TO: ALL CONCERNED

FROM: Dan Prenzlów, Director

The 2022 Colorado State Fish Hatchery Fish Distribution Schedule for "A" and "C" habitats is approved for the listed hatcheries. This schedule represents the stocking needs of the individual Senior Fish Biologists. It is balanced against the production capabilities of the Hatchery System and is presented alphabetically by water. Included are all of the species and sizes available from the State System, as well as Federal fish and trades from outside sources.

"A" habitats will receive fish from Units certified negative for Whirling Disease (WD) parasite and "C" habitats can be stocked by any Unit.

The Planting Schedule is designed to serve as a flexible Work Plan for the State Fish Hatchery System. A variety of outside conditions, i.e. low water, adverse water quality and other related conditions, may necessitate revisions as the year progresses, especially in the stocking dates. Action requiring revisions will be made in cooperation with the individual Biologists.

The Senior Fish Biologists are encouraged to utilize these in the most efficient manner possible in developing angler benefits while providing reasonable security for wild trout resources.

Approved: Reid DeWalt for Dan Prenzlów, Director
