Colorado Water Conservation Board  
Urban Drainage and Flood Control District  
Boulder County  
Weld County

August 1976

## APPENDIX II

A limited number of copies of this appendix has been produced for planners, engineers, developers, and others concerned with the development of Coal Creek and Rock Creek flood plains. It was prepared by the U. S. Department of Agriculture, Soil Conservation Service, in cooperation with the Colorado Water Conservation Board, the Urban Drainage and Flood Control District, Boulder and Weld Counties.

Included are computations for a theoretical floodway capable of carrying the 100-year frequency discharge at an increase in rise in water surface elevation above the pre-floodway water surface elevation. Data are in computer printout form and include floodway widths, cross sectional flow area, and average velocities. Computations are for an increase in rise of water surface in 0.5' increments from 0.0' to 2.0' above the 100-year flood. The theoretical floodway was computed on the basis of equal conveyance reduction from each side of the flood plain. The "Floodway widths - HUD 15 Computer Program," developed by the Soil Conservation Service, is the methodology used for the computations.

The data are keyed to the original cross sections and are compatible for use with the water surface profiles, photomaps, and other exhibits in the main report. The floodway stationing at each cross section is from left to right when viewed in a downstream direction.

As a general guide for orientation purposes, the following designations are assigned to stream names, photomap, reach, and cross-section numbers.

<u>Stream Name</u>	<u>Photomap Numbers</u>	<u>Reach Number</u>	<u>Cross Section Number</u>
Coal Creek	1-3	1	5-19
Coal Creek	3-6	2	19-35
Coal Creek	6-8	3	35-46
Coal Creek	8-13	4	46-85
Coal Creek	13-15	5	85-100
Rock Creek	8-9, 16-17	6	46-120
Rock Creek	17-20	7	120-138

The locations of the study reaches and photomap designations are illustrated on the Mosaic Sheet Index. A small scale reproduction of the Mosaic Sheet Index from the main report is included on the following page.

The hydrologic, hydraulic, and other pertinent data are on file with the U.S. Department of Agriculture, Soil Conservation Service, 2490 West 26th Avenue, Denver, Colorado.
