

Current as of
September 23, 2025
Published September 24, 2025

**The minimum
mapping unit is the
local watershed.**

This map depicts
watersheds where collared
wolves in Colorado have
been from August 26, 2025
- September 23, 2025. In
order for a watershed to
indicate wolf activity, at
least one GPS position was
recorded within the
boundaries of the
watershed.

**Simply because a
watershed indicates
wolf activity, it does
not mean that a wolf
or wolves are present
throughout the entire
watershed.**

 Wolf activity in
watershed

A watershed is a geographic unit that drains water
into a specific waterbody. These are also known as
Hydrologic Unit Codes (HUC). Information is shared
at the HUC 10 level. More can be learned about
HUC at <https://water.usgs.gov/themes/hydrologic-units/>.
