

## **Division of Housing 3<sup>rd</sup> Quarter 2013 Foreclosure Report**

**The Colorado Division of Housing is a division of the Colorado Department of Local Affairs**

**November 13, 2013**

### **Summary and Methods**

In response to recommendations from the Colorado Blue Ribbon Panel on Housing and the Colorado Foreclosure Prevention Task Force, the Colorado Division of Housing has compiled the attached information regarding foreclosures in Colorado.

During the 2009 legislative session, the legislature passed, and the governor signed, House Bill 1197 which mandates that the foreclosure totals contained in this report be considered the official foreclosure statistics of the state of Colorado. The legislation also required that statistics on cures now be included and that Public Trustees submit the required information to the Division of Housing.

These statistics have been collected to provide as accurate a view as possible of foreclosures in Colorado and to determine which regions of the state are most heavily impacted by foreclosures. The data is provided on a county-by-county basis and is based on foreclosure data reported by the Public Trustee's office of each county.

This report seeks to provide two essential pieces of information:

### **Foreclosure Filing Statistics:**

The recording of the notice of election and demand (NED) is the event that begins the foreclosure process. In general, when a borrower is at least 3 months delinquent and in default, the lender will file an NED with the public trustee and the borrower will receive notice of the initial sale date. This notice will be sent from the public trustee's office in the county in which the property is located, and at this point, the property is in foreclosure.

The Public Trustee filings provide an objective measure of how many foreclosure proceedings have been initiated in a given county. Such filings can be "cured" and "withdrawn" before the property is sold at auction, meaning that not all foreclosure filings result in a final foreclosure sale. However, Public Trustee numbers are a useful indicator of the number of loans in a county that have become seriously delinquent, and they provide insights into the overall health of the real estate market within that county.

We should note that in addition to single-family homes, condominiums, and townhomes, NED statistics include filings on agricultural, industrial, commercial, and multifamily properties. Vacant land is included as well.

**Foreclosure Sale Statistics:** Approximately 110-125 days after the initial filing, the property may be sold at the Public Trustee auction to a third party or to the mortgage company. Once the foreclosure sale takes place, eviction proceedings will proceed during the next several weeks.

As listed below, the foreclosure filings number and the foreclosure auction sales number are two independent numbers. In other words, the properties that went to final sale during the current quarter are not the same properties which entered the foreclosure process the same quarter. For example, among properties that went to sale during a given quarter, a large portion of those foreclosures were filed at least four months earlier, meaning a foreclosure filing and foreclosure sale do not occur within the same quarter. The period between the foreclosure filing and the foreclosure sale at auction is legally at least 110 days, but in some cases, this period may actually last much longer.

### **Why are both numbers important?**

The foreclosure filings number provides a view of how many borrowers have become seriously delinquent on their loans. Foreclosure filings provide a good guide to foreclosure activity in a given county, and while a property may be withdrawn from the foreclosure process after a filing is made, the filings statistics nevertheless indicate where borrowers are delinquent and in default.

The foreclosure sale numbers generally indicate how many borrowers have lost all equity in the property as the result of it being sold to another party at auction, including the mortgage company, an investor, or others. Many households in the foreclosure process lose their properties through a variety of processes such as short sales and deed-in-lieu-of-foreclosure agreements. Losing the property through a foreclosure sale, however, is generally most damaging to the credit of the borrower, and foreclosure (unless the property is sold at auction for more than the value of the loan) does not allow for the borrower to preserve any of the equity he or she might still have in that property.

### **Study Findings**

During the third quarter of 2013, Colorado public trustees reported 3,745 foreclosure filings and 2,074 sales at auction (completed foreclosures). During the third quarter of 2012, there were 7,076 filings and 4,138 sales. Comparing year-over-year for the third quarter, foreclosure filings fell 47.1 percent and completed foreclosures fell 49.9 percent.

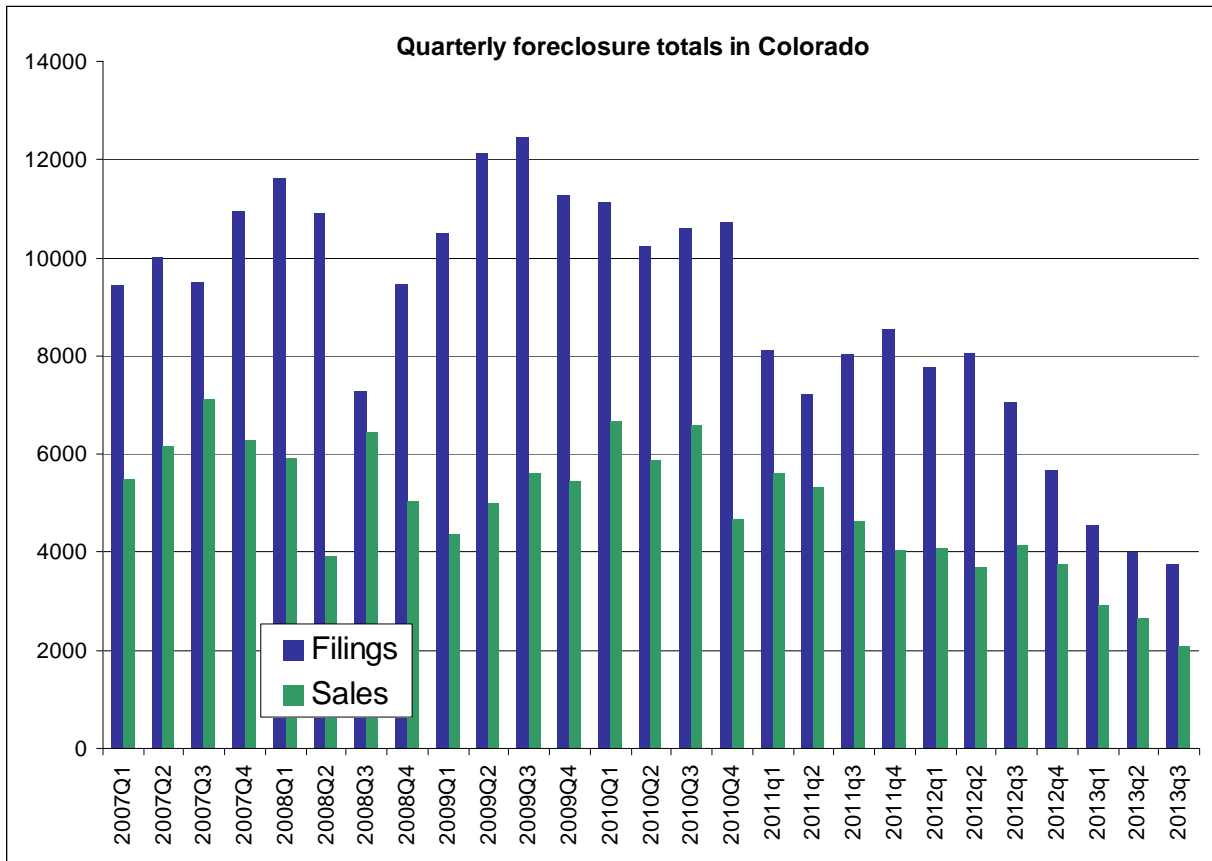

Comparing the third quarter of 2013 to the second quarter of 2013, foreclosure filings fell 7.0 percent from 4,025 to 3,745. Foreclosure sales fell 22.0 percent from 2,658 to 2,074 during the same period.

Comparing totals for the first three quarters of the year combined, foreclosure filings were down 46.1 percent from 2012 to 2013 dropping from 22,894 during 2012 to 12,341 during 2013. Foreclosure sales at auction fell 36.9 percent during the same period, dropping from 12,143 sales during 2012 to 7,667 during 2013.

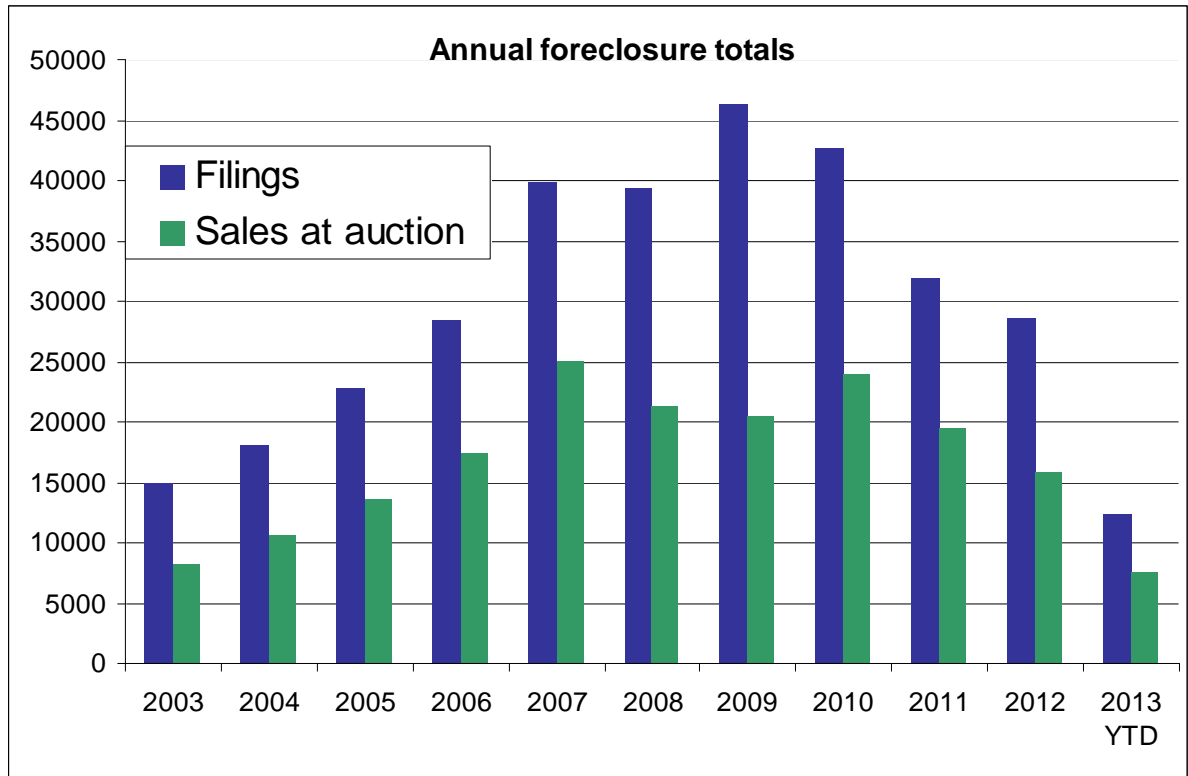

During the third quarter of 2013, foreclosure filings and sales both showed a continued trend of declining foreclosure activity.

Below is a time series showing quarterly totals in foreclosure filings and sales. The large dip in sales shown during the second quarter of 2008 can be attributed to a change in the foreclosure time line that took effect on January 1, 2008 and led to a large temporary dip in the number of foreclosure sales during March, April, and May of that year.

**Graph 1: Quarterly Foreclosure Filings vs. Sales at Auction:**

**Graph 2: Annual Foreclosure Totals:**

Note: Annual totals are available since 2003, but quarterly totals are only available since 2007.

**Table 1: Foreclosure Filings**

Year	Foreclosure Filings
2003	14,858
2004	18,127
2005	22,894
2006	28,435
2007	39,920
2008	39,333
2009	46,394
2010	42,692
2011	31,975
2012	28,579
2013	12,341 (January-September)

**Table 2: Foreclosure Sales at Auction**

<b>Year</b>	<b>Foreclosure Sales</b>
2003	<b>8,239</b>
2004	<b>10,566</b>
2005	<b>13,642</b>
2006	<b>17,451</b>
2007	<b>25,054</b>
2008	<b>21,306</b>
2009	<b>20,437</b>
2010	<b>23,891</b>
2011	<b>19,617</b>
<b>2012</b>	<b>15,903</b>
<b>2013</b>	<b>7,667 (January-September)</b>

### **County Statistics**

Trends in different counties throughout the state vary considerably. The 12 metropolitan counties in Colorado now account for slightly more than 81 percent of all foreclosure filings activity in Colorado. However, in 2007 the 12 metropolitan counties accounted for more than 90 percent of foreclosure activity in Colorado, indicating that foreclosure activity outside the metropolitan areas has become relatively more common.

Aggregate statewide totals and trends do not necessarily reflect changes in foreclosure totals at the county level as county-level changes were not uniform throughout the state.

The map below shows foreclosure rates in each county. Categories reflect proportions of households completing the foreclosure process.

**Map 1: Foreclosure rates in Colorado counties, 3<sup>rd</sup> Quarter 2013**

**Foreclosure rates are split into 4 categories: 1. (burgundy) More than 0.5 percent of all households. 2. (green) From .25 up to and including .50 percent of all households. 3. (orange) From 0.1 up to and including 0.25 percent of all households. 4. (yellow) 0.1 percent, or less, of all households.**

Rates of foreclosure for each county are listed in Table 3 of the appendix. Statewide, there was approximately 1 completed foreclosure (foreclosure sale) per 982 households for the third quarter of 2013. Note that in the map, for the first time since the Division of Housing began tracking foreclosures, no county reported a foreclosure rate about 0.5 percent.

None of the metropolitan counties were found among the counties with the top ten foreclosure rates. Most of the counties in the top ten were mountain counties including Grand, Saguache, San Juan, and Park counties.

Pueblo County reported the highest foreclosure rate of the metropolitan counties, with Mesa County reporting the second-highest foreclosure rate among the metro counties. Pueblo reported a foreclosure rate of one foreclosure per 442 households while Mesa County reported a rate of 1 foreclosure per 561 households. See Table 3 for full listing.

Boulder County reported the lowest foreclosure rate among metropolitan counties with 1 completed foreclosure per 3,853 households.

From 2006 through 2008, few mountain counties or Western Slope counties were found among the counties with high foreclosure rates. In recent quarters, however, counties from these parts of the state are common.

It is important to note that counties with small populations are also prone to very volatile foreclosure rates as a small rise or fall in the total number of foreclosures can significantly change the foreclosure rate in a small county for a quarter.

### **Future Outlook**

If current trends continue, the year-end foreclosure totals for Colorado will be similar to what was reported in 2004. This means that 2013 is looking to finish the year at a ten-year low for foreclosures. During 2004, there were approximately 18,000 foreclosure filings and 10,500 sales.

At this point there is a well-established downward trend, but this does not guarantee continued declines. However, with home prices on the rise and stable employment, current economic conditions point toward continued declines in foreclosure. Also, new mortgage loan originations continue to be down significantly from 2007 peak levels. With continued declines in the total number of mortgage loans serviced in the state in recent years, the number of potential foreclosures has declined as well.

### **Methods**

The Colorado Division of Housing has sought to collect foreclosure information on all 64 counties. Data is collected directly from the Public Trustee's office in each county. Some numbers in this report reflect corrections made to statistics reported in earlier reports.

The per-household calculation for each county is based on 2012 (the most recent year available) estimates of occupied households provided by the Colorado State Demographer.

The household number is that of "total occupied housing units" in each county. Owner-occupant totals are only available for a minority of Colorado counties, so for purposes of consistency across all counties, occupied housing unit totals are used.

The Colorado Division of Housing wishes to acknowledge the invaluable assistance of Carol Snyder, the former Public Trustee of Adams County, Robert Sagel, the Public Trustee of Morgan County, and the Public Trustee Association, although neither Ms. Snyder, Mr. Sagel, nor the Association bear any responsibility for any errors or for the conclusions and analysis contained in this summary.

**Table 3: Foreclosure rates based on the number of occupied housing units per completed foreclosure and percentage of all occupied housing units. 2012 household numbers are the most recent available.**
