BIENNIAL REPORT

OF THE

State Board of Land Commissioners OF COLORADO

Denver, Colo., November 30, 1908.

To His Excellency,
HENRY A. BUCHEL,
Governor.

Sir:—In compliance with statutory provision, I submit herewith a report of the business transacted by the State Board of Land Commissioners for the biennial period ending November 30, 1908.

The period just closing has been a busy one for this department, as a glance at the tables which follow will show. There has been a marked increase in the volume of business transacted in each branch of the department.

The many irrigation projects now in process of construction, presenting a solution of the problem of watering lands hitherto classed as arid, have drawn the attention of the homeseeker, and the investing public in general, to Western lands. The interest thus aroused has resulted in much inquiry concerning the lands of the State. Much of this information is requested in person; the counter work has therefore been heavier than ever before. In addition to this, many inquiries are received by mail, necessitating a large correspondence. During this biennial period 17,500 letters have been written by this department, this number being 3,000 in excess of those written during the previous administration.

Some idea of the large amount of clerical work of the office during the last two years may be gained from the following statements and figures.

Nearly 2,700 applications for lease, purchase and right of way have been received, this being an increase of 400 over the preceding period. When it is understood that each application must be filed and numbered, the number entered temporarily on the tract book, the fees entered, the application advertised, appraised and considered by the Board before the proper document can be issued to the applicant, and that in connection with its issuance each final instrument must be recorded and indexed, its number finally entered against the land, the moneys collected in

F. Board. of 1907-08

the transaction applied to the proper funds, and all papers in connection with the matter filed in their proper places; that in its course through the office the application has necessarily passed through the hands of ten or twelve people, some idea may be gained of the vast amount of detail work of the office, and of the unremitting care which must be exercised. It is the purpose of the system that the status of any application can be determined at any time.

Careful attention has been given to the appraisalment of lands, 2,350 appraisements having been made during the period, this being an increase of 900 over the number reported two years ago. This is an important branch of the work, meaning the personal inspection of the land by the appraiser, who is required to report to the Board upon the value of the land, its character and present uses, giving an estimate of the portion which may be cultivated, and any other information which he may be able to glean concerning conditions of the locality which will assist the Board in its consideration of the application. The typewritten reports of the appraisers are filed and indexed so as to form a record of permanent value. During this period the duties of the appraisers have been increased by the posting of notices upon all lands which are advertised for sale.

The State Land Board has been a careful and conscientious directorate. The members of the Board, although each has a department of his own, have given generously of their time and counsel to the affairs of this department. They have attended 105 meetings, audited 2,200 bills and considered and disposed of the 2,700 applications which have been received during the biennial period.

While the policy of the Board has been against the indiscriminate sale of State lands, it has carefully considered each application to purchase; the locality, quality, present and prospective value of the land, and the purpose for which it is desired by the applicant receiving especial attention. No large tracts of land have been sold, and applications having a seemingly speculative purpose were denied. In all sales ordered the rights to all coal or other mineral underlying the land have been reserved to the State, together with sufficient surface rights to provide for the convenient working of said mineral. This reservation has tended to the elimination of applications for the purchase of lands which were thought to contain valuable coal deposits, and has been conducive to the filing of only those applications whose real purpose was that expressed in the request for sale. Moreover, the present Board has secured better prices for the lands sold than have previously been obtained, there being an increase of thirty per cent. on the average price per acre since the last report of this department was made. This is attributed to the greater publicity which is now given to approaching sales. Besides advertising the sale for thirty days in the county in which the land is situated, this publication being required by law, the

advertisement is also given to a paper in one or more adjoining counties, if the land is so situated that it is thought the people of the neighboring counties may have an interest in the sale. A notice is posted on the land, one in the nearest postoffice, and one in the office of the State Land Board. In every possible way competition in the purchase of land has not only been encouraged, but invited.

In the case of timber sales the same publicity has been given as in the case of land sales, and in addition thereto, letters have been written to the leading lumber companies, giving notice of the date of sale, and inviting them to have a representative present on the day of sale.

Especial attention is called to the total number of acres leased during this biennial period, viz.: 2,688,648.9 acres, an increase of 230,000 acres; to the total annual rentals and royalties received on this leased acreage, viz.: \$298,116.65, this being a gain of nearly \$78,000.00; and to the total receipts for the biennial period which amount to \$825,901.67, an increase of \$141,218.05 over the biennial period just preceding.

Below is given a comparative statement which shows the growth of this department during the last ten years:

Period.	Total number of acres leased.	Receipts.
From December 1, 1896, to November 30, 1898.....	\$ 859,948.00	\$238,008.60
From December 1, 1898, to November 30, 1900.....	1,251,770.73	355,305.97
From December 1, 1900, to November 30, 1902.....	1,784,974.57	372,372.79
From December 1, 1902, to November 30, 1904.....	1,877,042.65	574,176.04
From December 1, 1904, to November 30, 1906.....	2,458,240.32	684,683.62
From December 1, 1906, to November 30, 1908.....	2,688,648.90	825,901.67

CAREY ACT SELECTIONS.

Under this law two segregations of land have been made in Colorado; one by the Routt County Development Company, assignee of The Colorado Realty and Securities Company, which land is now open for settlement, and applications by entrymen are being entertained. This consists of a body of land containing 37,825.47 acres, situated along the Snake river in Routt county. A water right with this land consists of not less than one-half cubic foot of water per second of time for each forty-acre tract, to cost not to exceed \$35.00 per acre. Thirty water rights have been sold. The estimated cost of constructing the irrigation system is \$201,500.

The Colorado Land & Water Supply Company has segregated a tract of land consisting of 16,277.52 acres in the former Southern Ute Reservation in La Plata county. On account of this land being in the former Reservation, it was necessary to obtain a Special Act of Congress permitting this land to be segregated under the Carey Act. This was done by the Act approved April 9,

1907, but the act requires that the settler pay the government \$1.25 per acre in addition to the fifty cents per acre paid to the State. This land is now ready to be opened for entry. The estimated cost of constructing the irrigation system is \$150,209.00. A water right costs \$35.00 per acre, divided into ten annual payments. The land lies along the Denver and Rio Grande Railroad in La Plata county.

TIMBER LAND.

By Willis T. Fairfax, Timber Warden.

The State Board of Land Commissioners has endeavored to handle the timber question in a practical manner, and with the small appropriation at its command has been very successful.

Rapid strides in the systematizing of the work have been made in the last several years. Communication has been established with those portions of the State in which timber lands are situated, and care has been taken to protect the timber from trespass, waste, or injury by fire. While all matured trees are for sale, yet, to protect the younger growth, the Board restricts the cutting and logging, and demands that no trees below ten inches in diameter be cut.

In some instances the Board has seen fit to withdraw from the market tracts of timber lands located in or near a summer resort, believing that the trees contribute to the attractiveness of the place and to the beauty of the surroundings, as well as furnish shade and comfort to many people who enjoy the summer outing.

SALES.

When timber was needed for school houses, bridges, mines, or railroad ties, in fact, at all times when matured timber has been needed for the public benefit, the Board has carefully considered any fair proposition to purchase, at the same time looking to the best interests of the State.

During the biennial period a total of 11,846,878 feet of timber have been sold, at an average price of \$2.96 per thousand feet, as compared with 4,976,130 feet sold during the previous biennial period, at an average price of \$1.91 per thousand feet.

FIRES.

In regard to fires, we have been very fortunate during the last two years. There have been many forest fires in different counties in the State that have caused uneasiness, being in close proximity to State land. We have always been on the alert and ready to go if emergency called.

The two fires that occurred on State land were as follows:

One on the land west of Pike's Peak that swept about fifteen acres of undergrowth, but did not cause any damage to mention; the other in the San Isabel Forest Reserve, southwest

of Westcliffe, in Custer county. This fire burned over about ten acres of timber land and was extinguished by those in charge of the Reserve before doing much damage.

THE SPECIES OF TREES.

In Colorado are the yellow and white pine, red and white spruce, black jack, balsam, quaking asp and scrub oak. The yellow pine grows to be 80 to 100 feet high, the red spruce about 80 feet, and the oak seldom reaches 20 feet in height. The quaking asp is of a deciduous growth; the balsam, which belongs to the pine family, appears in small numbers in certain localities.

We have kept in close communication with the experiments in re-foresting denuded land by the Agricultural Department under the supervision of the National Forest Reserve and find this proposition yet in its infancy.

We have been open to suggestions tending to the advancement of this branch of the department and ready at all times to consider whatever has been presented pertaining to the good of the service.

MINERAL DEPARTMENT.

A. A. Johnson, Superintendent.

This department submits not a detailed statement of each lease, but a concise statement of results as taken from the books, showing the acreage leased and the royalties paid by the various kinds of leases and a tabulated statement by counties, showing the earnings of the department.

The mineral leases of this department are classified as follows:

1. Mineral, confined to metalliferous ores.
2. Miscellaneous, oils, clays, stone, cement, gypsum and soda.
3. Coal.

This classification enables the records to be kept in separate books, and greatly facilitates the handling of the business of the department.

The following is the tabulated result of the rental and royalty earnings for the biennial period, ending November 30, 1908:

90 Mineral Leases.....	2,070 acres	\$ 8,706.60
20 Miscellaneous Leases.....	3,620 acres	3,866.05
32 Coal Leases.....	18,275 acres	104,456.42
Totals		23,965 acres \$117,029.07

The total earnings of the department for biennial period ending November 30, 1906, as shown by former report, were..... 62,858.11

Net biennial increase..... \$54,170.96

There is only a slight increase in the earnings of mineral leases, due to the depression in mining during the last two years, and the surrender and abandonment of a number of mineral leases. There is a small decrease in earnings of oil and miscellaneous leases, owing to the failure of oil wells. But there is a large increase in the royalties paid on coal, amounting to \$54,962.02. This large increase is due to three causes.

First. Method of Getting Tonnage. It was found that because of the specific gravity of the coal mined, 27 cubic feet of coal overrun, or made more than a ton of coal, and measurements have not been made except in disputed cases to find out amount of coal taken from mines. Instead of measurements, we have required the mine superintendents to report their tonnage by miners' pay roll under check numbers and railroad shipments. This has worked well, simplified reports, been satisfactory to the mine operators, and has, in my judgment, increased the tonnage and royalties received therefrom.

Second. Close Supervision, Constant Activity in Collections. Outside of current collections, which have thirty days for settlement, there is less than \$500 uncollected royalties in this department.

Third. Coal Mines. During this biennial period the Coke-dale mine on Riley Canon, near Trinidad, has been opened on 160 acres of coal land by the Carbon Coal and Coke Company, and a large coking plant established. This coal is all coked and has yielded to the State \$14,175.06 in the last fifteen months, and will probably return to the State double that amount during the next two years.

The Baum mine, near Dacona, on the Union Pacific, Weld county, has been developed into a large and splendid mine. A shaft 200 feet deep opens up an eight-foot vein of excellent coal, underlying the entire 640 acres of this lease. The mine is well equipped with machinery and intelligently developed, with a capacity of 1,000 tons per day. This is one of the best leases held by the State, and will become a large producer in the future. During the period of its development the State has received in royalties from this mine \$11,747.48.

Coal Lease No. 511 deserves mention and a place of record in this report. This is the oldest coal lease in the State and is on section 16, two miles south of Canon City. This lease for twenty years past has been the subject of controversies and litigation. Finally the lessees were compelled to open the coal or surrender the land to the State. By assignment, the lease passed to Littel Bros., of Colorado Springs. They have spent over \$100,000 in sinking a shaft 970 feet deep—the deepest coal mining shaft in Colorado—and have been rewarded in discovering five feet of splendid coal. With good equipment one of the largest mines in the State will result and become exceedingly valuable to the State.

EGERIA COAL LEASE.

Through this department's investigations, reports and recommendations, this lease was cancelled and every acre of the 7,400 acres restored to the State, and not a dollar was lost to the school fund; in fact, the State is \$800 ahead in royalties from this lease.

RECOMMENDATIONS.

1. The mineral lands of the State are so valuable that they should be safeguarded and made to yield to our schools and public institutions large returns in the future by leasing them on a royalty basis. A law should be enacted prohibiting leases for speculative purposes, and requiring the lessees to do active mining and development work, or surrender them to the State. The State should hold these lands for future operations and not speculators.

2. The Mineral Department is growing fast, as shown by the increased earnings. The increased office work and constant field supervision and travel is more than one man can do thoroughly and well. It will pay the State to employ the best scientific talent to supervise this department and its growing mining interests. In order to secure a competent scientific man, the superintendent's salary should be increased to \$2,500 per year.

The relations this department has sustained with mine operators, superintendents and State Land Board has been most cordial, pleasant and helpful. Harmony and co-operation have given splendid results.

THE LEGAL DEPARTMENT.

By Charles L. Dickerson, Attorney.

During the two years of my services as attorney for the Board I have personally examined the papers connected with every sale of land and timber made by this department with a view of ascertaining whether or not the proceedings had were legal, and if the papers were in proper form. My services have also enabled the department to collect practically all obligations due the State on account of leases and rights of way.

The suit pending in the District Court of Yuma county against L. D. Brown and M. C. Briggs to set aside sales of school lands made because of deceit practiced upon this office, have been brought to a successful termination in the District Court. The defendants, however, have appealed the cases to the Supreme Court of this State for final determination. No new litigation has been engaged in in the two years in which I have taken any part. It has been the policy of this department to conduct matters in such a way as to avoid legal entanglements.

The attorney for the Land Board can be used to a great advantage for the State, and on the theory that it is much easier to

do a thing right than to correct a wrong, much work can be found for him in this department. A careful examination of the proceedings of the Land Board will disclose that a greater amount of business has been transacted than during any other equal period, and that the interests of the State have been wisely administered and fully protected, for all of which the attorney for the Land Board invokes a modest share of credit.

CONCLUSIONS.

Some reforms and improvements in the conduct of the affairs of the office have suggested themselves to me, and without desire to dictate to my successors, or to the General Assembly, I present them for their consideration.

First. No department of the State has grown more rapidly than this one. Its increasing importance makes the demand the more imperative that its affairs be placed in the hands of a Board whose sole official duty it shall be to have charge of the lands of the State. An estate of nearly four million acres of land is not to be lightly administered, but should receive the most conscientious and judicious management. The officials of the State now composing this Board can not, in justice to their own departments, give to the affairs of this office the time and attention which so important a charge deserves. I, therefore, recommend that some provision be made for the creation of a Board into whose control this department shall be placed. I further recommend that the Superintendent of Public Instruction shall at all times be, ex-officio, a member of this Board.

Second. The attention of the General Assembly of the State of Colorado is called to the question of making some provision whereby the lands belonging to the State included in irrigation districts formed under what is known as the "Irrigation District Law," may be protected. Under the present laws no land in an irrigation district can be furnished with water unless such land is assessable and assessed for the purpose of defraying the expenses of securing water for irrigation purposes. The fact that State lands can not be assessed and are not amenable to taxation precludes the State from obtaining water rights for its land that can be irrigated. An amendment to the irrigation district law should be made requiring irrigation districts heretofore formed, and to be formed, to furnish water for the irrigation of all lands belonging to the State that are irrigable, to the lessee or purchaser of said land; said water to be furnished to the lessee or purchaser at a rate to be fixed in the manner that rates are fixed for waters derived from a common carrier, or by the payment of a just proportion of the entire cost and maintenance of ditches, canals, reservoirs, etc., constructed in the irrigation district. By this arrangement the State will not be forced to sell its land at the minimum price, but be able to receive for its lands a price corresponding to the values of other lands in the district. With-

out this protection a great loss will befall the school funds and the various interests under the protection of this Board.

Third. Under the present law all State lands sold must be offered in legal subdivisions of not less than 40 acres. The State now owns many tracts of land containing a less amount. Legislation should be enacted relieving this department of said restriction.

Respectfully submitted,

JOHN F. VIVIAN,
Register.
