WATER LEVELS IN SELECTED ALLUVIAL AND BEDROCK AQUIFERS OF WESTERN COLORADO

2005

This report presents water level data from 57 wells located in Archuleta, Delta, Garfield, Jackson, La Plata, Mesa, Moffat, Montrose, and Rio Blanco Counties. Most of the wells for which data are reported were originally constructed in the 1970's by the United States Geological Survey (USGS) as a part of their statewide monitoring well network. The USGS routinely measured water levels in these wells until 1982.

A new report format was created in 2004 and this format is used in this report. This is the result of placing all statewide water level data into HYDROBASE, which is a uniform database for all data collected and managed by the Division of Water Resources. Tabular data are presented for each well for the previous 10 years and graphical data are presented for the entire period of record. All historical measurement data is available in an Access database format on request. It is anticipated that continual improvements in data presentation and format will be made in future editions of this report.

Due to budget constraints, no water level measurements were made in 2002. The most recent water levels shown in this report were taken during September and October of 2005. Of the 57 wells listed in the report, water levels were obtained in 54 of the wells.

The wells listed in this report are now part of a statewide water level monitoring network funded by Senate Bill 200 (1987 Legislative Session). That legislation directed that a portion of the fees collected for applications for water well permits be used for the establishment of a program to monitor ground water levels throughout the state.

In 1991, the Division of Water Resources initiated a program to monitor water levels in about 50 of the wells that had been a part of the USGS monitoring system. A small number of additional wells measured are used for irrigation, stock watering, or domestic purposes. Several of the Rio Blanco County wells are also measured at least quarterly in connection with the ongoing monitoring in and around the C-B oil shale tract, and the solution mining operation of Natural Soda Inc.'s White River nahcolite (sodium bicarbonate) plant. These data are also presented where available.

In this report, the wells are sorted by location number. Only one well is measured in each of the following counties: Archuleta, La Plata, Mesa, and Moffat. Rio Blanco County contains the largest number of wells (33) being monitored. The well name, shown for each well describes the well location in the standard well numbering system used by the Bureau of Reclamation and the USGS. The aquifers monitored include the alluvium, the Fruitland, Mesa Verde, Wasatch, North Park, San Jose, Dakota/Burro Canyon, Green River, Uinta and Parachute Creek members or formations. The specific aquifer being monitored in a well is shown on the data sheet for that well.

Tabular data are presented for each well for the previous 10 years. Graphical data are presented for the entire period of record. When interpreting the hydrographs, you should note carefully the month and year of the measurement, as there is a 9- or 10-year data gap

between the historic USGS data and the DWR data. Generally, this gap occurs during the years between 1979 and 1991.

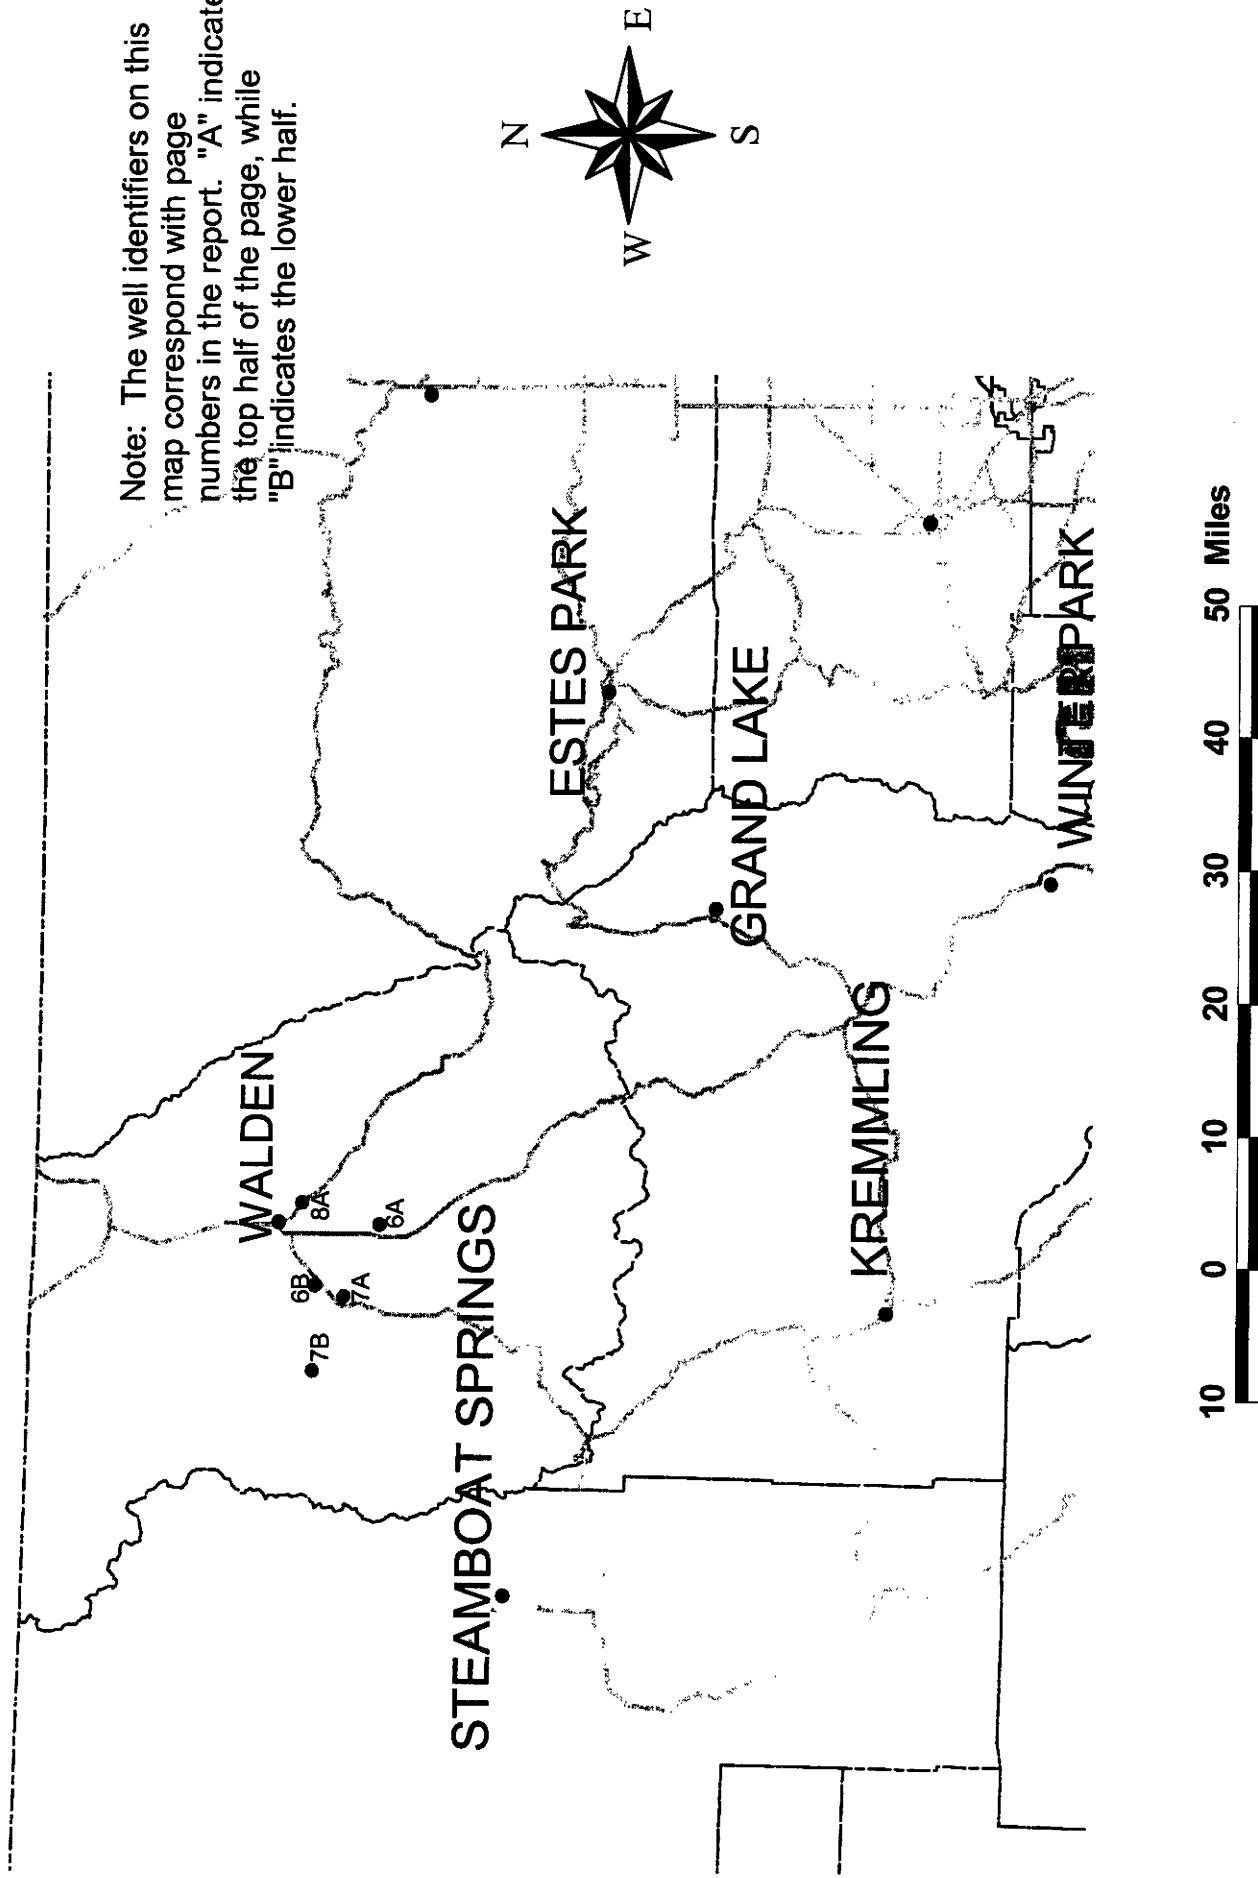

Four maps, showing the locations of the monitoring wells, have been added to this years report. The well identifiers given on each map indicate the page number and page position in the report for which that well's measurement data and hydrograph can be found.

Personnel of the USGS gathered water level data prior to 1983. Division of Water Resource personnel, Steve Joliat, Glenn Graham, and Michael Schaub have gathered data since 1990. North American Chemical Company personnel gathered some of the data for well Nos. SC00109814ACD1 and SC00109814ACD2 located in Rio Blanco County during part of the 1990's. The information contained in this report was compiled and prepared for publication by Michael Schaub.

Additional copies of this report may be obtained from the Colorado Division of Water Resources, Public Records Section. The Records Section can be contacted at 1313 Sherman Street, Room 818, Denver CO 80203, or by phone at 303/866-3581 or 303/866-3447.

Monitoring Well Locations in Jackson County

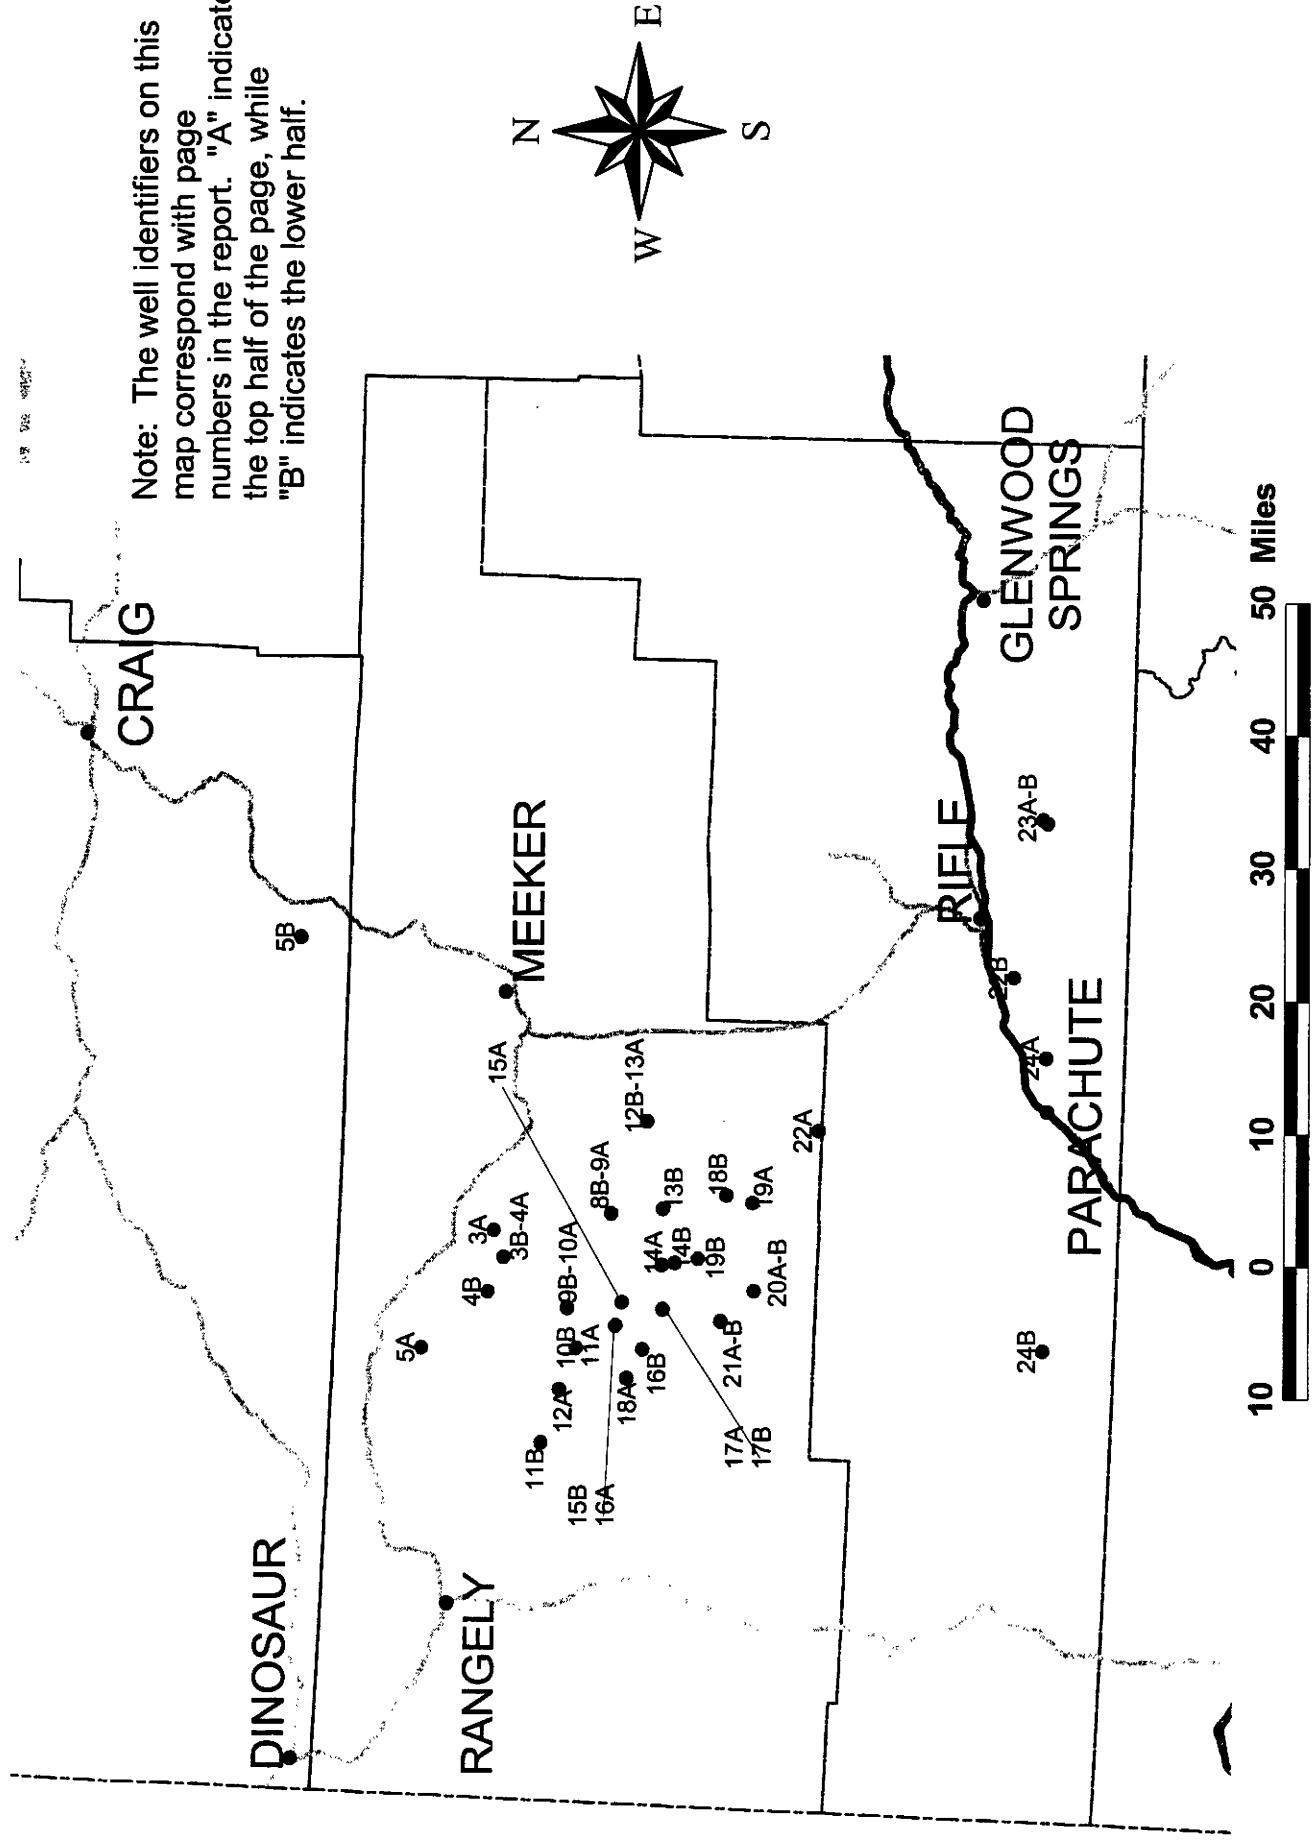

Note: The well identifiers on this map correspond with page numbers in the report. "A" indicates the top half of the page, while "B" indicates the lower half.
