COLORADO STATE PATROL ANNUAL REPORT 1987-88

The People Behind the Badge

CHARACTER

INTEGRITY

KNOWLEDGE

JUDGMENT

HONOR

LOYALTY

COURTESY

You have just been invested with the badge of authority of our organization, the Colorado State Patrol, but we wish to remind you that it symbolized far more than authority to us. You will note that it has seven points. Seven was regarded by the Greeks, Jews, and Etruscans as the number of perfection. We consider our badge a perfect star.

Each point of our badge represents one of the tenets that make up the ideology of the police profession. Six of these tenets are: Character, Integrity, Judgment, Loyalty, Knowledge, and Honor. The seventh tenet, which is Courtesy, sustains the other six. Courtesy inspired the motto of our organization, BE COURTEOUS BUT FIRM.

This badge is always worn on the left side of our uniform close to our heart. We hope and trust you will always wear this badge with Character, Integrity, Knowledge, Judgment, Honor, Loyalty, and Courtesy to yourself and to our organization, the Colorado State Patrol.

COLORADO
DEPARTMENT OF
PUBLIC SAFETY

Chief John N. Dempsey
Colorado State Patrol

700 Kipling St.
Denver, CO 80215-5865
(303) 239-4500

May 1, 1989

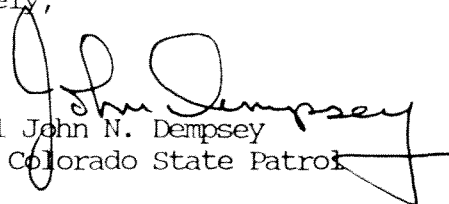

This 1987-88 Annual Report represents a summary of the Colorado State Patrol's goals, programs, and achievements during this past year.

1988 recorded the lowest number of traffic related deaths in Colorado in a quarter of a century. A large part of this saving of human lives resulted from our proven technique of identifying and targeting high accident-causing violations and locations and then applying available resources to solve the problems. Also reflected are the effects of our long-range planning efforts, including support of enabling laws such as stricter DUI enforcement, occupant restraint laws, and hazardous materials training and routing. The Motor Carrier Safety program and our innovative Safety Education efforts have also gained much needed voluntary compliance with laws which help us obtain our goal of saving lives.

Featured on the cover of this report are pictures of a cross-section of Colorado State Patrol employees. Without the selfless dedication of people like these and their willingness to work 24 hours a day, 7 days a week to provide services to Colorado citizens and visitors, such accomplishments would not be possible. As we know only too well, with the loss of our Trooper Charles Fry, the price of these achievements is often high.

They, the people behind the badge, are truly our state's greatest asset.

Sincerely,

Colonel John N. Dempsey

RESULTS MANAGEMENT

Divisions of state government should periodically step back and analyze their management programs for the purpose of determining both growth and cost effectiveness. During the 1987-88 fiscal year, the Colorado State Patrol initiated a program to do just that. Management teams from every level of the Patrol analyzed the current management systems in place and recommended both beneficial changes and innovative improvements for the future.

The goals of these teams were two-fold. The first goal was to establish a resource analysis tracking device that could be aligned with the State Patrol's primary goals and objectives. The second goal was to implement programs that would upgrade the level of services provided for the Colorado motoring public.

The State Patrol has operated under the philosophical princi-

ple of management by objectives since 1979. In this type of management program, all levels of the organization play a distinct and crucial role. In the Patrol, top managers set broad goals for the agency, middle managers then develop the criteria which measures the progress of these goals. First-line supervisors work with their subordinates to set and to achieve the specific objectives which drive the agency towards obtainment of these goals.

The overall goals of the Patrol are consistent with prior years. They are:

- to reduce motor vehicle injuries and fatalities
- to improve the mobility and the transportation efficiency on Colorado roads, and
- to provide a secure environment for activities of public interest.

Measurement criteria, however, has been upgraded to include the number of trooper resource hours projected and expended upon the specific objectives of the Patrol. This program will begin July of 1988. This will be a very important addition to the Patrol's capability of measuring impact upon objectives by expended trooper resource hours. For example, injury and fatal accident reduction can be predicted and controlled based upon the application of a known amount of resource hours.

The table to the right summarizes the Patrol's MBO Program. Two noteworthy statistics are the reduction found in both injury and fatal accidents and in alcohol caused accidents. At 8,871 injury/fatal accidents, Colorado experienced its lowest yearly rate in over five years. Fiscal year 1987-88 also set a five year low at 1,960 alcohol caused accidents with the Patrol's jurisdiction of traffic enforcement.

A major contributor to the reduction of alcohol caused accidents was the federally funded Hazardous Violations Team concept which the State Patrol implemented December 21, 1987. From that date through the end of the fiscal year, 1,928 program funded overtime hours were worked on high alcohol caused accident target roads. Two-hundred and ninety-three drivers were removed from the roads for DUI. All of those removed from the road were stopped prior to being involved in an accident.

One other area of improvement should be mentioned. The

Without support people, there's no results in Results Management.

**COLORADO STATE PATROL GOALS,
MEASUREMENT CRITERIA, OBJECTIVES AND RESULTS
FY 1985-86 TO FY 1987-88**

PATROL GOALS	MEASUREMENT CRITERIA		FISCAL YEAR		
			1985-86	1986-87	1987-88
To reduce motor vehicle injuries and fatalities and the personal and economic loss thereof.	o Number of patrol-investigated injury and fatal motor vehicle accidents (excluding accidents on private property)	OBJECTIVE RESULTS	10,060 9,396	10,338 9,672	10,391 8,871
	o Number of patrol-investigated alcohol-caused motor vehicle accidents (excluding accidents on private property)	OBJECTIVE RESULTS	2,587 2,222	2,660 2,218	2,462 1,960
	o Percent of vehicles inspected when drivers' licenses are checked.	OBJECTIVE RESULTS	21.1% 24.7%	22.3% 29.4%	26.2% 32.1%
	o Number of cursory truck inspections	OBJECTIVE RESULTS	12,203 10,083	NA NA	18,032 16,604
To assist in the efficient flow of traffic	o Number of motorists assists per 100 hours of trooper patrolling time	OBJECTIVE RESULTS	32.7 31.8	31.6 30.4	30.3 30.8
To provide a secure environment	o Number of auto theft recoveries	OBJECTIVE RESULTS	623 646	631 549	603 515
	o Number of hours dedicated to auto theft recovery	OBJECTIVE RESULTS	NA NA	8,562 10,279	8,006 8,517

	o Number of hazardous materials specialists	OBJECTIVE RESULTS	32 32	35 35	37 41

*NA Object not applicable for that year.

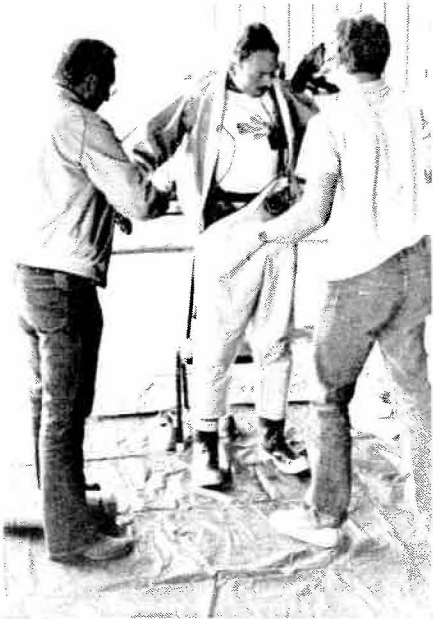

Patrol has initiated a program to upgrade all of its Patrol personnel to a much higher level of expertise in the area of accident investigation. When the project is completed, the Colorado State Patrol will be able to provide a technical

accident level of investigation for all citizens across the state. This should provide an excellent service for victims of all accidents investigated by the Patrol.

Is Results Management work-

ing for the State Patrol? Is it an effective form of management for a division of state government? Positive service oriented results answer both questions. Look at our results. The pride is back.

HAZARDOUS MATERIALS

Suiting up for danger.

As the table on the next page clearly shows, the State Patrol's role in addressing hazardous material spills is becoming increasingly complex. During this last year, for example, the Patrol responded to incidents in which the substance was as harmless as used motor oil, as dangerous as propane and as unique as Isocyanate A&B. In some instances, nothing was spilled, while in other instances, thousands of gallons were spilled.

Beginning with FY 87/88, it became clear that the troop specialist required more in the way of specialized training. In order to meet these new challenges, the number of monthly training hours has doubled since the last year.

Special Federal government shipments such as radioactive wastes are also creating new obstacles for our troopers. Radiological monitors have been purchased, and training on these instruments has been completed in anticipation of the nuclear waste shipments. In addition to the inspection of these nuclear shipments, our hazardous materials troop specialists are also working closely with the Motor Carrier Safety Unit, inspecting other hazardous materials trucks to insure compliance with transportation rules and regulations. Furthermore, now that the State Patrol has designated hazardous materials transportation routes pursuant to 1987 legislation, the troop specialist has become an integral part of the enforcement of the new

law as it pertains to hazardous materials vehicle's routing and permits.

The safe transportation of hazardous materials remains a priority of the Patrol. In FY 87/88 the Patrol's hazardous materials specialist worked very closely with local and regional agencies developing mutual aid agreements and shared training to assure the safe transportation of hazardous materials on the highways of Colorado.

A strong cooperative effort between the hazardous materials transporters, local government and the Patrol is increasing the safety factor, not only for individual companies, but the citizens of the state of Colorado.

Hazardous Materials officers plugging a leak.

COLORADO STATE PATROL HAZMAT SUMMARY FOR FY 1987-88

From one professional to another. "Thanks for being a pro" program.

ROUTING AND RULEMAKING

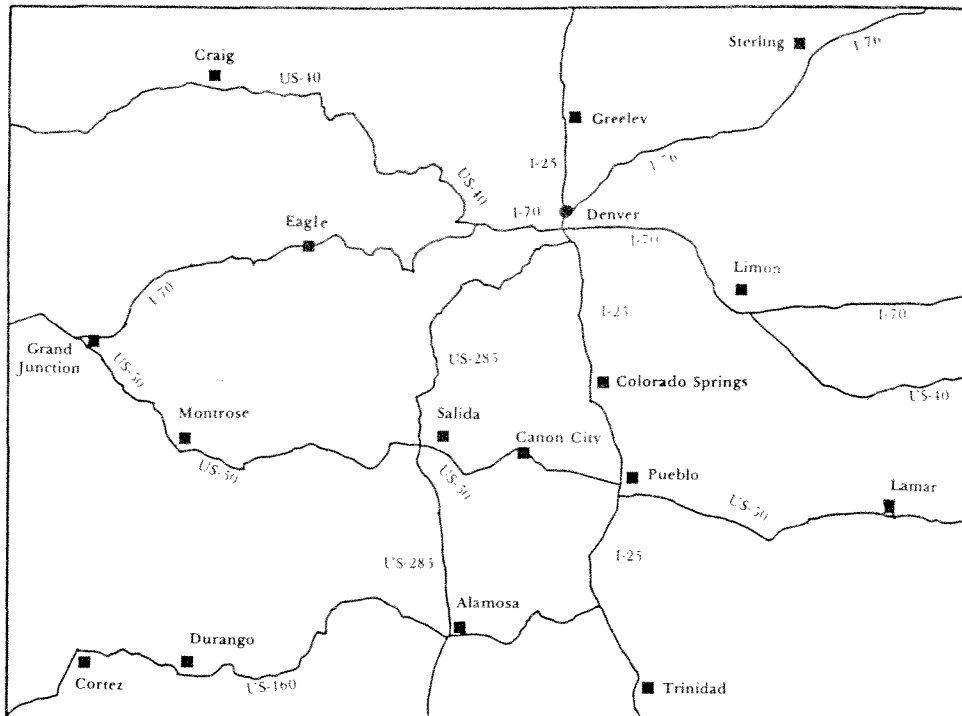

The risks associated with the transportation of hazardous materials are not new. Yet nationwide, government response toward the need for safer transportation management of these products has frequently been less than adequate. It is an unfortunate fact that most legislative action in this critical area is prefaced by a major transportation incident. In Colorado, it was the now infamous "Torpedoes in the Mousetrap" incident that raised the level of awareness among legislators and private citizens alike.

Whether the legislature's response to the torpedo incident was appropriate or not is irrelevant. The bottom line is that it produced results which will provide for safer hazardous materials transportation within Colorado.

In an effort to minimize the risks associated with the transportation of hazardous materials, the state legislature adopted the "Hazardous Materials Transportation Act of 1987." The provisions of this act require the State Patrol to promulgate rules for the routing, permitting, and inspection of vehicles transporting hazardous materials within and through Colorado.

To implement these provisions, a new section was created within the Patrol known as the Hazardous Material Routing and Rulemaking Section. This section became responsible for the following:

Developing a statewide network of designated routes over

which hazardous materials can be transported;

Establishing an effective and practical hazardous material permit system; and,

Establishing guidelines for the inspection of hazardous material transport vehicles.

The Patrol's regulatory authority in the above areas has a significant impact on all levels of government - from the smallest unincorporated town to the largest metropolitan city or county. It was clear from initial contact with members of local government that little or nothing was known about the act or its ramifications on their jurisdiction. Therefore, the Patrol's Routing and Rulemaking Section staff made over 40 presentations to members of local government around the state between September 1 and December

31, 1987 to educate them on the provisions of the act.

Petitioners (defined as local government and the State Department of Highways) wishing to have routes designated within their jurisdiction had to petition the State Patrol on or before July 1, 1988. Petitions for Route Designation require a petitioner to complete a risk analysis comparing proposed routes against available alternatives. The analysis and other required supporting data were then submitted to the Patrol for review and consideration of approval.

Much of the work of this section will come to fruition next fiscal year. At that time the Patrol will finalize the rulemaking process, including identifying those highways that have been designated for the transportation of hazardous materials.

EXECUTIVE SECURITY UNIT

The primary responsibility of the Executive Security Unit is to provide security for the executive and legislative branches of government in Colorado. This unit consists of twelve troopers, one lieutenant and one secretary.

Of the twelve troopers, three troopers directly assist the governor and his wife with such activities as driving and coordinating travel arrangements. Two troopers provide security for members of the house and senate and their

staff during working hours. The remaining seven troopers are responsible for round-the-clock security at the Governor's mansion and at the State Capitol Building.

Those troopers who work at the mansion and at the State Capitol are normally present at receptions, parties and tours. In the event of bomb threats, street crime, telephone threats, or any other type of disturbance in the area, their job is first to insure the safety of those around them. Once

those around them are out of danger, their second job is to bring the situation to a swift and peaceful conclusion.

In addition to these "normal" assignments, the Security Unit assists federal authorities with protecting visiting dignitaries including foreign royalty, the president and the vice-president of the United States, and any visiting governors from out-of-state. This assistance has extended to route selection for and security during motorcades.

MOTOR CARRIER SAFETY PROGRAM

The primary goal of the State Patrol's Motor Carrier Safety Assistance Program (MCSAP) is to experience a continuing reduction in the number and severity of commercial vehicle accidents and hazardous material incidents involving commercial carriers.

The Colorado State Patrol began pursuing the total truck enforcement program in 1985. Today there are 14 troopers working as 2-man teams doing motor carrier safety inspections throughout the state. They are a part of the State Patrol's Motor Carrier Safety Unit (MCSU) which is supervised by a Lieutenant and two Sergeants.

In addition to the uniformed personnel in the MCSU, the administrative support staff maintains a highly complex computer system dealing with commercial vehicles. This system, known as "SafetyNet", is linked to a federal computer in Washington, D.C. and contains the records of all truck inspections done throughout the United States by MCSAP participating agencies. Eventually, all states will be online with this system, and Colorado, along with all the other states will be able to access valuable information on specific carriers and operators from throughout the country.

Since MCSAP is a federal grant program, a 20% "in-kind" match is required to qualify for the \$962,973 in federal funds. This is where the regular field troopers come in. The State Patrol is given credit for match dollars for all of the cursory inspections performed by field

Colorado State Patrol Motor Carrier Safety Unit — The Crew.

Colorado State Patrol Motor Carrier Safety Unit — the job, to prevent this.

personnel during the grant period. Since the Patrol has been doing such inspections since the creation of the organization, this task is no more than documenting the number of cursory inspections performed — no new work is required and the state does not have to meet any of the 20% match with legislatively appropriated funds.

To assure uniformity of commercial vehicle inspections, and to avoid duplicate inspections, the Patrol has become a member of the Commercial Vehicle Safety Alliance (CVSA). CVSA is an organization made up of 47 states and Canadian provinces formed to set specific standards for inspections and to provide a reciprocating

agreement among all the members. By putting a sticker on the trucks that pass the inspection that is good for 90 days and honored by all CVSA member jurisdictions, the burden of the inspection program on the motor carrier industry is greatly reduced.

Colorado has enjoyed great success in this program illustrated by the fact that there has been an overall reduction in the number of accidents of 26%, injuries are down by 11% and fatalities are down by 28%. The motor carrier Safety Unit will make every attempt to continue this trend through its enforcement efforts and through education efforts with the industry to improve voluntary compliance.

AIRCRAFT

Bears in the air meet on the ground.

The Aircraft Section conducts aerial law enforcement and emergency response functions in addition to the operation and administration of the State Aircraft Pool.

Five aircraft are presently included in the Aircraft Pool. Four of these are stationed in Denver and consist of a Beechcraft King Air, Beechcraft Baron and two Cessna Skylanes. A third Cessna is stationed in Grand Junction and provides aerial support for Western Colorado.

The Aircraft Pool provides 24 hour transportation service for all state governmental agencies on a reservation or emergency basis. During this fiscal year, 757 passengers utilized this service, travelling an approximate total of 116,500 miles. This is a key resource for conducting state business since the majority of Colorado's rural

cities do not have commercial airline service.

During this fiscal year, aerial traffic enforcement and highway patrolling resulted in the issuance of 4,177 citations. While the majority of these citations were for speeding offenses, a total of 433 were issued for various violations ranging from Driving Under the Influence to Eluding Police Officers, and three percent of the violations involved commercial vehicles.

The aircraft frequently responds to requests for assistance from local law enforcement agencies, other Divisions of State Government, emergency medical facilities and the general public. These assistance missions include surveillance and photography, motor vehicle chases, searches for missing persons, prison escapees or criminal suspects,

as well as observation and communication support for civil demonstrations, special events and natural disasters. Life saving transportation or urgently needed medical supplies such as serum, blood, organs or special equipment is provided whenever possible.

Fiscal 1987/88 completes 23 years of accident and injury free flight operations for the State patrol since implementation of aircraft usage by the agency. In slightly over two decades, a total of 28,300 accident free flight hours have been recorded, an equivalent of approximately five million miles, or over 200 times around the globe.

The utilization of aircraft continues to play a key role in support of the State Patrol's law enforcement and emergency service mission.

AUTO THEFT UNIT

Auto Theft continues to be a major economic problem in Colorado and it affects each and every citizen of the state. Not only do vehicle owners lose possession of their property, but the high theft rates drive up the price of auto insurance.

There are some promising things in sight, however. Recent federal legislation and some of the jail sentences that have been handed down, are encouraging. This has possibly led to a decrease in the rate of stolen vehicles in the state of Colorado. In 1986, for example, there were 15,841 thefts. In 1987, this number dropped to 14,463, a decrease of 9.4%. The rate per hundred thousand residents decreased 10.3%. There is still, however, a motor vehicle stolen every 37 minutes in Colorado.

While auto theft is only 6.8% of the total crimes and is 7.3% of the property crimes, it has the highest total property value of any crime. In 1987, in Colorado, this amounted to \$61.5 million.

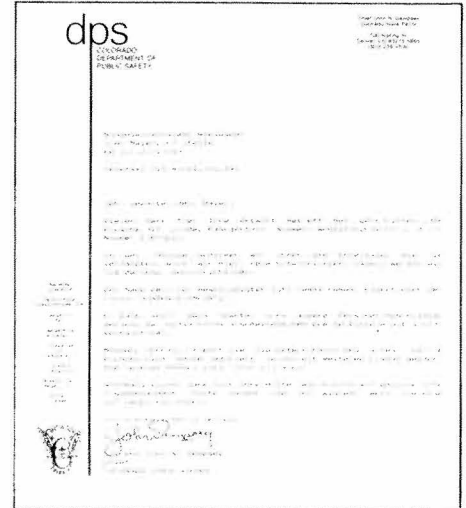

Currently, the Auto Theft Section of the State Patrol consists of a lieutenant, a sergeant, 8 investigators and a secretary. These investigators are stationed in Grand Junction, Durango, Pueblo, Colorado Springs, Ft. Collins, and at Denver Headquarter.

In addition to handling the auto theft investigations for the State Patrol in Colorado, they are further charged with affixing all of the assigned identification numbers for vehicles that require specially assigned identifications.

Also, they are doing a large majority of the certified vehicle identification number inspections on vehicles that are rebuilt, reconstructed, require bond titles, kit cars, homemade vehicles, or those that have been issued a salvage certificate.

These investigators are also involved in auto theft training throughout the state, and nationwide, for numerous other law enforcement agencies. This section also coordinates the Colorado State Patrol Criminal Interdiction Program.

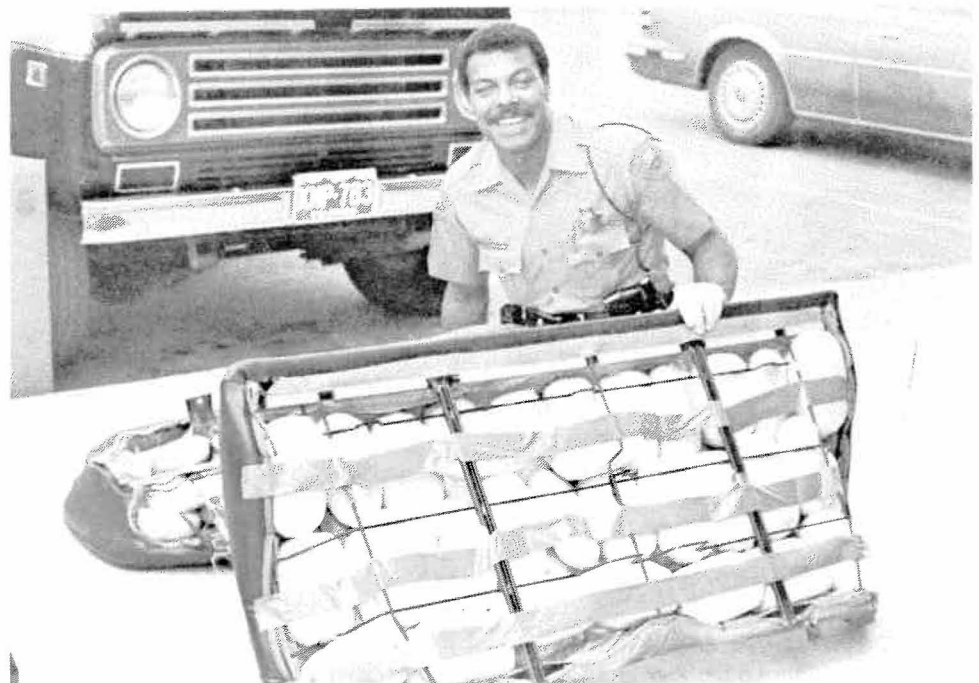

Along with having full-time investigators scattered throughout the state, there is at least one trooper in each troop who has been trained to be an auto theft specialist. This trooper works various auto theft cases in his troop whenever time permits, in addition to his regular patrolling duties.

This letter, written in German, requests assistance from Interpol concerning car (pictured below) stolen in Germany and recovered in Colorado.

Auto theft is an international problem. This Porsche was stolen in Germany and recovered in Colorado.

Interesting find while on "routine" patrol.

CRIMINAL INTERDICTION

The tools of criminals faced, and confiscated, by officers in the Criminal Interdiction Program.

Criminal interdiction is not new to the State Patrol. Troopers have been arresting criminals and confiscating drugs, weapons and other illegal contraband for many years. A formal criminal interdiction policy, on the other hand, is new. The program began in late 1987 and continues to expand and improve with time.

The basic philosophy of the criminal interdiction program is this:

- the responsibilities of the State Patrol officer extends beyond the enforcement of traffic laws; he is there to uphold the Constitution of the United States, and

- every traffic stop carries with it the potential for discovering serious criminal conduct

The idea is simple. During routine stops, the trooper is now being trained to look for more than simple traffic infractions. Officers are now looking for tell-tale signs of, among other things, homicide, drug smuggling, and grand theft.

Beginning in late 1987, members of the Patrol's Auto Theft have been providing training in criminal interdiction. Not only is this instruction provided to new recruits but it is now part of the annual in-service which is attended by

all officers. Three days of the annual in-service are now devoted to, among other things, drug recognition, search and seizure laws, and techniques of interview and interrogation.

Between late 1987 and June of 1988, 25 routine traffic stops have resulted in the confiscation of nearly three-quarter of a million dollars in illegal drugs. The table below summarizes the Patrol's criminal interdiction program during this time period.

Substance	Street Value
Marijuana	\$635,000
Cocaine	\$100,000
Other drugs	\$ 5,000
Totals	\$740,000

SPECIAL EMERGENCY RESPONSE TEAM

The purpose of the Special Emergency Response Team (SERT) is to have the capability to respond and handle incidents, usually involving firearms, where an officer is limited in his ability to handle the situation because of the magnitude or seriousness of the problem.

Due to the limited scope of State Patrol police authority, the SERT teams may be utilized only when certain criteria apply. They may be used, for example, in any event in which an officer is involved in a shooting

or hostage situation arising from the proper exercise of Patrol duties. They may be used when, in an emergency and with the approval of the Governor, another police agency or other local jurisdiction requests assistance. This was the case this past year when the Patrol SERT team was called in to assist other police agencies in settling the prison unrest at Ordway.

The State Patrol has two SERT teams. One operates out of Golden, the other out of

Pueblo. The Golden team is made up of a sergeant and five troopers, and a hostage negotiator. The Pueblo team has a sergeant and five troopers.

Member of this team receives regular specialized training in marksmanship, communications, and riot control. And, once a year, the two SERT teams square off in a mock drill, designed to keep all members well prepared for any emergencies.

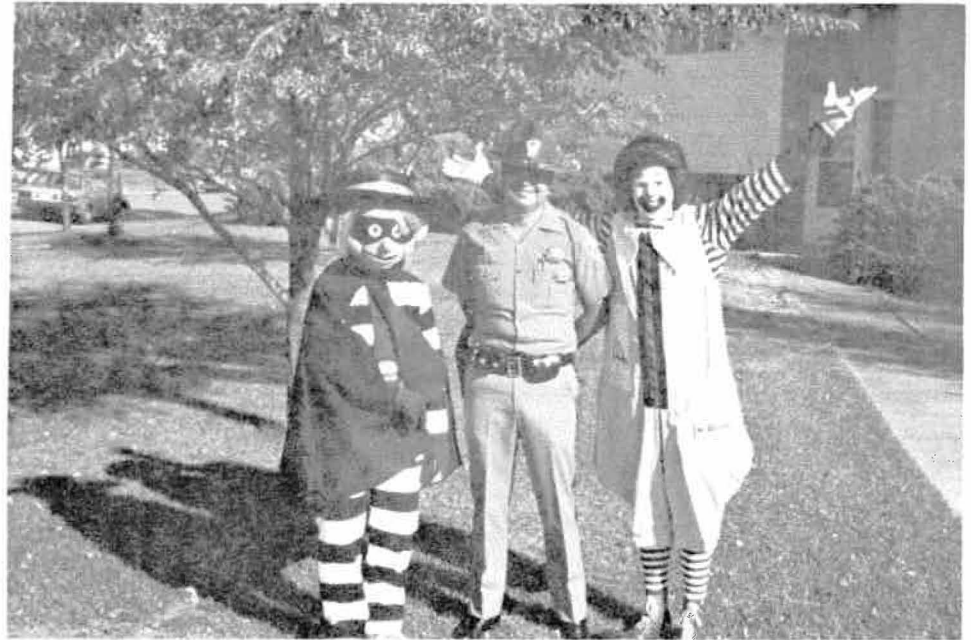

After Operation photograph — the Golden SERT team.

EDUCATION AND SAFETY

The Education and Safety Unit is charged with the mission of getting the Patrol's traffic safety message out to the public. For many years, a large part of this job has been carried out by local officers speaking at schools and at businesses.

But in the last year or so, due to a tremendous demand for these programs, coupled with a reduction in the number of officers available for these presentations, the Education and Safety Unit was given the following assignment: maintain the high quality of the Patrol's safety programs, but do it with fewer officers.

In response to this challenge, the Education and Safety Unit developed a variety of free-standing programs and materials which are now supplied directly to schools and businesses. Some examples include safety posters, video tapes (some produced on a local level with high school help), bumper stickers, and "canned"

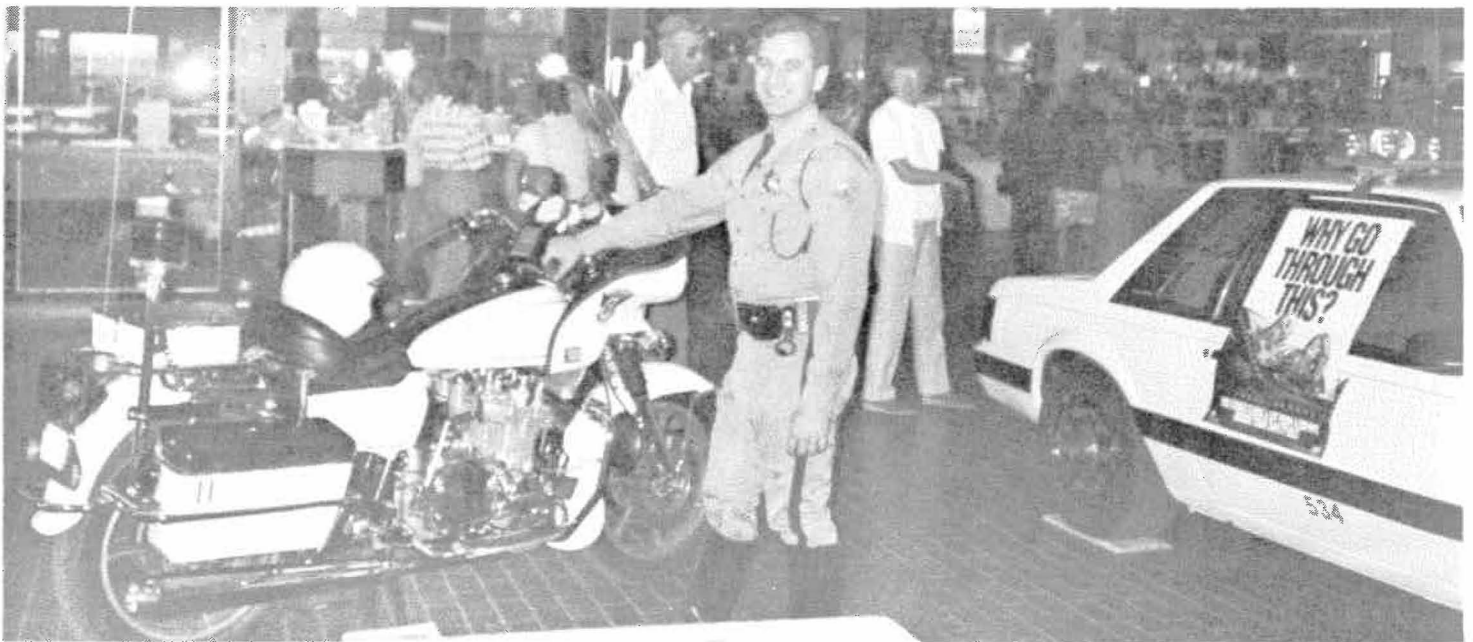

Children's traffic education and safety is everybody's business.

instructional programs.

While free-standing programs help with the traffic message, unfortunately, they do not take the place of an officer. Many students will graduate from high school without a single positive experience of interacting with a State Patrol officer in a school environment.

Does this mean safety talks are a thing of the past? Not at all. In the past year, the Patrol made presentations at US West, Public Service Company, and the Denver Federal Center. And staffed presentations will always be a part of big events like the State Fair, mall exhibits, and the Stock Show.

Education and safety is a full time business.

MANAGEMENT RESEARCH

The duties of the Management Research Section fall into two broad categories: duties which relate to the Colorado State Legislature and duties which relate to the distribution of State Patrol data.

Each year, the Colorado State Legislature processes hundreds of new laws, and revises numerous others. Many of these laws, such as the mandatory seatbelt law have a direct impact on the day to day operation of the State Patrol. In order to keep track of all of these laws as well as to have a voice in the process of writing the laws, the Patrol assigns one of its officers as legislative liaison.

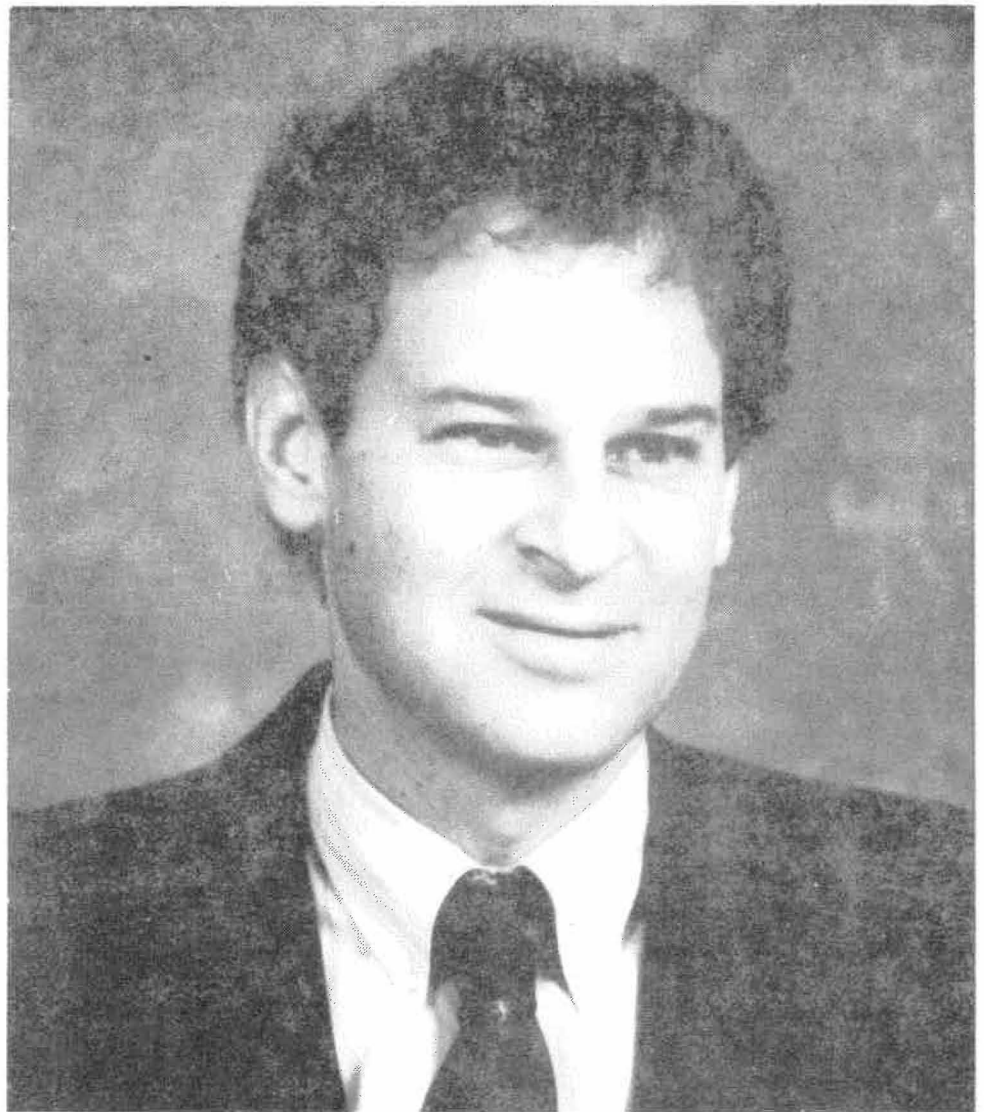

Each legislative session, the liaison provides information requested by the legislature as it relates to the budget, to legal issues, and to new laws. When the session is over, this officer works with representatives from other agencies, including other law enforcement agencies, to change existing laws and to address legal issues of mutual concern.

The other responsibilities of this section relate to the distribution of State Patrol data. In FY 1987-88, the State Patrol operated a wide variety of programs which addressed everything from livestock theft to the transportation of hazardous materials. Many important decisions made by management required solid information about these programs. The staff of the Management Research Section provided management with timely and accurate reports which charted the progress of these

programs throughout the year.

Management was not the only party interested in this data. This data was also of enormous interest to the public. Students requested data for their speeches and term papers; concerned citizens asked for data to support

their cause for highway safety improvements; and environmental engineers needed to know if a planned construction site was prone to hazardous materials spills. These types of requests, over 100 in FY 1987-88, were handled by the Management Research Section, usually within 24 hours.

APPENDIX A

DETAILED DESCRIPTIONS OF CSP ACCIDENT SUMMARY

Private Property	This is the total number of accidents reported as occurring on private property.	DRV ASLEEP	Drove While Asleep
Animal	This is the total number of accidents reported which involved an animal.	LANE VIOL	Lane Violation
Total Citations	This is the total number of tickets issued in this Patrol jurisdiction.	ANIMAL	Animal Caused
WRN TKTS (Acc Caus Fact)	This is the total number of warning tickets were issued for accident causal factors* on target roads only.	DEFECT VEH	Defective Vehicle
Economic Impact (NCS Fig. 1-85)	This will take the number of fatal (FTL) accidents, the number of injury (INJ) accidents, and the number of property damage (PD) accidents and multiply each by the latest dollar figure published by the National Safety Council (NCS) to determine the cost to society for these motor vehicle accidents. The NSC bases these figures on averages throughout the nation.	IMP BACK	Improper Backing
Cost/VMT	Estimates the cost of these motor vehicle accidents for each vehicle mile travelled. This figure is not yet available.	O TRAF DEV	Disregarded Other Traffic Control Device
Rate/100MVT	Accident rate which is based on the number of accidents per 100 million vehicle miles travelled in this CSP jurisdiction. This figure is not yet available.	WRNG SD RD	Wrong Side of Road
Factors	What the investigating trooper determines to be the actual cause of the accident.	IMP PASSNG	Improper Passing
#	The number of accidents with this causal factor.	O IMP TURN	Other Improper Turn
%	The percent of all accidents with this causal factor.	STOP SIGN	Disregarded Stop Sign
CIT	The number of citations which were issued for this causal factor.	PARK VIOL	Parking Violation
Abbreviations of Accident Causal Factors	Description	PED VIOL	Pedestrian Violation
INAT DRVNG	Inattentive to Driving	IMP LIGHT	Improper Vehicle Lighting
COLD REPOR	Cold Report: An accident report filed by an individual involved in the accident, after the accident occurred and without investigation.	SPILL LOAD	Spilling of Load
EX SAF SPD	Exceeding Safe Speed	SIG VIOL	Signaling Violation
DUI/DWI	Driving Under the Influence/ Driving While Intoxicated	IMP LOAD	Improper Load
YLD ROW	Yield Right of Way		
FOL TO CLS	Following Too Closely		
EX LAW SPEED	Exceeded Lawful Speed		
IMP L TURN	Improper Left Turn in Face of Approaching Traffic		

*The accident causal factor is what the investigating trooper determines to be the actual cause of the accident.

APPENDIX B

DETAILED DESCRIPTION OF CSP ACTIVITY SUMMARY

Miles Driven	Total miles driven by troopers in patrol cars.	HAZ Materials	federal safety standard guidelines.
MLS Per Contact	Number of miles driven by troopers between contacts with motorists.	Prisoner Processing	Time spent in the response, inspection, or cleanup of hazardous materials.
% Time PAT & SE	Percent of troopers time spent on patrolling and on selective enforcement. Selective enforcement includes radar, vascar, aircraft, and safety checks.	Court	Time spent processing an arrest other than a DUI arrest.
Enforcement Index	The number of Hazardous Violation Penalty Tickets divided by the number of injury accidents multiplied by the conviction rate (.90).	Other Productive	Time spent in pretrial conferences, court preparation, court appearances, and travel time for these activities.
Contacts	Total vehicles contacted and drivers licenses checked.	Total (Prod)	Time spent on ride, field, and office supervision, on education and safety, and on such activities as DUI processing, aircraft operation, and auto theft.
Oral: Traffic	Number of warnings for traffic infractions which were issued verbally	All Other	Summation of hours spent on previous 11 categories.
Assists	Total number of trooper assists	Violation Reports	Variety of activities not previously noted. Examples: Dispatching, auto maintenance, warrant service, and gubernatorial security.
All Other	Number of warnings issued for all other reasons	Patrolling	Citations issued by troopers.
Total	Sum of these three activities	Radar	Number and percent of total citations issued by troopers while on general patrol.
Time Distribution	Breakdown of trooper time by selected activity.	Aircraft	Number and percent of total citations issued by troopers using aircraft equipment.
Hrs	Total number of trooper-hours devoted to an activity.	Safety Checks	Number and percent of total citations issued by troopers using aircraft surveillance.
%	The percent of the troopers total time devoted to an activity.	Sub-Total	Number and percent of total citations issued by troopers during safety checks.
Gen Acc Reduc (Targ)	Normal preventative patrolling on all targeted road segments. Includes any activities relating to this objective.	Acc Citations	Sum of the number of citations issued during patrolling, with the use of radar, vascar, aircraft, and during safety checks.
Gen Acc Reduc (Not-Targ)	Normal preventative patrolling on all non-targeted road segments. Includes the time spent on paperwork while in the car on preventative patrolling.	Total	The Total number of citations issued for accidents.
Alc Acc Reduc (Targ)	Normal DUI preventative patrolling on all targeted road segments. Includes any activities relating to this objective.	Warning Tickets	Grand total of all citations issued by the Patrol.
Alc Acc Reduc (Not-Targ)	Normal DUI preventative patrolling on all non-targeted road segments.	HVPT	The total number of warning tickets.
Accident Investigation	Travel to and time spent at an accident, a hospital, a garage, or a morgue. Time spent on follow-up investigation is included in this time.	Optional Field 1	The total number of Hazardous Violation Penalty Tickets. HVPT's are citations which contain at least one violation that could create a driving hazard.
Accident Reporting	Time spent completing all accident related reports and investigative summaries.	Optional Field 2	Used to collect data to be used by management at the state level.
Motor Carrier Safety	Time spent inspecting commercial motor vehicles to insure that they meet strict	DUI Citations	Used to collect data to be used by management at the local level.
			Total number of citations issued for Driving Under the Influence

	or Driving vehicle While Ability Impaired.
Safety Program	Total number of occasions where troopers gave a safety talk or instruction, or appeared on Radio or TV.
TCR	The number of Truck Contact Reports issued by the Patrol.
Acc Report (%)	The total number of accident reports. The percentage is the percent of accidents reported for which a ticket was issued.
OT Hours	The total number of overtime hours logged by troopers.
Comp Time (%)	The number of hours of compensated overtime. The percentage is the percent of overtime hours which were compensated.
Veh Inspected	Number of vehicles failing to meet one or more equipment safety standards.
Veh In Violation	Number of vehicles failing to meet one or more equipment safety standards..
% of Veh In Violation	Number of vehicles in violation divided by the number of vehicles inspected.
Felony Misdemeanor	The number of Felony Arrests. The number of misdemeanor Arrests.
Auto thefts: Assists	The number of assists provided by the Auto Theft Unit to auto theft agencies or to other troopers.
Veh Inspected	The number of vehicles inspected by the Auto Theft Unit and by liaison officers.
Bus Inspected	The number of businesses inspected for the Daily Records Law.
#	The total number of times the specified activity was performed by troopers.
Attend	Number of guests present at the specified activity.
Time	Total time troopers devoted to this activity.

REMEMBRANCE OF CHARLIE FRY

Trooper Charlie Fry

Trooper Charles Andrew Fry (Charlie) was born February 9, 1946 in Erie, Pennsylvania to Robert and Betty Fry, both now deceased. Trooper Fry's father was active military, and as a result of this, Charlie grew up traveling the world. He lived in Colorado Springs while his father was assigned to the United States Air Force Academy faculty and attended Wasson High School. Charlie graduated from Wakefield High School in Arlington, Virginia, and then joined the United States Marine Corps., serving from 1965 through 1969, rising to the rank of Sergeant E-5.

Charlie saw combat duty in

Vietnam and earned several citations. He returned to Colorado after his discharge and began the dual career of student at Adams State College in Alamosa, Colorado, and as an officer with the Alamosa Police Department. Trooper Fry attended Adams State College from 1970 to 1976 as time allowed and worked for the Alamosa Police Department from 1970 to 1976.

During his tenure with the police department, he was assigned to the drug enforcement branch of the Crime Strike force in southeast Colorado. Charlie was recognized as the outstanding young law en-

forcement officer of the year by the Alamosa Junior Chamber of Commerce. His law enforcement career continued into the Colorado State Patrol when he was appointed to attend the Patrol Academy on May 3, 1976.

Trooper Fry's first duty station was in Wray, Colorado from July 1976 until September 1984 when he was transferred to District 2, Troop B with duty in Colorado Springs. It was here on September 26, 1987, Trooper Fry was struck down by a hit and run driver while in the performance of his duties on I-25, north of Colorado Springs, on Monument Hill in El Paso County.

In his private life, Trooper Fry was a dedicated husband and father. His wife, Sonja; daughter Jennifer; and son, Jeffery, still reside in their Colorado Springs home. On his off-duty time, Charlie was an avid hockey player and coach. His pee-wee team played the longest recorded game in hockey history during a tournament in Phoenix, Arizona in 1986. The game lasted three days before Charlie's team scored a goal and won the match.

Charlie distinguished himself with his cheerful outgoing personality, his eagerness to help his fellow man, and willingness to go the extra mile. His record contains many commendations from those he stopped to help. But this is little consolation to his young family who must now proceed without a husband and father to guide their growing lives.
