DESIGNATED BASIN

1992

OFFICE OF THE STATE ENGINEER
COLORADO DIVISION OF WATER RESOURCES

George D. VanSlyke
Project Manager

This report represents water level measurement data for the North Kiowa-Bijou Ground Water Management District for the 1992 season. This project was done in cooperation with the Management District and with local well owners. Funding for the project is supplied in part from well permit fees collected and managed by the Office of the State Engineer as a cash fund designated for use in obtaining ground water information throughout the state.

A total of 37 wells were measured During the month of April, 1992. These wells are all part of the observation well network which has been measured for many years. Records on at least one well date back to 1936. However, most of the wells date from the 1950's and 1960's. Water levels in the changes between 1991 and 1992 from a decline of 21.06 feet in T1S, R60W, Sec 3, to a rise of 2.03 feet in T3S, R63W, Sec 13. The well in T1S, R60W, Sec 3 showed a rise of 20.02 feet in 1991. The cause for this is unknown, however, the measurement for this year was rechecked and does not appear to be in error, especially when compared to pre-1991 levels. The ten year period from 1982 to 1992 shows a range from a decline of 15.21 feet in T3N, R59W, Sec 19, to a rise of 14.15 feet in T1S, R62W, Sec 2. The average change for the 1991 to 1992 period is a decline of 0.54 feet if the 21.06 foot decline is not included in the average. The average for 1991 was a decline of 0.71 feet. For the 1982 to 1992 period, the average change has been a decline of 0.80 feet. Or less then 0.1 feet per year.

One Arapahoe Aquifer well is measured in T3S, R63W, Sec 13. The water level in this well has declined 4.8 feet during the last year. Further information concerning water levels in bedrock aquifers in the Denver Basin can be obtained from the Office of the State Engineer.

Included in this report are water level data from 1980 to 1992 for all the wells in the monitoring network. Also included are hydrographs of 29 of the wells and the complete water level data for these wells.

Copies of this report are being made available to all well owners whose wells were measured as part of this project. Additional copies of the report can be purchased from the Office of the State Engineer.
