Members, Agriculture, Natural Resources and Energy Committee, Colorado State Senate

**FROM:** Tom Remington, Director, Division of Wildlife

**DATE:** November 1, 2008

**RE: FY 08 Habitat Partnership Program Annual Report**

As required by statute, attached please find the FY 08 report for the Habitat Partnership Program (HPP). HPP is authorized by the State Legislature to “reduce wildlife conflicts, particularly those associated with forage and fence issues, and to assist the Division of Wildlife in meeting game management objectives through duties as deemed appropriate by the Director.” HPP is funded by 5% of big game (deer, elk, antelope, moose) license sales in HPP areas, which amounted to \$2,585,744 million dollars in FY 08.

In FY 08, 19 local HPP committees and the State Council, made up of more than 100 volunteer members representing agricultural producers, sportsmen, federal land management agencies and the DOW met throughout the year to cooperatively discuss and resolve wildlife conflicts. HPP has strong support at the local level due to the makeup of the local committees and their ability to implement projects on the ground quickly. A key benefit of the HPP program is the strong communication and dialogue that takes place among all participants with different perspectives to identify and resolve local problems.

A total of \$15.36 million dollars - \$2.13 million of HPP money leveraged with \$13.23 million of partner money - was spent on projects by the HPP program. In addition, nearly \$3.7 million dollars of in kind services was also provided by our partners and they also contributed nearly 19,000 hours of labor for HPP projects.

Local HPP committees are involved in many diverse projects. Habitat improvement projects are a primary project for most committees and are intended to improve range and habitat conditions for the long term for both wildlife and livestock. Typical habitat improvement projects include weed control, prescribed burning, fertilization, seeding, water developments and shrub and tree cutting.

Fence projects include both new fence construction and repair of existing fences. In many cases and in the partnership spirit of the program, materials are provided to landowners who then make the repairs themselves. Various fence styles and designs are being used by committees, ie. laydown fences, high tensile, electric, 3 or 4 strand wire, designated crossing points, white vinyl top wire, etc are being used to repair the fence while reducing the yearly fence repair issues continually undertaken by ranchers.

HPP also serves to complement the Division's game damage program, primarily by providing or repairing permanent stack yards that protect a rancher's hay. Again, many times materials are provided by the game damage program while the landowner contributes the labor. In addition, hunt coordinators are used by several committees to access private property with hunters to target problem animals causing damages. This helps to gain additional harvest, disperse the offending animals and reduce the DOW's overall financial liability for game damage.

HPP committees are also involved in research and monitoring efforts, information and education projects and conservation easements. As with any program this varied, there are also administrative costs needed to support local committees and projects. As you can see, the flexibility of the HPP program and the diverse challenges across the HPP committee area makes this program an active partner in many projects tailored to the local needs.

One area I would like to highlight is the involvement of HPP during the winter of 2007/2008. As you know, the Division was actively feeding big game in several areas due to extreme winter conditions. What may not be as well known is that HPP spent approximately \$150,000 in hay purchases for landowners that were experiencing conflicts with elk. These hay purchases were used to bait elk away from livestock operations, replace hay eaten by elk or to provide hay for elk to eat on private property when there were no other alternatives to move them. This was a vital part of the Division's overall winter efforts and HPP provided much needed assistance to landowners during this time and we addressed many issues by being able to respond quickly in this manner and also helped reduce our game damage liability.

I also wanted to make you aware of a project that HPP has begun working on in FY2009. Although we know that HPP partners are extremely satisfied and supportive of the program, a need was identified to better demonstrate the success of our projects. The State Council and the local committees are beginning work on project monitoring protocols that, over time, will evaluate the vegetative and wildlife responses to treatments and provide another measurement of project effectiveness. I hope to have more to report on this topic in the FY 09 HPP report.

Lastly, the figures used in this report are gathered from projects approved in FY08. If the project has been completed, actual costs and accomplishments figures are used. If the project is incomplete, original estimates provided at the time of approval are used. As approved projects are completed, it's likely that the final figures will change as accomplishments and costs are finalized.

There is much more detailed information available about the HPP program and projects undertaken by it. If you have any specific questions or would like to see additional information, please contact Pat Tucker, HPP Coordinator, at (970) 255-6188.

## HABITAT PARTNERSHIP PROGRAM COLORADO DIVISION OF WILDLIFE

### Glossary of Terms and Abbreviations

**ADM** – administrative projects, ie. committee administrative assistants, State Council and local committee meeting costs and supplies, etc.

**EQP** – equipment purchased by committees for project work. (Prior approval needed and there are limitations on use.)

**FEN** – fencing projects, ie. new construction, repairs (may be labor and/or materials) to existing fences in problem areas, etc.

**GBL** – for HPP projects, 9 GBL's are used to categorize the type of project being done, ie. ADM, EQP, FEN, GDM, INF, MAN, MTC, OTH, RES

**GDM** – game damage projects, ie. new stackyard construction, repairs to existing stackyards (may be labor and/or materials), forage purchases, hunt coordinators

**INF** – information and education projects, ie. brochures, web sites, seminars, workshops, etc

**MAN** – habitat manipulation projects, ie. prescribed burns, brush/tree treatments, fertilization, reseeding, weed control, water developments, etc.

**MTC** – maintenance, ie. supplies and ongoing maintenance for HPP owned equipment.

**OTH** – conservation easement transaction costs and archeological clearances

**RES** – monitoring and research projects, ie. inventory, habitat, movement studies

**Match \$** - actual dollars contributed by a cooperator to a project

**In-Kind \$** - goods or services provided by a cooperator to a project that has a dollar amount calculated for it.

**In-Kind Hours** – time contributed by a cooperator to complete a project.

**HPP Cost** – actual HPP dollars approved by a committee for a project

**Total Cost** – sum of HPP cost, match \$ and in kind \$ contributed to a project

**Private Cost** – HPP dollars spent on private land projects

**Public Cost** – HPP dollars spent on public land projects

## **Cooperator Abbreviations**

BLM – Bureau of Land Management  
CSFS – Colorado State Forest Service  
DOW – Division of Wildlife  
GOCO – Great Outdoors Colorado
