DOLA

staff. The Impact Advisory Committee will be notified of these awards.

• Tier II grants are for projects between \$200,000 and \$1,000,000. The Advisory Committee

recommends project awards to the Executive Director for final consideration based on

funding criteria developed to evaluate project significance.

• Tier III grants are intended to support projects that are regional or multi-jurisdictional in

nature. Grant awards will be in the range of \$2,000,000 to \$10,000,000 to be made available

once per year.

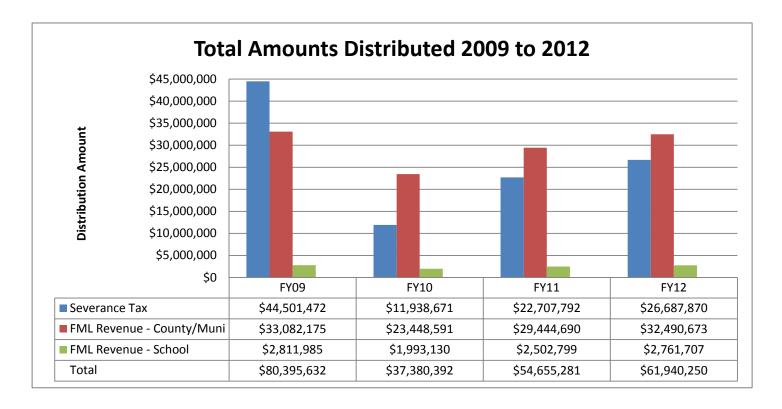

The new small and medium grant programs were "rolled out" during the summer of 2008. Tier III

grants will be implemented in the future when funds become available.

Thirty-sixth Annual Report - FY2012 Local Government Energy and Mineral Impact Assistance Program

Direct Distribution

The Colorado Department of Local Affairs (DOLA) distributes revenue derived from energy and mineral extraction statewide directly to the local units of government. These revenues come from State Severance Tax receipts and Federal Mineral Lease non-bonus payments.

In August 2012, over \$61 million in annual Severance Tax and Federal Mineral Lease funds was distributed to 502 Colorado counties, municipalities and school districts. The direct distributions combined total was \$61,940,250. The amount in Severance Tax Direct Distribution that went to local communities in 2012 was \$26,687,870 and the total for Federal Mineral Lease Direct Distribution was \$32,490,673. School districts received a total of \$2,761,707 in Federal Mineral Lease Direct Distribution.

Grant Program Highlights

The Energy and Mineral Impact program is administered with the goal of addressing local

governments' priority needs. In FY 2012, DOLA worked to assist regional efforts directed at

sustainability and substantial capital development. In FY 2012, DOLA staff provided technical

assistance in the completion of 17 projects funded through earlier grant cycles and ongoing assistance

on 97 projects in progress.

Below are examples of projects highlighting the benefits of this program in meeting not only critical

public facility and infrastructure needs, but also encouraging innovative, sustainable projects

throughout Colorado.

SB09-232 Projects

The legislation, SB09-232, designated \$17 million in grant funding available from federal mineral lease

dollars for a one-time, competitive grant allocation for projects in communities significantly impacted

by energy and mineral production on federal mineral lease land.

In July 2009, DOLA received pre-applications from 10 communities for the SB09-232 fund. Using

several criteria such as degree of energy impact on the community, readiness of the project, regional

significance and amount of local funding match committed, seven projects were selected to make a full

application for the dollars.

The special grant application cycle had no minimum or maximum amount to be awarded; therefore,

one project could potentially have received the full \$17 million, or multiple projects could have

received varying amounts. The total amount of funding requested through the pre-application process

was approximately \$61 million.

 $Thirty\hbox{-}sixth\ Annual\ Report\ -\ FY2012$

Four projects were selected in February 2010. The progress of those projects is as follows:

Town of Parachute Interchange at US-6 & I-70 - \$8 million

Applicant/Partners: Town of Parachute, Garfield County, EnCana and Williams gas companies

Project Type: Transportation

Project Description: This project consists of two elements: construction of a new full-diamond interchange on I-70 with completion at year's end; and a downtown by-pass. The interchange improvements include construction of a full-diamond interchange (two on and off ramps) with acceleration and deceleration lanes. The interchange is located approximately two miles west of the existing Town of Parachute I-70 interchange (Exit 75). The project also involves completing a truck by-pass of Parachute from State Highway 6 to CR 215. Acceleration and deceleration lanes at SH 6, a bridge over Parachute Creek and an additional 1,500 feet of road surface would complete the by-pass route. Construction began in spring 2012 and a ribbon-cutting ceremony was held in October.

Mesa County 29 Road Overpass - \$3.2 million

Applicant/Partners: Mesa County, City of Grand Junction

Project Type: Transportation

Project Description: In 2011, the completion of the 29 Road Overpass Project was celebrated at a grand opening event attended by citizens and local and state officials. The project is the result of a joint effort between Mesa County and the City of Grand Junction that consisted of the construction of a grade-separated crossing of the Union Pacific Railroad in Grand Junction. This project is a component of the beltway loop around the core of the Grand Valley serving Grand Junction, and the outlying communities of Whitewater, Clifton and Fruitvale.

Southwest Colorado Council of Governments SWCCOG) Regional Telecommunications Infrastructure – \$3 million

Applicant/Partners: Southwest Colorado Council of Governments, City of Durango, City of Cortez; Towns of Bayfield, Mancos, Dolores, Dove Creek, Rico, Silverton, Pagosa Springs; Counties of Archuleta, Dolores, La Plata, San Juan and Montezuma; Fort Lewis College; Southwest Community College, and various other public agencies such as libraries, schools and fire districts.

Project Type: Regional Broadband Infrastructure

Project Description: This is a regional telecommunication and broadband infrastructure improvement project coordinated by the Southwest Colorado Council of Governments and Region 9 Economic Development District. The

overall regional project is comprised within each county and municipality. These smaller portions support the overall regional goal of high-capacity connectivity among public facilities in the various

political subdivisions. This project further grows the high capacity network out into each local community and additionally aggregates demand on a regional basis to make the on-going cost affordable. Significant time has been spent developing job descriptions for the General Manager to focus on operations management and capital expenditures. The effort to refine

design plans and cost estimates continues for many of the communities. Technology improvements and the possibility of collaborating with EagleNet add value to the project. Local match has been budgeted for 2012 in most of the communities and the Southwest Colorado Council of Governments anticipates much of the infrastructure will be installed in 2012, with an anticipated completion date in 2013.

City of Delta Highway 50 Bypass - \$2.8 million

Applicant/Partners: City of Delta

Project Type: Transportation

Project Description: This project consists of the construction of an alternate road for the purpose of routing truck traffic away from the City of Delta's Historic Main Street. The alternate truck route will relieve traffic congestion and improve safety for the city's downtown business corridor located along State Highway 50. The project includes the construction of an overpass structure above the Union Pacific railroad tracks to allow uninterrupted access for emergency responders to and from the North Delta area and the completion of a four lane road connecting at the north and south ends of Main Street. Delta has bonded their portion of the project, and is in the process of negotiating rights of way with the railroad for the truck route. Engineering is nearly complete, with hopes of breaking ground this spring on actual construction.

Energy and Mineral Impact Loan Program

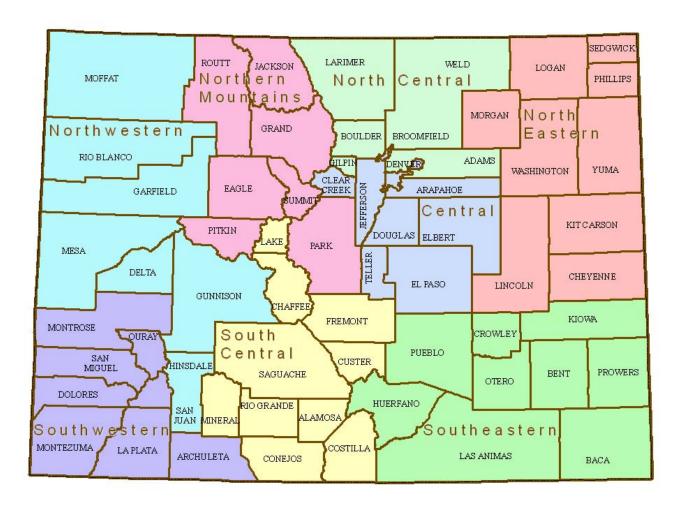

To assist communities with critical water and wastewater improvements, Colorado Revised Statutes allow loans from the Local Government Severance Tax Fund, C.R.S. 39-29-110(1)(b)(II) (A).

This program allows the executive director to make loans to political subdivisions for the planning, design, construction, erection, building, acquisition, alteration, modernization, reconstruction, improvement, or expansion of domestic wastewater treatment works or potable water treatment facilities. Loans must follow terms to insure repayment of the loan with interest assessed and collected at an interest rate of not less than five percent.

The current value of the loan portfolio is \$35,874,332 and consists of 103 active loans totaling \$16,068,509. Since the water and sewer loan program was authorized by statute in 1985, a total of 337 loans have been made, with 234 loans being fully repaid. There have been no defaults in the history of the loan program.

DOLA Regional Managers & Regional Map

One of DOLA's strengths is our ability to deliver services directly within the communities we serve. Regional Managers cover eight regions throughout Colorado, allowing local governments, community leaders and organizations to address their needs with someone who lives and works right in their own communities. Our Regional Managers work tirelessly within their regions, serving as consultants to communities in their community development efforts and providing technical assistance and guidance to grant recipients throughout each step of the process – from application to contract. They play an invaluable role in helping DOLA in its administration of the Impact program.

Exhibit D - Origins and History of the Program

Throughout its history, Colorado has experienced the booms and busts of energy and mineral production. The fluctuations of international marketplaces for precious and base metals, coal, oil, gas, carbon dioxide, uranium and other radioactive materials, oil shale, helium and other natural resources have profoundly affected Colorado, particularly small, rural communities near the geological resource deposits. Until the Local Government Energy and Mineral Impact Assistance program was created in 1977, few attempts were made to moderate these impacts and to assist the communities affected by cyclical periods of prosperity and decline.

State Severance Tax

In 1977, the General Assembly enacted legislation establishing a state severance tax on certain minerals. In that legislation, the Legislature found "when nonrenewable natural resources are removed from the earth, the value of such resources to the state of Colorado is irretrievably lost." The Legislature declared, severance tax is a means for the state to "recapture a portion of this lost wealth...removed from the soil of this state and sold for private profit" and expressed its intent that "a portion be made available to local governments to offset the impact created by nonrenewable resource development."

The severance tax legislation called for a portion of revenues from this new tax to be deposited in the Local Government Severance Tax Fund and to be distributed by the Executive Director of the Department of Local Affairs. According to the statute, thirty percent of the severance tax revenue credited to the fund is required to be distributed directly to counties and municipalities based on several factors. In addition to the basis of the relative number of production employees residing in the unincorporated areas of such counties and in the boundaries of unincorporated municipalities, HBO8-1083 added mining and well permits, mineral production, population and HUTF road miles to the formulaic distribution. "Seventy percent of the funds from the Local Government Severance Tax Fund shall be distributed to those political subdivisions socially or economically impacted" by the development, processing, or energy conversion of mineral and mineral fuels subject to severance taxation. Such funds shall be "used for the planning, construction, and maintenance of public facilities and for the provision of public services." For more information on the direct distribution of severance tax revenues, see http://dola.colorado.gov/directdistribution.

Federal Mineral Leasing Funds

In 1977, the General Assembly also enacted legislation directing a portion of the state's receipts of federal mineral lease revenues to be deposited in a Local Government Mineral Impact Fund for distribution by the Executive Director of the Department of Local Affairs to "public schools and political subdivisions of the state" impacted by mineral and energy development "for planning, construction and maintenance of public facilities and for public services." The Legislature has directed that fifty percent of the federal mineral lease funds deposited in the Fund be distributed to counties and municipalities on the basis of several factors. SB08-218 added federal mineral leasing funds by the county of origin, population and HUTF road miles to the residence of employees of mineral producers to the distribution formula. In addition, SB08-218 directed that the Department of Local Affairs distribute a portion of federal mineral leasing funds to school districts. This distribution was formerly administered by the State Treasurer. The statute requires that "priority shall be given to those public schools and political subdivisions socially or economically impacted by the development, processing or energy conversion of fuels and minerals leased under said federal mineral lands leasing act." For more information on the direct distribution of federal mineral leasing funds, see http://dola.colorado.gov/directdistribution.
