#702 - BOARD AUTHORITY

1. The Board may waive the requirement for a park pass, or it may close any state park or state recreation area, or portions thereof, whenever it finds the action necessary to protect and promote the health,

safety and general welfare of the people of this state.

SPECIAL ACTIVITIES

#703 - SPECIAL ACTIVITIES REQUIRING PERMITS

1. "Special activities" means those events which have the potential for a significant adverse impact on park values or health, safety or welfare of park visitors or which may otherwise require special planning/scheduling for proper management. Special activities shall require prior approval in the form of a special-activities permit. Applications thereof generally shall be made to the Park Manager at least ninety (90) days prior to the event. Such application must be accompanied by the appropriate application filing fee. This requirement for an application to be filed ninety days prior to an event will be waived in rare circumstances where arrangements can be made in a shorter time without putting undue administrative burden on the Park Manager or when no special arrangements are necessary.
2. The decision of whether to approve special activity permits will be made by the Park Manager when it is determined that the special activities will not involve the use of a park or recreation area by a group of persons totaling more than the park or recreation area's established carrying capacity. Otherwise, the Regional Manager shall make the decision of whether to approve the permits. The decision of whether to approve special activities permits will be based on the impact on park values and/or the health, safety and welfare of park visitors and other affected persons, and also will be based on:
 - a. The nature of the park or recreation area and the types of recreational opportunities/resources it is intended to provide the public
 - b. The carrying capacity of the facility or facilities to be utilized during the special activity compared to:
 - (1) The total number of park visitors (including participants and spectators in the special activity) expected to utilize such facilities; and
 - (2) The total number of vehicles, vessels or persons expected to participate in or be attracted to such activities.
 - c. The extent to which the special activity will contribute to the variety of outdoor recreational opportunities available to the people of this state and its visitors.
 - d. The extent to which the special activity places an administrative burden on the staff of the park area.
3. Permits will be denied when a proposed special activity would have significant adverse impact on park values, pose significant threats to the health, safety or welfare of park visitors or other person, be inconsistent with area management plans or intended facility use, or place an unreasonable administrative burden on park staff.
4. Whenever it is determined that any special activity will involve the use of a park or recreation area by a group of persons totaling more than the park's or recreation area's established carrying capacity a thirty day written public comment period and a public meeting shall be required prior to the granting of a permit. The Park Manager shall publish notice of both the written comment period and the meeting at least once in a newspaper of general circulation in the county or counties wherein said park or recreation area is located. The meeting shall be conducted by the Division representative responsible for the permit issuance decision and shall be held either at the park or recreation area, or within a county in which the park or recreation area is located. Such public meeting is not intended to be an adjudicatory licensing hearing under the provisions of the Colorado Administrative Procedures Act, but only as an opportunity for public comment.

5. An application for a permit shall be acted upon promptly, and the applicant shall be notified immediately after the taking of action on the application. If the application is denied, the applicant shall be notified in writing within five working days of such action. Such written notification shall include the basis for the denial. The applicant may submit a written appeal of a denial to the Division Director within sixty days of receipt of the denial, requesting a hearing pursuant to section 24-2-104(9), C.R.S., if the date of the proposed special activity is to occur within the sixty day appeal period, then the applicant shall submit any written appeal as soon as practicable so as to allow a reasonable time for the Director to act upon the appeal. Absent special circumstances justifying a later submittal and depending upon the nature of the proposed special activity and the amount of preparation required on the part of the Division for such activity, generally an appeal submitted less than twenty-five days prior to the proposed special activity will be deemed untimely.
6. Upon written request, the Division shall waive the requirement for a parks pass for those vehicles when all the occupants are entering parks and outdoor recreation areas for the purpose of administering permitted special activities and not for the purpose of their own recreation.
7. For special activities where the Division representative responsible for the permit issuance decision determines it will be a greater administrative ease for the Division to administer the activity, an alternative fee of \$2.00 per person per day may be charged for admission of persons attending or participating in the special activity. This permission shall apply only to groups of twenty or more persons.

Except as provided in these regulations or authorized by the Divisions or under Title 33 or Title 35 C.R.S., it shall be unlawful for any person to possess, import, export, ship, transport, release, place, plant, or cause to be released, placed, or planted into the waters of the state any aquatic nuisance species.
- b. The Divisions' authorized personnel, authorized agents, qualified peace officers, private inspectors, and private decontaminators are permitted to possess and transport live or dead aquatic nuisance species samples for the purposes set forth in Article 10.5 of Title 33, C.R.S. and in these regulations.

- b. Authorized agents shall be certified by the Divisions prior to providing any inspection or decontamination services. A description of training stages and certification requirements is available from the Divisions. After receiving proper training and certification from the Divisions, authorized agents may stop, detain and inspect vessel or other floating device. Authorized agents do not have any authority to order vessel or other floating device decontaminated, nor do they have the authority to impound or order the quarantine of any vessel or other

floating device. Authorized agents shall be authorized to perform decontaminations at the direction of a qualified peace officer or at the voluntary request of any person transporting a vessel or other floating device.

- c. Prior to providing any inspection and/or decontamination services, authorized agents and private inspectors and/or decontaminators must successfully complete the Divisions' training course, must maintain active certification and must comply with all quality assurance requirements as listed herein.

#803 – INSPECTIONS

- a. Inspections may be conducted by
 - 1. Any qualified peace officer;
 - 2. Any authorized agent or private inspector and/or decontaminator who has been properly trained as required by the Divisions, who holds a valid, active certification and who is in good standing with the Divisions' quality assurance checks.
- b. All persons transporting a vessel or other floating device from a water of the state known to be infested, as determined in regulation #806 D, must be inspected prior to leaving the infested water, or if state authorized inspection facilities are not open or otherwise available, must be inspected prior to launch in any other water of the state. All waters determined to be infested shall be posted and a list of infested waters will also be available from the Divisions.
- c. All persons transporting a vessel or other floating device must go to a state authorized inspection location and submit to and receive documentation of an inspection prior to launching in any water of the state if the vessel or other floating device has been in another state's waters in the last 30 days, or if they are not registered in Colorado.
- d. Inspectors will determine if there is a reasonable belief that aquatic nuisance species are present by interviewing the person transporting the vessel or other floating device and using visual and/or tactile inspection methods and using appropriate forms supplied by the Divisions.
- e. All vessels or other floating devices of any kind, are subject to inspection in accordance with WID procedures prior to launch onto, operation on or departure from any waters of the state or vessel staging areas.

All compartments, equipment and containers that may hold water, including, but not limited to, live wells and ballast and bilge areas shall be drained as part of all inspections.
- f. Any vessel or other floating device found or reasonably believed to contain aquatic nuisance species shall be decontaminated using WID

procedures before said vessel or other floating device will be allowed to launch onto, operate on or depart from any waters of the state or vessel staging areas.

- g. Compliance with the above aquatic nuisance species inspection and removal and disposal requirements is an express condition of operation of any vessel or other floating device on waters of the state. Any person who refuses to permit inspection of their vessel or other floating device or to complete any required removal and disposal of aquatic nuisance species shall be prohibited from launching onto or operating the vessel or other floating device on any water of the state. Further, the vessel or other floating device of any person that refuses to allow inspection or to complete any required removal and disposal of aquatic nuisance species prior to departure from any water of the state or vessel staging area where any aquatic nuisance species is known to be present is subject to impoundment until said aquatic nuisance species inspection and/or decontamination is completed.
- h. Any person operating a vessel or other floating device may be ordered to remove the vessel or device from any water of the state by any qualified peace officer or authorized agent if they reasonably believe the vessel or other floating device was not properly inspected prior to launch or may otherwise contain aquatic nuisance species. Once removed from the water, the vessel or other floating device shall be subject to inspection for, and the removal and disposal of aquatic nuisance species.
- i. Any authorized agent or private inspector or private decontaminator who, through the course of an inspection, determines there is a reasonable belief that aquatic nuisance species are present shall document the inspection, including but not limited to, type and number of aquatic nuisance species suspected and/or detected and identification of the vessel or other floating device, including license plate numbers and hull and/or vehicle identification numbers, if available. Further, the authorized agent or private inspector/decontaminator shall advise the operator that the vessel or other floating device is suspected of possessing aquatic nuisance species and that it must be decontaminated according to WID procedures as soon as possible. Only qualified peace officers have the authority to order decontamination, impound or quarantine of a vessel or other floating device.
- j. Once a vessel or other floating device is inspected and/or decontaminated, a WID seal may be attached to the vessel or other floating device by a qualified peace officer, authorized agent, or private inspector/decontaminator. A receipt using the Divisions' form shall accompany all WID seals. WID seals shall be attached to a vessel or other floating device as specified by the Divisions. A WID seal, once properly attached to a vessel or other floating device by a qualified peace officer, authorized agent, or a private inspector/decontaminator, and when accompanied by the proper receipt, documents a proper inspection or decontamination procedure.
- k. If a vessel or other floating device contains bait in water, then the owner or operator will be required to produce a receipt for the bait from a Colorado bait dealer with a date clearly printed on the receipt and the date is no more than 7 days previous. If the owner or operator does not have such a receipt, then they will be required to transfer such bait into a temporary holding container. The bait will be removed from the vessel's or other floating device's live well or container and placed into the holding container using a net while attempting to minimize as much as possible any transference of water from the live well. The live well or container will then be drained and decontaminated using proper WID procedures before restocking with the bait can occur. Whenever possible, water from the water body that the vessel is going to be launched into should be used for restocking the bait.

#804 – DECONTAMINATION

- a. The Divisions will only recognize the decontamination methods listed herein that are recognized as proper WID procedures. All treatments will be employed following all applicable laws, disposal methods, recommended safety precautions, and safety equipment and procedures.
- b. To decontaminate water compartments, equipment or containers in a vessel or other floating device to address potential presence of larvae or waterborne aquatic nuisance species, the only acceptable methods will be rinsing and flushing with water of 140 degrees F or hotter.
- c. To decontaminate the exterior of a vessel or other floating device, remove or destroy attached aquatic nuisance species, all visible mud, plants, and organisms. The entire exterior of the vessel or other floating device and all intakes will be thoroughly washed with hot water (140 degrees F or hotter) and as necessary use scrubbing or high pressure water (a minimum of 250 psi). All compartments, equipment and containers that may hold water including, but not limited to live wells, ballast and bilge areas, will be flushed with hot water (140 degrees F or hotter) but not at high pressure. If a bilge pump is present, then it will be run until the bilge appears to be empty. The lower unit of the engine will be thoroughly flushed with hot water (140 degrees F or hotter).
- d. After decontamination, authorized agents, private decontaminators, or qualified peace officers must re-inspect the vessel or other floating device to ensure complete decontamination prior to the release of the vessel or other floating device.
- e. Proof of decontamination will consist of a receipt using the form “ANS Documentation and Vessel Decontamination Form” provided by the Divisions. Such forms shall document the reasons for the decontamination, any aquatic nuisance species found, the date and location of the decontamination, and the method(s) of decontamination used. Authorized agents, private decontaminators, or qualified peace officers may also apply a WID seal to document the decontamination procedure.

#805 – IMPOUNDMENT

- a. All vessels or other floating devices are subject to impoundment if the person in charge of the vessel or other floating device:
 1. Refuses to allow an inspection of the vessel or other floating device to be conducted by an authorized agent or qualified peace officer.
 2. Refusals to allow a decontamination of the vessel or other floating device when decontamination is ordered by a qualified peace officer.
- b. If the person in charge of the vessel or other floating device is not the registered owner then the registered owner shall be notified by mail, return receipt requested, within ten days of the location of the impounded vessel or other floating device. Such notification must also include contact information for the qualified peace officer ordering the impoundment. If the registered owner is present when the vessel or other floating device is ordered impounded, then the same information shall be provided to the registered owner at the time the order is issued.
- c. All vessels or other floating devices will be held in impound at the risk and expense of the owner. A vessel or other floating device under impound for non-compliance with aquatic nuisance species laws may be released only after a qualified peace officer is satisfied by inspection or quarantine that the vessel or other floating device is no longer a threat to the aquatic resources and water infrastructure of the state. Only a qualified peace officer may authorize the release of the vessel or other floating device.
- d. No vessel or other floating device impounded may be moved or released until an impound release form is signed and executed by a

qualified peace officer. The Divisions will provide impound release forms.

#806 – MONITORING AND IDENTIFICATION

- a. All aquatic nuisance species sampling and monitoring will be coordinated with the Divisions.
- b. Aquatic nuisance species sampling equipment, vessels or other floating devices, and gear will be decontaminated at the conclusion of sampling in compliance with WID procedures.
- c. Aquatic nuisance species sampling and specimen collection for plankton tows, substrate sampling, or shoreline surveys will be conducted using standards and procedures approved in writing by the Divisions.
- d. To initially identify waters infested with aquatic nuisance species, the following standards will be applied before notifying the public of the existence of these aquatic nuisance species:
 1. Zebra and quagga mussel veligers. A multi-phase testing process involving both visual and molecular identification methods will be completed in accordance with the procedural checklist “Multi-Phase Identification of Zebra/Quagga Veligers” available from the Divisions.
 2. Zebra and quagga mussel adults or New Zealand mudsnails. Concurring identification by two or more mollusk identification experts.
 3. Rusty crayfish. Concurring identification by two or more crustacean identification experts.
 4. Waterfleas. Concurring identification by two or more plankton identification experts.
 5. Aquatic nuisance species plants. Concurring identification by two or more aquatic botanical experts.

#807 – REPORTING ANS FINDINGS

- a. Identification of an aquatic nuisance species through sampling and monitoring procedures at a location where that species has not been known to exist will be reported immediately to the Divisions.
- b. If an aquatic nuisance species is suspected, but the identity is not known, for example a plant of unknown identity or organic material resembling juvenile mollusks, then the Divisions shall be contacted within 48 hours and collected samples will be submitted as stated in regulation #806C.
- c. Any person that becomes aware that an aquatic nuisance species is present at a specific location shall report the aquatic nuisance species presence to an authorized agent or a qualified peace officer of the Divisions, or to the Division of Wildlife Invasive Species Program, 6060 Broadway, Denver, CO 80216. Aquatic nuisance species reports should include the date and time of the detection of the aquatic nuisance species, the exact location of sighting (water body and specific location on the water body), the suspected species, and the name and contact information of the reporter.
- d. Aquatic nuisance species or suspected aquatic nuisance species may be reported by:
 1. Telephone: 1-877-STOP-ANS or 1-303-293-6531
