January 31, 2003

The Honorable Bill Owens Governor 136 State Capitol Building Denver, Colorado 80203

Dear Governor Owens:

I am submitting a Quarterly Financial Report on the status of the state's financial condition for the six-month period ended December 31, 2002. This Quarterly Financial Report summarizes activity in the General Fund and the Capital Construction Fund.

The attached Exhibit A provides a Balance Sheet for the Unrestricted General Fund and Capital Construction Fund at December 31, 2002. Several factors that contribute to the \$1,147.1 million deficit total fund equity are discussed in Exhibit B below. When four percent of appropriations are reserved, as is required by current law, the General Fund unreserved fund balance deficit is \$1,387.8 million. This compares to the unreserved fund balance deficit of \$1,350.0 million at December 31, 2001. However, the December 31, 2001 deficit was largely the result of the delayed recognition of the Fiscal Year 2000-01 \$927.2 million TABOR refund liability as required by House Bill 98-1414. While there is no TABOR refund liability in Fiscal Year 2002-03, the current year deficit is comparable in size because of revenue shortfalls and the structural budget imbalance made possible by House Bill 98-1414. In Fiscal Year 2001-02, the deficit was addressed by reserve spending and by \$726.1 million of one-time transfers from cash funds. Except for the \$130.6 million net transfer back to the cash funds, those monies are unavailable to address the current deficit. The General Fund is normally in deficit at this time of year because of the legal requirement for the Department of Education to transfer nine months of public school moneys by the end of the second quarter. However, the additional three months of public school moneys accounts for less than \$700 million of the deficit.

While the fund balance deficit is significant, the trend in the General Fund cash deficit may be more serious. The state's current General Fund cash position (defined here as the Liability to Pooled Cash plus State Treasurer's short-term borrowing payable at June 27, 2003, reduced by investments available for liquidation) is \$1,688.5 in deficit. The state's General Fund deficit cash position was \$911.2 million and \$322.4 million at December 31, 2001, and 2000, respectively. Although there will be no outflow for TABOR refunds this year, the State Treasurer anticipates a General Fund cash deficit at fiscal year end even

Governor Bill Owens Page 2 of 3 January 31, 2003

after the Governor's proposed ten percent reduction in General Fund expenditures. The ability to repay the Treasurer's short-term borrowing at fiscal year end is contingent on the availability of borrowable resources in the Treasurer's cash and investment pool, which includes certain cash fund resources. The state's General Fund cash position continues to deteriorate due to expenditures in excess of revenues. As a result, more of the state's borrowable resources will have to be used to repay the Treasurer's General Fund borrowing. If the balance between expenditures and revenues is not corrected, the state will eventually use up the cash in its borrowable resources. Unfortunately changes in budgetary policies, such as, delaying recognition of accrued payroll liabilities, Medicaid payables, or tax refunds payable, do not beneficially affect the state's ongoing cash position. In addition, while transfers from cash funds benefit the General Fund fund balance, they consume borrowable resources, and therefore, do not benefit the state's overall cash position. Continued pressure on the state's cash position could result in the state being unable to meet its obligations.

Exhibit B provides a Schedule of Revenues, Expenditures and Changes in Unreserved Fund Balance - General Fund - Budget and Actual for the six-month period ended December 31, 2002. The Current Estimate/Budget column reflects the most recent OSPB estimate of revenues on the modified accrual basis for the fiscal year and appropriations and transfers currently in law. Departments recorded \$86.1 million and \$56.1 million of general fund budget restrictions at December 31, 2002, and 2001 respectively, and are in the process of recording the balance of the Governor's proposed ten percent restrictions. Because the Fiscal Year 2002-03 restrictions recorded at December 31, 2002, do not reflect the Governor's entire proposed reductions, no restrictions on departmental budgets are reported in the departmental budget amounts. The ten percent restriction is reflected as part of the \$852.2 million shown in the line item titled Appropriation Reductions Needed to Meet the Required Statutory Reserve. An additional \$20.1 million revenue shortfall reported on the December Year-to-Date Revenue Summary Report is not yet reflected in the Current Revenue Estimate and is therefore also not reflected in the \$852.2 million amount.

At the end of the second quarter, actual general-purpose revenues were \$2,655.1 million, which is 47.9 percent of the annual estimate. Departmental expenditures of the General Fund through the second quarter were 61.9 percent of current appropriations. This compares with the prior year figure of 60.2 percent of appropriations at December 31, 2001. The primary reason for spending more than 50 percent for the second quarter is the legal requirement to transfer nine months of public school moneys totaling \$1,849.2 million from the General Fund to the Public School Fund by December 31. At the end of the second quarter, eight departments have spent in excess of 50 percent of their unrestricted budgets while eleven departments have spent less than 50 percent. However, only three departments have spent 45 percent or less of their unrestricted budgets that would be expected in order to meet the Governor's proposed ten percent reduction.

Exhibit C is a Schedule of Revenues, Expenditures and Changes in Unreserved Fund Balance - Regular Capital Construction Fund - Budget and Actual for the six-month period ended December 31, 2002. Consistent with our normal reporting practice, the estimated expenditures of the Capital Construction Fund do not reflect budget restrictions. It is anticipated that expenditures will be reduced to prevent a deficit fund balance. Expenditures of the Capital Construction Fund are expected to be less than outstanding appropriations because of the multi-year nature of the appropriations compared to current fiscal year

Governor Bill Owens Page 3 of 3 January 31, 2003

expenditures. This timing difference between the revenues and expenditures, inherent in the multi-year appropriations process, causes a large variance between the estimated and the actual fund balance.

Based on review of the attached financial reports and agency comments, I have presented the financial issues that I believe are significant to the state. Questions concerning this report should be directed to my office.

Sincerely yours,

Arthur L. Barnhart State Controller
