WATER LEVELS IN THE LOWER SOUTH PLATTE RIVER BASIN ALLUVIAL AQUIFER - 2015

This report contains basic data concerning the depth to and elevation of groundwater in the alluvial aquifer of the Lower South Platte River Basin and select tributaries collected during the spring and fall of 2015. Water-level measurements in this year's report were obtained by Colorado Division of Water Resources (DWR) personnel, USGS personnel and Deputy District Water Commissioner Steve Peterson. Measurements are usually taken twice a year, typically in the spring before irrigation pumping commences and again in the fall after irrigation pumping has ceased. A map showing the location of each monitoring well in this report is included (Figure 1).

This report contains 135 semi-annual measurements from 2015. The current 140-well network consists of 83 privately owned wells, 36 monitoring wells installed by the South Platte Decision Support System (SPDSS) and 21 wells associated with the USGS National Water-Quality Program (NAWQA). Under the direction of House Bill 15-1166, 25 wells have been added to the monitoring network. These wells were chosen because they were measured in the past and have a historical period of record or because they are located in a geographic data gap from the previous network.

The 36 SPDSS, 21 NAWQA and one private well are outfitted with automated water-level data-collection devices (data loggers). The data loggers collect daily water-level data which are uploaded into HydroBase, DWR's free online water database. Only the semi-annual manual measurements are listed in this report.

As in previous reports, the accompanying data table only lists data from the last 10 years, though the hydrographs display the full period of record. The report also contains data from wells that are normally a part of this monitoring effort, but for which measurements were not available in 2014. Wells lacking measurements for the past 10 years have been removed from the monitoring program and are no longer included in this publication.

On average, groundwater levels have risen about one-half foot across the basin since 2014. They have generally risen just under one foot compared to 2010 (5-year comparison) and just over three feet compared to 2005 (10-year comparison) measurements. Figure 2 is a map showing depth to water below ground surface measured during the fall of 2015.

The Colorado Water Conservation Board (CWCB) provided funding to replace failed data loggers and associated equipment and Division staff installed replacements as needed during the spring and fall water level monitoring events. The CWCB also funded a project to survey the measuring point elevations with high-precision GPS. The survey report can be downloaded by following this link:

<http://dwrweblink.state.co.us/dwrweblink/0/doc/2859436/Page1.aspx?searchid=ec9ca3dd-f15a-40b5-9c52-0270b960feee>

In addition to the alluvial groundwater levels presented in this report, Division staff are actively involved in two special project areas - Sterling and LaSalle/Gilcrest. Groundwater levels in these areas are being monitored as separate programs. The Division is conducting multi-year studies, with funding provided by the CWCB, to gather the relevant data needed to identify the factors contributing to high groundwater level conditions identified by landowners in these areas. Water level data specific to these project areas can be accessed through the Division 1 website at:

<http://water.state.co.us/DivisionsOffices/Div1SPlatteRiverBasin/Pages/Div1SPlatteRB.aspx>

An electronic copy of this report is available on the Division of Water Resources website:
<http://water.state.co.us/groundwater/Levels/Pages/HydroGeo.aspx>.

Additionally, all groundwater level data may be accessed and exported using the tools available on the Colorado Decision Support System website:

<http://cdss.state.co.us/onlineTools/Pages/GroundWaterWaterLevels.aspx>

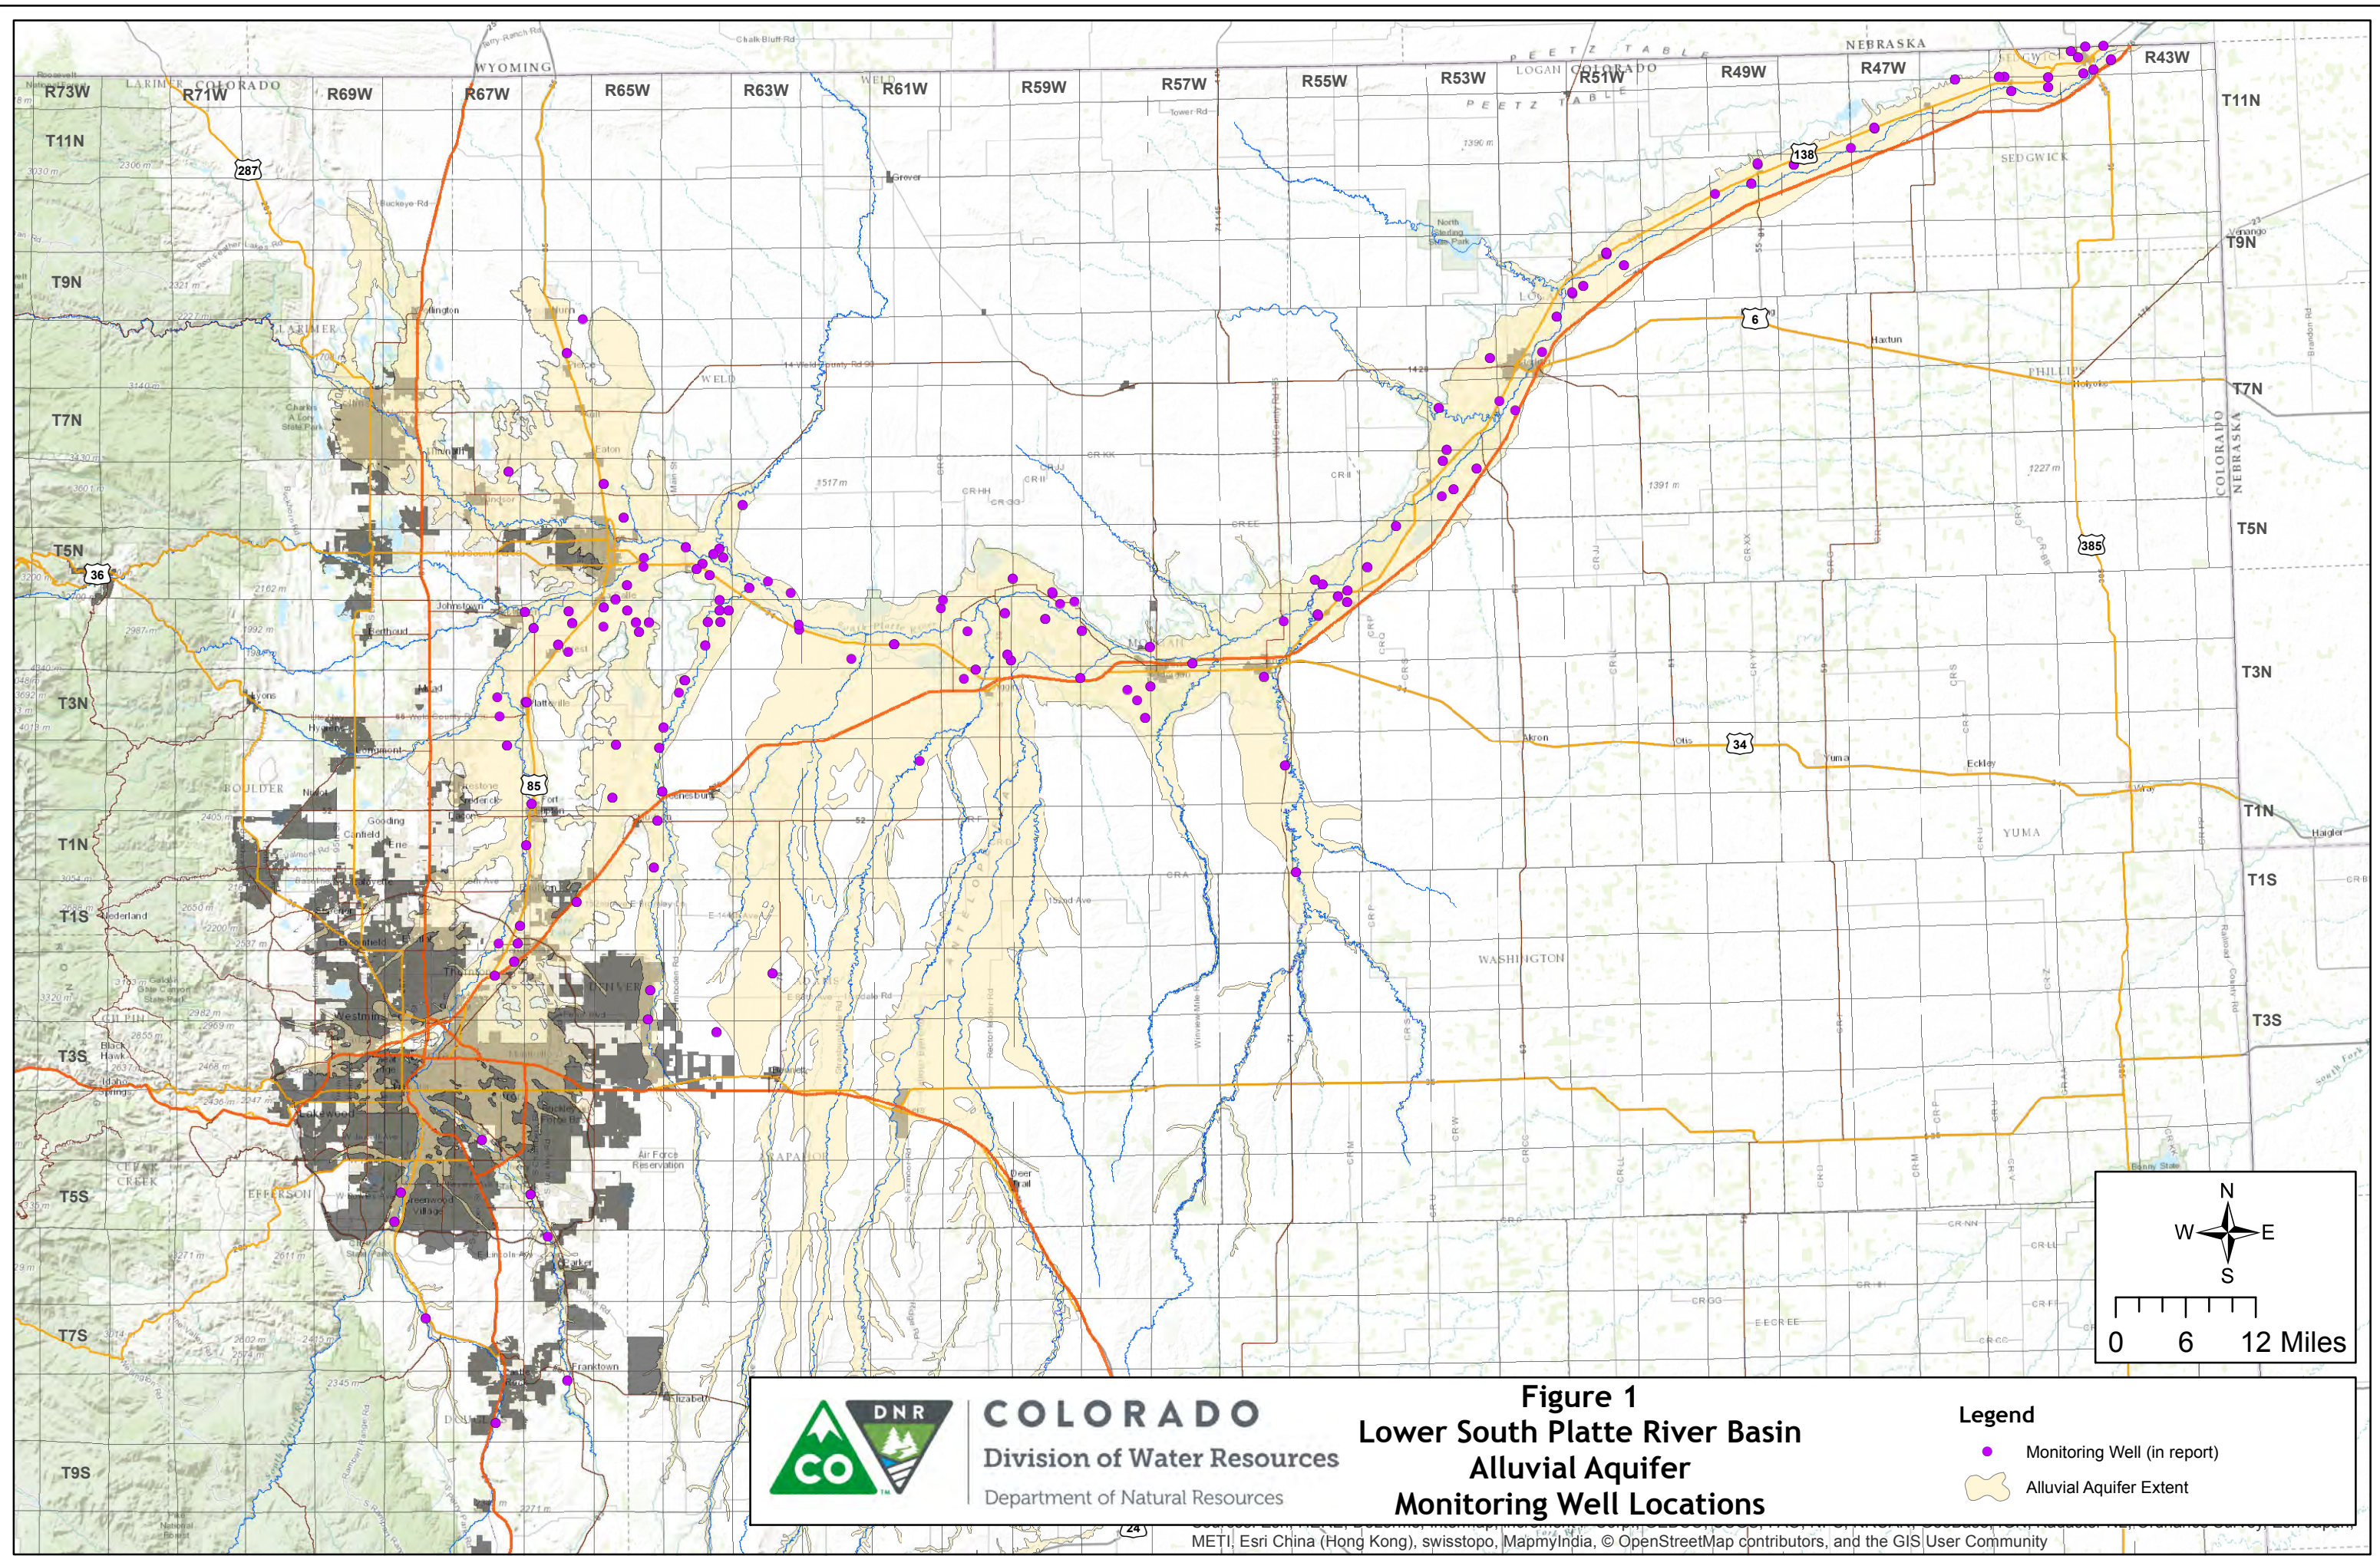

and the Colorado Information Marketplace HydroBase Bulk Data Exporter:

<https://data.colorado.gov/Information-Sharing/DWR-Well-Water-Level/hfwh-wsgi>

or the Colorado Decision Support System MapViewer:

<http://water.state.co.us/DataMaps/GISandMaps/MapView/MapView/Pages/FAQ.aspx>

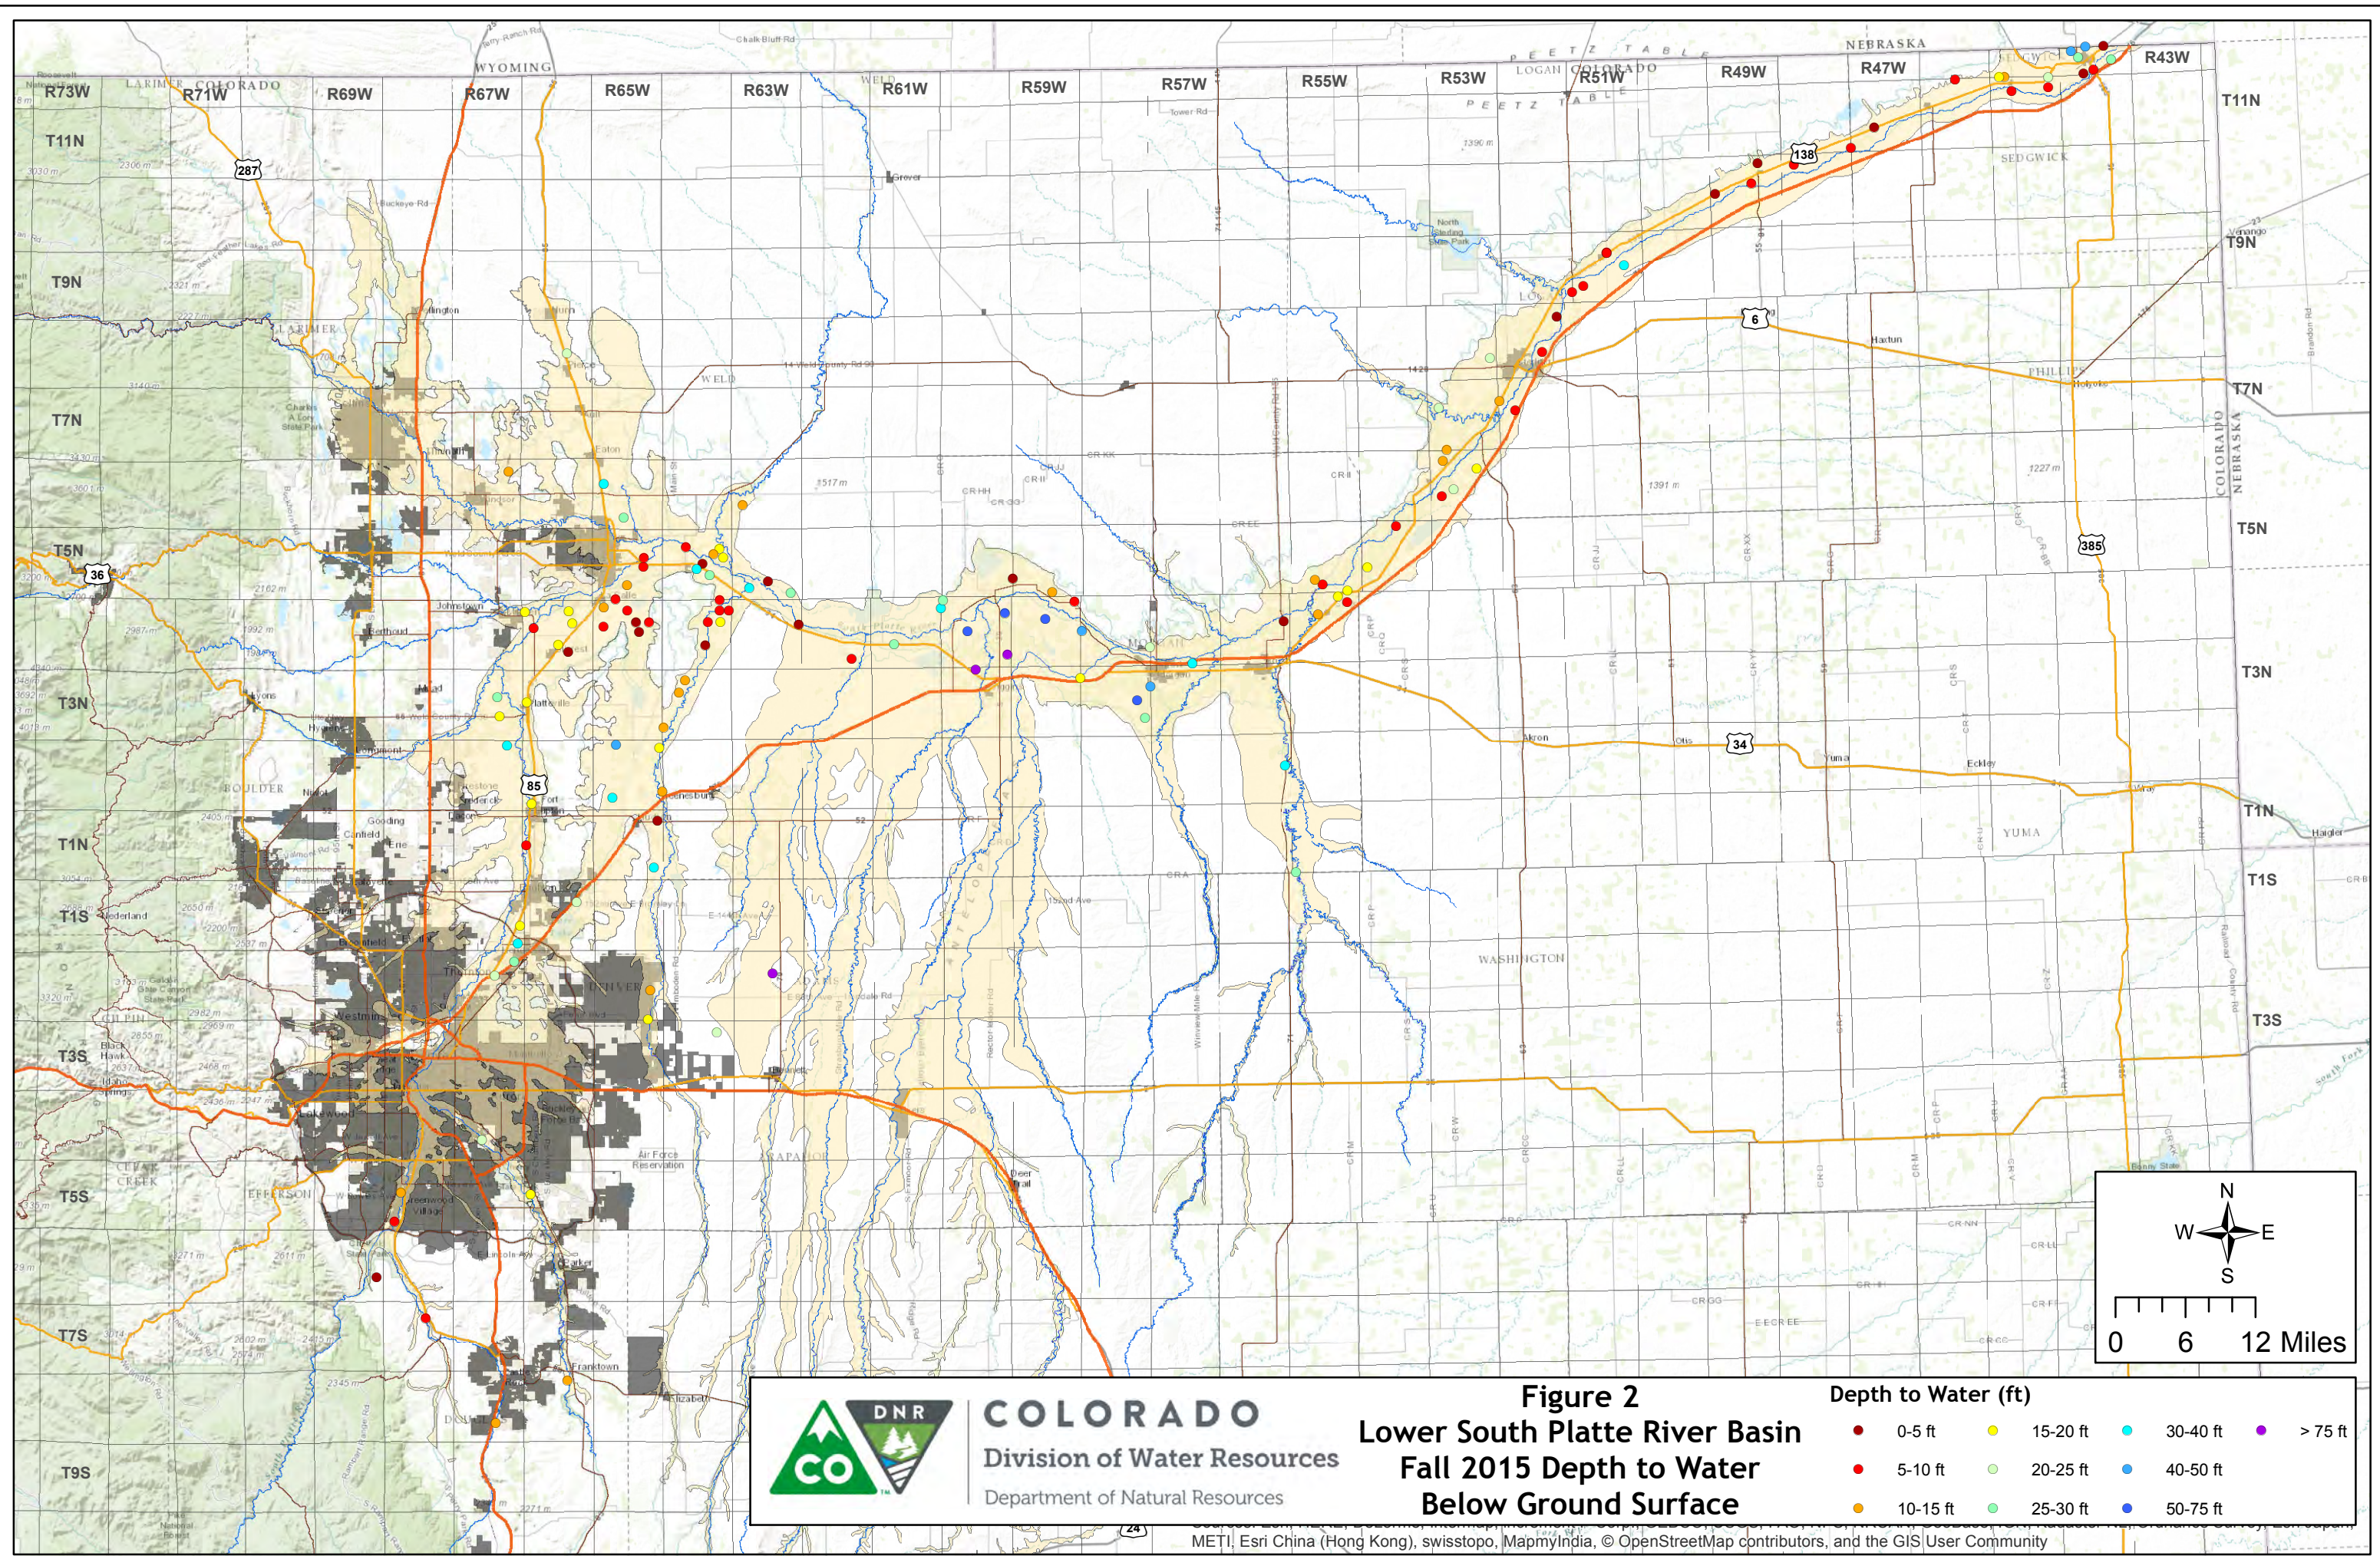

If you have any questions regarding groundwater and the information in this report, please contact the Groundwater Information Desk at (303) 866-3587.
