# Public Employees' Retirement Association of Colorado

COMPREHENSIVE ANNUAL FINANCIAL REPORT FOR THE FISCAL YEAR ENDED DECEMBER 31

1987

The Public Employees' Retirement Association of Colorado provides retirement and survivor benefits for the employees of 331 state, school, and local government entities in Colorado.

### 1987 Statistical Highlights

- Benefit Recipients ..... 30,105
- Contributing Members ..... 100,808
- Service Retirements ..... 2,807
- Disability Retirements ..... 309
- Member Deaths ..... 152
- Deaths After Retirement ..... 878
  
- Benefits Paid .....\$ 274,235,000
- Refunds .....\$ 27,704,000
- Employer Contributions .....\$ 285,101,000
- Member Contributions .....\$ 198,543,000
- Investment Assets .....\$6,997,824,000
- Investment Income .....\$ 598,685,000
  
- Investment Rate of Return ..... 2.9%
- Five-Year Rate of Return ..... 12.0%

Life Insurance Program .....	71
Voluntary Investment Plan .....	72

# Introductory Section

# Letter of Transmittal

June 24, 1988

## Dear Members of the Board of Trustees:

I am pleased to present the Comprehensive Annual Financial Report of the Public Employees' Retirement Association of Colorado for the year ended December 31, 1987.

This Report consists of seven sections. The Introductory Section contains this Letter of Transmittal, the Board Chairman's Letter, a summary of the benefit programs, information about the Board of Trustees, the administrative organization and the consulting services used by PERA. The Financial Section contains the opinion of the independent certified public accountants, Arthur Andersen & Co, and the financial statements of the Association, followed by a Supporting Schedules Section. The Investment Section presents information regarding the fund's investments, including the Investment Policy and Summary, information about the fund's performance, a Colorado Investment Profile and listings of the Association's common stock holdings and brokers used.

The Actuarial Section contains the certification of the consulting actuary, Gabriel, Roeder, Smith & Company, along with the results of the actuarial valuation and other actuarial statistics. The Statistical Section contains tables of significant data pertaining to the Association. In the Other PERA Programs Section, the scope and activities of other programs in which the Association is involved for the good of its members and benefit recipients are explained. This includes the Health Care Program, the Life Insurance Program and the Voluntary Investment Program.

## Accounting System and Reports

This Report has been prepared in accordance with generally accepted accounting principles applied on a consistent basis as agreed upon by the Governmental Accounting Standards Board (GASB) and the American Institute of Certified Public Accountants. The Financial Statements are presented in accordance with guidelines promulgated by the Financial Accounting Standards Board Statement No. 35 (FASB). The Notes to Financial Statements were prepared in accordance with GASB Statement No. 5.

Transactions of the Association are reported on the accrual basis of accounting for assets, liabilities, revenues and expenses. Revenues for PERA are taken into account when earned without regard to the date of collection. Expenses are recorded when the corresponding liabilities are incurred, regardless of when the payment is made. Fixed assets are recorded at cost and depreciated through charges to expense over the estimated useful lives of the assets.

In developing and evaluating the Association's accounting system, it was found that internal controls adequately safeguard assets and provide reasonable assurance of proper recording of financial transactions.

Contributions are based on the principles of level-cost financing, with current service financed on a current basis. Prior service is amortized over varying periods depending on the respective Division, i.e. 30 years for the State Division, 22 years for the School Division, 30 years for the Municipal Division and 35 years for the Judicial Division.

The Government Finance Officers Association (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to PERA for its financial report for the fiscal year ended December 31, 1986. To be awarded a Certificate of Achievement, a public employee retirement system must publish a readable and organized

report that conforms to program standards. We believe our current Report continues to meet GFOA requirements, and we are submitting it to GFOA to determine its eligibility for another Certificate.

## Revenues

The revenues needed to finance retirement benefits are accumulated through the collection of employer and member contributions and through income on investments reported at market value. Contributions and investment income, including unrealized gains and losses for 1987, totaled \$660,256,000.

As a budget reduction measure, the State Legislature temporarily reduced employer contribution rates for the period of July 1, 1987 to June 30, 1988. For the State Division, the contribution was reduced from 12.2 to 10.2 percent of salary; for State Troopers, the contribution was reduced from 13.2 to 11.2 percent of salary; for the School Division, the contribution was reduced from 12.5 to 11.5 percent of salary; and for the Judicial Division, the contribution was reduced from 15 to 13 percent of salary. There was an increase in total contributions of approximately \$11,814,000, resulting from increases in members and the amounts of their salaries.

## Expenses

The primary expense of a retirement system relates to the purpose for which it is created, that is, the disbursement of retirement and survivor benefits. These recurring benefit payments, along with refunds of contributions to members who terminate employment, subsidies towards health care benefits and the cost of administering the Association comprise the total expense. In 1987, this totaled \$307,092,000, an increase of 16.6 percent over 1986. This increase resulted primarily from a growth in the number and the average size of benefit payments, as well as from the annual increase provided to some benefit recipients.

Total revenues of \$660,256,000 exceeded expenses of \$307,092,000 by \$353,164,000 during 1987. Administrative expenses are controlled by an annual budget approved by the Board of Trustees, and represent 0.1 percent of total assets.

## Value of Accumulated Plan Benefits (Reserves)

Accumulated plan benefits as presented in our audited financial statements total \$5,487,355,000. This amount is calculated in accordance with FASB Statement No. 35, which does not take into consideration the effect of future salary increases.

For clarification, we also present in the Actuarial Section a summary of PERA's unfunded actuarial accrued liabilities. These liabilities are calculated using assets on a historical cost basis, and include the effect of projected future salary increases on liabilities. The Notes to Financial Statements on pages 18 to 23 are governed by GASB Statement No. 5, and present actuarial valuations including future salary increases and assets at market value.

## Investments

The investment portfolio is regarded as a major contributor to the Association. In 1987, realized income from both long and short-term investments amounted to \$598,685,000. This exceeded the total revenue contributed by members and employers of \$198,543,000 and \$285,101,000, respectively.

Changes in the composition of the total portfolio during the year are reflected in the Investment Summary on page 37. Proper funding and healthy investment returns are very important to the

financial soundness of PERA. The ratio of investment earnings to total revenue is evidence of the Association's continued strong financial management.

### **October Stock Market Decline**

The Association is restricted by state law from investing more than 50 percent of its assets at cost in the stock market. About 43 percent of the fund was invested in the stock market at the time of the sharp decline in the market in October 1987.

While this decline adversely impacted the fund in regard to unrealized gains, PERA did not sell any stocks when the market declined or on succeeding days. Rather, the Association strengthened its holdings in blue chip companies by selectively buying additional shares. Also, since the fund is diversified over several types of investments, the total impact was lessened because the bond market (in which PERA was 35 percent invested) increased in value during and after the stock market decline.

### **Asset Allocation**

In June 1987, the Board decided to have an asset allocation study conducted to determine what the advantages would be if such a study were adopted by the Association. Based on a thorough analysis which examined plan liabilities, projected future cash flows, market expectations and simulations of future inflation and investment performance, the committee recommended that PERA develop a long-term strategic asset allocation mix as an integral part of the investment policy.

The new asset mix differs from the Association's current asset allocation by a reduction of domestic equities, bonds and cash and an increase in equity real estate, international equities and alternative investments. Implementation of this new policy began in 1988.

### **Funding**

The bottom line for a retirement system is its level of funding. If this level is adequate, the ratio of assets accumulated to total liabilities will be larger, and more income is available for investment purposes. Also, an adequate funding level gives the participants a higher degree of assurance that their pension benefits are secure.

The advantage of a well-funded plan is that participants can see assets which are irrevocably committed to the payment of promised benefits. Although the historical level of funding for PERA is good (as illustrated by the Solvency Test on page 54), continued effort is being directed at improving that level. Funding levels are presented in the Actuarial Section of this Report.

### **Professional Services**

Professional consultants are hired to perform services essential to the efficient operation of PERA. Certifications from the Association's outside auditor and actuary are included in this Report. The Association's consultants are listed on page 11.

### **Review of Operations and Activities of 1987**

The PERA staff is dedicated to professionally serving the Association's members, retirees and other benefit recipients.

In June 1987, legislation passed which instituted a Modified Rule of 75 for two months. Under this Rule, any member age 55 years or older could retire between July 1 and August 31, 1987, with an unreduced benefit according to actual years of service credit if the member's age plus years of service equaled 75 or more. This early retirement incentive caused 1987 to be a record retirement year for

the Association, with a total of 2,807 retirements, 1,344 of which were under the provisions of the Modified Rule of 75.

Also, for the first time in 56 years, the law under which the Association operates was recodified. This legislation, which was drafted and supported by PERA, simplified and better organized the law so there will be consistent interpretation of its provisions by members, affiliated employers, PERA staff and legal representatives. The recodified law did not significantly change costs or benefits.

The Association devotes much attention to advising members on their current or future benefits, and assisting them in making personal data record changes. During 1987, the Association's staff met individually with more than 3,600 members and benefit recipients in the PERA office, and responded to more than 61,500 telephone inquiries and 31,000 letters. Also, 204 group meetings were held around Colorado to provide information about plan benefits; more than 6,800 members, retirees and other persons attended these sessions.

The PERA Voluntary Investment Program (VIP), a 401(k) tax-deferred supplemental retirement program, continues to grow. In 1987, assets grew \$2,541,678 — from \$1,750,673 at the end of 1986 to \$4,292,351 at the end of 1987, and membership increased from 902 in 1986 to 1,322 at the end of 1987.

The PERA Health Care Program began in 1986 for benefit recipients and their eligible dependents. At the end of 1987, more than 18,000 of the Association's benefit recipients and 6,900 dependents were covered by the Program.

In May 1987, Board of Trustee elections were held. As a result of new legislation, the size of the Board increased from 15 to 16 members, with the addition of one seat for a representative from the Judicial Division. Judge Donald P. Smith Jr. was elected to be the first Judicial Division representative. Also, Roberta Altenbern was re-elected to represent School Division members, George H. Meares was elected to represent State Division members and Carl S. Wilkerson was elected to represent retirees.

One key staff change was made. Norman G. Benedict became the Deputy Executive Director of Investments.

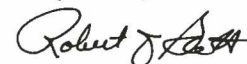

### **Acknowledgements**

The cooperation of PERA-affiliated employers contributes significantly to the success of the Association. We thank them for their continuing support.

The compilation of the 1987 Report reflects the combined effort of the PERA staff. It is intended to provide complete and reliable information as a basis for making management decisions and as a means of determining compliance with legal provisions, and for determining responsible stewardship of assets contributed by the members and their employers. It is being mailed to all affiliated employers of the Association; a summary will be published in the next Member and Retiree Reports.

I would like to express my gratitude to the staff, consultants, Board and other associates who worked diligently to ensure the successful operation of PERA in 1987.

Respectively submitted,

Robert J. Scott  
Executive Director

# Certificate of Achievement for Excellence in Financial Reporting

Presented to

Public Employees' Retirement  
Association of Colorado

For its Comprehensive Annual  
Financial Report  
for the Fiscal Year Ended  
December 31, 1986

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to governmental units and public employee retirement systems whose comprehensive annual financial reports (CAFR's) are judged to substantially conform to program standards.

President

Executive Director

## Board Chairman's Letter

### PUBLIC EMPLOYEES' RETIREMENT ASSOCIATION OF COLORADO

1300 Logan Street Denver, Colorado 80203 (303) 832-9550

June 10, 1988

To all PERA Members, Retirees and Employers:

The 1987 Comprehensive Annual Financial Report of the Public Employees' Retirement Association of Colorado presents a detailed review of the financial and actuarial status of your retirement system. I hope you will be pleased with PERA's steady growth.

The Board of Trustees is dedicated to preserving the financial integrity of the fund through a sound fiscal management program. It takes its role very seriously, and has spent considerable time in becoming more knowledgeable in investment and asset allocation strategies and policies.

In the 1987 General Assembly, several bills were proposed by the Association and became law.

● Senate Bill 61 was submitted to the Legislature as a benefit improvement bill with a permanent Modified Rule of 80 provision. After some opposition from members of the Assembly, we compromised and agreed to the following:

- 1) A permanent change in the benefit reduction formula for a reduced service retirement (from a 7 percent to a 4 percent reduction per year),
- 2) An increase in the percent of Highest Average Salary from 1 to 1.25 for each year of service over 20, to a maximum of 75 percent,
- 3) A second effective date (November 1) for annual benefit increases, and
- 4) A temporary Modified Rule of 75 retirement provision which allowed persons age 55 and over whose age plus service equaled 75 or greater to retire with a "full" retirement benefit, instead of a reduced benefit.

- The staff revised and recodified the PERA law for the first time in history.
- A Judicial Division representative was added to the Board of Trustees.

In other action, the Legislature also passed a temporary, one year reduction in PERA-affiliated employer contribution rates; and member contributions to PERA became tax-deferred for state income tax purposes.

Finally, on the national level, Congress attempted to make the Medicare tax mandatory for all public employees. PERA led the successful opposition to this initiative.

In closing, the Board and I send you our thanks for your support and interest. With it, PERA continues to be a leader in public employee retirement systems.

Sincerely,

Terry L. Lantry, J.D., C.P.A.  
Chairman, Board of Trustees

# Board of Trustees

By state law, the management of the public employees' retirement fund is vested in the Board of Trustees of the Public Employees' Retirement Association of Colorado.

The Board is composed of 16 members, including the State Auditor and State Treasurer. The 14 representative members are elected by mail ballot of their respective division members to serve on the Board for a four-year term. Five members are elected from the School Division, four from the State Division, two from the Municipal Division, two representing retirees and one from the Judicial Division. If a Board member resigns, a new member is appointed from the respective Division to complete the term.

## **Dr. Terry L. Lantry**

Chairman of the Board

- Member since 1976
- Represents state employees
- Professor, Accounting & Business Law, Colorado State University
- Current term expires July 1, 1988

## **Willborn S. Whitehead**

Vice Chairman of the Board

- Member since 1970
- Represents municipal employees
- Manager, Buildings & Grounds Dept., City of Arvada
- Current term expires July 1, 1990

## **Roberta Altenbern**

- Member since 1977
- Represents school employees
- Middle school media specialist, Adams County School District 14
- Current term expires July 1, 1991

## **George Meares**

- Member since 1987
- Represents state employees
- Department Controller, Highway Department
- Current term expires July 1, 1991

## **Donald P. Smith, Jr.**

- Member since 1987
- Represents judges
- Judge, Colorado Court of Appeals
- Current term expires July 1, 1991

## **Ada Houck**

- Member since 1973
- Represents retirees
- Retired elementary teacher
- Current term expires July 1, 1989

## **Edward W. Murrow**

- Member since 1977
- Represents state employees
- Treasurer, University of Colorado
- Current term expires July 1, 1989

## **Frank V. Taulli**

- Member since 1977
- Represents school employees
- Elementary school principal, Pueblo Public Schools #60
- Current term expires July 1, 1990

## **Marsha M. Jackson**

- Member since 1986
- Represents school employees
- Elementary classroom teacher, Mesa County School District
- Current term expires July 1, 1988

## **J. Kim Natale**

- Member since 1985
- Represents school employees
- Math and science teacher, Jefferson County Public Schools
- Current term expires July 1, 1989

## **Carl S. Wilkerson**

- Member since 1987
- Represents retirees
- Retired Deputy Executive Director, PERA
- Current term expires July 1, 1991

## **William Maguire**

- Member since 1985
- Represents state employees
- Personnel Specialist, Colorado State Hospital
- Current term expires July 1, 1990

## **Timothy M. O'Brien**

- Member since 1985
- State Auditor
- Continuous term, ex-officio

## **Gar McInnis**

- Member since 1986
- Represents municipal employees
- Risk and Insurance Administrator, City of Colorado Springs
- Current term expires July 1, 1991

## **Gail Schoettler**

- Member since 1986
- State Treasurer
- Continuous term, ex-officio

## **John Young**

- Member since 1980
- Represents school employees
- Biology teacher, Jefferson County Public Schools
- Current term expires July 1, 1988

# The Plan Summary

The Public Employees' Retirement Association plan was established in 1931 and began by covering state employees only. Since then, membership has expanded and includes employees of the State of Colorado, school districts except Denver, and numerous municipalities, special districts, public health departments and other local government entities, as well as the State's judges.

The Plan's purpose is to provide income to members and their families at retirement or in case of death or disability. Funding for the Plan operates on an actuarial reserve basis, with money being set aside for retirement benefits while the benefits are being earned and before they will be paid.

## Administration of the Plan

The Association operates by authority of the Colorado General Assembly with benefits and administration defined under Title 24, Article 51 of the Colorado Revised Statutes. PERA is governed by a 16-member Board of Trustees, 14 of whom are elected by the membership for four-year terms and serve without compensation except for necessary expenses. The State Auditor and the State Treasurer serve as ex-officio members.

The Board appoints an Executive Director, who is responsible for the daily operation of the Association. The legal advisor to the Board is the Colorado Attorney General. An actuary who makes annual valuations to determine the adequacy of the funding of retirement benefit liabilities accrued under the Plan is employed. Also, various advisory committees such as Audit, Insurance, Investments and Legislative are appointed by the Board.

## Investments

The Board of Trustees has the responsibility for the investment of the Association's funds. These funds are invested in corporate bonds, U.S. Treasury and other government securities, common stocks of top-rated companies, real estate mortgages, direct ownership of real estate property and alternative investments including venture capital.

## Member Contributions

Members contribute 8 percent of their annual gross earnings to an individual account. State Troopers contribute 9 percent. Gross earnings include pay for overtime and additional duties, but not reimbursement for expenses and contributions to an employer-sponsored IRC 125 plan as defined by the Internal Revenue Code. The accumulated amount in each account will be used to fund the member's retirement benefit if service is not discontinued.

These contributions are tax-deferred, and are not considered as income for federal and state income tax purposes until they are withdrawn through a refund or a benefit.

## Employer Contributions

Affiliated employers also contribute a percentage of their total payroll to the fund. The rates of employer contributions are calculated by the Association's consulting actuary and are set by law: State Division, 12.2 percent; State Troopers, 13.2 percent; School Division, 12.5 percent; Municipal Division, 10.2 percent; and Judicial Division, 15.0 percent.

As a budget reduction measure, the State Legislature temporarily reduced employer contribution rates for the period of July 1, 1987 to June 30, 1988, to 10.2 percent for the State Division, 11.2

percent for State Troopers, 11.5 percent for the School Division and 13 percent for the Judicial Division.

## Termination

A member who terminates PERA-affiliated employment is entitled to a refund of all of the contributions he or she made to PERA. Refunds do not include interest or employer contributions since this income is used to fund other benefits.

If the member has five or more years of service, he or she may leave the money in the account and, without further payment, receive a lifetime monthly benefit payable when qualified for service or reduced service retirement.

## Retirement

PERA benefits are calculated as a percentage of Highest Average Salary (HAS). This is one-twelfth of the average of the three highest annual salaries earned during calendar year periods on which PERA contributions were paid. A 15 percent limitation applies to annual salary increases used in the calculation.

Service retirement benefits are calculated at 2.5 percent of HAS for each year of service through 20 years, and 1.25 percent of HAS for each year between 20 and 40 years up to a maximum benefit of 75 percent.

Reduced service retirement is calculated the same as service retirement, then decreased by 0.333 percent for each month prior to the first eligible service retirement date. This reduction equals 4 percent per year.

A member is eligible to receive a reduced service retirement benefit as early as age 55 with 20 years of PERA service credit, or at age 60 with as few as 5 years of service.

Service retirement benefits, without reduction, are available to members at age 55 with at least 30 years of service, age 60 with at least 20 years of service or at age 65 with at least 5 years of service.

## Disability Retirement

Members with five or more consecutive years of service credit may qualify for disability retirement if determined to be permanently disabled. The disability retirement benefit is a percentage of HAS, based on actual service credit and projected service to age 65 or 20 years of service, whichever is less. Many disabled members receive 50 percent of their HAS, although certain exceptions do exist.

## Survivor Benefits

If a member dies before retirement with at least one year of PERA service credit, his or her eligible, unmarried children will receive monthly survivor benefits. Children are eligible until age 18 or, if enrolled full-time in an accredited institute of higher education, until they reach age 23.

If there are no eligible children, or after benefits to children have ceased, the member's surviving spouse receives a monthly benefit at age 60 if the member had less than 10 years of service credit, or immediately if the member had more than 10 years of service at the time of death.

If the member's death was service incurred, the service credit minimum does not apply. If there are no eligible survivors, the named beneficiary, or estate if no beneficiary was named, will receive a single payment refund of any remaining contributions.

# Financial Section

The table structure is defined by a diagonal line that separates the header from the main body. The header section, labeled 'Financial Section', is a rectangular area with a gray background and white diagonal stripes. The main body of the table consists of multiple rows and columns, with the area below the diagonal line also featuring a gray background and white diagonal stripes. The text within the table is extremely faint and illegible.

# Auditor's Report

ARTHUR ANDERSEN & CO.

DENVER, COLORADO

To the Participants and Board of Trustees of  
The Public Employees' Retirement Association of Colorado  
and the Legislative Audit Committee of the State of Colorado:

We have examined the combined statements of net assets available for benefits and of accumulated plan benefits of the PUBLIC EMPLOYEES' RETIREMENT ASSOCIATION OF COLORADO (a public association of the State of Colorado) as of December 31, 1987 and 1986, and the related combined statements of changes in net assets available for benefits and of changes in accumulated plan benefits for the years then ended. Our examination was made in accordance with generally accepted auditing standards and, accordingly, included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the financial statements referred to above present fairly the net assets and accumulated plan benefits of the Public Employees' Retirement Association of Colorado as of December 31, 1987 and 1986, and the changes in its net assets and accumulated plan benefits for the years then ended, in conformity with generally accepted accounting principles applied on a consistent basis.

Our examination was made for the purpose of forming an opinion on the basic financial statements taken as a whole. Schedules I, II, III, and IV are presented for purposes of additional analysis and are not a required part of the basic financial statements. This information has been subjected to the auditing procedures applied in our examination of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Denver, Colorado,  
June 2, 1988.

## Combined Statements of Accumulated Plan Benefits

As of December 31, 1987 and 1986  
(In Thousands of Dollars)

	1987	1986
<b>Actuarial present value of accumulated plan benefits:</b>		
Vested benefits		
Benefit recipients .....	\$2,692,772	\$2,179,458
Other members .....	<u>2,271,958</u>	<u>2,290,203</u>
<b>Total vested benefits</b> .....	4,964,730	4,469,661
Non-vested benefits .....	<u>522,625</u>	<u>500,347</u>
<b>Total actuarial present value of accumulated plan benefits</b> .....	<u>\$5,487,355</u>	<u>\$4,970,008</u>

The accompanying notes to combined financial statements are an integral part of these statements.

## Combined Statements of Changes in Accumulated Plan Benefits

For the Years Ended December 31, 1987 and 1986  
(In Thousands of Dollars)

	1987	1986
<b>Actuarial present value of accumulated plan benefits at beginning of year</b> .....	\$4,970,008	\$4,235,618
<b>Increase (decrease) during the year attributable to:</b>		
Change in actuarial assumptions .....	—	268,100
Benefits accumulated and interest amortization, net of refunds .....	630,741	692,511
Change in plan provisions resulting from legislation .....	144,000	—
Benefits paid .....	<u>(257,394)</u>	<u>(226,221)</u>
<b>Actuarial present value of accumulated plan benefits at end of year</b> .....	<u>\$5,487,355</u>	<u>\$4,970,008</u>

The accompanying notes to combined financial statements are an integral part of these statements.

# Notes to Combined Financial Statements

December 31, 1987 and 1986

## (1) GENERAL DESCRIPTION OF PLAN

### Organization

The Public Employees' Retirement Association of Colorado (the "Association") was established under Title 24, Article 51, Section 102 of the Colorado Revised Statutes, as amended. It was created in 1931 as a public association for the purpose of providing present and future retirement, disability or survivor benefits for persons who are employed by public employers (most of whom do not participate under Social Security) located in the State of Colorado and affiliated with the Association. This is accomplished through its operations as a cost-sharing multiple-employer defined benefit pension plan (the "Plan"). Responsibility for the organization and administration of the Plan is vested in the Public Employees' Retirement Association Board of Trustees (the "Board"). The State Division Trust Fund was established in 1931, the School and Municipal Division Trust Funds in 1944 and the Judicial Division Trust Fund in 1949.

The numbers of participating public employers for the four divisions are as follows:

	As of December 31	
	1987	1986
State.....	77	78
School.....	198	198
Municipal.....	50	47
Judicial.....	<u>6</u>	<u>6</u>
<b>Total employers.....</b>	<b><u>331</u></b>	<b><u>329</u></b>

The participants of the Association consisted of the following as of December 31, 1987 and 1986:

	State	School	Municipal	Judicial	Combined Total	
					1987	1986
Retirees and beneficiaries currently receiving benefits, and terminated members entitled to benefits but not yet receiving them.....	14,698	15,796	1,548	168	32,210	29,973
<b>Members</b>						
Vested.....	21,117	34,444	3,673	170	59,404	59,192
Non-vested.....	<u>15,127</u>	<u>22,717</u>	<u>3,494</u>	<u>66</u>	<u>41,404</u>	<u>40,785</u>
<b>Totals.....</b>	<b><u>50,942</u></b>	<b><u>72,957</u></b>	<b><u>8,715</u></b>	<b><u>404</u></b>	<b><u>133,018</u></b>	<b><u>129,950</u></b>

### Reporting Entity

The combined financial statements of the Association include all funds over which the Board has the ability to exercise oversight responsibility. This oversight responsibility includes designation of management, the ability to significantly influence operations and accountability for fiscal matters.

By law, the Association is not an agency of state government, nor is it subject to administrative direction by any department, commission, board, bureau or agency of the state. Accordingly, the Association's financial statements are not included in the financial statements of any other organization.

### Contributions and Members' Accounts

Employer and member contributions are defined by state statute based upon actuarial valuations performed annually, using the methods prescribed by National Council on Governmental Accounting Statement No. 1. Members are required to contribute 8 percent of their annual salary to the Association, except for State Patrol Troopers ("State Troopers"), who contribute 9 percent.

Contributions are tax-deferred to the members for federal and state income tax purposes effective July 1, 1984 and January 1, 1987, respectively. Prior to those dates, contributions were made on an after-tax basis. These contributions are credited directly to their "active member" accounts. Members' contributions are fully refundable, without interest, upon request at termination of employment from Association-affiliated employers. If members have at least five years of credited service, they are eligible to receive a future monthly retirement benefit. Any refund of contributions waives all future rights to any benefits. However, eligible members with one or more years of credited service who previously refunded their contributions may reinstate withdrawn service through lump-sum or installment payments. Any member of the Association who has non-covered public service time may purchase credit for that service through lump-sum or installment payments to receive additional credited service which will increase future retirement benefits.

The Association's funding policy also requires contributions by employers. Contributions during 1987 and 1986 were as follows:

Division	Membership	Contributions as a Percent of Members' Salaries	
		January 1, 1986 through June 30, 1987	July 1, 1987 through December 31, 1987
State	All members except State Troopers	12.2%	10.2%
	State Troopers	13.2	11.2
School	All members	12.5	11.5
Municipal	All members	10.2	10.2
Judicial	All members	15.0	13.0

These contributions are credited to the member's division for the purpose of creating actuarial reserves so each member's benefits will be fully provided for upon retirement.

### Benefits

Members are eligible for service retirement benefits upon reaching (a) age 65 with five or more years of credited service, (b) age 60 with 20 or more years of credited service, (c) age 55 with 30 or more years of service or by (d) earning 35 or more years of credited service. In addition, State Troopers are eligible for retirement benefits upon (a) reaching age 55 with 20 or more years of credited service or (b) earning 30 or more years of credited service. Such benefits are equivalent to 2.5 percent of their Highest Average Salary ("HAS"), the average of their three highest annual salaries earned during calendar year periods, prior to retirement for each year of service up to 20 years, and 1.25 percent for each year over 20 years. The maximum benefit available is 75 percent of their HAS. The Plan also permits reduced service retirement at age 55 (age 50 for State Troopers) with 20 or more years of credited service, or at age 60 with five or more years of credited service. Members may elect to receive their benefits in the form of single life or joint life payments. As a result of changes in legislation, certain benefits changed during 1987, resulting in an increase in the actuarial present value of accumulated plan benefits as of December 31, 1987, of \$144,000,000.

The Plan also provides for disability retirement and survivor benefits. Members who become permanently disabled with at least five years of credited service since the beginning of the most recent period of membership can receive disability benefits that are based on service credit projected to age 65, to a maximum of 20 years of credit. The HAS calculation is the same as that used for service retirement. There are also provisions for a partial disability retirement benefit when the member is disabled from regular but not comparable employment.

If an active member dies after accumulating at least one year of service credit, a benefit based upon the accumulated credited service as of the time of death and the number and relationship of family survivors, is payable to such survivors.

### Termination of the Association

The law provides that should the Association be terminated or partially terminated for any reason, the rights of all members and former members to all benefits accrued to the date of such termination, to the extent then funded, shall become nonforfeitable.

## (2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### Basis of Accounting and Presentation

The accompanying financial statements are prepared using the accrual basis of accounting, in accordance with generally accepted accounting principles applicable to governmental accounting for a pension trust fund. The various funds have been presented on a combined basis, with all interfund balances and transactions eliminated in the combined financial statements.

### Fund Accounting

The financial activities of the Association are recorded in separate divisions (State, School, Municipal and Judicial) established by statute with investments owned by the divisions recorded in the Combined Investment Fund. A Cost of Living Stabilization Fund, Health Care Fund, Common Operating Fund and Insurance Dividend Reserve are also maintained. Each division maintains separate accounts and all actuarial determinations are made on the basis of each division's separate information.

The Cost of Living Stabilization Fund (the "CLSF") was created on May 1, 1980, through the enactment of Senate Bill 62 to offset inflation by providing increased benefits payable to retirees of the Association. The CLSF is funded by payments from employers equal to 2 percent of member salaries. Such payments are collected by each division on behalf of the CLSF. The increased benefits to retirees are paid directly by each division to the retirees and then reimbursed by transfer from the CLSF. The net assets of the CLSF as of December 31, 1987 and 1986, amounting to \$32,232,000 and \$27,772,000, respectively, are included in net assets available for benefits presented in the Combined Statements of Net Assets Available for Benefits. Conversely, the computation of the total actuarial present value of accumulated plan benefits included in the Combined Statements of Accumulated Plan Benefits and Combined Statements of Changes in Accumulated Plan Benefits does not include a provision for cost of living increases from the CLSF, in accordance with the Statement of Financial Accounting Standards No. 35.

The Health Care Fund (the "HCF") was created on July 1, 1985, through the enactment of Senate Bill 67 to provide group health insurance to Association retirees. The HCF is funded by payments from employers equal to 0.8 percent of member salaries. Such payments are collected by each division on behalf of the HCF. Beginning July 1, 1986, the HCF began contributing towards enrolled retirees and benefit recipients' health care premiums by making payments directly to insurance companies and Health Maintenance Organizations selected for this program.

The Common Operating Fund (the "COF") accounts for all administrative activities common to the divisions. Operating assets and liabilities which are held for the benefit of all divisions are also recorded in the COF. The expenses incurred by the Association are allocated from the COF to the various divisions on the basis of the relationship of the number of members in the division to the total membership in the Association.

The Insurance Dividend Reserve (the "IDR") is an accumulation of dividends received from an insurance company as a return of the premiums paid, adjusted for actual historical experience by members. In addition, the IDR receives income from its investment in the Combined Investment Fund. The IDR is used to purchase paid-up life insurance for eligible members when they retire and additional paid-up insurance for insured members.

### Investments

Plan investments (excluding the guaranteed investment contract with an insurance company and short-term investments) are presented at fair market value. Securities, which are traded on a national securities exchange, are valued at the last reported sales price during the year. For other investments which do not have an established market, estimated fair values are presented. Corporate bonds are valued based on yields currently available on comparable securities of issuers with similar credit ratings. Mortgages are valued on the basis of their future principal and interest payments discounted at prevailing interest rates for similar instruments. The fair market value of real estate investments is based upon estimates prepared by independent appraisers.

In addition, the guaranteed Aetna Life and Casualty Note (Notes 3 and 4) is valued at contract value, representing principal plus accrued interest at the stated contract rate. Short-term investments are carried at cost, which approximates fair market value.

The change in the market value of investments held as of year-end is reflected in the Combined Statements of Changes in Net Assets Available for Benefits as unrealized appreciation or depreciation.

On October 1, 1985, plan investments (and investment-related amounts) owned by the divisions were transferred to the Combined Investment Fund (the "CIF"). Upon transfer, each division received ownership units in the CIF based upon the fair market value of each division's investment portfolio (and investment-related amounts) held on September 30, 1985. On March 1 and July 1, 1986, investments (and investment-related amounts) of the HCF and CLSF, respectively, were transferred to the CIF in exchange for ownership units in the CIF. The IDR investments (and investment-related amounts) were transferred to the CIF on January 1, 1987, in exchange for ownership units in the CIF. Under this system, each fund's ownership units in the CIF are adjusted upward or downward based upon the fund's activity. Results of investment performance and the value of the CIF are allocated among the funds based upon each fund's ownership units as a percentage of the total units outstanding. As of December 31, 1987 and 1986, the ownership units of each fund are as follows:

	Units as of December 31	
	1987	1986
State .....	42,102,241	41,440,270
School .....	58,107,233	56,513,183
Municipal .....	5,507,325	5,308,042
Judicial .....	599,432	600,384
HCF .....	563,036	407,375
CLSF .....	427,207	372,070
IDR .....	147,192	—
<b>Total</b> .....	<u>107,453,666</u>	<u>104,641,324</u>

### Actuarial Valuation

Accumulated plan benefits are those future periodic payments, plus lump-sum distributions, which are attributable under the Plan's provisions to the service members have rendered. Accumulated plan benefits include benefits expected to be paid to (a) retired or terminated members or their beneficiaries, (b) beneficiaries of members who have died and (c) present members or their beneficiaries.

The actuarial present value of accumulated plan benefits included in the Combined Statements of Accumulated Plan Benefits and Combined Statements of Changes in Accumulated Plan Benefits is presented in accordance with the Statement of Financial Accounting Standards No. 35.

The actuarial present value of accumulated plan benefits was determined by the firm of Gabriel, Roeder, Smith and Company on the basis of the "entry age normal" cost method. The resulting amount adjusts accumulated plan benefits to reflect the time value of money (through discounts for interest) and the probability of payment (by means of decrements for death, disability, withdrawal or retirement)

between the valuation date and the expected date of payment. The following summarizes the significant actuarial assumptions underlying the actuarial computations as of December 31, 1987 and 1986:

Valuation as of December 31		
Actuarial Assumptions	1987	1986
Investment return	7.5% compounded annually	7.5% compounded annually
Average retirement age		
Men	Ranging from 60 to 65	Ranging from 61 to 66
Women	Ranging from 60 to 65	Ranging from 60 to 65
Life Expectancy	1971 Group Annuity Mortality Table projected to 1984	1971 Group Annuity Mortality Table projected to 1984

These actuarial assumptions are based on the presumption that the Association will continue. If the Plan were to terminate, different actuarial assumptions and other factors might be applicable in determining the actuarial present value of accumulated plan benefits.

#### Unfunded Actuarial Accrued Liabilities

The unfunded actuarial accrued liability calculation compares the present value of future benefits less the Association's assets. The accompanying financial statements reflect plan assets on a fair market value basis. If the plan assets had been presented on a historical cost basis and future salary increases were considered, the unfunded actuarial accrued liabilities for the various divisions as of December 31, 1987 and 1986, would be as follows:

	1987	1986
State.....	\$ 593,228,108	\$495,305,322
School.....	542,935,499	386,552,691
Municipal.....	44,957,260	16,874,024
Judicial.....	6,206,946	2,339,842
<b>Total.....</b>	<b>\$1,187,327,813</b>	<b>\$901,071,879</b>

Contributions were made to the divisions in accordance with actuarially calculated contribution requirements determined through actuarial valuations performed as of December 31, 1987 and 1986. The following summarizes the contributions made during 1987 and 1986:

	1987	1986
Contributions made by:		
Employers.....	\$216,089,000	\$218,520,000
Members.....	198,543,000	187,020,000
<b>Total contributions.....</b>	<b>\$414,632,000</b>	<b>\$405,540,000</b>

	1987	1986
Contributions consisted of:		
Normal cost.....	\$330,070,000	\$324,256,000
Amortization of the unfunded actuarial accrued liabilities.....	84,562,000	81,284,000
<b>Total contributions.....</b>	<b>\$414,632,000</b>	<b>\$405,540,000</b>

Amortization periods computed to fund unfunded actuarial accrued liabilities.....	22 to 35 years	5 to 16 years
--	----------------	---------------

#### Property and Equipment

Property and equipment are carried at cost. Costs of major additions and improvements are capitalized. Expenditures for maintenance and repairs are charged to operations as incurred. Depreciation is computed on the straight-line method using estimated lives ranging from three to 50 years.

### Federal Income Tax Status

During the years ended December 31, 1987 and 1986, the Association continued to receive from the Internal Revenue Service a favorable determination for exemption from federal income taxes.

### (3) GUARANTEED NOTE

In 1980, the Association acquired a guaranteed note from the Aetna Life and Casualty Insurance Company for \$50,000,000. The note earns interest annually at a rate of 14.3 percent which is guaranteed through 1989.

### (4) INVESTMENTS

#### Investment Authority

By statute, the Board has complete control and authority to invest the funds of the Association. The law allows any kind of investments with the following limitations: (a) The aggregate amount of moneys invested in corporate stocks or corporate bonds, notes or debentures which are convertible into stock or in investment trust shares shall not exceed 50 percent of the then book value of the fund; and (b) no investment of the fund in common or preferred stock, or both, of any single corporation shall be of an amount which exceeds 5 percent of the then book value of the fund, nor shall the fund acquire more than 7 percent of the outstanding stock or bonds of any single corporation.

#### Cash and Short-Term Investments

The following table presents cash and short-term investments held by the Association at December 31, 1987:

	(In Thousands of Dollars)	
	Carrying Value	Bank Balance
Deposits with banks (fully insured by federal depository insurance) .....	\$ 7,550	\$(315,997)
Repurchase agreements (held by the Association's agent in the Association's name) .....	291,458	291,458
Money market funds (fully collateralized by the underlying securities) .....	106,553	106,553
<b>Total cash and short-term investments</b> .....	<u>\$405,561</u>	<u>\$ 82,014</u>

The differences between carrying amounts and bank balances are due to checks and deposits not yet processed by the bank and an error made by the bank on December 31, 1987, which was corrected by the bank on the first business day of 1988.

The state statute allows the Association to enter into repurchase agreements. These are agreements in which the Association transfers cash for securities to a dealer who agrees to repurchase the securities at a stated price, which includes interest, at a stated time. The repurchase agreements the Association was invested in at December 31, 1987, had underlying securities with a market value of \$298,623,000, or 102 percent of the cash transferred to the dealer. The Association's collateral interest in the underlying securities is perfected by delivery of the securities to the Association's safekeeping account.

#### Other Investments

The following table presents the remaining investments held by the Association at December 31, 1987, categorized to give an indication of the level of risk assumed by the Association at year-end. The categories are:

- (1) Insured or registered, or securities which are held by the Association in the Association's name or its agent's name.
- (2) Uninsured and unregistered, with securities held by the counterparty's trust department or agent in the Association's name.
- (3) Uninsured and unregistered, with the securities held by the counterparty, or by its trust department or agent but not in the Association's name.

Investments in real estate cannot be categorized because securities are not used as evidence of the investment.

	Category			(In Thousands of Dollars)	
	1	2	3	Amortized Cost	Market Value
U.S. Government obligations .....	\$2,063,034	\$ —	\$ —	\$2,063,034	\$2,015,775
Corporate bonds .....	452,830	—	—	452,830	445,928
Common stocks .....	2,973,118	—	—	2,973,118	2,984,001
Guaranteed note .....	139,399	—	—	139,399	139,399
Mortgages .....	631,960	—	—	631,960	636,365
Municipal bonds .....	25,000	—	—	25,000	22,866
<b>Subtotal</b> .....	<u>\$6,285,341</u>	<u>\$ —</u>	<u>\$ —</u>	6,285,341	6,244,334
Non-categorized real estate .....				350,774	347,929
<b>Total</b> .....				<u>\$6,636,115</u>	<u>\$6,592,263</u>

## Securities Lending

The Association enters into various short-term arrangements whereby investments are loaned to various brokers. The lending arrangements are collateralized by cash, letters of credit and marketable securities. These agreements provide for the return of the investments and for a payment of: (a) A fee when the collateral is marketable securities or letters of credit, or (b) interest earned when the collateral is cash on deposit. The securities on loan to the broker are presented in the Combined Statements of Net Assets Available for Benefits at fair market value. As of December 31, 1987, the Association had lending arrangements outstanding with a total market value of \$1,084,176,000 and a total collateral value of \$1,107,797,000 or 102 percent of the total market value outstanding.

## (5) COMMITMENTS AND CONTINGENCIES

At December 31, 1987, the Association was committed to the future purchase of investments at an aggregate cost of approximately \$95,600,000. In addition, various legal proceedings are pending against the Association which are the result of the normal activities of the Association. Based on the facts presently available, the Association, with advice from legal counsel, has concluded that the aggregate liability, if any, of the Association resulting therefrom will not have an adverse impact on the financial condition of the Association.

## (6) FUNDING STATUS AND PROGRESS

The amount shown below as the "pension benefit obligation" is a standardized disclosure measure of the present value of pension benefits adjusted for the effects of projected salary increases and estimated to be payable in the future as a result of member service-to-date. The measure is the actuarial present value of credited projected benefits and is intended to (a) help users assess the Plan's funding status on a going concern basis, (b) assess progress being made in accumulating sufficient assets to pay benefits when due and (c) allow for comparisons among public employee retirement plans. The measure is independent of the actuarial funding method used to determine contributions to the Plan.

The pension benefit obligation was determined as part of an actuarial valuation of the Plan as of December 31, 1987 and 1986. Significant actuarial assumptions used in determining the pension benefit obligation include (a) a rate of return on the investment of present and future assets of 7.5 percent per year compounded annually; (b) projected salary increases of 5.5 percent per year compounded annually, attributable to inflation; (c) additional projected salary increases ranging from 0 percent to 7.4 percent per year depending on age, attributable to seniority/merit; and (d) projected benefit increases ranging from 1.5 percent to 3 percent per year after retirement.

At December 31, 1987 and 1986, assets in excess of pension benefit obligation, as determined in accordance with generally accepted accounting principles prescribed by Statement No. 5 of the Governmental Accounting Standards Board, were as follows:

	(In Thousands of Dollars)				1987	1986
	State	School	Municipal	Judicial	Total	Total
Pension benefit obligation:						
Retirees and beneficiaries currently receiving benefits.....	\$1,318,824	\$1,229,743	\$121,978	\$22,227	\$2,692,772	\$2,179,458
Terminated members not yet receiving benefits.....	17,234	34,744	1,523	586	54,087	54,783
Current members:

## Schedule of Funding Progress\*

Analysis of the dollar amounts of net assets available for benefits, pension benefit obligation and pension benefit obligation in excess of assets in isolation can be misleading. Expressing the net assets available for benefits as a percentage of the pension benefit obligation provides one indication of the Association's funding status on a going concern basis. Analysis of this percentage over time indicates whether the system is becoming financially stronger or weaker. Generally, the greater the percentage, the stronger the retirement system. Trends in pension benefit obligation in excess of assets and annual covered payroll are both affected by inflation. Expressing the assets in excess of inflation aids analysis of PERA's progress made in accumulating sufficient assets to pay benefits when due.

(In Millions of Dollars)

	(1) Net Assets Available for Benefits**	(2) Pension Benefit Obligation	(3) Percentage Funded (1) ÷ (2)	(4) Pension Benefit Obligation In Excess of Assets (2) - (1)	(5) Annual Covered Payroll	(6) Pension Benefit Obligation in Excess of Assets as a Percentage of Covered Payroll (4) ÷ (5)
Fiscal Year						
1986	\$6,654	\$6,224	106.91%	\$(430)	\$2,409	(17.85%)
1987	\$6,995	\$7,210	97.02%	\$ 215	\$2,531	8.49%

# PERA Investment Policy

The function of the Public Employees' Retirement Association is to provide retirement or survivor benefits for its members. Thus, the preservation of capital is of paramount importance.

The future investment performance of the fund directly affects its future financial strength. Earnings on portfolio assets in excess of the assumed actuarial rate of return (7.5 percent) reduce unfunded actuarial liabilities. However, the greater the expected return, the higher the risk and thus, the greater the volatility of actual versus expected returns.

## Investment Decisions

The fund is long-term in nature. The selection of investments is regulated by statutory limitations, investment time horizons, limits of acceptable risk and the objective of optimizing the total rate of return for the portfolio.

Approval of all purchases and sales of investments is vested by law in the PERA Board of Trustees. The Deputy Executive Director of Investments is authorized to execute transactions on behalf of the Board, as permitted under policy and procedure statements.

Investment decisions are made within the framework of the goal established for the rate of return, limits of acceptable risk and fund objectives. The goal is to optimize the return of the portfolio as opposed to maximizing the rate of return. The optimal portfolio mix is one that carefully equates expected rate of return with expected risk of all investment categories used in the portfolio.

State law limits the amount of the fund to be invested in equity stock to 50 percent at book value. It also prohibits the investment of more than 5 percent of PERA assets at the then book value in any single company, and limits PERA to own no more than 7 percent of any single corporation's outstanding stocks or bonds.

The portfolio will be managed using the expertise of both internal and external management. No holding will be considered a "permanent" part of the portfolio. Any security can be sold at any time either to increase gains or decrease losses.

In making investment decisions, the Board will use the highest caliber advice available, both internally and externally. This advice may include the internal investment staff, outside investment managers selected for both traditional and nontraditional asset classes and investment consultants selected by the Board for expertise in implementing and carrying out the portfolio process.

## Asset Allocation

During 1987, the Board approved a formal strategic (long-term) asset allocation study to diversify PERA's assets. This policy change allows the fund to invest up to 15 percent of its assets in foreign securities. This will be accomplished by using external international equity managers commencing in 1988.

The targeted strategic asset allocation is designed to provide the optimal mix of asset categories which emphasize diversification over the investment time horizon of the portfolio. In doing so, the characteristics of risk, expected return and their correlation to the various asset categories have been carefully projected. Both traditional (cash, bonds, domestic equities, fixed income and mortgages) and nontraditional assets (real estate, guaranteed investment contract, international equities, venture capital and alternative investments) will be incorporated into the strategic asset mix.

Since the investment time horizon of the portfolio is long-term and the portfolio is constructed to avoid the necessity of liquidating holdings to meet benefit payments, liquidity is not the first consideration. However, every reasonable effort will be made to provide protection for the portfolio in any future deteriorating market.

The Board recognizes that individual investment holdings contain higher risk than portfolios constructed of such holdings. Primary effort will be made to diversify the risk of the total portfolio through an optimal diversification, as opposed to concentrating on individual issues. The Board also recognizes that the use of certain nontraditional asset categories such as venture capital, international equities and real estate may result in individual holdings within those nontraditional asset categories which contain greater risk than individual holdings within traditional asset categories.

## South Africa Policy

Divestment from companies which do business in South Africa will not be made solely because of those operations. U.S. businesses operating there are, and can continue to be, a force for positive change.

PERA representatives continue to propose resolutions at corporate stockholder meetings urging companies that operate in South Africa to implement or improve their compliance rating with the Statement of Principles for South Africa (formerly called the Sullivan Principles). Additionally, when considering new investments which are equally promising, companies doing business in South Africa will not be selected.

## Colorado Investments

State law provides that preference shall be given to Colorado investments, consistent with a sound investment policy. However, to provide optimal portfolio diversification by geographical location and asset class, and to maintain fiduciary responsibility, investments located within the State of Colorado will not exceed 20 percent of the combined portfolio at cost.

Within the 20 percent limitation, every effort will be made to diversify investments among the available asset classes—commercial real estate mortgages, common stocks, corporate debt, equity real estate, etc.

## Review and Reporting

Generally accepted accounting principles (GAAP) will be followed in accounting for the portfolio, however, GAAP should not restrict investment decisions. The completed transaction method will be used to account for gains and losses. Securities recorded at original cost, adjusted cost and market value will be reported to the Board. The accounting firm conducting the annual audit will be consulted when questions concerning procedures arise.

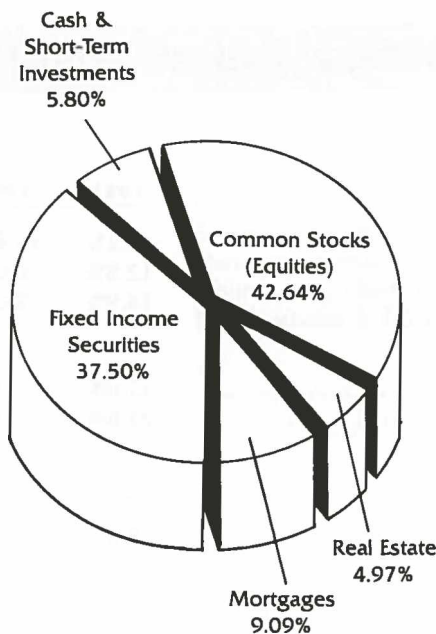

An annual evaluation will be conducted by a performance evaluation service from the investment industry. In addition, the annual external audit and the annual actuarial valuations will be reviewed in conjunction with the evaluations of investment performance. All evaluations will be related to the Association's stated goals. Because these goals are long-term, cumulative performance results are considered more important than performance in any one year.

# Investment Summary

(At Market)  
As of December 31, 1987

# Fund Performance Evaluation

The Association retains R.V. Kuhns & Associates to evaluate the PERA fund performance.

In their analysis, R.V. Kuhns includes all investments within the portfolio, including cash and accrued income. They also make the calculations using post-closing amounts for annual rates of return.

### Asset Allocation

During 1987, the assets (at market value) were allocated within the following ranges: Equities — 42.38 to 51.09 percent, Bonds — 30.62 to 36.88 percent, Other Assets — 13.40 to 16.61 percent and Cash and Equivalents — 2.42 to 9.74 percent.

### Total Portfolio Results

For the year ended December 31, 1987, the total fund had a positive rate of return of 2.9 percent. This was the lowest return for the last five years, primarily due to the sharp stock market decline in October and a complete reappraisal of the real estate portfolio during the year. However, the fund's average rate of return for the last five years is 12 percent, well above the return needed to meet the Association's actuarial requirements.

The Association's actuarial consultants have included in their calculation assumptions the requirement that the fund must realize an average rate of return of 7.5 percent yearly to pay promised benefits. Even with the market decline, the Association has averaged a 10.2 percent rate of return over the last 10 years.

The impact of the stock market decline on the fund was lessened because the bond market (in which the Association was 35 percent invested) experienced a coincidental rally. Because of the fund's position in bonds, the total market value decline of the fund was limited to about 10 percent.

### Equities

The 1987 rate of return for the equity portfolio was 6.9 percent.

In three of the last five years, the average return on the Association's equity portfolio has out-performed the Standard and Poors 500 Index, a measure of stock market performance.

Even with the increased market volatility during 1987 and the substantial decline in October, the equity portfolio return surpassed Standard and Poors by 1.7 percent. This was accomplished, in part, by not selling any stock during the October decline, by adding to selected, undervalued stocks after the decline and by diversifying into various industry categories which were considered to be undervalued at that time.

The PERA fund is restricted by law from investing more than 50 percent of its assets in the stock market at cost. When the October 19 decline occurred, only 43 percent of the fund was invested in the stock market.

### Bonds

PERA bond performance is compared to the Shearson Lehman Bond Index. For 1987, the Association achieved a 2.7 percent rate of return. In three of the last five years, PERA bonds have equaled the Shearson Index. This was, in large part, due to changing various maturity schedules and improving the quality of the Association's bond holdings during that time period.

### Real Estate

The Association's real estate portfolio underperformed the Wilshire Real Estate Median Fund during 1987, primarily due to the results of a complete reappraisal of all real estate portfolio holdings.

Considering the economic environment in which the majority of the Association's real estate is located (Colorado and Texas), a complete appraisal to market was deemed appropriate. Through portfolio diversification and a stabilizing economy, future returns are expected to improve.

## Annual Rate of Return

	1983	1984	1985	1986	1987	Annualized
PERA Portfolio: .....	12.2%	10.4%	21.5%	13.8%	2.9%	12.0%

# Actuary's Letter

GABRIEL, ROEDER, SMITH & COMPANY  
Actuaries & Consultants

200 Globe Building • 407 East Fort • Detroit, Michigan 48226 • 313-961-3346

May 19, 1988

The Board of Trustees  
Public Employees' Retirement  
Association of Colorado  
1300 Logan Street  
Denver, Colorado 80203

Ladies and Gentlemen:

The basic financial objective of PERA is to establish and receive contributions which, expressed as percents of active member payroll, will remain approximately level from generation to generation of Colorado citizens.

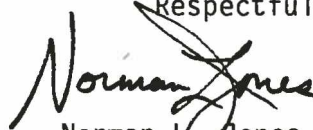

In order to measure progress toward this fundamental objective, PERA has annual actuarial valuations to (i) measure present financial position, and (ii) test the adequacy of established contribution rates. The latest completed actuarial valuations were based upon data and assumptions as of December 31, 1987. Conditions and results are shown in our reports. These valuations indicate that the contribution rates, established by the Retirement Board for benefits then in effect, meet the basic financial objective.

Actuarial valuations are based upon assumptions of future experience in various risk areas. Assumptions are adopted by the Board after consulting with the actuary and were last revised in 1986. We believe the assumptions used in the December 31, 1987 valuations produce results which are reasonable.

The relationship between assumed experience and actual experience in each risk area is then observed annually by an actuarial gain/loss analysis. Since 1982, actual experience has been more favorable than assumed, primarily as the result of historically high real rates of investment return. (During the decade prior to 1982, experience was less favorable due to high rates of inflation which are damaging to financial security programs such as PERA.)

Based upon the valuation results, it is our opinion that the Public Employees' Retirement Association of Colorado continues in sound condition in accordance with actuarial principles of level cost financing.

Respectfully submitted,

  
Norman L. Jones

  
Richard G. Roeder

# Actuarial Principles

Once vested in the Plan, each PERA member acquiring a year of service credit is, in effect, given an "IOU" by PERA which says: "The Public Employees' Retirement Association of Colorado owes the member one year of retirement benefits to be paid when the member retires." The law governing PERA financing intends that 1987 members and taxpayers contribute the money to cover the IOU's being handed out this year. By following this principle, the contribution rates will remain approximately level from generation to generation.

An inevitable by-product of the level cost design is the accumulation of reserve assets and investment income from those assets. Invested assets increase as contributions accumulate and income is earned. Investment income then becomes the third contributor for benefits and is directly related to the contribution amounts required from members and employers. The chart below depicts this level-cost design.

In actuarial terminology, this level-cost objective means that the contribution rates must total at least the current cost of the service being given this year, and the interest on unfunded actuarial accrued liabilities (UAAL). UAAL is the difference between actuarial liabilities for service rendered and the accrued assets of PERA.

## Computing Contributions to Support Fund Benefits

From a given schedule of benefits and from the member and asset data furnished, the actuary determines the contribution rates

to support the benefits by means of an actuarial valuation and funding method.

An actuarial valuation uses the rate of investment income which plan assets will earn, the rates of withdrawal of members who leave covered employment before qualifying for any monthly benefit, the rates of mortality, the rates of disability, the rates of salary increases and the assumed ages at actual retirement.

In making an actuarial valuation, assumptions must be made as to what the above rates will be for the next year and for decades in the future. Only the subsequent actual experience of the Plan can indicate the degree of accuracy of the assumptions.

## Reconciling Differences Between Assumed and Actual Experience

Once actual experience has occurred and been observed, it will not coincide exactly with assumed experience, regardless of the wisdom of the assumptions or the skill of the actuary and the many calculations made. The future can be predicted with considerable precision (except for inflation) but not with 100 percent accuracy.

PERA copes with these continually changing differences by having annual actuarial valuations. Each actuarial valuation is a complete recalculation of assumed future experience, taking into account all past differences between assumed and actual experience. The result is continuing adjustments in financial position.

**Level Contribution Line:** Determining the level contribution line requires detailed assumptions concerning experiences in future decades, including: rate of withdrawal of members (turnover), rates of mortality, rates of disability, ages at actual retirement, rates of pay increases, investment income and change in member group size.

**Cash Benefits Line:** This relentlessly increasing line is the fundamental reality of retirement plan financing. As the ratio of retirees to members rises, the benefits paid rise as a percent of salary. The line increases over time, even if new benefits are not added, and regardless of the financing method being followed.

# Summary of Actuarial Assumptions

The following economic and non-economic actuarial assumptions were adopted by the Board of Trustees after consulting with the actuary and first used with the December 31, 1986, actuarial valuation. The assumptions are reviewed in depth every five years and are established to make projections for the Plan's experience decades into the future.

## Economic Assumptions

The investment return rate used in making the valuations was 7.5 percent per year compounded annually (net after administrative expenses). The real rate of return is the portion of total investment return which is more than the inflation rate. Considering other financial assumptions, the 7.5 percent investment return rate translates into an assumed real rate of return of 2 percent.

The overall member payroll is assumed to increase 5.5 percent annually. Pay increase assumptions for individual members are shown for sample ages in Exhibits A, B, C, and D. Part of the assumption for each age is for a merit and/or seniority increase, and the other 5.5 percent recognizes inflation.

The number of members is assumed to continue at the present number.

## Non-Economic Assumptions

The 1971 Group Annuity Mortality Table, projected to 1984, was used in evaluating the cost of benefits to be paid. Related values are shown in Exhibit F.

The probabilities of age and service retirement are shown in Exhibit G.

The probabilities of withdrawal from service, disability and death-in-service are shown for sample ages in Exhibits A, B, C, D and E. For disability retirement, impaired longevity was recognized by basing benefit values on an adjusted age midway between attained age and normal retirement age. For other withdrawal it was assumed that all members terminating before age 35 with less than five years of service and 25 percent of members terminating after 35 with over five years of service would withdraw their contributions and forfeit their monthly benefit at retirement age.

The entry age normal actuarial cost method of valuation was used in determining liabilities and normal cost. Differences in the past between assumed experience and actuarial experience ("actuarial gains and losses") become part of actuarial accrued liabilities. Unfunded actuarial accrued liabilities are amortized to produce payments (principal and interest) which are level percents of payroll contributions.

Employer contribution dollars were assumed to be paid in equal installments throughout the employer fiscal year. Present assets (cash and investments) were used at book value.

The data about persons now covered and about present assets was furnished by PERA's administrative staff. Although examined for general reasonableness, the data was not audited by the actuary. The actuarial valuation computations were made by or under the supervision of a Member of the American Academy of Actuaries (M.A.A.A.).

State .....	7,323	1,407	2,619	601	1,067	306
School .....	9,273	1,325	1,958	445	630	301
Municipal .....	624	176	311	74	133	20
Judicial .....	28	14	57	13	25	6

- Benefit Types:**
- 1 — Age and service retirement.
  - 2 — Disability retirement.
  - 3 — Survivor payment — Option 3.
  - 4 — Survivor payment — children, spouse or dependent parent.
  - 5 — Surviving spouse with deferred future benefit.
  - 6 — Former member with deferred future benefit.

**Option Selection:** Age and service retirees and disability retirees select an option at retirement to provide death benefits. They are as follows:

- 1 — Single life benefit.
- 2 — Joint benefit with 1/2 to surviving cobeneficiary.
- 3 — Joint and survivor benefit.
- 4 — Joint benefit with 1/2 to either survivor:  
Surviving retiree — cobeneficiary has pre-deceased the retiree.  
Surviving cobeneficiary — retiree has pre-deceased the cobeneficiary.

## Member-Retiree Comparison

The number of persons receiving monthly retirement benefits has grown steadily in relation to membership. This trend will continue for many years into the future.

The level-cost financing principle ensures that contribution rates will not have to be raised to meet the benefit load. The current percentages of salaries will be sufficient to meet the increasing

retirement payroll if the benefit provisions contained in state law are not changed.

The retirement benefit disbursements shown in the right-hand column include cost-of-living increases paid in years since 1970. Figures shown are for the State, School and Municipal Divisions. Prior to 1981, figures are for years ended June 30.

Year	Number of retirees on 12/31 <sup>1</sup>	Number of member accounts on 12/31 <sup>2</sup>	Retirees as % of members on 12/31	Total benefits paid - yr. ended 12/31*

## Solvency Test

The PERA funding objective is to be able to pay long-term benefit promises through contributions that remain approximately level from year to year as a percent of salaries earned by members. In this way, members and taxpayers in each year pay their fair share for retirement service accrued in that year by PERA members. Occasionally rates are increased, but only to add or improve benefit provisions.

If the retirement system follows level contribution rate financing principles, the system will pay all promised benefits when due — the ultimate test of financial soundness.

A short-term solvency test is one means of checking PERA's funding progress. In a short-term solvency test, the retirement plan's present assets (investments and cash) are compared with: 1) member contributions on deposit, 2) the liabilities for future benefits

to persons who have retired and 3) the liabilities for service already rendered by active members. In a system that has been following the discipline of level contribution rate financing, the liabilities for member contributions on deposit (liability 1) and the liabilities for future benefits to present retirees (liability 2) will be fully covered by present assets except in rare circumstances.

In addition, the liabilities for service already rendered by members (liability 3) will be partially covered by the remainder of present assets. Generally, if the system has been using level contribution rate financing, the funded portion of liability 3 will increase over time. Liability 3 being fully funded is very rare.

The schedule below illustrates the progress in funding liability 3 of PERA and is indicative of PERA's policy to follow the discipline of level contribution rate funding.

### TOTAL ACTUARIAL LIABILITIES

## Summary of Unfunded Actuarial Accrued Liabilities

Unfunded actuarial accrued liabilities are the difference between actuarially calculated liabilities for service already rendered and the assets of the retirement fund. It is natural for unfunded liabilities to exist for PERA and other retirement plans.

The law governing PERA requires that these liabilities be financed systematically over future years. The period for amortizing unfunded actuarial accrued liabilities is currently under the 60-year limit specified in state law in all divisions of PERA. (The law requires that contribution rates be set at a level which, if actuarial experience matches plan assumptions, will pay off unfunded liabilities over 60 years or less.) The amortization periods have shown stability over the last decade.

Benefits to retirees are "fully funded" — assets reserved for benefits currently being paid equal liabilities for those benefits. Liabilities for members are based on service rendered toward their retirement benefits which will be payable in the future. Unfunded actuarial accrued liabilities exist because liabilities for such service by

members exceed assets currently on hand for such future benefits.

Because inflation continues, though at a much lower rate in the last few years, the value of dollars is decreasing. Looking at just the dollar amounts of assets, benefits paid, member salaries and unfunded actuarial accrued liabilities will be misleading.

While no one or two measures can fully describe the financial condition of the plan, unfunded actuarial accrued liability dollars divided by member salary dollars provides a meaningful index. The smaller the ratio, the stronger the system. Observation of this relative index over a period of years will give an indication of whether the system is becoming financially stronger or weaker.

This ratio has increased at times over the last decade, but the recent trend shows stability. Actuarial assumptions were revised in 1986 to recognize higher investment returns expected over the long term. The high investment returns in the last two years have helped to increase assets, reduce unfunded actuarial accrued liabilities and lower the ratio of unfunded liabilities to member salaries.

# Health Care Program

The PERA Health Care Program began covering benefit recipients and qualified dependents on July 1, 1986. This benefit was developed after legislation in 1985 established the Program and the Health Care Fund, which is used to subsidize premium costs.

Prior to this, while some retirees received coverage through their former employers, many others had no group health care coverage available to them after retirement. Others had a group plan in which they could enroll, but they paid the full premium.

Under the Health Care Program, PERA subsidizes a portion of the monthly premium for health care coverage. The benefit recipient pays any remaining amount of that premium through an automatic deduction from the monthly retirement benefit. During 1987, the subsidy was \$87.01 per month for benefit recipients who had 20 or more years of PERA service credit. For those with less service, the subsidy was reduced 5 percent (\$4.35) for each year under 20 years.

Monthly premium costs for participants depend on the health care plan selected, the number of persons being covered and Medicare eligibility; the number of years of service credit a retiree has determines the amount of the premium subsidy. The Health Care Fund receives a small portion of the monthly PERA contribution

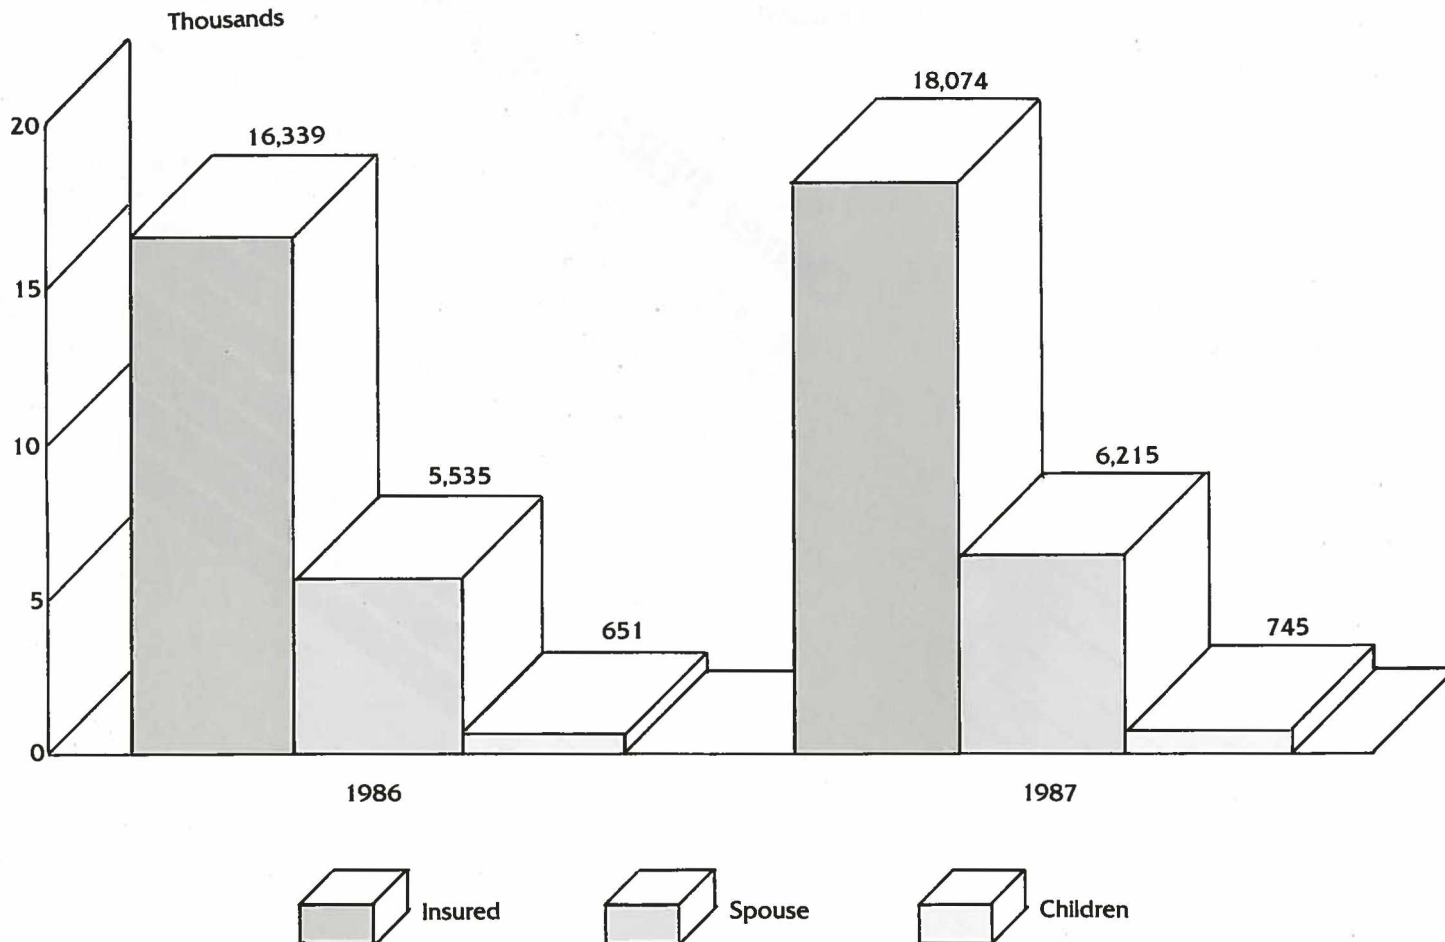

(0.8 percent of salary) from affiliated employers. This allocation is invested and any investment earnings are added to the Health Care Fund.

Under the Program, PERA uses Blue Cross and Blue Shield of Colorado, a major medical indemnity carrier, and seven Health Maintenance Organizations (HMOs): Comprefcare HMO, Kaiser Permanente, Health Dimensions, Peak Health Plan, Qual Med HMO, Rocky Mountain HMO and San Luis Valley HMO. In October, Health Dimensions discontinued operations and the 230 persons covered by that HMO were transferred to other carriers.

The annual open enrollment for the Health Care Program was held between May 1 and June 15, 1987. During that period, PERA benefit recipients could join the program for the first time, transfer from one plan to another and add or delete eligible dependents. As a result, the program experienced a net increase of 421 new enrollments and 322 new dependents. Only 260 participants (less than 2 percent of those enrolled) changed their health care plans.

At the end of the year, 18,074 of the 30,105 PERA benefit recipients were enrolled in the Program. Also, 6,960 dependents were covered.

## Health Care Enrollments

## Life Insurance Program

PERA provides its members access to two group life insurance plans offered by Prudential and New York Life. Members may join one or both of the plans, and may continue coverage into retirement.

During the annual open enrollment period held each fall, members are not required to furnish evidence of good health for themselves or their dependents. Members may enroll outside of the open enrollment period, but must provide a health statement from a physician.

Monthly premiums are paid by payroll deduction; the premiums are \$9 for Prudential and \$10 for New York Life.

### Life Insurance Enrollment

Year	New York Life	Prudential	Total Enrollments
1977	18,443	7,364	25,807
1978	17,625	8,155	25,780
1979	17,691	9,425	27,116
1980	18,098	10,925	29,023
1981	17,729	11,472	29,201
1982	17,553	12,077	29,630
1983	18,242	12,298	30,540
1984	19,643	12,837	32,480
1985	21,296	13,635	34,931
1986	23,052	13,863	36,915
1987	24,394	14,113	38,507

### Life Insurance Dollars Paid

Year	New York Life	Prudential	Total Paid
1977	\$ 709,246	\$223,504	\$ 932,750
1978	1,086,319	255,442	1,341,761
1979	992,477	394,377	1,386,854
1980	1,026,473	442,340	1,468,813
1981	1,137,044	619,274	1,756,318
1982	1,388,697	528,458	1,917,155
1983	1,114,010	447,706	1,561,716
1984	1,484,583	872,860	2,357,443
1985	1,950,696	910,057	2,860,753
1986	1,670,531	802,016	2,472,547
1987	2,097,665	865,783	2,963,448

## Voluntary Investment Program

The PERA Voluntary Investment Program (VIP) was established on July 1, 1985, under section 401(k) of the Internal Revenue Code. Program participation is voluntary and contributions are entirely separate from those that members make to the Association each month. VIP allows participants additional tax deferral of current income by investing some of their current income for retirement. Earnings on VIP investments are also tax-deferred.

In 1987, members were able to invest up to 12 percent of their annual gross salary, to a maximum of \$7,000 in the Program. Contributions are deducted from the participant's monthly salary.

VIP offers members a choice of three funds in which they may invest. They are a Short-Term Fund, a Fixed Income (bond) Fund and a Growth Stock (equity) Fund. Each quarter, members may change their contribution amount, transfer their account balance between funds and change the contribution percentage designated to each fund. The Program also has loan and hardship withdrawal provisions.

On December 31, 1987, VIP had accumulated assets of \$4,292,351 and 1,322 participants.

Year	Assets	Number of Participants
1985 (Jul-Dec)	\$ 203,272	236
1986	\$1,750,673	902
1987	\$4,292,351	1,322

### Fund Performance
