

COLORADO

Department of Local Affairs

Division of Housing

3rd Quarter 2016 Foreclosure Report

The Colorado Division of Housing is a division of the Colorado Department of Local Affairs

December 27, 2016

Summary and Methods

As part of an effort to provide information to the public and government agencies on economic trends in Colorado, the Division of Housing compiles quarterly totals on foreclosure activity in Colorado Counties. Data is collected from the public trustee in each county and published quarterly by the Division of Housing.

This report seeks to provide two essential pieces of information:

Foreclosure Filing Statistics:

The recording of the notice of election and demand (NED) is the event that begins the foreclosure process. In general, when a borrower is at least 3 months delinquent and in default, the lender will file an NED with the public trustee and the borrower will receive notice of the initial sale date. This notice will be sent from the public trustee's office in the county in which the property is located, and at this point, the property is in foreclosure.

The Public Trustee filings provide an objective measure of how many foreclosure proceedings have been initiated in a given county. Such filings can be "cured" and "withdrawn" before the property is sold at auction, meaning that not all foreclosure filings result in a final foreclosure sale. However, Public Trustee numbers are a useful indicator of the number of loans in a county that have become seriously delinquent, and they provide insights into the overall health of the real estate market within that county.

We should note that in addition to single-family homes, condominiums, and townhomes, NED statistics include filings on agricultural, industrial, commercial, and multifamily properties. Vacant land is included as well.

Foreclosure Sale Statistics: Approximately 110-125 days after the initial filing, the property may be sold at the Public Trustee auction to a third party or to the mortgage company. Once the foreclosure sale takes place, eviction proceedings will proceed during the next several weeks.

As listed below, the foreclosure filings number and the foreclosure auction sales number are two independent numbers. In other words, the properties that went to final sale during the current quarter are not the same properties which entered the foreclosure process the same quarter. For example, among properties that went to sale during a given quarter, a large portion of those foreclosures were filed at least four months earlier, meaning a foreclosure filing and foreclosure sale do not occur within the same quarter. The period between the foreclosure filing and the foreclosure sale at auction is legally at least 110 days, but in some cases, this period may actually last much longer.

Why are both numbers important?

The foreclosure filings number provides a view of how many borrowers have become seriously delinquent on their loans. Foreclosure filings provide a good guide to foreclosure activity in a given county, and while a property may be withdrawn from the foreclosure process after a filing is made, the filings statistics nevertheless indicate where borrowers are delinquent and in default.

The foreclosure sale numbers generally indicate how many borrowers have lost all equity in the property as the result of it being sold to another party at auction, including the mortgage company, an investor, or others. Many households in the foreclosure process lose their properties through a variety of processes such as short sales and deed-in-lieu-of-foreclosure agreements. Losing the property through a foreclosure sale, however, is generally most damaging to the credit of the borrower, and foreclosure (unless the property is sold at auction for more than the value of the loan) does not allow for the borrower to preserve any of the equity he or she might still have in that property.

Study Findings

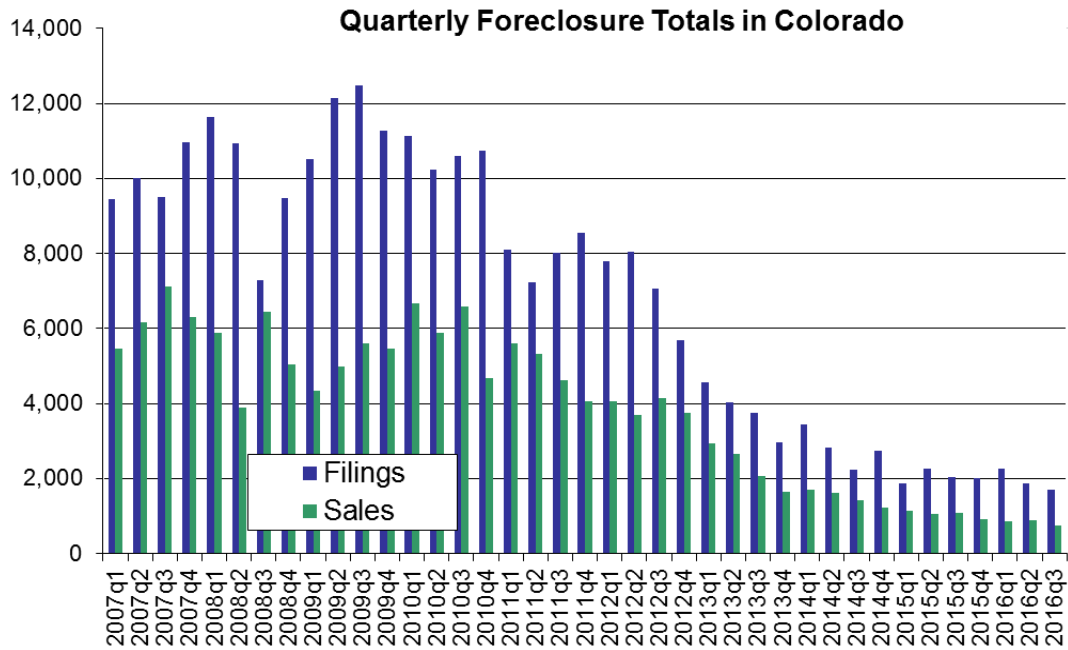

Foreclosure activity in 2016 continued to fall to new lows. During the third quarter of 2016, Colorado public trustees reported 1,721 foreclosure filings and 751 sales at auction (completed foreclosures). During the third quarter of last year, there were 2,058 filings and 1,089 sales. Comparing year-over-year for the third quarter, foreclosure filings fell 16.4 percent and completed foreclosures fell 31 percent.

Comparing the third quarter of 2016 to the previous quarter, foreclosure filings fell 8.1 percent from 1,872 to 1,721. Foreclosure sales fell 2.6 percent from 883 to 751 during the same period.

Below is a time series showing quarterly totals in foreclosure filings and sales. The large dip in sales shown during the second quarter of 2008 can be attributed to a change in the foreclosure time line that took effect on January 1, 2008 and led to a large temporary dip in the number of foreclosure sales during March, April, and May of that year. In recent quarters, foreclosure filings and sales have stabilized and flattened.

Overall, foreclosure totals are at remarkably low levels, and now similar to foreclosure activity observed during the economic boom of the 1990s in Colorado.

Graph 1: Quarterly Foreclosure Filings vs. Sales at Auction:

Graph 2: Annual Foreclosure Totals (2016 is YTD, through September):

Note: Annual totals are available since 2003, but quarterly totals are only available since 2007.

Table 1: Foreclosure Filings

Year	Foreclosure Filings
2003	14,858
2004	18,127
2005	22,894
2006	28,435
2007	39,920
2008	39,333
2009	46,394
2010	42,692
2011	31,975
2012	28,579
2013	15,333
2014	11,235
2015	8,241
2016 (January-September)	5,872

Table 2: Foreclosure Sales at Auction

Year	Foreclosure Sales
2003	8,239
2004	10,566
2005	13,642
2006	17,451
2007	25,054
2008	21,306
2009	20,437
2010	23,891
2011	19,617
2012	15,903
2013	9,318
2014	6,003
2015	4,209
2016 (January-September)	2,495

Quarter-by-Quarter Analysis

There are not large seasonal changes in foreclosure activity in Colorado, although the third quarter tends to be the most active quarter for foreclosure sales in Colorado.

Since 2010, foreclosure sales at auction have declined in every quarter when compared to the same quarter a year earlier. For the second quarter, foreclosure activity is at the lowest level measured since this survey was initiated in 2007.

County Statistics

Trends in different counties throughout the state vary considerably. The 12 metropolitan counties in Colorado now account for slightly more than 82 percent of all foreclosure filings activity in Colorado. However, in 2007 the 12 metropolitan counties accounted for more than 90 percent of foreclosure activity in Colorado, indicating that foreclosure activity outside the metropolitan areas has become relatively more common.

Aggregate statewide totals and trends do not necessarily reflect changes in foreclosure totals at the county level as county-level changes were not uniform throughout the state.

The map below shows foreclosure rates in each county. Categories reflect proportions of households completing the foreclosure process in each county. Overall, foreclosure activity remains down considerably from when the survey was begun in 2007. The top counties for foreclosure activity shown here are Moffatt, and Rio Blanco counties. However, even these counties are at low levels of foreclosure activity by historical standards.

Map 1: Foreclosure rates in Colorado Counties, 3rd Quarter 2016

Foreclosure rates are split into 4 categories: 1. (burgundy) More than 0.5 percent of all households. 2. (green) From .25 up to and including .50 percent of all households. 3. (orange) From 0.1 up to and including 0.25 percent of all households. 4. (yellow) 0.1 percent, or less, of all households.

Rates of foreclosure for each county are listed in Table 3 of the appendix.

Statewide, there was approximately 1 completed foreclosure (foreclosure sale) per 2,842 households for the 3rd quarter of 2016.

Only one metropolitan county was found among the top ten counties for foreclosure sales rates: Mesa County. Most of the counties in the top ten were mountain and rural counties including Rio Blanco, Las Animas, and Archuleta counties. But, foreclosure activity in all counties remained small compared to levels seen from 2007-2010.

Pueblo and Mesa counties reported the highest foreclosure rates of the metropolitan counties. Pueblo County reported a foreclosure rate of one foreclosure per 789 households while Mesa County reported a rate of 1 foreclosure per 682 households. See Table 3 for full listing.

Broomfield County reported the lowest foreclosure rate among metropolitan counties with 1 completed foreclosure per 24,841 households.

Future Outlook

So far, 2016 shows no signs of sizable growth in foreclosure activity, and the first quarter's year-over-year gain in foreclosure sales has turned out to not have indicated any new trend at this time. So long as employment data continues to point toward economic stability, it appears that any surge in foreclosure activity is unlikely.

Methods

The Colorado Division of Housing has sought to collect foreclosure information on all 64 counties. Data is collected directly from the Public Trustee's office in each county. Some numbers in this report reflect corrections made to statistics reported in earlier reports.

The per-household calculation for each county is based on 2013 (the most recent year available) estimates of occupied households provided by the Colorado State Demographer.

The household number is that of "total occupied housing units" in each county. Owner-occupant totals are only available for a minority of Colorado counties, so for purposes of consistency across all counties, occupied housing unit totals are used.

The Colorado Division of Housing wishes to acknowledge the invaluable assistance of Carol Snyder, the former Public Trustee of Adams County, Robert Sagel, the Public Trustee of Morgan County, and the Public Trustee Association, although neither Ms. Snyder, Mr. Sagel, nor the Association bear any responsibility for any errors or for the conclusions and analysis contained in this summary.

Appendices

Table 3: Foreclosure rates based on the number of occupied housing units per completed foreclosure and percentage of all occupied housing units.

County	Households (2015 estimates)	2016 3rd Q Sales	Foreclosure Rate by Percentage	Foreclosure Rate by No. of Households per Completed Foreclosure
