Dear Ms. Williams and Ms. Tochtrop:

This report is submitted pursuant to CRS 24-102-205(7)(b) directing the Department of Personnel & Administration (DPA) to deliver information on personal services contracts, contained in Colorado's Contract Management System (CMS), to DPA's standing legislative committees of reference in each house of the general assembly. This is our third annual report.

Background

The General Assembly of the State of Colorado passed Senate Bill 07-228, now codified as CRS §§ 24-102-205, 24-102-206, 24-103-601, 24-103.5-101, and 24-105-102, mandating implementation of a statewide-centralized system to improve tracking and management of state contracts and achieve greater public transparency. Over the past year (2012), the Contract Management System (CMS) did not undergo any significant upgrades or modifications by either the Governor's Office of Information Technology (OIT) or the vendor.

Reporting Highlights

This year's submittal includes two new Tables (1-1 and 2-1) illustrating trends in Colorado contracting. These tables reference each of the Exhibits and provide a snapshot of contract trends

since implementation of the CMS in July of 2009. In general, trends appear to represent a relatively steady state in personal services contracts and dollars spent.

1. CMS Records as of December 31, 2012

- a. CMS had 40,341 records for 25 State agencies and institutions of higher education since the inception of the system in July 2009.
- b. Of this amount, 33,974 records are for non-personal services contracts under \$100,000, including 11,668 modifications (amendments), 8,470 personal services contracts under \$100,000, 6,990 purchase orders under \$100,000, 3,205 non-personal services contracts, 2,827 master task order contracts, and 813 records for institutions of higher education. Institutions of higher education are not required to include their contract records in CMS.
- c. The remaining 6,367 records are personal services contracts over \$100,000, defined by the Office of the Attorney General (OAG) to include: grants, information technology contracts, task orders, interagency agreements, intergovernmental agreements, construction, professional, and purchased services agreements (reportable personal services contracts).
- d. Given that only 6,367 of 40,341 records, or 15.8% of CMS records, are required to be included per legislation, it is apparent that State agencies are using CMS for overall contract tracking and management, and not merely for statutory compliance.
- e. This report is based on CMS records as of December 31, 2012 with a report run date of April 30, 2013.

2. Personal Services Contracts

- a. The 6,367 personal services contracts entered into since July 2009 (cumulative amount) have a total value of \$10.3 billion, including amounts added through contract modifications. During calendar year 2012, agencies entered into 1,456 reportable personal services contracts with a total value of \$2.1 billion.
- b. Of the cumulative amount, three Colorado departments (Transportation, Human Services, and Public Health and Environment) account for 61.7% of these contracts and 52.9% of the total value.
- c. Of the cumulative amount, there were 1,073 construction contracts (total value of \$2.2 billion) which account for 16.9% of personal services contracts over \$100,000 and 21.2% of the total value.
- d. See Tables 1-1, 2-1 and Exhibits A1-1, A1-2, A3-1 and A3-2.

3. Vendor Performance Ratings

- a. Agencies rate vendor performance at the completion of the contract, defined as the full life of the contract including extensions. Per statute, evaluation and rating assignment must occur within 30-days of the completion date. Any contracts with a completion date of December 31, 2012 may not have a rating until January 31, 2013 – outside of the January 1, 2012 to December 31, 2012 reporting period.
- b. Agencies rate vendor performance as Below Standard, Standard, and Above Standard.
- c. Of the 6,367 personal services contracts, 2,661 (41.8%) have expired and are rated, while the remaining 3,706 (58.2%) are continuing or are expired and not yet rated.

- d. For the 2,661 personal services contracts that were rated, 2,336 (87.8%) were rated as Standard, 284 (10.7%) Above Standard, and 41 (1.5%) Below Standard
- e. The contracts rated as Below Standard were issued by 9 agencies: the Department of Public Health & Environment (12), the Department of Transportation (21), the Department of Local Affairs (1), the Department of Natural Resources (1), the Department of Human Services (2), and the Division of Homeland Security and Emergency Management (1), Colorado Energy Office (2), Colorado Department of Public Safety (1). The primary reason reported by the agencies for assigning a low rating was failure to complete the project and non-adherence to the tasks assigned in the contract scope of work.
- f. CDOT had 8 contracts with Rocky Mountain Enterprises Inc. that were rated below standard. This vendor went bankrupt in 2012 and did not complete these contracts.
- g. Of the 6,367 personal services contracts, 1,073 are construction contracts. For construction contracts, 358 (33.4%) have expired and are rated, while the remaining 715 (66.6%) are continuing and not yet rated.
- h. For the 358 construction contracts that were rated, 264 (73.7%) were rated as Standard, 87 (24.3%) Above Standard, and 7 (2.0%) Below Standard
- i. See Tables 1-1, 2-1 and Exhibits B1-1, B1-2, B4-1 and B4-2.

4. Sole Source Contracts

- a. Of 1,456 personal services contracts entered into during calendar year 2012, there were 65 sole source contracts or 4.5% of 2012 reportable personal services contracts. The total value of these sole source contracts was \$77.1 million, or 3.7%, of the contract value of all personal services contracts.
- b. Thirteen agencies had sole source contracts.
- c. The Department of Public Health & Environment accounted for 33 sole source contracts (50.8% of the total), representing 16.6% of the sole source contract value. Department of Human Services had 7 sole source contracts (10.8% of the total), representing 31.5% of the contract value and Colorado Department of Education had 2 sole source contracts (3.1% of the total) representing 32.3% of the value.
- d. The total number of sole source contracts contained in CMS since July 1, 2009, is 300; 4.7% of cumulative reportable personal services contracts.
- e. See Tables 1-1, 2-1 and Exhibit C3-1, C3-2, D1-1, and D3-1.

5. Solicitation/Selection Method

- a. Of the 6,367 personal services contracts, 15 different solicitation/selection methods were used to classify 4,905 personal services contracts and 1,462 were not identified by solicitation/selection method. The most common solicitation/selection methods were grant specific (1,160 contracts or 23.6% of the total classified), Invitation for Bid (836 contracts or 17.0% of the total classified), and Request for Proposals (751 contracts or 15.3% of the total classified).
- b. See Exhibits D1-1 and D3-1.

6. Work Performance Location

- a. Of the 6,367 personal services contracts, 26 were awarded to contractors who are performing some or all of the work outside of Colorado.

- b. These 26 contracts were awarded by 7 agencies as follows: Department of Transportation (14), Department of Human Services (4), Department of Public Health & Environment (2), Department of Regulatory Agencies (2), Department of State (2), Department of Labor & Employment (1), and Office of Economic Development and Trade (1).
 - c. Three of the CDOT contracts were awarded to contractors who are performing some of the work outside the United States. All are for remote project management and/or information technology assistance. One OEDIT contract was awarded to a contractor who is performing management assistance work outside the United States. All four of these contracts were awarded in 2011.
 - d. See Exhibits E1-1 and E3-1
7. **Public Website** – On the Public Website, any member of the public can search for contracts by State agency, vendor, contract date, contract amount, vendor selection method, number of State positions created, location where the work was performed, and/or vendor performance rating. See <http://contractsweb.state.co.us/> Information is posted automatically onto the public website when certain conditions are met: 1) the total dollar amount exceeds \$100,000; 2) 30-days have passed from the entered performance start date; and 3) the contract type selected is either, personal services, construction, or intergovernmental. To date, 5,418 of the 6,367 records are available on the public website. The difference of 1,114 includes 735 contracts that had a start date prior to July 1, 2009 because agencies had subsequent amendments to these contracts and entered the original contract in CMS. These contracts are outside the scope of the legislative period and will not be included on the public website. The remaining 375 contracts were entered into during December 2012 and eventually will be on the public website. During 2012, 3,465 people visited the site, with 53.8% directed by search engines such as Google, 22.3% were viewed as direct traffic (visitor typed in the CMS website address) and 23.9% directed through other referring websites (such as the State's transparency website).

Now entering into its fourth year as Colorado's first and only agency-wide Contract Management System, CMS continues to achieve a high level of success. This success has been possible due to the support of all the State agencies, the Governor's Office of Information Technology and the Office of Contract Administration in the Office of the State Controller. Questions concerning this report should be directed to my office.

Sincerely,

David J. McDermott, CPA
Colorado State Controller

⁽¹⁾ Implementation of CMS on July 1, 2009 was in compliance with the statutory provisions noted herein. Many of the contracts held by State agencies as of that date were later amended or extended and some were Master agreements with individual task orders issued under their broad provisions. To facilitate a more complete contract history and complete information related to a contractor and its performance, many agencies elected to create a CMS record for the original agreement which was effective prior to the July 1, 2009 date. The past two years of data included these contracts as well, despite not being required under statute to be included in these legislative documents, as they are a part of the complete package leading up to vendor evaluation and rating.

Explanation of Exhibits and Exhibits

These are included on the Office of the State Controller's website due to the length of these documents:

http://www.colorado.gov/dpa/dfp/sco/contracts/CMS_Reports/2010%20Report%20Data%20March%201,%202011/CMS_Reports.htm

Explanation of Exhibits

Each of the attached Exhibits fulfills a specific statutory requirement and contains contract data covering the time period indicated.

1. Exhibit A1-1: Colorado Personal Services Contracts (174 pages)

This report is required by CRS 24-102-205 (7)(b). Personal Services contracts have been defined by the Office of the Attorney General (OAG) to include: Grant Agreements, Information Technology contracts, Task Order Agreements, Interagency Agreements, Intergovernmental Agreements, Construction, Professional, and Purchased Services Agreements that exceed \$100,000. This report presents the contract identification number (CMS #), the status of the contract (active or expired), title given the contract, the solicitation method used, whether the contract is a multi-year or single-year contract, the current *cumulative* maximum dollar amount of the contract, and the number of State employment positions created, if any. Each section of the report presents an individual agency divided between construction contracts and all contracts other than construction. The OSC has adopted “Single-year” to describe a typical State contract that is entered into on a 12-month basis with up to 4-one year renewals for a total of potentially 5-years (single year initial term followed by single term renewals). The OSC has adopted “Multi-year” to describe a State contract entered into with an initial term of more than 1-year followed by one year renewals for a total of potentially 5-years. Given this, many of the contracts reported will not have a final rating assigned for a number of years. Each section then summarizes the total number of active and expired, multi-year and single-year, personal services contracts presented, their combined total dollar amount, and the total number of created State positions. Per statute, only those personal services contracts with a value of greater than \$100,000 are included. This Exhibit presents all personal services contract records entered into CMS between July 1, 2009 and December 31, 2012. Historically, creation of FTE at a State agency does not occur under personal services contracts; however, the number of State employment positions created is a required reportable field per statute. The OAG has interpreted this provision as meaning the State of Colorado as the employer, thereby including only those positions hired by the executive, legislative, and judicial branches of government and not positions created by contractors/vendors. Note: the SB 07-228 statutes apply only to the executive branch.

2. Exhibit A1-2: Overall Department Summary of Personal Services Contracts (6 pages)

This report presents the summarized information for each agency included in Exhibit 1-1.

3. Exhibit A3-1: 2012 Colorado Personal Services Contracts entered into during calendar year 2012 (51 pages)

This report presents only the 1,421 personal services contracts entered into by the State of Colorado between January 1, 2012 and December 31, 2012. This breakdown is created to show contracts executed by Colorado agencies in the most recent calendar year (2012). The 1,421 personal services contracts entered into during calendar year 2012 include new multi-year contracts (419) and the total number of new single-year contracts in 2012 (1,003). The exhibit also shows, the number of new 2012 Active contracts (1,237) and

total of contracts that expired in 2012 (185). The contracts shown in this Exhibit are also included in Exhibit A1-1.

4. Exhibit A3-2: Overall Department Summary of 2012 Colorado Personal Services Contracts (5 pages)

This report presents the summarized information for each agency included in Exhibit 3-1.

5. Exhibit B1-1: Vendor Performance Ratings (231 pages)

This report is required by CRS 24-102-205 (3)(a)(VIII) and (6). Vendor performance is rated using a three (3) tiered method (Below Standard, Standard and Above Standard). The OSC issued guidance to allow for consistency and reduced subjectivity in evaluation. Since statute requires evaluation and rating at the completion of a contract, most of the contracts shown in this report have not yet been rated. This report presents the contract identification number (CMS #), title given the contract, the current expiration date of the contract, vendor name, and final rating, if applicable/available. Each section then summarizes the total number of active (open) contracts, the total number of expired (complete) contracts, the number of contracts eligible for rating depending on completion date of the contract, and the final ratings assigned, if any. The OAG has interpreted “completion of the contract” to mean the *full* life of the contract including any allowed extensions. A typical State contract is entered into on a 12-month basis with up to 4-one year renewals for a total of potentially 5-years. Given this, many of the contracts reported will not have a final rating assigned for a number of years. Agencies are, however, conducting interim evaluations and assigning interim ratings to use in assigning a final reported rating. An entry of “Not Yet Rated” is selected for those contracts whose final expiration date has not yet been reached but will require a final rating upon contract close. Entry of “N/A” is selected for those CMS records created to track and manage State contracts that are not governed by Senate Bill 07-228 (such as a contract signed prior to July 1, 2009 and/or a contract whose value is less than \$100,000). Many Construction and Division of Housing contracts are unable to assign a final rating within thirty (30) days of the completion date of the contract. This is due to the manner in which these types of contracts are “closed out.” For both types of contracts, the parties involved typically have an additional 90 to 120 days to complete a punch-list and/or finalize documentation and to pay any retainage. Evaluation and rating occurs immediately thereafter. This Exhibit presents all personal services contract records entered into CMS between July 1, 2009 and December 31, 2012.

6. Exhibit B1-2: Overall Department Summary of Vendor Performance Ratings (6 pages)

This report presents the summarized information for each agency included in Exhibit B1-1.

7. Exhibit B3-1: Records in CMS for contracts that Expired and were rated between January 1, 2012 and December 31, 2012 (39 pages)

This report presents only those 868 contracts that expired *and* were rated anytime between the reporting dates of January 1, 2012 and December 31, 2012. This exhibit was not provided in the March 30, 2012 report. It is a new breakdown created to focus further in on the expectations of the statutory provisions. Statute requires agencies to evaluate

and assign a rating within 30-days of the contract's completion date. Any contracts with a completion date of December 31, 2012, therefore, have until January 31, 2013 to assign a rating. As of the date of this submittal, all contracts requiring a rating have been rated.

8. Exhibit B3-2: Overall Department Summary of Records in CMS for contracts that Expired and were rated between January 1, 2012 and December 31, 2012 (3 pages)
This report presents the summarized information for each agency included in Exhibit B3-1.
9. Exhibit B4-1: Records in CMS for Capital Construction contracts that Expired and were rated between January 1, 2012 and December 31, 2012 (9 pages)
This report presents only those 104 capital construction contracts that expired and were rated anytime between the reporting dates of January 1, 2012 and December 31, 2012. This exhibit was not provided in the March 30, 2012 report.
10. Exhibit B4-2: Overall Department Summary of Records in CMS for Capital Construction contracts that Expired and were rated between January 1, 2012 and December 31, 2012 (2 pages)
This report presents the summarized information for each agency included in Exhibit B4-1.
11. Exhibit C3-1: Sole Source Contracts (22 pages)
This report is required by CRS 24-102-205 (3)(a)(VI) and (7)(c). This report presents the contract identification number (CMS #), the title given the contract, the current dollar amount of a contract including any added funding subsequent to the initial execution of the agreement, the vendor name, an indication of whether a Sole Source Justification form was completed, and whether standard steps in making a sole source determination were taken. Each section then summarizes the total number of sole source contracts per agency and the combined dollar amount. The Colorado State Purchasing Office identified three steps considered "standard" towards making a Sole Source determination. They are: use of Bid Information and Distribution System (BIDS) web statistics, market research, and manufacturer's statement. Those records with a "blank" response utilized other steps in making the sole source determination and recorded the steps in a free text "Notes" field in the contract record. This Exhibit presents contract records entered into CMS between January 1, 2012 and December 31, 2012.
12. Exhibit C3-2: Overall Department Summary of Sole Source Contracts (2 pages)
This report presents the summarized information for each agency included in Exhibit B3-1.
13. Exhibit D1-1: Solicitation/Selection Types Used (7 pages)
This report was created as required by CRS 24-102-205 (3)(a)(VI). It presents each department and the number of solicitations/selections used per identified solicitation/selection method. Sixteen methods are included. This Exhibit presents contract records entered into CMS between July 1, 2009 and December 31, 2012.
14. Exhibit D3-1: Solicitation/Selection Types Used for contracts entered into anytime between January 1, 2012 and December 31, 2012 (7 pages)

This report presents only those solicitations/selections made by each department for the contracts entered into between January 1, 2012 to December 31, 2012. This exhibit was not provided in the March 30, 2012 report. It is a new breakdown created to focus further on the 2012 reporting period. Sixteen methods are included.

15. Exhibit E1-1: Work Performance Location (8 pages)

This report was created as required by CRS 24-102-205 (3)(a)(IX)(X). It presents only those agencies having contracts in which a percentage of the work was performed outside of Colorado and/or the United States. Currently, this report shows seven (7) state agencies entering into a total of twenty-five (26) contracts with some of the work completed outside Colorado, and four (4) of these same contracts having some of the work completed outside the United States. This Exhibit presents contract records entered into CMS between July 1, 2009 and December 31, 2012.

16. Exhibit E3-1: Work Performance Location for contracts entered into anytime between January 1, 2012 and December 31, 2012 (2 pages)

This report presents only those agencies having contracts in which a percentage of the work was performed outside of Colorado and/or the United States and the contracts were entered into by the departments anytime during the reporting period of January 1, 2012 to December 31, 2012. This exhibit was not provided in the March 30, 2012 report. It is a new breakdown created to focus further on the 2012 reporting period. This report shows only one (1) agency having entered into one (1) contract in 2012 with some of the completed outside Colorado, and none of the work being completed outside the United States.

Guide to Report Terms and Acronyms:

Exhibits A1-1, A1-2, A2-1, A2-2, A3-1 and A3-2

- *Advertisement for Bids:* Primarily used to solicit competitive bids on construction projects. Public notice for construction or construction related projects. Not a formal solicitation method.
- *Authorized by Statute:* Selection method directed/required by law. Full and open competition need not be provided for when (i) a statute expressly authorizes or requires that an acquisition be made through another agency or from a specified source, or (ii) the agency's need is for a brand name commercial item for authorized resale.
 - Example 1: The Department of Human Services has numerous programs that operate under their own statute. The statute will specify a vendor community, resulting in "Law Specified" vendors.
 - Example 2: The Department of Natural Resources (DNR) awards the majority of its grants using a selection method specified by statute. Each grant program within DNR has a website that describes the grant, those eligible to apply, the application procedures, and evaluation criteria. Though not solicited under the procurement code, there is a competitive process for selection. DNR also has several grant programs where Great Outdoors Colorado (GOCO) monies, severance tax dollars, lottery dollars, Off-Highway Vehicle (OHV) and

snowmobile license fees, or federal funding dollars are passed through to other governments and private entities. Program examples include the Natural History Small Grants Program, FEMA grants and Wetlands grants.

- *Discretionary*: No competition required due to dollar amount of the project or funding source.
- *Documented Quote (DQ)*: Used for informal solicitations of specific goods or services: (i) commodities costing between \$10,000 and \$150,000; (ii) services costing between \$25,000 and \$150,000; and (iii) construction projects between \$25,000 and \$500,000. DQs greater than \$10,000 must be solicited by purchasing staff and require detailed specifications and/or Statement Of Work (SOW).
- *Emergency*: As declared by agency's purchasing director.
- *Exempt*: Not governed by the Procurement Code (such as elected officials can conduct solicitations independent of the Code).
- *Grant Specific*: The grantor specifies within the grant who the contractor/vendor must be.
 - Example 1: Federal grants that list the grantees of the award.
 - Example 2: Location where grant monies must be spent directs/limits award of the grant.
- *Invitation for Bid (IFB)*: Formal solicitation method where sealed bid responses are received by the State. The lowest priced bid that is also responsive to the requirements and where the bidder is deemed responsible is awarded. IFBs contain, or incorporate by reference, the work specifications and all contractual terms and conditions.
- *Not Yet Selected*: Often a record is created in CMS before the solicitation process is concluded. This entry is later changed once the means of solicitation has been determined and vendor selection has been made.
- *Other*: Selected if a more defined selection method is used such as naming a particular State Price Agreement.
- *Request for Applications (RFA)*: A formal statement that invites grant or cooperative agreement applications in specified area to accomplish specific program objectives. The RFA typically includes the estimated amount of funds set aside for the competition, the estimated number of awards to be made, and the application receipt date(s). Applications submitted in response to an RFA are often reviewed by an initial review group put together by the issuing agency. Final selections made or those applicants meeting the minimum qualifications will be asked to submit a bid or proposal per a solicitation process.
- *Request for Proposal (RFP)*: Formal solicitation method where sealed proposals are received by the State. Price and other factors are evaluated with the awarded proposal being one deemed most advantageous to the State's requirements. RFPs are publicly advertised and proposers respond with a detailed proposal and price quote. Award may not necessarily be made to the lowest quote.
- *Request for Qualifications (RFQ)*: A solicitation document requesting submittal of qualifications or specialized expertise in response to the scope of services required. Pricing is not solicited with RFQs. Typically used in Architectural and Engineering, Land-surveying and Industrial Hygienist service solicitations.

- *Sole Source:* Procurements where only one vendor is capable of meeting solicitation requirements, for example, vendors with unique skills, who have a patent, or are solely able to timely deliver needed goods and/or services.
- *Solicitation Not Conducted:* This option is selected when a type of agreement does not require a solicitation because it is exempt from the procurement code. For example, Interagency Agreements.
- *State Price Agreement:* A contract between the Department of Personnel & Administration's, Division of Finance and Procurement, State Purchasing Office and a vendor, which allows agencies and institutions of higher education to order goods or services from the vendor, pursuant to the terms of the price agreement, by issuing a purchase order, task order, or other approved order form.

Exhibits B1-1, B1-2, B3-1, B3-2, B4-1 and B4-2

- *Above Standard:* Contractor's performance under the contract has exceeded specifications/requirements of the contract.
- *Below Standard:* Contractor's performance under the contract has failed to meet all specifications/requirements of the contract.
- *N/A:* Used for those CMS records created to track and manage State contracts that are not governed by Senate Bill 07-228 (such as a contract signed prior to July 1, 2009 and/or a contract whose value is less than \$100,000).
- *Not Yet Rated:* Used if contracted services have not yet been evaluated and rated.
- *Standard:* Contractor's performance under the contract has met all specifications/requirements of the contract.

Exhibits C3-1 and C3-2

Follow-on Contract: Used in situations where the contract is a continuation of work started under another contract and the determination has been made that it is in the best interest of the State to continue with the current vendor. Examples include information technology and facilities contracts in which new work impacts the existing procurement, and selecting another vendor would act to void any warranties and/or adversely impact work continuity

^[1] Implementation of CMS on July 1, 2009 was in compliance with the statutory provisions noted herein. Many of the contracts held by State agencies as of that date were later amended or extended and some were Master agreements with individual task orders issued under their broad provisions. To facilitate a more complete contract history and complete information related to a contractor and its performance, many agencies elected to create a CMS record for the original agreement which was effective prior to the July 1, 2009 date. The past two years of data included these contracts as well, despite not being required under statute to be included in these legislative documents, as they are a part of the complete package leading up to vendor evaluation and rating.
