**DENVER BASIN BEDROCK AQUIFERS  
WATER LEVEL MEASUREMENTS  
2023**

This report updates basic data concerning the depth to and elevation of groundwater in the four main Denver Basin bedrock aquifers collected during 2023. The report is organized first by aquifer, then by well name. Well completion information is provided, where available. Wells whose construction information indicates they are completed in more than one aquifer are grouped in this report according to the uppermost aquifer.

Approximately 73 water-level measurements in this year's report were obtained by Division of Water Resources (Division) personnel. Additionally, a total of six wells have been instrumented with data loggers to collect daily water-level data. These include the following:

- four wells in the Castle Rock area that monitor all four Denver Basin aquifers; CO3\_LTDW (DB-204), CO3\_TKD (DB-205), CO6\_KA (DB-206) and CO3\_KLF (DB-203); and
- two wells near Golden in the Pleasant View Metropolitan District are completed in the Arapahoe (DB-201) and Laramie-Fox Hills (DB-200) aquifers.

Water-level data from 71 cooperator wells are also included in this report. Personnel from cooperating water districts and municipalities graciously provided these data upon request. The Division appreciates the cooperation of the many entities that provide water-level information.

Tabular data are presented for each well for the previous ten years. Graphical data show the entire period of record for each well. Wells lacking measurements in the past 10 years have been removed from the monitoring program and are no longer included in this publication, although the data are retained in the Division's HydroBase database.

Analyses of water-level changes in the aquifers are based on single point comparisons and may be complicated by unknown pumping schedules or other site-specific hydrologic factors. Table 1 summarizes some of these water-level changes for each aquifer based on only those wells measured in 2023.

Maps were created to show the spatial distribution of wells by production aquifer and include all wells measured within the past 10 years. Color-coded maps were created to show the change in water levels (by aquifer) for a one-year period (2022-2023) and include only those wells measured in 2023. The changes, both positive and negative, are displayed by color in accordance with the map key.

Recent Legislation has directed the Division of Water Resources, in consultation with the Colorado Water Conservation Board, to encourage qualified parties to submit water-level data for inclusion in the statewide water-level database. Through these efforts DWR created an online Cooperator Groundwater Level Measurement Network where well owners/operators can enroll their well(s) and self-report groundwater levels, both individually and in bulk reporting. DWR is currently working with existing cooperating entities to move to this online reporting portal and encouraging new entities to use this option as well. For more information or to join the program please visit the Water Levels section here:

<https://dwr.colorado.gov/services/data-information#data-submittal>

An electronic copy of this report is available on the Division of Water Resources website:

<https://dwr.colorado.gov/services/well-construction-inspection#groundwater-levels>

The direct link to the Denver Basin Publication Area on the CDSS webpage:

<https://dwr.state.co.us/Tools/GroundWater/WaterLevels?submitButton=Submit&SelectedGeoValue=waterDivisionDiv&SelectedPublicationAreaName=DENVER%20BASIN&SelectedAquiferName=All>

Additionally, all groundwater level data may be accessed and exported using the tools available on the Colorado Decision Support System website:

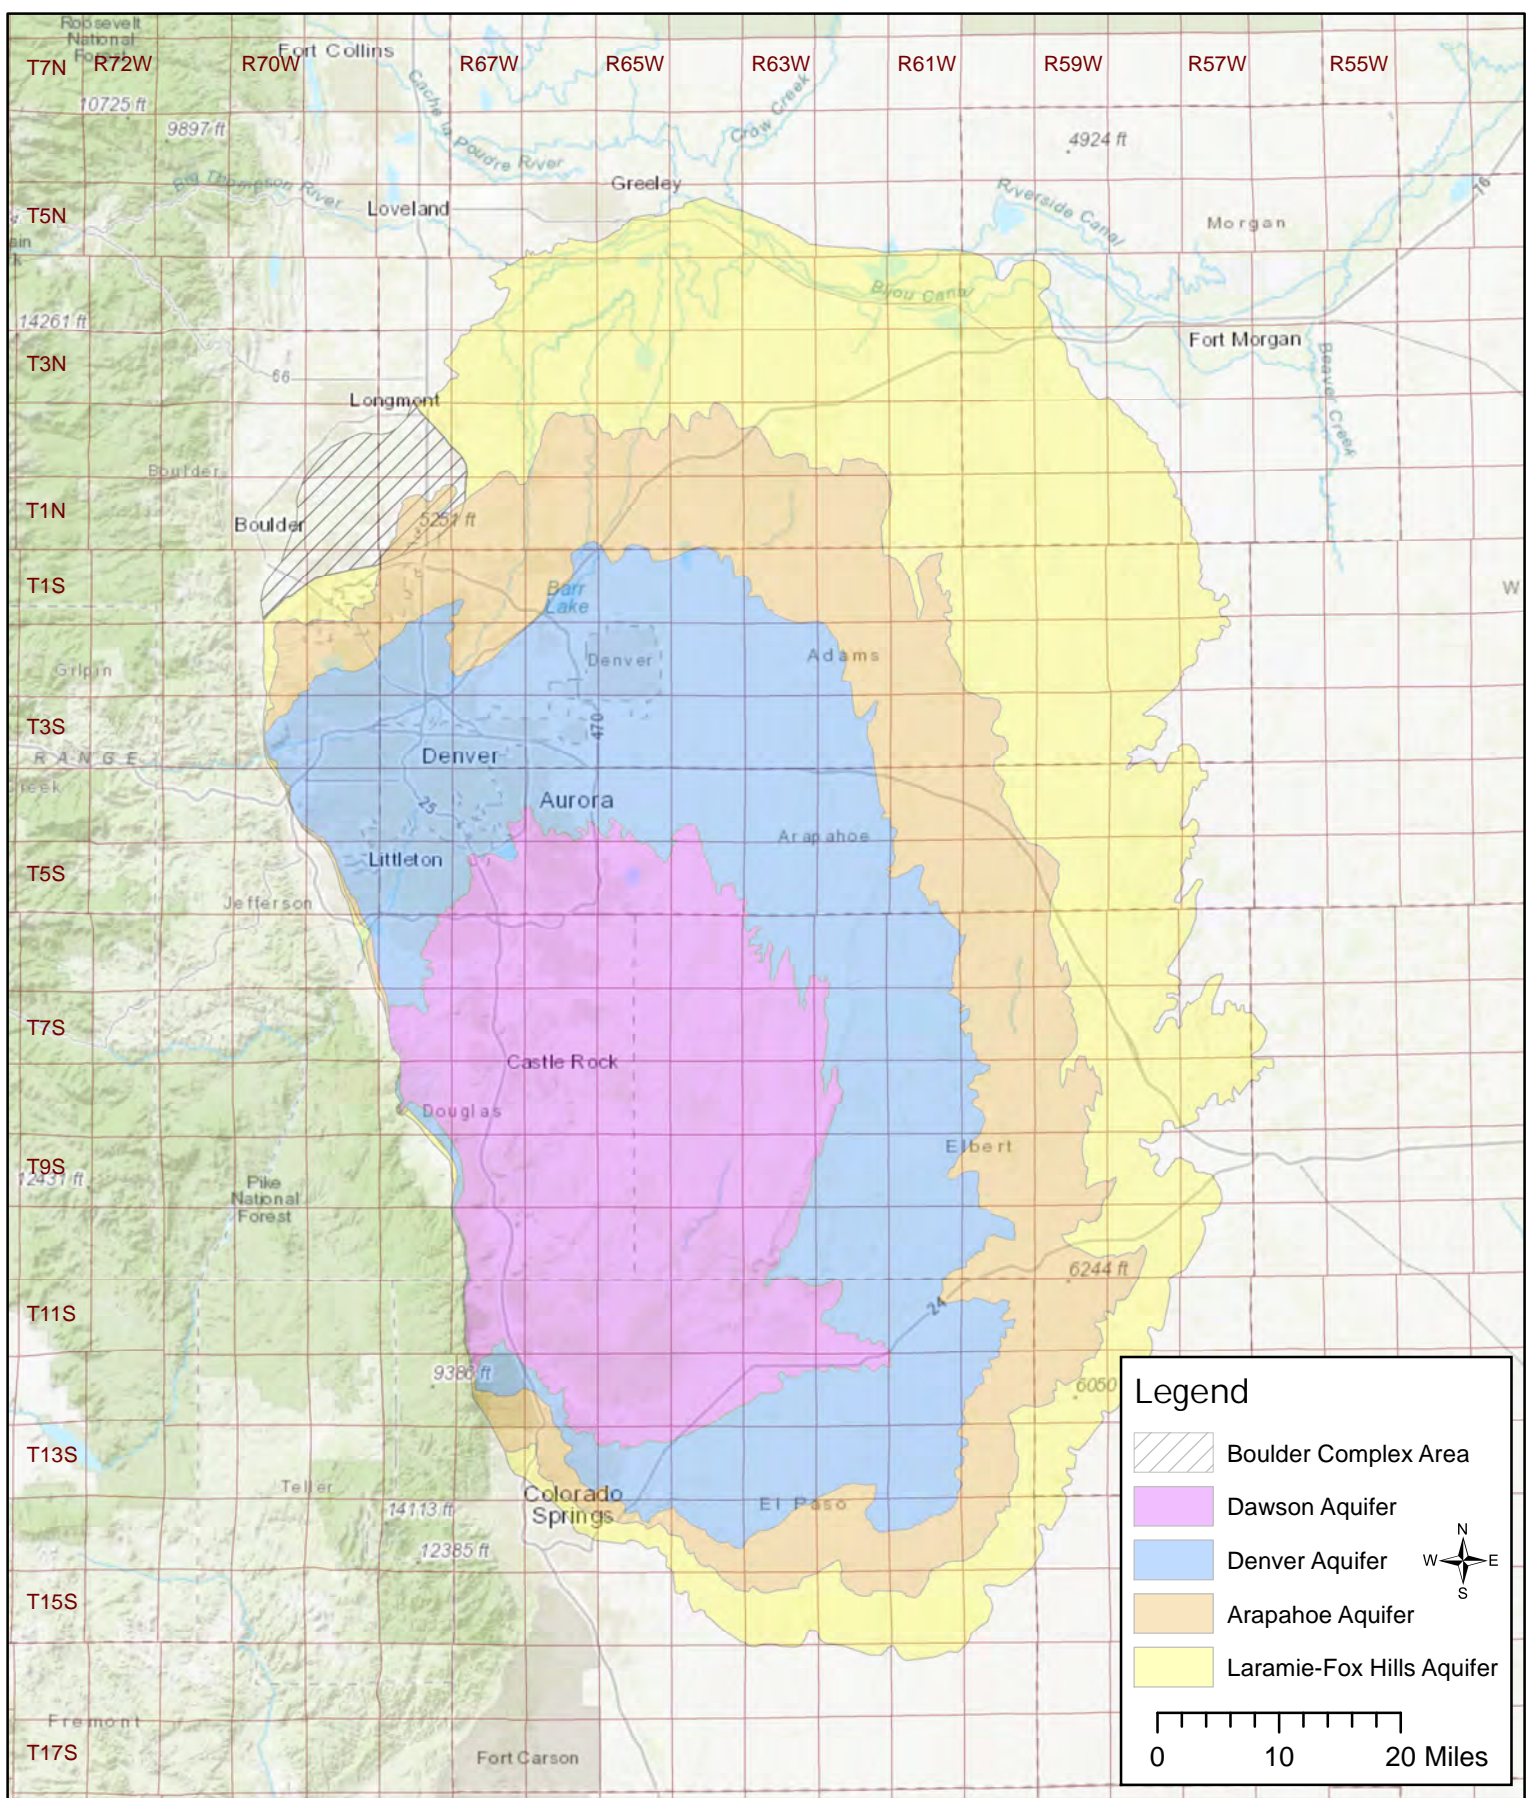

<https://dwr.state.co.us/Tools/GroundWater/WaterLevels>

or the Colorado Decision Support System MapViewer:

<https://dwr.colorado.gov/services/data-information/gis>

If you have any questions regarding groundwater and the information in this report, please contact the Groundwater Information Desk at (303) 866-3587 or through AskDWR,

<https://dwr.state.co.us/Portal/dwr/AskDWR?topicNum=31&officeNum=8>
