

DIVISION OF WATER RESOURCES

STATE ENGINEERS OFFICE

IRRIGATION DIVISION NO. 4

ANNUAL REPORT

1970 Water Year

November 25, 1970

Mr. C. J. Kuiper, State Engineer  
Division of Water Resources  
101 Columbine Building  
1845 Sherman Street  
Denver, Colorado 80203

Dear Mr. Kuiper:

Attached hereto for your consideration is the Annual Report of 1970 - Irrigation Division No. 4, as required under the provisions of Colorado law as provided in C.R.S. 148-12-7, 1963.

Respectfully submitted,

  
Ralph V. Kelling, Jr.

Irrigation Division Engineer

ANNUAL REPORT 1970

IRRIGATION DIVISION NUMBER FOUR

INTRODUCTORY STATEMENT

Purpose:

The purpose of this report is to present in resume form at the annual meeting of division engineers a summary of division activities for the 1970 irrigation season, together with the reports of the district water commissioners.

Location:

The division is located in southwestern Colorado and is defined within the following drainage basins: Gunnison River, San Miguel River, Little Dolores River, and that portion of the Dolores River within Mesa and Montrose Counties. Larger cities in the area include Gunnison, Montrose, and Delta.

As defined in the 1969 Annual Report, the division boundary has been modified by the recent legislation of "Senate Bill 81". Thus Division Number Four has been deleted of those land areas whose streams are tributary to the Colorado River within former Water District Forty-two - excepting the Gunnison River drainage basin.

Land and Climate:

Elevations range from 4,500 feet to in excess of 14,000 feet in the San Juan Mountain range. The climate is semi-

arid with precipitation varying from 10-15 inches per year. Recent minimums at Grand Junction have been less than six inches annually. In excess of 650,000 acres are irrigated annually, with major crops being hay, sugar beets, small grains, and mountain fruits. Beef cattle and sheep are the primary stock production.

Industry:

Agriculture and ranching are the mainstay of the local economy, with orchards, lumbering and mining being important areas of employment. Uranium, coal and silver are the major mineral resources, with oil and gas exploration being in a stage of infancy. Tourism is very significant to the area's economy.

Water Resource Projects:

Existing projects are the Uncompaghre, Paonia and Crawford, with the Curicanti Unit and the Silver Jack Reservoir of the Bostwick Park Project nearing completion. Projects in various study phases by the Bureau of Reclamation include Grand Mesa, Fruitland Mesa, Dallas Creek, San Miguel and Upper Gunnison.

GENERAL SUMMARY OF IRRIGATION DIVISION NO. 4:

On page three a resume of the division is presented which defines in general terms the scope of activity and area of responsibility. Personnel and administration data are incorporated into the report on following pages.

## RESUME

### IRRIGATION DIVISION NO. 4

The division is comprised of lands in parts of seven counties in southwestern Colorado which covers an areal extent of approximately 11,200 square miles. Included in this region are the entire drainage basins of the Gunnison and San Miguel Rivers, and additionally, that part of the Dolores River within Montrose County.

Elevations range from 4500 feet at the Utah state line to in excess of 14,000 feet in the peaks of the San Juan Mountain range. The growing season varies from ninety to one hundred twenty days and irrigated crops include hay, small grains, corn, sugar beets, beans, onions, and various fruits.

The annual available water supply is dependent upon snow-pack, runoff, rainfall, and storage supply. Based upon this supply, approximately 3,000,000 acre-feet is diverted annually to some 650,000 acres of irrigable lands. The recently completed tabulations of decreed water rights contain in excess of 12,000 individual listings which in effect present a basic decretal history of each water right and are an attempt to inter-relate all division decreed rights on a seniority basis.

Water projects within the division are as follows: Uncompaghe, Crawford, Colibran, Paonia, and the Curecanti Unit of the Colorado River Storage Project. The U.S. Bureau of Reclamation has various projects in study phase, as follows: Grand Mesa, Dallas Creek, San Miguel, and Upper Gunnison.

There are twenty-six division personnel involved in the administration and distribution of the public waters, to wit: One division engineer, one secretary, seven water commissioners, and seventeen deputy water commissioners. The average annual mileage traveled on these duties is about 185,000 miles. The average annual cost to the division per acre-foot of water delivered is \$0.05.

The Division Field Office is located in the Montrose County Courthouse and a District Field Office has been established at Cedaredge.

Personnel and Division Administration:

There are twenty-six departmental employees in the division, whose names, period of employment, and salary data are listed on page five . To date there have been four applicants for the position of Assistant Division Engineer; however, the position is still open at this time. Sandra M. Cronenberg was employed by the Montrose office on April 22, 1970 as Intermediate Clerk-Typist, and Lloyd Connell was employed as a deputy water commissioner in the Cedaredge area this spring. Glen Mc Caslin, a former deputy in the Cedaredge area, has applied for retirement due to a heart condition. Woodrow Saunders and Doug Golbreath are jointly serving divisions four and five due to the change in division boundaries. Funeral services for John A. Sullivan of Norwood, retired Deputy Water Commissioner, were held April 16, 1970 at Norwood.

The Cedaredge District Field Office was established February 16, 1970, under the supervision of District Water Commissioner, Mr. R.E. Robinson. The address is P.O. Box 655, Cedaredge, Colorado 81413, and the telephone number is 856-8540. Numerous items of office equipment and furniture have been received by the division, all of which has been badly needed for many years.

## IRRIGATION DIVISION NO. 4

## PERSONNEL SALARY AND WORK DATA SHEET

July 1, 1970

Quantity	Item	Cost
1	Reproduction Machine	\$750.00 Est.
4	3-drawer, legal sized file cabinets	500.00

# WATER SUPPLY OUTLOOK

as of  
May 1, 1970

The map on this page indicates the most probable water supply as of the date of this report. Estimates assume average conditions of snow fall, precipitation and other factors from this date to the end of the forecast period. As the season progresses accuracy of estimates improve. In addition to expected streamflow, reservoir storage, soil moisture in irrigated areas, and other factors are considered in estimating water supply. Estimates apply to irrigated areas along the main streams and may not indicate conditions on small tributaries.

USDA-SCS-PORTLAND, OREG. 1967 WT-L-1 6845

# WATER SUPPLY CONDITIONS

as of

May 1, 1970

APRIL SNOWS FOLLOWED THE SAME PATTERN AS PREVIOUS MONTHS. THE NORTHERN HALF OF COLORADO HAD ABOVE NORMAL SNOW WHILE THE SOUTHERN HALF AND NEW MEXICO HAD NORMAL TO BELOW SNOWFALL.

FORECASTS WERE RAISED 10% TO 20% IN THE NORTH AND REMAINED ABOUT THE SAME AS FORECAST APRIL 1st IN THE SOUTH.

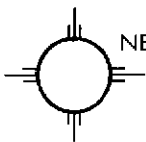

SOME HIGH WATER CAN BE EXPECTED IN THE SOUTH PLATTE DRAINAGE. ALL THE RESERVOIRS ARE NEARLY FULL AND RIVER FLOW FORECASTS RANGE ABOVE 140%.

IF TEMPERATURES REMAIN LOW AND THERE IS NO EXCESSIVE RAINFALL, NO MAJOR DAMAGE IS EXPECTED.

SOIL MOISTURE THROUGHOUT COLORADO IS EXCELLENT. NEW MEXICO REPORTS FAIR TO POOR SOIL MOISTURE CONDITIONS.

COLORADO -- COLORADO SHOULD HAVE AN EXCELLENT WATER SUPPLY THIS SUMMER. THE ONLY TWO AREAS THAT WILL HAVE SOME SHORTAGE ARE THE RIO GRANDE AND SAN JUAN DRAINAGES. SHORTAGE HERE SHOULD NOT BE SEVERE. THE REST OF THE STATE'S STREAMS SHOULD FLOW CONSIDERABLY ABOVE NORMAL. THE SOUTH PLATTE AND ITS NORTHERN TRIBUTARIES MAY HAVE MORE WATER THAN THEY CAN HANDLE. SOME HIGH WATER IS EXPECTED IN THIS AREA. OTHER MAJOR STREAMS ARE EXPECTED TO FLOW ABOVE NORMAL, BUT NO HIGH FLOW PROBLEMS ARE EXPECTED. RESERVOIR STORAGE IS GOOD. SOIL MOISTURE CONDITIONS ARE REPORTED AS EXCELLENT.

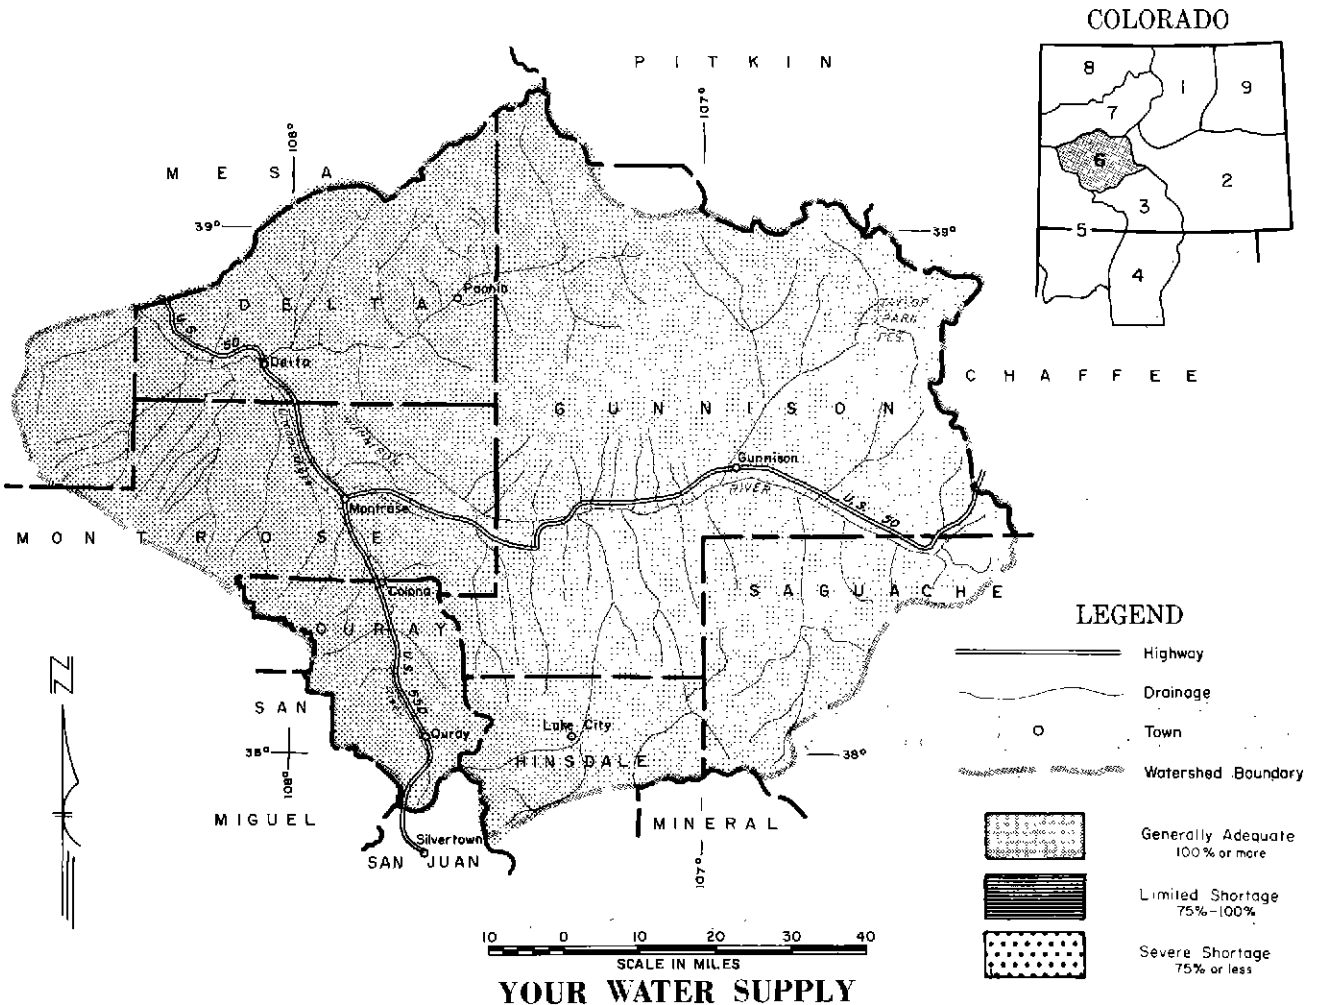

NEW MEXICO -- SOME WATER SHORTAGE IS EXPECTED IN NEW MEXICO THIS SUMMER. THE RIO GRANDE SHOULD FLOW ABOUT 70% OF NORMAL. THE SAN JUAN SHOULD ALSO HAVE SUMMER FLOWS WELL BELOW NORMAL. THE SNOW PACK DID NOT IMPROVE DURING APRIL. ALL BUT THE VERY HIGH ELEVATION SNOW HAS ALREADY DISAPPEARED. SOIL MOISTURE CONDITIONS ARE ONLY FAIR. SOME WATER MAY BE NEEDED TO IRRIGATE UP CROPS. CARRY-OVER STORAGE IS BETTER THAN NORMAL AND WILL BE AN EXCELLENT SUPPLEMENT. UNLESS SUMMER RAINFALL IS ABOVE NORMAL LATE SEASON FLOWS WILL BE VERY LOW.

# WATER SUPPLY OUTLOOK FOR THE SOIL CONSERVATION DISTRICTS IN THE GUNNISON RIVER WATERSHED IN COLORADO

as of

May 1, 1970

**U. S. DEPARTMENT OF AGRICULTURE · SOIL CONSERVATION SERVICE**  
COLORADO EXPERIMENT STATION, STATE ENGINEERS OF COLORADO AND NEW MEXICO

STREAMFLOW FORECASTS WERE INCREASED THIS MONTH. THE GUNNISON RIVER WAS INCREASED CONSIDERABLY WHILE THE UNCOMPAGRE AND SURFACE CREEK WERE RAISED SLIGHTLY. ADEQUATE WATER SUPPLIES SHOULD BE AVAILABLE THIS SUMMER. FORECASTS ARE BASED ON NORMAL PRECIPITATION FOR THE REMAINDER OF THE YEAR.

SOIL MOISTURE CONDITIONS ARE GOOD IN THE IRRIGATED AND MOUNTAIN SOILS. RESERVOIR STORAGE IS GOOD WITH 115% OF LAST YEAR'S STORAGE.

# WATER SUPPLY OUTLOOK FOR THE SOIL CONSERVATION DISTRICTS IN THE SAN MIGUEL, DOLORES, ANIMAS, SAN JUAN WATER SHEDS IN COLORADO AND NEW MEXICO

as of  
May 1, 1970

**U. S. DEPARTMENT OF AGRICULTURE · SOIL CONSERVATION SERVICE**  
COLORADO EXPERIMENT STATION, STATE ENGINEERS OF COLORADO AND NEW MEXICO

## YOUR WATER SUPPLY

SNOW PACK IN THE SAN JUAN BASIN IS STILL BELOW NORMAL, HOWEVER, THERE WAS A SLIGHT IMPROVEMENT ON THE DOLORES AND ANIMAS DRAINAGES. THESE TWO STREAMS SHOULD HAVE NEAR NORMAL FLOWS. THE REMAINDER OF THE STREAMS IN THE BASIN SHOULD FLOW ABOUT 70% OF THE 1953-67 AVERAGE. SOIL MOISTURE IS GOOD AND RESERVOIR CARRY-OVER STORAGE IS ABOVE NORMAL.

## YOUR WATER SUPPLY

SNOW PACK IS MUCH ABOVE AVERAGE BECAUSE OF ABOVE AVERAGE SNOWFALL AND BELOW AVERAGE TEMPERATURES. ALL STREAMFLOW FORECASTS HAVE BEEN INCREASED. MOST STREAMS ARE FORECAST AT ABOUT 140% OF AVERAGE WITH THE EXCEPTION OF WILLIAMS RIVER AND WILLOW CREEK WHICH ARE ABOUT 175%.

SOIL MOISTURE CONDITIONS ARE REPORTED AS GOOD IN THE IRRIGATED AREAS. MOUNTAIN SOIL MOISTURE IS ABOVE AVERAGE.

STREAMFLOW FORECASTS ARE BASED ON NORMAL PRECIPITATION FOR THE REMAINDER OF THE YEAR.

Travel:

Travel milage, excepting that of the Division Engineer, totaled 129,891 miles through October, 1970. This figure will increase sharply as continuing demands for more records of diversions are imposed upon division personnel; however, total annual milage to date continues to be less than the average of the last eight year period. Further information on the travel expenses can be found on page six.

Water Supply

Dams:

In the division there are in excess of 1500 decreed reservoirs. To list these as per the proposed format in the division engineers annual report does not appear warrented at this time. It is considered more important to present various problems relating to reservoirs, especially those which are hazardous or have failed or are of particular concern for other reasons.

Two reservoirs failed this season, the Y - T in Division No. Five near Collbran and the Sheep Drive in the Leroux Creek Reservoir system. Fortunately, the Y - T did not lose storage (55 A.F. capacity); although a center section of the downstream dam face slipped due to piping through tree and brush root systems at the highwater line. Reconstruction is proceeding this fall. The Sheep Drive (23.3 A.F. absolute,

28.0 A.F. Conditional) failed through the center of the dam above the outlet pipe by over-topping after debris had filled the spillway. There was a significant lack of communication from the deputy water commissioner to his supervisor in this failure, and thus the loss was not reported. Continuing deterioration of the Alta Lakes Dams is occurring, and it is apparently just a matter of time until they fail. It appears that both division and legal staff efforts are wasted in this type of circumstance and that more explicit legislation may be in order.

Trans - Mountain Diversions:

<u>NAME</u>	<u>SOURCE</u>	<u>AVG. AMT.</u>	<u>RECIPIENT</u>
Garnet Feeder of Cimarron Canal	W. Fk. Cimmaron	2500 AF	Uncompaghre Project
Red Mountain Ditch	Mineral Creek	260 AF	Ouray Ditch
Carbon Lake Ditch			Ouray Ditch
Leopard Creek Ditch	Leopard Creek	1372 AF	Marie Scott
Larkspur Ditch	Cochetopa Cr.	125 AF	
Tabor Ditch	Cebolla Creek	670AF,'69W.Y.	Colo. Game & Fish
Tarbell Ditch	Cochetopa Creek	410 AF,'69W.Y.	

LIVESTOCK WATER TANKS

It has been suggested at the state level that inspections of stock tanks is being considered. This appears to be a subject for further consideration, since although timely inspections are desirable, if no benefit results, the efforts would not be warranted.

LIVESTOCK WATER TANKS: ( permits issued 1970 )

<u>Name</u>	<u>Stream</u>	<u>Height</u>	<u>Capacity</u>	<u>Permit No.</u>
E.J. Johannson	Tuttle Draw of San Miguel	10'	1 AF	#12364

Stewart Lechléiter Little Piney Tank	Little Piney	10'	1 AF	#12271
R.L. Edmondson	Unnamed Trib. Lake Fork of Gunnison	19'	10 AF	#12203

WATER RIGHTS

Utter confusion has been the name of the game this year insofar as the recent water legislation is concerned. The time deadlines which have been required appear to have been ill-advised, and the additional work load to field personnel appears abusive. Much of the extraction of decree data should properly have been done by personnel competent in surveying and pre-engineering knowledge. Far greater dissemination of information from the state level should have preceded publication of the tabulations, in order that much concern to the water user may have been avoided.

In the division all corrections to the tabulations to date have been submitted to the Denver office. It is estimated that ten years will be necessary to secure any semblance of priority order to the tabulations on a division-wide basis.

Referees Findings and Decrees

Approximately 250 separate applications concerning water rights

have been received to date by the water clerks' office. Of these about 150 are specific applications for water rights, and among these are many containing a multiplicity of individually requested priorities. About 50 applications have been received asserting due diligence on conditional water rights, and ten each of applications for storage, changes, and underground water rights. To date there are no plans for augmentation.

#### ORGANIZATIONS

The following are the larger water user organizations:

Tri-County Water Conservancy District, Montrose, Colo. 81401  
Mr. Dick Edmondson

Upper Gunnison Water Conservancy District, Gunnison, 81230  
Mr. Rial Lake

North Fork Water Conservancy District, Hotchkiss,  
Mr. Charles Neill

Grand Mesa Water Conservancy District, Cedaredge,

Gunnison River Water Users Assn., Cedaredge, Colo. 81413  
Mr. Jerry Goldsmith

Grand Mesa Water Users Assn., Cedaredge, Colorado 81413  
Mr. Benson Palmer

WATER COMMISSIONERS SUMMARY:

W.D.	Total A.F. Delivered	
28	388,680	
40	516,913	
41	620,319	
42	530,124	
	4,947	(Chiquito - Dolores)
	1,618	(Coats Creek)
	2,957	(Gunnison - 42)
59	353,557	
60	219,286	
61	12,114	
62	73,612	
63	13,377	
68	<u>116,279</u>	
Total	2,853,783	

Please refer to water commissioner summary sheets for additional data regarding reservoirs, etc.

RECOMMENDATIONS AND SUGGESTIONS:

1. Secure timely disbursement of monthly payroll checks and milage checks.
2. Review fiscal policy and funding as they relate to division functions and personnel - (avoid fluctuations of a feast and famine operation.).
3. Review various forms used by field personnel to the point that needless data and duplications are not required, i.e.:
  - a. speedometer readings on payroll vouchers.
  - b. resérvoir, ditch, field book, summary sheets.
4. Review format for division engineers annual report to avoid inclusion of tabulated data of questionable value (duplication), i.e.:
  - a. water supply, water budget.
  - b. underground water (p.2, e)
  - c. reservoir storage, stock tank inspections
  - d. agriculture
  - e. dams
  - f. listing all water related organizations
