UPPER BLACK SQUIRREL CREEK DESIGNATED GROUND WATER BASIN 2016

This report contains groundwater level data collected from wells in the Upper Black Squirrel Creek Designated Basin during the period from 2006 through 2016. Acquisition and publication of this information is a cooperative effort between the well owners, Upper Black Squirrel Creek Ground Water Management District and the Colorado Division of Water Resources. The project is part of a statewide groundwater level monitoring program funded by Senate Bill 200 (1987 legislative session). This legislation directed that a portion of the fees collected for water well permit applications be used for the establishment of a program to monitor water level trends throughout the state.

The report contains water level measurements from thirty-five wells. The locations of the wells and the extent of the alluvial aquifer are shown on the following map. Thirty-two water level measurements were recorded in late February 2016. Depth to groundwater below land surface ranged from 7 to 146 feet. Water levels in excess of 100 feet deep were only measured at two locations: BS-15A and BS-SLB4.

The wells in this report are listed by well name in numerical order. Tabular data are presented for each well for the previous ten years while graphical data are presented for the entire period of record. Measurements for the full period of record may be accessed from HydroBase. Wells lacking measurements in the past 10 years have been removed from the monitoring program and are no longer included in this publication. Plate 14 from the Colorado Geological Survey 2008 report, depicting water table contours for January 2008, is reproduced here to provide the user a sense of groundwater flow directions.

Analyses of water level changes in the aquifer are complicated by unknown pumping schedules. Overall, average groundwater levels at measured wells increased by approximately one-half of a foot (0.56 ft) from 2015. The largest decline of 2.46 feet was reported at well BS-07, while the greatest increase of 3.17 feet was reported at well BS-SLB1. Basin-wide, water levels in 2016 were within 0.14 feet of the medium (5-year) and long term (10-year) year-to-year comparisons indicating relatively static water levels.

Copies of this report can be purchased from the Office of the State Engineer, Records Section, 1313 Sherman St., Room 821, Denver, CO 80203, (303) 866-3581. An electronic copy of this report, in Adobe PDF format, is available on the Division of Water Resources website <http://water.state.co.us/groundwater/Levels/Pages/HydroGeo.aspx>.

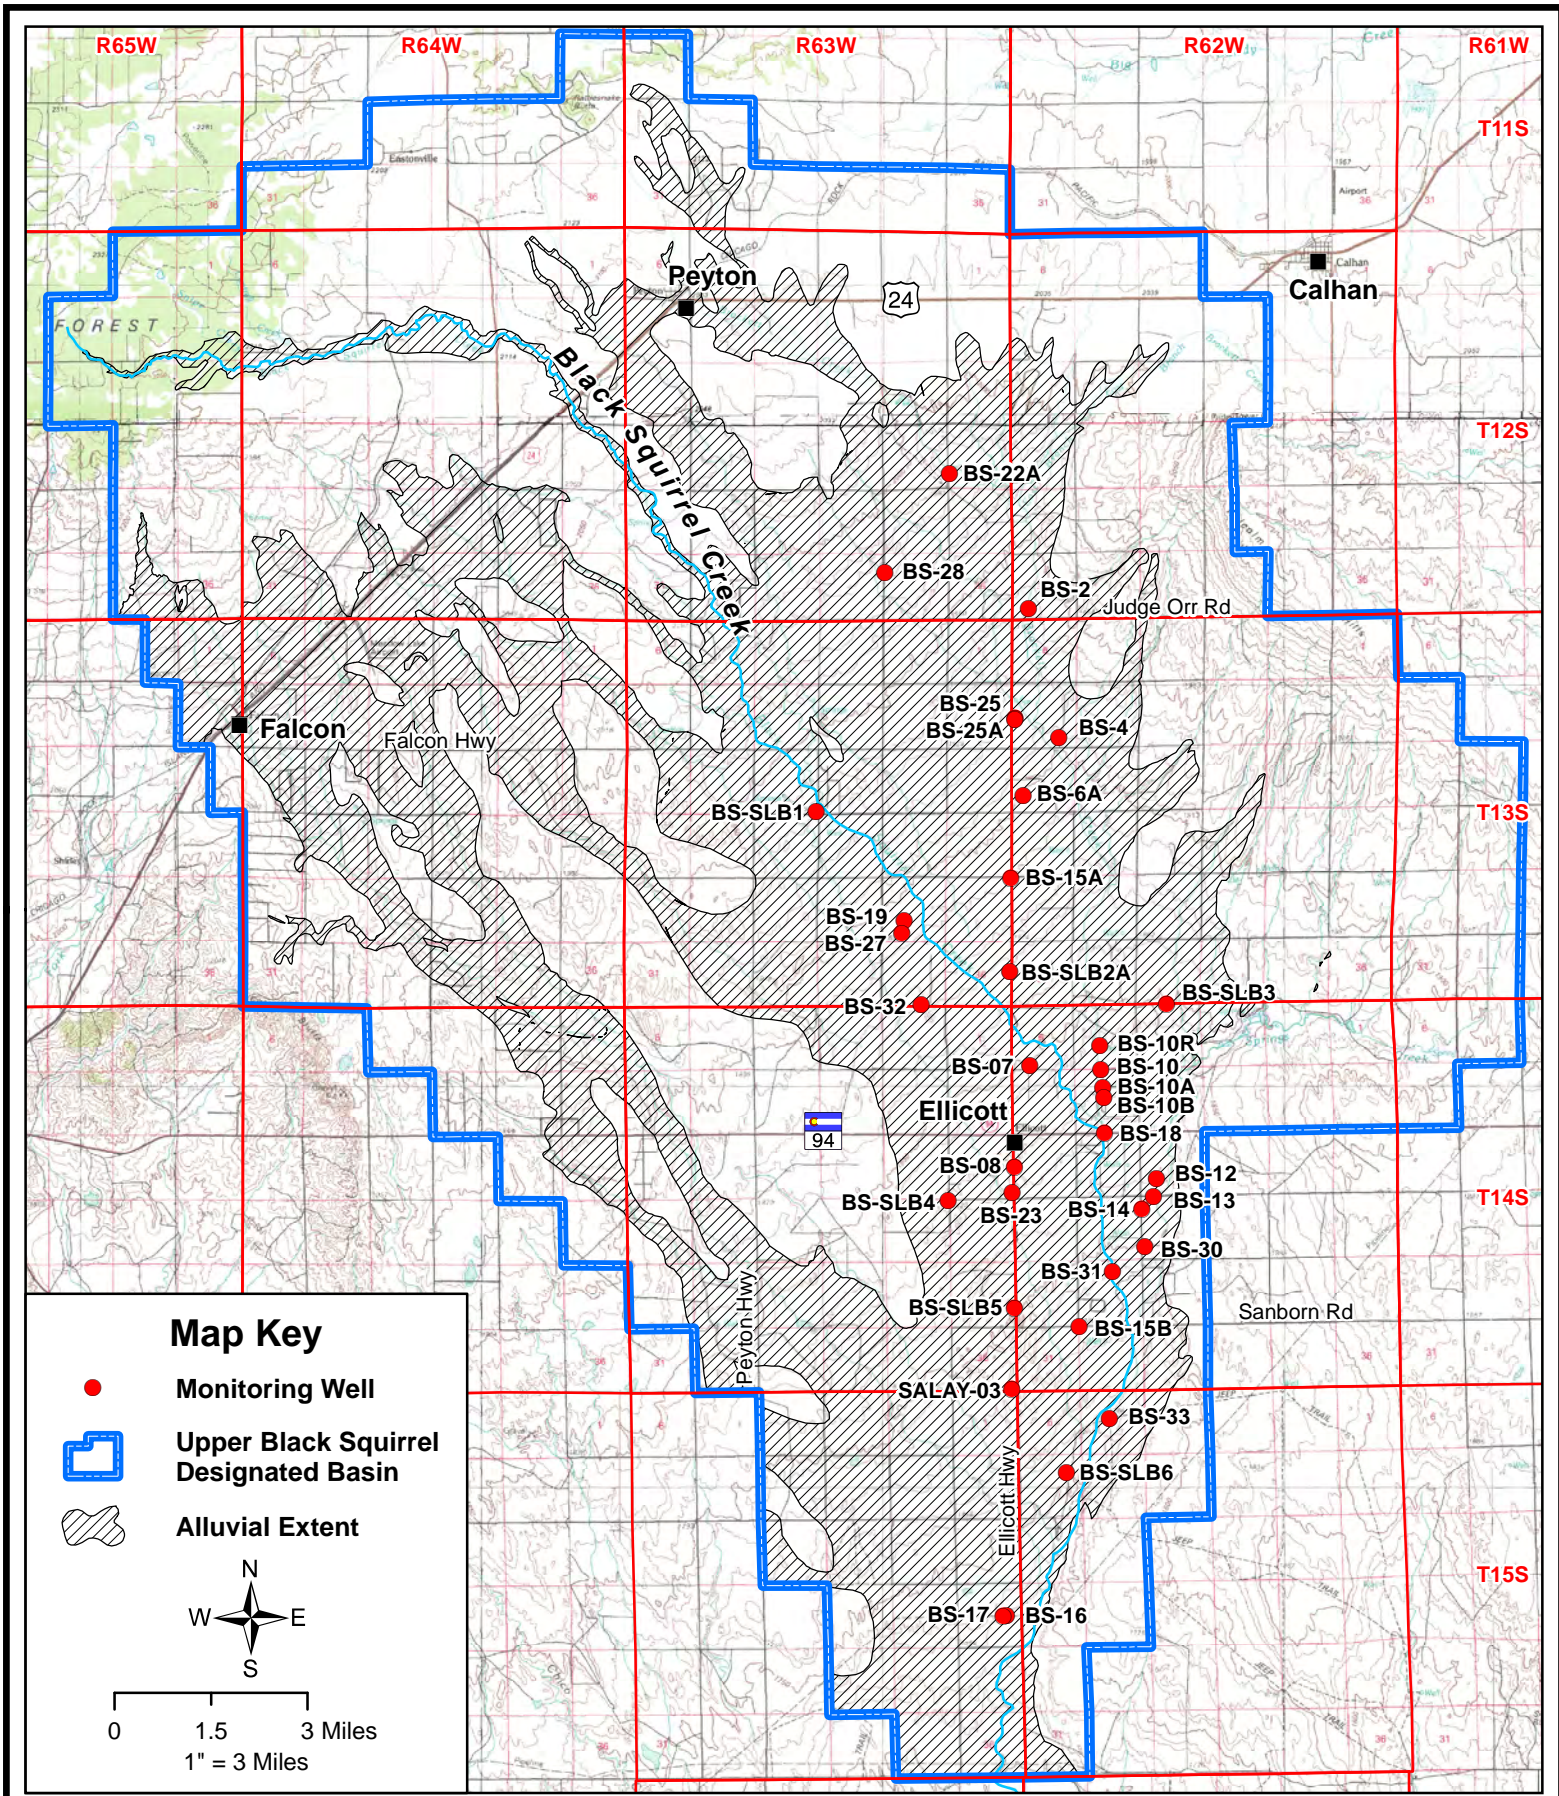

Additionally, all groundwater level data may be accessed and exported using the tools available on the Colorado Decision Support System:
<http://cdss.state.co.us/onlineTools/Pages/GroundWaterWaterLevels.aspx>

and the Colorado Information Marketplace HydroBase Bulk Data Exporter:
<https://data.colorado.gov/Information-Sharing/DWR-Well-Water-Level/hfwh-wsgi>

or the Colorado Decision Support System MapViewer
<http://water.state.co.us/DataMaps/GISandMaps/MapViewer/Pages/FAQ.aspx>

If you have any questions regarding groundwater in the Upper Black Squirrel Designated Ground Water Basin and the information in this report, please contact the Groundwater Information Desk at (303) 866-3587.
