

Division of Housing 4th Quarter 2014 Foreclosure Report

The Colorado Division of Housing is a division of the Colorado Department of Local Affairs

March 27, 2015

Summary and Methods

In response to recommendations from the Colorado Blue Ribbon Panel on Housing and the Colorado Foreclosure Prevention Task Force, the Colorado Division of Housing has compiled the attached information regarding foreclosures in Colorado.

During the 2009 legislative session, the legislature passed, and the governor signed, House Bill 1197 which mandates that the foreclosure totals contained in this report be considered the official foreclosure statistics of the state of Colorado. The legislation also required that statistics on cures now be included and that Public Trustees submit the required information to the Division of Housing.

These statistics have been collected to provide as accurate a view as possible of foreclosures in Colorado and to determine which regions of the state are most heavily impacted by foreclosures. The data is provided on a county-by-county basis and is based on foreclosure data reported by the Public Trustee's office of each county.

This report seeks to provide two essential pieces of information:

Foreclosure Filing Statistics:

The recording of the notice of election and demand (NED) is the event that begins the foreclosure process. In general, when a borrower is at least 3 months delinquent and in default, the lender will file an NED with the public trustee and the borrower will receive notice of the initial sale date. This notice will be sent from the public trustee's office in the county in which the property is located, and at this point, the property is in foreclosure.

The Public Trustee filings provide an objective measure of how many foreclosure proceedings have been initiated in a given county. Such filings can be "cured" and "withdrawn" before the property is sold at auction, meaning that not all foreclosure filings result in a final foreclosure sale. However, Public Trustee numbers are a useful indicator of the number of loans in a county that have become seriously delinquent, and they provide insights into the overall health of the real estate market within that county.

We should note that in addition to single-family homes, condominiums, and townhomes, NED statistics include filings on agricultural, industrial, commercial, and multifamily properties. Vacant land is included as well.

Foreclosure Sale Statistics: Approximately 110-125 days after the initial filing, the property may be sold at the Public Trustee auction to a third party or to the mortgage company. Once the foreclosure sale takes place, eviction proceedings will proceed during the next several weeks.

As listed below, the foreclosure filings number and the foreclosure auction sales number are two independent numbers. In other words, the properties that went to final sale during the current quarter are not the same properties which entered the foreclosure process the same quarter. For example, among properties that went to sale during a given quarter, a large portion of those foreclosures were filed at least four months earlier, meaning a foreclosure filing and foreclosure sale do not occur within the same quarter. The period between the foreclosure filing and the foreclosure sale at auction is legally at least 110 days, but in some cases, this period may actually last much longer.

Why are both numbers important?

The foreclosure filings number provides a view of how many borrowers have become seriously delinquent on their loans. Foreclosure filings provide a good guide to foreclosure activity in a given county, and while a property may be withdrawn from the foreclosure process after a filing is made, the filings statistics nevertheless indicate where borrowers are delinquent and in default.

The foreclosure sale numbers generally indicate how many borrowers have lost all equity in the property as the result of it being sold to another party at auction, including the mortgage company, an investor, or others. Many households in the foreclosure process lose their properties through a variety of processes such as short sales and deed-in-lieu-of-foreclosure agreements. Losing the property through a foreclosure sale, however, is generally most damaging to the credit of the borrower, and foreclosure (unless the property is sold at auction for more than the value of the loan) does not allow for the borrower to preserve any of the equity he or she might still have in that property.

Study Findings

During the fourth quarter of 2014, Colorado public trustees reported 2,736 foreclosure filings and 1,233 sales at auction (completed foreclosures). During the fourth quarter of 2013, there were 2,981 filings and 1,650 sales. Comparing year-over-year for the fourth quarter, foreclosure filings fell 8.2 percent and completed foreclosures fell 25.3 percent.

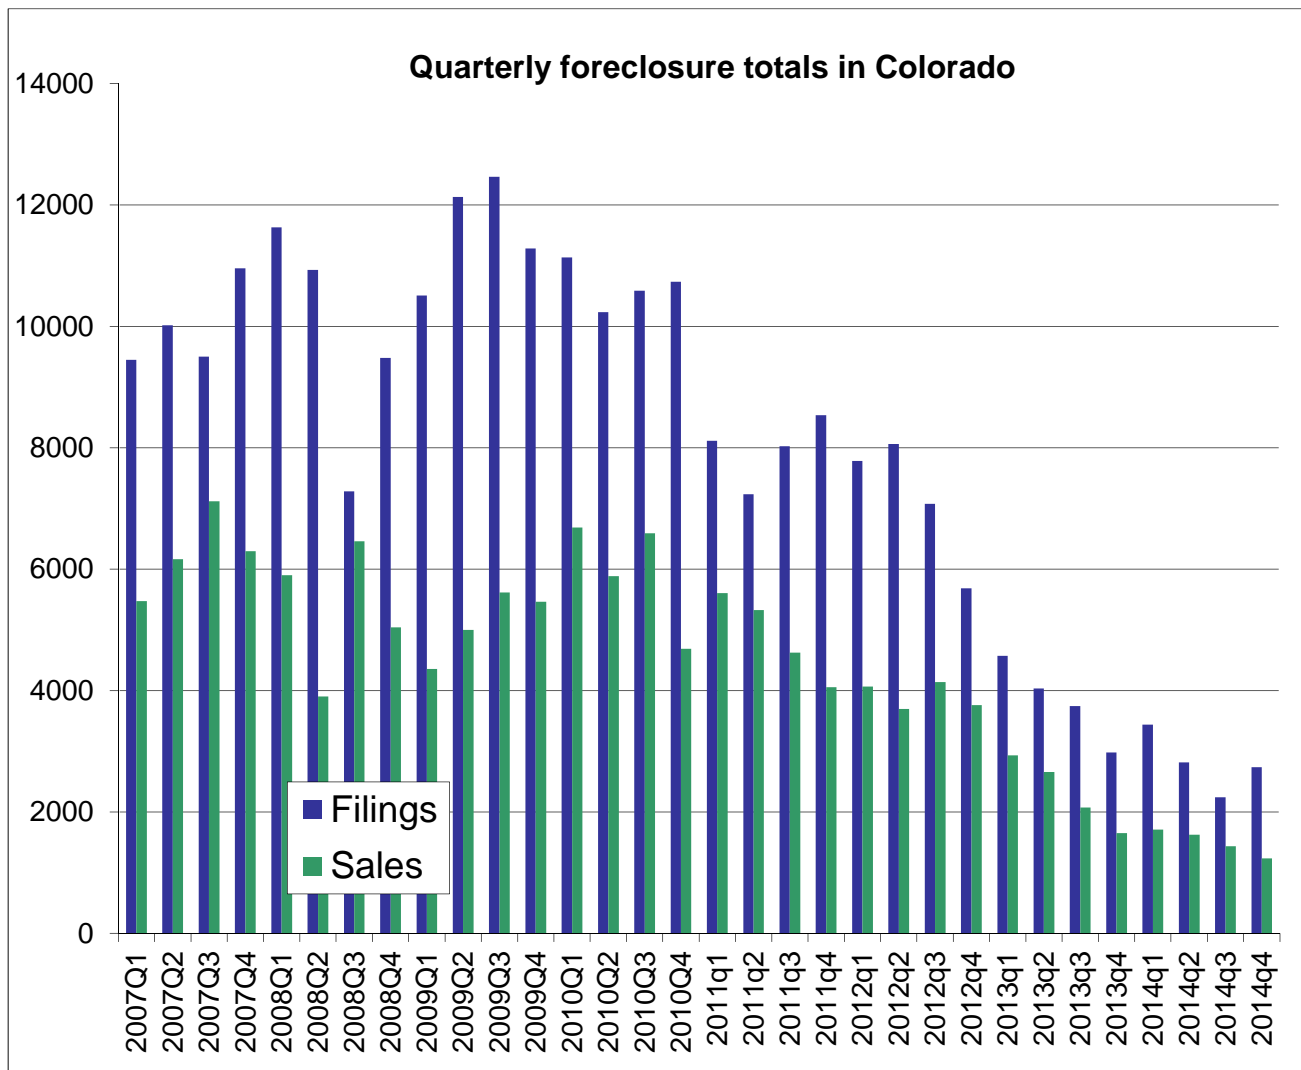

Comparing the fourth quarter of 2014 to the third quarter of 2014, foreclosure filings rose 22.1 percent from 2,241 to 2,736. Foreclosure sales fell 14.2 percent from 1,437 to 1,233 during the same period.

During the fourth quarter of 2014, foreclosure filings and sales both showed decreases compared to 2013's fourth-quarter rate. The fourth-quarter filings total was at the second-lowest level ever recorded by this survey, and the filings total was at the lowest level ever recorded.

For the full year of 2014, foreclosure filings were down 26.7 percent compared to the full year of 2013, dropping from 15,333 in 2013 to 11,234 in 2014. Foreclosure filings also showed declines with foreclosure activity dropping 35.6 percent from 9,318 during 2013 to 6,000 during 2014.

Below is a time series showing quarterly totals in foreclosure filings and sales. The large dip in sales shown during the second quarter of 2008 can be attributed to a change in the foreclosure time line that took effect on January 1, 2008 and led to a large temporary dip in the number of foreclosure sales during March, April, and May of that year.

Graph 1: Quarterly Foreclosure Filings vs. Sales at Auction:

Graph 2: Annual Foreclosure Totals:

Note: Annual totals are available since 2003, but quarterly totals are only available since 2007.

Table 1: Foreclosure Filings

Year	Foreclosure Filings
2003	14,858
2004	18,127
2005	22,894
2006	28,435
2007	39,920
2008	39,333
2009	46,394
2010	42,692
2011	31,975
2012	28,579
2013	15,333
2014	11,234

Table 2: Foreclosure Sales at Auction

Year	Foreclosure Sales
2003	8,239
2004	10,566
2005	13,642
2006	17,451
2007	25,054
2008	21,306
2009	20,437
2010	23,891
2011	19,617
2012	15,903
2013	9,318
2014	6,000

County Statistics

Trends in different counties throughout the state vary considerably. The 12 metropolitan counties in Colorado now account for slightly more than 80 percent of all foreclosure filings activity in Colorado. However, in 2007 the 12 metropolitan counties accounted for more than 90 percent of foreclosure activity in Colorado, indicating that foreclosure activity outside the metropolitan areas has become relatively more common.

Aggregate statewide totals and trends do not necessarily reflect changes in foreclosure totals at the county level as county-level changes were not uniform throughout the state.

The map below shows foreclosure rates in each county. Categories reflect proportions of households completing the foreclosure process.

Map 1: Foreclosure rates in Colorado counties' 4th Quarter 2014

Foreclosure rates are split into 4 categories: 1. (burgundy) More than 0.5 percent of all households. 2. (green) From .25 up to and including .50 percent of all households. 3. (orange) From 0.1 up to and including 0.25 percent of all households. 4. (yellow) 0.1 percent, or less, of all households.

Rates of foreclosure for each county are listed in Table 3 of the appendix.

Statewide, there was approximately 1 completed foreclosure (foreclosure sale) per 1,676 households for the fourth quarter of 2014. The map shows that there are few hot spots for foreclosure left in Colorado, and those that remain, such as Bent County, are small markets where foreclosure rates can move up and down quickly.

Pueblo County was the only metropolitan county found among the counties with the top ten foreclosure rates. Most of the counties in the top ten were mountain and rural counties including Moffat, Gilpin, and Las Animas counties.

Pueblo and Mesa counties reported the highest foreclosure rates of the metropolitan counties. Mesa County reported a foreclosure rate of one foreclosure per 832 households while Pueblo County reported a rate of 1 foreclosure per 644 households. See Table 3 for full listing.

Boulder County reported the lowest foreclosure rate among metropolitan counties with 1 completed foreclosure per 6,261 households.

It is important to note that counties with small populations are also prone to very volatile foreclosure rates as a small rise or fall in the total number of foreclosures can significantly change the foreclosure rate in a small county for a quarter.

Future Outlook

At this time, foreclosure activity continues to be low by historical standards, and there are not signs at this time of a new upward trend. Current foreclosure rates are now comparable to past historical periods when real estate markets were strong and foreclosure activity was relatively rare.

Methods

The Colorado Division of Housing has sought to collect foreclosure information on all 64 counties. Data is collected directly from the Public Trustee's office in each county. Some numbers in this report reflect corrections made to statistics reported in earlier reports.

The per-household calculation for each county is based on 2013 (the most recent year available) estimates of occupied households provided by the Colorado State Demographer.

The household number is that of "total occupied housing units" in each county. Owner-occupant totals are only available for a minority of Colorado counties, so for purposes of consistency across all counties, occupied housing unit totals are used.

The Colorado Division of Housing wishes to acknowledge the invaluable assistance of Carol Snyder, the former Public Trustee of Adams County, Robert Sagel, the Public Trustee of Morgan County, and the Public Trustee Association, although neither Ms. Snyder, Mr. Sagel, nor the Association bear any responsibility for any errors or for the conclusions and analysis contained in this summary.

Appendices

Table 3: Foreclosure rates based on the number of occupied housing units per completed foreclosure and percentage of all occupied housing units. 2013 household numbers are the most recent available.

County	Households (2013 estimates)	2014 4th Q Foreclosure Sales	Foreclosure Rate by Percentage	Foreclosure Rate by No. of Households per Completed Foreclosure
