# Performance Plan Evaluation – July 1, 2014 Submission Department of Personnel and Administration

### **Strategic Policy Initiatives**

#### Initiative criteria<sup>1</sup>:

- Outcome oriented: The initiative reflects the results the Department seeks to achieve, rather than the products of a process or activity.
- Measureable & Time-specific: The initiative includes quantifiable parameters and a timeframe within which the parameters will be met.
- Specific, Directional, & Understandable The reader should be able to define the problem or solution from the goal statement, i.e. directional verbs such as "increase" or "decrease/reduce".
- The Department has identified 3-5 strategic policy initiatives that either directly reflect the work of specific divisions or span the overall functions of the Department.

| Strategic Policy<br>Initiative (SPI) | Outcome oriented  | Measureable &<br>Time-specific  | Specific, Directional, &<br>Understandable  | Connected to<br>Division/Major<br>Program Area  | Strategy/action<br>steps identified  |
|--------------------------------------|---|---|---|---|--|
| Improve DPA<br>Customer Service      | Outcome goals include<br>finalizing the Capitol<br>Complex Master Plan;<br>tracking the use of<br>historically underutilized<br>businesses; and a<br>procurement<br>improvement plan. | Each outcome goal for 2015 and 2017 includes at least one specific measure. | The language clearly indicates that the goal of the various outcomes is to improve DPA Customer Service. For the next iteration of the plan, the Department may benefit from identifying its customers more explicitly in this section in order to help the reader understand how the outcomes feed customer service. | State Architect's Office,<br>Office of the State<br>Controller, and State<br>Purchasing Office. | The plan provides a number of performance measures that serve as strategies/action steps for achieving the goals outlined. |

<sup>&</sup>lt;sup>1</sup> These parameters are from OSPB's instructions; wording is more specifically from the "Performance Management Toolkit: A Step-by-Step Guide for Leaders & Managers", p. 19

| Strategic Policy<br>Initiative (SPI) | Outcome oriented  | Measureable &<br>Time-specific   | Specific, Directional, &<br>Understandable  | Connected to<br>Division/Major<br>Program Area   | Strategy/action<br>steps identified   |
|--------------------------------------|---|--|---|--|---|
| Modernize DPA<br>Systems             | Implement CORE,<br>digitize State Archive's<br>collection holdings,<br>obtain funding for<br>statewide Human<br>Resources Information<br>System, and increase the<br>number of CNG vehicles<br>in the state fleet   | Each outcome is linked to at least one performance measure. However, some performance measures may require additional process detail in order to assess the achievement of the outcome.  | The Department may seek to define the parameters of the initiative more for the next iteration of the plan. | State Fleet, State<br>Archives, Human<br>Resources, in addition<br>to other<br>functions/Divisions not<br>explicitly outlined.   | Similar to outcomes   |
| Reinvest in the<br>Workforce         | Increase participation/engagement in the State's employee wellness program. Since the initiative language is broader, it may be beneficial to incorporate other aspects of reinvesting in the workforce under this initiative or clarify why wellness was the priority. | Performance measures are associated with the outcome, but the measures are not specific (increase the number of employees from x to y, for example). Adding more specifics to the next iteration of the plan will help the Department identify achievement of its goals. | The Department may seek to define the parameters of the initiative more for the next iteration of the plan. | It is unclear which parts of the Department are specifically involved with the initiative – assuming the Employee Benefits Unit? | Increase number of employees enrolled in the State employee wellness program; increase the number of employees participating/engaged in the wellness program platform; expand employee wellness program to be more interactive. |

Additional Feedback: The Department provided valuable background on the problem that each initiative is attempting to tackle; the Department also identified performance measures for each outcome, which reflects a best practice of identifying key targets and action steps for each goal. For the next iteration of the plan, the Department may want to provide more specific parameters to measures, and incorporate the performance measures in the operational component of the plan to track progress.

# **Major Program Areas**

Major Program Area criteria:

- Major Program Areas identified; may be actual Department divisions or functions.
- The Major Program Area description outlines at least one customer.

| Major Program Area  | Defined                                 | Customer identified   |
|---|---|---|
| CO State Employee Assistance Program (C-SEAP)                 | Defined within the strategic component. | State employers and employees   |
| Office of the State Architect                                 | Defined within the strategic component. | All State agencies and institutions   |
| Colorado State Archives                                       | Defined within the strategic component. | Colorado's territorial and State governments  |
| State Agency Services (Consulting Services)                   | Defined within the strategic component. | All State departments and Institutions of Higher Education, Human Resources Offices in State agencies, and the offices of the elected officials.  |
| Training Services (Statewide Training and Development Center) | Defined within the strategic component. | State agencies and employees  |
| Compensation Unit   | Defined within the strategic component. | All State departments and Institutions of Higher Education, Human Resources Offices in State agencies, and the offices of elected officials.  |
| Employee Benefits Unit  | Defined within the strategic component. | State agencies and employees  |
| Risk Management Services                                      | Defined within the strategic component. | All State departments and Institutions of Higher Education except the following: University of Colorado system, Colorado State University at Fort Collins, Adams State University, Western State University, Fort Lewis College, Mesa State College of Colorado and the University of Northern Colorado |
| Integrated Document Solutions                                 | Defined within the strategic component. | State agencies, Institutions of Higher Education and municipalities statewide   |
| Address Confidentiality Program                               | Defined within the strategic component. | Victims of violent crimes who are enrolled in the program   |
| Fleet Management Program and Motor Pool<br>Services           | Defined within the strategic component. | All State agencies and institutions   |
| Capitol Complex Facilities                                    | Defined within the strategic component. | Tenants of Capitol State complex buildings  |
| Office of the State Controller                                | Defined within the strategic component. | State agencies and institutions   |
| State Purchasing Office                                       | Defined within the strategic component. | State agencies, Institutions of Higher Education, political subdivisions, certified nonprofits, and the supplier community  |

| Major Program Area                 | Defined                                 | Customer identified   |
|------------------------------------|---|---|
| Supplier Database and eProcurement | Defined within the strategic component. | State agencies, political subdivisions, Institutions of<br>Higher Education, and nonprofits         |
| Collection Services                | Defined within the strategic component. | State agencies, Institutions of Higher Education and political subdivisions                         |
| Administrative Law Judge Services  | Defined within the strategic component. | More than 50 State departments, agencies, boards, county departments, school districts and citizens |
| State Personnel Board              | Defined within the strategic component. | Applicants and employees in the State Personnel<br>System   |

Additional Feedback: The Department identified customers for each major program area within the respective divisions. For the next iteration of the plan, OSPB recommends the Department further segment customers for major program areas that specifically drive success of the strategic policy initiatives.

## **Critical Processes**

Critical Process criteria:

- The Department has identified at least one critical process per Major Program Area.
- Each process is defined by at least one input, output, and one informational output.
  - $\circ\quad$  Input: workload demand, FTE, operating budget, etc.
  - Output: number of goods provided (inspections made, technical assistance visits, licenses/permits processed, etc.)
  - o Informational output: quality with which the output was generated (timeliness, accuracy, customer satisfaction, etc.)

| Major Program Area                      | Process  | Inputs identified                     | Outputs identified   | Informational Output identified   |
|---|--|---------------------------------------|--|---|
| CO State Employee<br>Assistance Program | Provide State employees with<br>a free, confidential individual<br>counseling service throughout<br>the state. | Workload demand, FTE, operating costs | Number employees served; number of employees requesting mental health information on website (suggest refining this measure to indicate how it is an output); number of employees aware of services. | Percentage of employees satisfied with C-SEAP services. For additional measures in the future, the Dept may look at other quality measures such as effectiveness of connecting the customer to the right service, or timeliness of response in processing requests. |

| Major Program Area                             | Process   | Inputs identified   | Outputs identified  | Informational Output<br>identified  |
|--|---|---|---|---|
| Office of the State<br>Architect               | Improve the working environment by upgrading the condition of the inventory of State-owned buildings through controlled maintenance funding recommendations and implementation of appropriations. | Inventory of facilities and<br>square feet, age and funding<br>levels (workload demand) | Controlled maintenance funding as percentage of actual FY appropriation, and Reinvestment Rate; Number of projects recommended as percentage of actual number funded.   | Percentage changes in a variety of characteristics of the inventory   |
| Colorado State Archives                        | Preserve, increase and digitize collection holdings   | Workload demand   | Number of analog records<br>accessioned from state agencies for<br>permanent storage; number of<br>records stored with State Archives   | Number of permanent electronic/digital records  |
| Colorado State Archives                        | Review and prioritize<br>statewide records<br>management programs   | Workload demand   | State agency compliance rate;<br>number of statewide retention<br>schedules reviewed/updated;<br>number that received records<br>management training  | The compliance rate is the better informational output for this process; the Department may seek to continue to refine this measure by assessing the quality of record management training and outreach efforts to ensure compliance for the next plan. |
| State Agency Services<br>(Consulting Services) | Provide guidance on the State<br>of Colorado's selection<br>processes and procedures  | Workload demand   | Number of days required to complete director reviews; number of days required to fill a State position; number of disparate human resources management systems (this seems like more of an input than an output for the next iteration). Is the number of days required to fill a state position more an input as well? | To improve the clarity of some of these measures it may be better to cite the goal within the measure for the length of the turnaround time for the output measures.  |
| Statewide<br>Training/Development<br>Center    | Provide professional<br>development and training<br>services to State employees   | Workload demand, FTE, operating budget  | Number of employees enrolling in<br>workshops; number of trainings<br>presented; number of new<br>employees participating in new<br>employee orientation  | Number of new employees participating in new employee orientation within 10 days of employment. For the next iteration, the Center may want to include a measure on the quality of the training.  |

| Major Program Area                                   | Process  | Inputs identified                           | Outputs identified   | Informational Output identified  |
|--|--|---|--|--|
| Compensation Unit                                    | Manage the compensation<br>and classification plan for the<br>State of Colorado                                    | Workload demand, FTE,<br>budget allocations | Number of survey source<br>comparisons for each benchmark<br>job in the annual compensation<br>survey; number of days to complete<br>a director's review | Percentage of classification survey conducted  |
| Employee Benefits Unit                               | Administer the State of<br>Colorado insurance plans<br>(health, life and dental)                                   | FTE, Workload demand                        | Number of reviews to determine eligibility of benefits   | Percentage of fulltime<br>employees offered group<br>medical plan coverage; for<br>next iteration, suggest adding<br>a customer service measure<br>component to the process.   |
| Risk Management<br>Services                          | Provide loss control training<br>to State agencies and other<br>loss control services                              | FTE, Workload demand                        | Injury rate of state employee;<br>incurred cost of current fiscal year<br>workers' compensation claims   | To improve the informational nature of these measures, suggest adding a customer service component to the process.   |
| Integrated Document<br>Solutions                     | Manage the metering of<br>outgoing mail for state<br>agencies to receive the<br>maximum reduction in USPS<br>rates | FTE, operating costs,<br>workload demand    | Number of b&w and color impressions; number of pieces of letter mail processed; number of zip code sort counts   | Percentage of total letter mail processed that received the maximum postage discount; for next iteration, it may help the Department to break out how it controls this output in order to focus on improving it.               |
| Address Confidentiality<br>Program                   | Facilitate confidential mail forwarding to program participants  | Workload demand,<br>operating costs, FTE    | Percentage of outgoing mail to incoming mail; average cost per piece of mail processed using the most cost effective strategies                          | For a more informational output focus, the Program may seek to identify ways it can increase collaboration with other organizations that deal with victims of violent crimes in order to assure increased services to victims? |
| Fleet Management<br>Program & Motor Pool<br>Services | Provide fleet vehicles to state agencies   | Workload demand                             | Number of CNG vehicles in the state fleet  | For a more informational output focus, Fleet may seek to identify a performance measure that reflects customer satisfaction with the fleet service in order to foster continuous improvement of the service.                   |

| Major Program Area                                   | Process  | Inputs identified                                      | Outputs identified  | Informational Output<br>identified   |
|--|--|--|---|--|
| Fleet Management<br>Program & Motor Pool<br>Services | Manage motor pool rental requests in the Denver metro area | Workload demand  | Number of motor pool rentals,<br>number of motor pool rental days   | Percentage efficiency; the Department may want to clarify the informational measure of "percentage efficiency" in order to help the reader understand the measure as well as enable the program to manage process improvement. |
| Capitol Complex Facilities                           | Manage requests for repairs or maintenance                 | Workload demand, FTE, operating costs                  |   | Number of requests for<br>repairs or maintenance<br>completed within one day<br>time frame; number of calls<br>for return service on a<br>previous repair ticket   |
| Office of the State<br>Controller                    | Manage the State's financial reporting                     | Workload demand  | Number of disparate systems being used by the state for accounting/budgeting/procurement (not sure this is an output – appears to be more of an input); number of users of the system (also seems to be more of an input);  | Number of days to complete a procurement; number of paper warrants issued  |
| State Purchasing Office                              | Facilitate state purchasing processes                      | FTE, workload demand                                   | Number of BIDS/VSS new vendor registrations; number of SASPO/WSCA rebates received; number of active statewide price agreements available; volume/utilization of price agreements statewide; number of registered HUBs; number of quarterly business reviews conducted; number of Pcard rebates received, Pcard user entities | Number of strategic sourcing events hosted (as this seems to touch the customer service aspect of this process more); number of registered HUBs in BIDS/VSS (as this ties to an SPI)   |
| Supplier Database and<br>eProcurement                | Implement electronic procurement processes                 | Number of purchase or<br>delivery orders from catalogs | Number of statewide price<br>agreements added to the<br>eprocurement catalog  | Is there is a time frame for<br>this measurement to help the<br>Department assess how<br>effectively the process is<br>being implemented?  |
| Central Collection<br>Services                       | Collect overdue accounts on behalf of State agencies       | Workload demand, FTE,<br>budget                        | Total amount of debts collected;<br>total number of debtors with<br>payment plan; total number of<br>closed, paid-in-full<br>records/accounts   | Average collection rate on debts referred to CCS   |

| Major Program Area                   | Process  | Inputs identified  | Outputs identified   | Informational Output identified   |
|--------------------------------------|--|--|--|---|
| Administrative Law Judge<br>Services | Adjudicate workers compensation proceedings and other government cases on behalf of various Colorado state, county and administrative agencies, as well as local school boards | FTE, workload demand,<br>number of hearings held,<br>number of courtrooms  | Number of cases electronically filed   | Hours required to processes a<br>worker's compensation case<br>from the opening of the case<br>to the setting date  |
| State Personnel Board                | Provide fair and timely<br>resolution to cases before the<br>Board and ensure that state<br>employment is based on merit   | Workload demand, hours of<br>legal research and writing<br>per case filing | Number of cases resolved within<br>statutorily required deadlines;<br>number of hours ALJ routinely<br>spend on legal research and writing | For the next iteration, suggest adding a measure that captures the "fair" part of the resolution, or measures some level of customer satisfaction with the process. |

Additional Feedback: The Department identified at least one critical process per major program area. For the next iteration, it may be useful to include more performance measures that assess the level of customer service in addition the efficiency that the Department is currently measuring. For example, reporting on customer satisfaction would support the Department's commitment to customer service and provide an additional level of opportunity identification for process improvements.
