CONCERNING THE TABULATION OF)
WATER RIGHTS IN WATER DIVISION 3 WATER RIGHTS TABULATION

Notice is hereby given that pursuant to Section 37-92-401, C.R.S. (2009) the Division Engineer of Water Division No. 3, with the approval of the State Engineer, has made such revisions as were determined to be necessary or advisable to the July 1, 2010, tabulation of all decreed water rights and conditional water rights in Water Division No. 3. The 2012 tabulation also reflects the judgments and decrees of the Courts entered prior to January 1, 2012. The tabulation may not include certain water rights claimed in pending or recently concluded proceedings.

This tabulation lists the current status of decreed water rights in order of seniority. The current status is represented by the net amounts of absolute and conditional water rights, along with alternate points of diversion and exchanges. These net amounts are determined by adding the total of original or supplemental water rights to transfers made to the structure, and subtracting transfers made from the structure and abandonments. Conditional rights made absolute are added into the net absolute amount, and subtracted from the net conditional amount. Net amounts are computed and reported by structure and priority date.

This tabulation may be used by the Division Engineer, the State Engineer, and their staffs for administrative purposes. The relative listing of water rights in the tabulation shall not create any presumption of seniority, nor shall the listing of water rights in the tabulation create any presumption against abandonment. The tabulation shall not be construed to modify special provisions of court decrees adjudicating, changing, or otherwise affecting such water rights or to modify contractual arrangements governing the interrelationship of such water rights. This tabulation may include additional information regarding the water rights herein for purposes of identification and description, but this additional information is neither conclusive nor presumptive as to the truth and accuracy of the matters obtained therein. The tabulation may be inspected after July 1, 2012, in the offices of the Division Engineer, the State Engineer, each Water Commissioner and the Water Clerk at any time during regular office hours. The State Engineer or Division Engineer will furnish or mail a copy of the tabulation to anyone requesting the same upon a payment of a fee of ten dollars ($10).

Dated this 1st day of July 2012

Craig W. Cotten Dick Wolfe

Craig Cotten, Division Engineer Dick Wolfe, State Engineer

Explanation of Contents and Codes Used in the Tabulation

This tabulation represents the current status of water right decrees as of December 31, 2011. Each line displays the current net amount of absolute and conditional decrees for a structure by priority date. If the total of absolute and conditional decrees is currently zero, no tabulation line is displayed.

Name of Structure
The decreed structure's name. Some commonly-used abbreviations include:

ditch	D	well	W	reservoir	R, RES	spring	SPR
pipeline	PL	no.	#	pump	P	and	&

Typ
A single letter describing the structure type; if more than one structure type is decreed, an asterisk is shown. Codes are used as follows:

Typ	Structure type	Typ	Structure Type	Typ	Structure Type	Typ	Structure Type
D	Ditch	M	Mine	W	Well	L	Pipeline
R	Reservoir	P	Pump	S	Spring	Z	Power Plant
E	Seep	O	Other				

Name of Source
The source, typically a stream, from which the water is to be taken.

WD
The Water District number.

LOCATION
The component location fields are displayed in small-to-large order:
Q10, Q40, Q160, Section, Township, Range, P.M.

Use
Up to three use code letters are displayed to describe the decreed uses. If more than three uses are decreed, an asterisk is displayed at the third position. The use code letter(s) represent the current cumulative set of uses for the decree listed. Note that lower case letters are different codes than upper case letters!

Use	Use Name	Use	Use Name	Use	Use Name	Use	Use Name
I	Irrigation	E	Evaporation	M	Municipal	f	Forest
C	Commercial	G	Geothermal	N	Industrial	H	Household use only
R	Recreation	K	Snowmaking	P	Fishery	m	Minimum streamflow
F	Fire	p	Power generation	D	Domestic	r	Recharge
S	Stock	s	State export	O	Other	t	Transmountain export
A	Augmentation	W	Wildlife	B	Basin export	X	all beneficial uses

Net Abs
The net amount of absolute water decreed for the structure and priority date. The net amount represents the current cumulative amount of water for the decree listed. To arrive at the net absolute amount, original or supplemental decrees are added to transfers-to and conditionals-made-absolute. Transfers from and abandonments are subtracted out.

Net Cond
The total amount of conditional water decreed for the structure and priority date. The net amount represents the current cumulative amount of conditional water for the decree listed. To arrive at the net conditional amount, original or supplemental conditional decrees are added to transfers-to. Transfers-from, abandonments, and conditionals-made-absolute are subtracted out.

AltP/Exch
The total of alternate point and exchange water for the structure and priority date. A zero in this column should be interpreted as showing that some alternate point(s) exist, the total or maximum amount of which have not yet been tabulated.

U
The units of the decreed amount. CFS (C) and AF (A) decrees are accumulated separately and displayed on separate report lines. An 'X' entered here implies that the decree is for 'All' the water available at the diversion point. In this case, the word 'All' will be displayed in the Net Abs column.

Adj Date
The adjudication date applicable to this decree.

P Adj Date
The date of the previous adjudication in the same Water District.

Appro Date
The appropriation date assigned to the water right in the decree.

O
An order number may be assigned to distinguish decrees with identical dates but that have been decreed to have specifically different priorities.

AdminNumber
A number developed by the Division of Water Resources to provide a simple and efficient method of ranking decrees in order of seniority. Each side of the decimal point represents days since 12/31/1849. The left side represents the number of days between 12/31/1849 and the latter of the P Adj Date and the Appro Date. If the right side is non-zero, it represents the number of days between 12/31/1849 and the Appro Date.

ID#
The structure identifier number that is assigned to the structure in which the water right is diverted. This number is the same one used to record diversions for the structure. ID numbers have not yet been determined for all water rights in all Divisions; these will be shown as blank on the Tabulation.

Pr#/C#
A composite column showing either the priority number typically assigned in the early District Court decrees, or the Case number, which was assigned in various forms throughout the history of water decrees. If a priority number is available and has been entered, it will be printed. Otherwise, a Court Case Number will be shown, if available. (Water Division 5 prints only Case Number).

Line
The line number on the report page, displayed to assist in referencing a specific location on the report, when used with the Page number at the top of each page
