

# COLORADO ASSESSED VALUES

## 1991 to 2004

Prepared by the

**COLORADO DIVISION OF PROPERTY TAXATION**

Mary E. Huddleston, Property Tax Administrator

February 2005

# INTRODUCTION

This is the fifth edition of the Colorado Assessed Values report, which provides a visual snapshot of value changes within each county and statewide, since 1991. The manual displays assessed values as reported on county Abstracts of Assessment, first as countywide totals and then as totals for each property class. Beginning with this edition, the values from non-reappraisal (even numbered) years are included. For years 1991-1998, the state assessed personal property values of certain counties were adjusted because the split between real and personal was not uniformly reported.

For residential property, both assessed and actual values are shown. Together, they illustrate the effect of a constitutional provision that requires a biennial adjustment of the residential assessment rate. Known as the Gallagher amendment, the provision was enacted by voters in 1982 with the intent of maintaining a consistent relationship over time between the tax revenue generated from residential property versus non-residential property. From 1991 to 2003, the residential assessment rate was adjusted downward from 14.34 percent to 7.96 percent. During this period, the actual (market) values of residential property increased statewide by 312.7 percent, while residential assessed values increased by a more modest 129.1 percent. The assessment rate for most non-residential property is fixed at 29 percent. A table on page two of the introduction also displays the effect of Gallagher by comparing the statewide value distribution of actual and assessed values since Gallagher's inception.

This report also contains two charts per county that are devoted to personal property. The first shows state assessed personal property and the second is comprised of all taxable personal property, including state assessed. Their intent is to show that counties with a large percentage of value in the state assessed class generally have a large percentage of value comprised of personal property. Approximately 90 percent of all state assessed property value is personal. A table found on page three of the introduction displays the distribution of locally and state assessed personal property by county.

A more detailed listing of assessed values and revenue is found in the Annual Report to the Governor and the General Assembly. The Annual Report lists county assessed values, parcel counts, unit counts and/or acreages according to property subclassification. It also includes the mill levies and property tax revenue certified by local governments. The most recent editions of the Annual Report, and the Colorado Assessed Values report, are found on the Division of Property Taxation website at <http://www.dola.state.co.us/PropertyTax/Publications/PublisIntro.htm>. Earlier editions can be obtained by calling the Division at (303)866-2371.

## COLORADO ASSESSED VALUES

ASSESSED VALUES				DISTRIBUTION OF VALUE			
Year	Total	Residential	Non-Residential	Year	Total	Residential	Non-Residential
1983	\$17,185,698,000	\$7,424,951,000	\$9,760,747,000	1983	100.00%	43.20%	56.80%
