# INTRODUCTION

The Colorado Assessed Values Manual provides a visual presentation of historical value changes within each county, and statewide, for each class of taxable property. The data reported in this manual covers tax years 2009-2023. These values are reported annually by Colorado assessors on their Abstracts of Assessment. **NOTE:** The 2023 tax year was significantly modified by legislation that was passed by an extraordinary session of congress. The most notable results were a reduced residential assessment rate on top of an actual value adjustment. Thus, residential actual values cannot be calculated like they were in the past, and numbers reported here are actually from a separate data submission by the assessors in connection with calculating certain local government revenues.

There are various graphs with accompanying data for each of Colorado's 64 counties, as well as for statewide totals. The first graph shows the taxable value for each class and how much of the total each class makes up. The remaining graphs and data show the change in taxable value, both for the whole county, and then for each class of property, over a 15-year period. The last few graphs provide more detailed information on personal property values over time and distinguish the changes in locally assessed and state assessed personal property.

**Residential Property:** For the residential property class, both the assessed and actual values are provided in this manual. The assessment ratios for both residential and non-residential property (except for producing mines and oil and gas leaseholds and land) are as follows:

**Personal Property:** The last page of graphs for each county displays a history of personal property values. Except for vacant land and residential property, each class of taxable property is comprised of both real property (land and buildings), and personal property. Most personal property is valued annually by the county assessor, but state assessed values, which consist of both real and personal property, are established annually by the Division of Property Taxation. In 2023, approximately **90.69** percent of all state assessed property value is personal property. A table found on page seven of this introduction displays the distribution of locally and state assessed personal property by county.

A more detailed listing of assessed values and revenue is found in the Annual Report to the Governor and the General Assembly. Recent editions of the Annual Report to the Governor and the General Assembly, and the Colorado Assessed Values Manual are found on the Division of Property Taxation's website at <https://dpt.colorado.gov/>.

Earlier editions can be obtained by calling the Division at 303-864-7777.
