Preface

In 2015, the Colorado General Assembly passed House Bill 1273 (C.R.S. 22-32-146(5) and C.R.S. 20-1-113(4)), mandating that local law enforcement agencies and district attorney offices annually report specific information to the Division of Criminal Justice (DCJ) within the Colorado Department of Public Safety. These agencies must report every incident that resulted in a student's arrest, summons or ticket during the academic year for an offense that occurred on school grounds, in a school vehicle, or at a school activity or event sanctioned by public elementary schools, middle or junior high schools, or high schools.

H.B. 15-1273 mandated DCJ to annually analyze and report these data disaggregated by law enforcement agency, district attorney office, and school. This report is presented to the Judiciary and Education Committees of the General Assembly in tandem with a corresponding web-based interactive data dashboard that provides information on individual schools and law enforcement agencies. ***These two reporting mechanisms—this report and the data dashboard—should be viewed together since only the report contains the analyses of all incidents and information regarding the development of the data sets used in the report and in the dashboard.*** The interactive website may be found at <https://ors.colorado.gov/ors-studentcontacts>

Every effort was made to protect the identity of individual students. Disaggregating the data by individual school required special precautions to protect student privacy. To this end, schools with five or fewer incidents were placed into a category titled "Schools with few incidents." Additionally, when only one individual fell into a race/ethnicity category in a specific school, that case was placed into the "other or unknown" race/ethnicity category in an effort to protect the identity of the student.

For information on incidents analyzed by school, school district, and by law enforcement agency, please go to the following website to access the data dashboard:
<https://ors.colorado.gov/ors-studentcontacts>

Executive Summary

Background. In 2015, the Colorado General Assembly passed House Bill 1273, mandating that local law enforcement agencies annually report specific information to the Division of Criminal Justice (DCJ) within the Colorado Department of Public Safety. These agencies must report every incident that resulted in a student’s arrest, summons or ticket during the prior academic year for an offense that occurred at a public elementary school, middle or junior high school, or high school; in a school vehicle; or at a school activity or sanctioned event. In addition, H.B. 15-1273 mandated that each district attorney annually report to DCJ the name of any student who was granted pre-filing juvenile or adult diversion for a ticket, summons, or offense that occurred at a public elementary school, middle or junior high school, or high school; in a school vehicle; or at a school activity or sanctioned event. The DCJ provided data collection instruments on its website for law enforcement agencies and district attorney offices to use that would allow for the submission of this information. This report covers the 2019-2020 academic year.

The year 2020 was marked by unprecedented circumstances due to the worldwide pandemic of COVID-19. Starting in March 2020, most of Colorado school classes moved to on-line learning, meaning that few students were on school grounds in the last three months of the school year.

One hundred forty-two (142) law enforcement agencies provided data to DCJ for this study.¹ Of these, forty-eight (48) law enforcement agencies reported no incidents. Thus, 94 agencies reported more than 4897 incidents in 525 public schools for the 2019-20 academic year.^{2,3} This compares with 135 agencies in the 2018-2019 school year (36 reported no incidents) reporting 6688 incidents in 528 public schools. This reduction of approximately 27% of incidents is likely a result of classes moving to on-line learning in the spring of 2020.

Not all district attorney offices offer pre-filing diversion opportunities. Seventeen of the 22 district attorney offices submitted information to DCJ for the 2019-2020 academic year. Four of these reported no cases.

Law enforcement incident reports. About 85% of the incidents reported by law enforcement agencies occurred in eight judicial districts: the 1st, 2nd, 4th, 8th, 17th, 18th, 19th and 20th. The majority (88%) of the 4897 incidents resulted in law enforcement officers issuing a ticket or summons and 9% resulted in an arrest. In terms of race/ethnicity, 53% of the students involved in the incidents reported by law enforcement were White, 36% were Hispanic, and 9% were Black (for 2% of incidents, race/ethnicity was “other or unknown”).⁴ Weapons were reported to be present in 15% of incidents, however, this figure includes 582 (79%) instances when the weapon was a leg or fist (personal weapon). Twenty-two (22), or 0.5% of all incidents analyzed, involved a firearm.

¹ Approximately 240 law enforcement agencies are expected to report data to DCJ. It is unknown if those agencies that did not report did not have incidents on school grounds, or were unaware of the reporting requirements specified in H.B. 15-1273. The data collection templates include a “No Incidents” option.

² This compares to 92 agencies that responded to the DCJ request for school incident reports corresponding to the 2014-15 school year, 147 agencies corresponding to the 2015-16 school year, 140 agencies corresponding to the 2016-17 school year and 172 agencies corresponding to the 2017-18 school year, the focus of previous reports. In 2014-15, 72 agencies reported incidents in at least one school in their jurisdiction, in 2015-16, 91 agencies reported incidents, in 2016-17, 93 agencies reported incidents, in 2017-18, 113 reported incidents, and in 2018-19, 99 agencies reported incidents.

³ Please see the “Developing the data base” section for information describing why some incidents were excluded from the analysis. Note that law enforcement agencies reported incidents in 525 public schools; there are over 1800 schools statewide.

⁴ The Colorado Department of Education reports the race/ethnicity distribution for all schools at the beginning of academic year 2019-20 as follows: 53% were White, 34% were Hispanic, 5% were Black, and 8% of students fell into “other, Asian/Native Hawaiian/American Indian/Alaska Native.”

Marijuana-related offenses, disorderly conduct and assault were the most frequently occurring offenses. While White students were involved in 53% of incidents overall, Whites were represented in 73% of drug/health public safety violations, and 70% of public order crimes and liquor alcohol violations. Hispanic students, involved in 36% of incidents overall, were more likely to be involved in disorderly conduct (50%), and assault (41%). Black students, involved in 9% of incidents overall, were more likely to be involved in public peace violations (28%).

For information by law enforcement agency, school district, and school, please use the following link to access an interactive data dashboard: <https://ors.colorado.gov/ors-studentcontacts>

Court case outcome. H.B. 15-1273 requires that DCJ obtain the court disposition for the reported incident, when this information is available. Using data from Judicial's ICON data system (which does not include Denver County Court data or municipal court data), court case records were found for 1119 of law enforcement records. Note that cases filed in county or district court are likely to reflect charges that are more serious or multiple prior infractions. About 42% of these cases resulted in a conviction. Charges were dismissed in 38% of cases. Charges were dismissed more frequently for White students (40%), and less frequently for Hispanics and Black students (34% and 35%, respectively).

Sentencing information was available for 442 cases. Of these, 69% received probation/deferred judgment or intensive supervision, whereas 20% of these cases received a fine or a fee. Hispanic and Black students or those in the "other/unknown" race/ethnicity category were more likely to receive probation/deferred judgment compared to White students. Three cases resulted in a sentence to the Division of Youth Services.

District attorney diversion cases. Thirteen district attorney offices reported 453 pre-filing diversion cases involving 149 females, 304 males. Black students represented 4% of the cases, Hispanics represented 32%, and Whites represented 59% of the cases; for the remaining 5% of cases, race/ethnicity was other/unknown. Offense type was found for 229 cases after matching district attorney cases with law enforcement records. Among these cases, disorderly conduct/fighting was the most common offense (17%), followed by assault (13%) and harassing communication (11%).

Background

In 2015, the Colorado General Assembly passed House Bill 1273 (C.R.S. 22-32-146(5) and C.R.S. 20-1-113(4)), mandating that local law enforcement agencies annually report specific information to the Division of Criminal Justice (DCJ) in the Department of Public Safety. Agencies must report every incident that resulted in a student's arrest, summons or ticket during the previous academic year. H.B. 15-1273 mandated DCJ to annually analyze and report the data by law enforcement agency and by school. For information on incidents analyzed by school, school district, and by law enforcement agency, please go to the following website to access an interactive data dashboard:

<https://ors.colorado.gov/ors-studentcontacts>

In addition, H.B. 15-1273 mandated that each district attorney office annually report to DCJ specific information regarding any student who was granted pre-filing juvenile or adult diversion for a ticket, summons, or offense that occurred at a public elementary school, middle or junior high school, or high school; in a school vehicle; or at a school activity or sanctioned event.

DCJ provided data collection instruments to law enforcement agencies and district attorney offices that allowed for the submission of this information for the period between August 1, 2019 and July 31, 2020.

This report is organized as follows: Section One describes the statute including the data requested, and also describes the approach employed to develop the data set; Section Two focuses on the findings from the data provided by law enforcement agencies; Section Three presents information on the final outcome of the incidents according to court records; and, Section Four provides results from district attorney pre-filing diversion cases and a summary of the findings by judicial district.

Section One: Data sources and method

Data sources

Law enforcement data. Based on the statutory mandate, each law enforcement agency employee or contractor who acted in an official capacity on school grounds, in a school vehicle, or at a school activity or sanctioned event at public elementary schools, middle or junior high schools, or high schools, is required to report the following information:

- a) The student's full name;
- b) The student's date of birth;
- c) The student's race, ethnicity, and gender;
- d) The name of the school where the incident occurred or the name of the school that operated the vehicle or held the activity or event;
- e) The date of the arrest or taking of a student into custody;
- f) The date of the issuance of the summons or ticket;
- g) The arrest or incident report number as recorded by the law enforcement agency;
- h) The single most serious offense for which a student was arrested, issued a summons, or issued a ticket using the National Crime Information Center (NCIC) crime code;
- i) The type of weapon involved, if any, for offenses classified as Group A offenses in NIBRS; and
- j) The law enforcement agency's originating reporting identifier.

For the period between August 1, 2019 and July 31, 2020, 142 law enforcement agencies provided information to DCJ. Of these, 48 agencies reported no-incidents and 94 agencies reported at least one school incident.⁵

Approximately 240 law enforcement agencies are expected to report data to DCJ for this project. It is unknown if those agencies that did not report to DCJ did not have incidents on school grounds, or were unaware of the reporting requirements specified in H.B. 15-1273. DCJ provides data collection instruments to law enforcement agencies to capture reports of both incidents and non-incidents.

A note of caution. Given the limitations of law enforcement records management systems, it is likely that agencies reported incidents based on the address of the school. This means information may be missing regarding incidents that occurred elsewhere, such as in a school vehicle or at a school-sanctioned event. It also means that incidents that involved individuals other than students may be included in the data provided to DCJ.

District attorney data. As previously mentioned, H.B. 15-1273 mandated that each district attorney office annually report to DCJ specific information regarding any student who was granted pre-filing

⁵ This compares to 92 agencies that responded to the DCJ request for school incident reports corresponding to the 2014-15 school year, 147 agencies corresponding to the 2015-16 school year, 140 agencies corresponding to the 2016-17 school year, and 172 agencies corresponding to the 2017-18 school year, the focus of previous reports. In 2014-15, 72 agencies reported incidents in at least one school in their jurisdiction, in 2015-16, 91 agencies reported incidents, in 2016-17, 93 agencies reported incidents and, in 2017-18, 113 agencies reported incidents, and in 2018-19, 99 agencies reported incidents.

juvenile diversion for a ticket, summons, or offense that occurred at a public elementary school, middle or junior high school, or high school; in a school vehicle; or at a school activity or sanctioned event.

The following information regarding pre-file juvenile or adult diversion is required:

- a) The student's full name;
- b) The student's date of birth;
- c) The student's race, ethnicity, and gender;
- d) The date of the arrest or taking of a student into custody;
- e) The date of the issuance of the summons or ticket;
- f) The arrest or incident report number as recorded by the law enforcement agency; and
- g) The name of the law enforcement agency that issued the ticket/summons or arrest.

This report covers the period between August 1, 2019 and July 31, 2020. Not all DA offices offer pre-filing diversion. Seventeen of the 22 district attorney offices in Colorado submitted information to the DCJ. Four DA offices reported no diversion cases.

Court data from the Judicial Branch's ICON/ECLIPSE data system. Using Judicial's ICON/ECLIPSE data system, efforts were made to locate the disposition of cases filed in county or district court. Note that Denver County Court is not part of the ICON system, so that information is unavailable. Additionally, there is no central repository for municipal court information so these data are not available for analysis. Court records were located for approximately 23% of incidents.

National Crime Information Center. To obtain the type of offense associated with the incidents provided, the offenses or crimes reported by the law enforcement agencies were matched with crime codes and categories provided by the Federal Bureau of Investigation's National Crime Information Center (NCIC). Not all reported incidents included a crime type, however. When this occurred, the offense type was coded "other."

Colorado Department of Education. H.B. 15-1273 limits the analysis to public schools. An official list of public schools from the Colorado Department of Education (CDE) website was used to identify and match the school name provided by law enforcement agencies with the official school name, and to obtain the school level (e.g., middle school). Some of the school names provided corresponded to a school facility, a school program or a private school not listed by CDE as having a school code. These incidents (a total of 88 incidents) were excluded from the analysis.

Method

Incident date and name. For an incident to qualify for inclusion in the study, the arrest date of the incident had to fall between August 1, 2019 and July 31, 2020. If the arrest date was not provided (and arrest information was unavailable in the court record), or the arrest date was outside the period of study, the incident was not included in the analysis. Incidents that did not include the name of the student (required for matching with court data) were eliminated from the court record analysis but included in the law enforcement contact analyses.

Some agencies reported more than one offense for the same person on the same arrest date, using the same incident number. When this occurred, the most serious offense was selected for analysis.

Contact type. H.B. 15-1273 called for the analysis of school-related incidents that resulted in either an arrest, a summons or a ticket. Because “summons” and “ticket” are used interchangeably, these two categories were combined. When the contact type was blank or unclear, which occurred for 170 reported incidents, 54 incidents were excluded where no court records were found. For the 116 incidents where court records were found, the contact type was changed to “other/unknown”.

Calculation of age. The data collection instrument requested the student’s date of birth (DOB). Using the DOB and the arrest date, the age of the person at the time of the incident was calculated. Incidents for which no DOB was available were excluded from the court records analysis (n=11).

Once the age for each individual was calculated, the following categories were used: Those less than ten years old, 10-11 years old, 12-13 years old, 14-15 years old, 16-17 years old, and 18-19 years old. Incidents with students age 9 or younger (n=1) were excluded to protect the privacy of the individual; students age 20 and older (n=32) were also excluded from the analyses because these are likely incidents not involving students.

Schools. School information was necessary to identify those incidents that occurred on school premises. Incidents for which the school name was not provided, or the name was not on the list of Colorado Department of Education Schools, were eliminated (n=24). Also, to protect the identity of students who may be involved in the incidents reported here, schools with five or fewer incidents were placed in a category titled “Schools with few incidents.” In total, 251 schools (48%) were re-assigned to the category “Schools with few incidents.”

Race/ethnicity. The following categories describe race/ethnicity: White, Hispanic, Black, and Other/unknown. To ensure the privacy of students in this study, further aggregation was done based on race/ethnicity in the following manner: When there was a school with only one incident, the race/ethnicity of the student was changed to “other/unknown.”

Matching records. Name, date of birth, incident/arrest number, arrest date and most serious offense from the law enforcement agency data were used to match incidents with court records in Judicial’s ICON/ECLIPSE data system. A similar matching process was undertaken to obtain offense type for the district attorney diversion cases. Note that ICON/ECLIPSE does not contain municipal court records or Denver County Court data, so this information was not available for analysis.

Summary

One hundred forty-two (142) law enforcement agencies responded to the DCJ request for school incident reports corresponding to the 2019-20 academic year. Out of those that responded, 94 law enforcement agencies reported incidents in at least one school in their jurisdiction. Forty-eight (48) law enforcement agencies reported no-incidents in their jurisdiction.

Approximately 240 law enforcement agencies are expected to report data to DCJ for this study. It is unknown if those agencies that did not report to DCJ did not have incidents on school grounds, or were unaware of the reporting requirements specified in H.B. 15-1273.

Given the limitations of law enforcement records management systems, it is likely that law enforcement agencies reported incidents based on the address of the school. This means information may be missing regarding incidents that occurred elsewhere (school vehicle or school-sanctioned event). It also means that incidents that involved individuals other than students may be included in the data provided to DCJ.

A total of 4897 incidents in 525 public schools were included in the analyses presented here. Court records were found for 1119 incidents, representing 23% of the 4897 incidents analyzed. Since these

cases were filed in district or county court,⁶ it is likely that these 1119 incidents represent more serious offenses, or individuals with prior incidents. Seventeen of the 22 district attorney offices in Colorado submitted information to DCJ. Four DA offices reported no diversion cases. The diversion analysis was performed on data from 13 offices.

⁶ Denver County Court data and municipal court data were not available for analysis. Denver County Court is not part of the statewide Judicial ICON data system. There is no centralized repository for municipal court data.

Section Two: Analysis of law enforcement contacts

Ninety-four (94) law enforcement agencies reported 4897 qualifying incidents in 525 public schools during the 2019-20 academic year, from August 1, 2019 through July 31, 2020.

This section provides an analysis of law enforcement reports of incidents. For information on incidents analyzed by school and by law enforcement agency, please go to the following website to access an interactive data dashboard: <https://ors.colorado.gov/ors-studentcontacts>

Description of incidents

Table 2.1 shows that 88% of incidents resulted in a summons/ticket and 9% resulted in arrest. For approximately 2% of incidents, contact type was other/unknown. In terms of race/ethnicity (Table 2.2), 53% of students were White, 36% were Hispanic, 9% were Black, and for 2% of students the race was either “other or unknown.”

Table 2.1: Contact type

Contact Type	N	%
Summons	4,321	88%
Arrest	460	9%
Other/unknown	116	2%
Total	4,897	100%

Table 2.2: Student race/ethnicity

Race/Ethnicity	N	%
White	2,588	53%
Hispanic	1,774	36%
Black	427	9%
Other/unknown	108	2%
Total	4,897	100%

Sixty-six percent (66%) of incidents reported by law enforcement agencies involved male students and 34% involved female students (data not presented). Table 2.3 below shows the age of the students involved in the incidents. Fourteen and 15-year-olds were more likely than those in the other age categories to be involved in the incidents reported here. Five percent (5%) of cases fell into the 10-11 age category and 3% fell into the 18-19 age category. Table 2.4 shows that 5% of the incidents occurred in elementary schools, 28% occurred in middle schools, and 67% occurred in high schools.

Table 2.3: Student age category

Age	N	%
10-11	233	5%
12-13	1,147	23%
14-15	2,002	41%
16-17	1,361	28%
18-19	144	3%
Unknown	10	<1%
Total	4,897	100%

Table 2.4: School level

School Level	N	%
High	3,301	67%
Middle	1,359	28%
Elementary	237	5%
Total	4,897	100%

Table 2.5 shows the type of offenses involved in the incidents described here. The most frequently occurring offense involved marijuana. That is, 21% of the incidents reported by law enforcement agencies were marijuana-related. Disorderly conduct, at 17%, and assault, at 12% of offenses when combined with marijuana, represent about half of all incidents as shown in the percent column in Table 2.5.

Table 2.5: Offense type

Offense	N	%
Marijuana	1,034	21%
Disorderly Conduct/Fighting	826	17%
Assault	570	12%
Dangerous Drugs	339	7%
Liquor/Alcohol	292	6%
Tobacco	278	6%
Harassing communication	230	5%

Interference with Educ. Institution	30	1%
Burglary	20	<1%
Arson	17	<1%
Family/Child Offense	14	<1%
Robbery	12	<1%
Kidnapping	5	<1%
Extortion	2	<1%
Fraud/Forgery	2	<1%
Missing/Unclear	2	<1%
Morals-Decency Crimes	2	<1%
Attempted murder	1	<1%
DUI-D	1	<1%
Homicide	1	<1%
Incite Destruction of Life or Property	1	<1%
Vehicle Theft	1	<1%
Vehicular homicide	1	<1%
Total	4,897	100%

Marijuana offenses, disorderly conduct and assault were the top three offenses across high, middle and elementary school. Table 2.6 shows offense type by school level for 90% of the most frequently occurring crimes and collapses the least frequent (and remaining) 10% into the last row. Marijuana offenses were the most frequently reported offense in high schools (24%). Disorderly conduct/fighting (20%) and assault (15%) were the most common offense types in middle schools as was assault in elementary schools (20%).

Table 2.6: Offense type by school level

Offense	High	Middle	Elementary	Total
(N)	3,301	1,359	237	4,897
Marijuana	24%	14%	15%	21%
Disorderly Conduct/Fighting	16%	20%	13%	17%
Assault	10%	15%	20%	12%
Dangerous Drugs	8%	5%	5%	7%
Liquor/Alcohol	7%	5%	<1%	6%
Tobacco	5%	8%	1%	6%
Harassing communication	3%	8%	8%	5%
Public Order Crimes	5%	2%	3%	4%
Larceny/Theft	3%	5%	2%	4%
Trespassing	3%	2%	13%	3%
Public Peace	2%	3%	3%	2%
Criminal Mischief	2%	2%	1%	1%
Damage Property	1%	2%	<1%	1%
Traffic Offense	2%	<1%	0%	1%
Remaining 10%	9%	9%	16%	10%
Total	100%	100%	100%	100%

Given the frequency of assault and disturbing the peace incidents, it is not surprising that law enforcement agencies reported that 15% (n=739) of total incidents involved a weapon. However, Table 2.7 shows that personal weapons, such as a fist, were the most common weapons reported in 79% of incidents involving weapons. A firearm was present in 3% of incidents involving a weapon (n=22).

Table 2.7: Weapon type

Weapon	N	%
Personal Weapons	582	79%
Other	67	9%
Knife/Cutting Instrument	54	7%
Handgun	17	2%
Blunt Object	8	1%
Any Firearm	5	1%
Fire/Incendiary Device/Explosives	5	1%
Motor Vehicle	1	<1%
Total	739	100%

Summary. Ninety-four (94) law enforcement agencies reported 4897 qualifying incidents in 525 public schools during the 2019-20 academic year. The majority of incidents (88%) resulted in law enforcement officers issuing a ticket/summons, 9% resulted in an arrest, and for less than 2% of the incidents the information was missing. More than (53%) of the students involved in the incidents reported by law enforcement agencies were White, 36% were Hispanic, 9% were Black, and for 2% of incidents the students' race/ethnicity was coded "other/unknown." Marijuana-related incidents, disorderly conduct and assault were the most frequently occurring offenses. Law enforcement reported that weapons were present in 15% of incidents; of these, 79% were personal weapons such as a fist. A firearm was present in 3% of incidents involving a weapon (n=22).

Description of incidents by contact type (summons/ticket or arrest)

Table 2.8 shows that female students were slightly more likely to receive a summons/ticket than were males, at 91% and 87% respectively and, conversely, males were more likely to get arrested (10% for males compared to 8% for females). As shown in Table 2.9, those younger than age 18 were somewhat more likely to receive a summons compared to those age 18 and 19. Based on school level (Table 2.10), the incident resulted in arrest for 11% of elementary school students, 8% of middle school students, and 10% of the high school students.

Table 2.8: Student gender by contact type

Gender	N	Summons	Arrest	Other/ Unknown	Total
Male	3,252	87%	10%	3%	100%
Female	1,645	91%	8%	2%	100%
Total	4,897	88%	9%	2%	100%

Table 2.9: Age category by contact type

Age	N	Summons	Arrest	Other/ Unknown	Total
10-11	233	91%	9%	<1%	100%
12-13	1,147	89%	9%	2%	100%
14-15	2,002	89%	9%	2%	100%
16-17	1,361	86%	10%	4%	100%
18-19	144	83%	15%	2%	100%
Unknown	10	90%	10%	0%	100%

In terms of race/ethnicity and contact type, Hispanic students were more likely to receive a summons (90%) compared to White and Black students (88% and 84% respectively). Black students were more likely to be arrested (14%) than the overall rate of 9% (Table 2.11).

Table 2.11: Student race/ethnicity by contact type

Race/Ethnicity	N	Summons	Arrest	Other/Unknown	Total
White	2,588	88%	9%	4%	100%
Hispanic	1,774	90%	9%	1%	100%
Black	427	84%	14%	2%	100%
Other/unknown	108	89%	9%	2%	100%
Total	4,897	88%	9%	2%	100%

Table 2.12 shows the types of offenses that are more likely to result in an arrest. Assault incidents were considerably more likely to be linked to an arrest (22%); this was also the case with dangerous drug violations and harassing communication (17% and 13% respectively). Regarding the top three offenses, marijuana offenses or disorderly conduct resulted in an arrest 3%, while assault resulted in an arrest in 22% of incidents. The crimes combined in the “remaining 10%” also had a high rate of arrests: 29% compared to 9% overall. This is not surprising since many of the “remaining 10%” of crimes were serious, infrequent events.

Table 2.12: Offense type by contact type

Offense	N	Summons	Arrest	Other/Unknown	Total

Total	4,874	88%	9%	2%	100%

Fifteen percent (15%) of incidents involved weapons, according to law enforcement reports. However, 79% of these incidents included personal weapons (such as a leg or fist). As shown in Table 2.13, the incidents involving unknown weapons or personal weapons were less likely to result in an arrest. About 44% of incidents that involved a knife/cutting instrument resulted in an arrest; 68% of incidents

involving a firearm resulted in an arrest; and 60% of incidents that involved fire/incendiary devices/explosives resulted in an arrest.

Table 2.13: Weapon by contact type (n=739)

Weapon	N	Summons	Arrest	Unknown	Total
Personal Weapons	582	84%	16%	<1%	100%
Other	67	85%	15%	0%	100%
Knife/Cutting Instrument	54	43%	44%	13%	100%
Handgun	17	18%	82%	0%	100%
Blunt Object	8	88%	13%	0%	100%

Motor Vehicle	1	0%	100%	0%	100%
Total	739	79%	20%	1%	100%

Summary. Males were slightly more likely to be arrested than females, and those incidents that involved a serious weapon such as any firearm were more likely to result in an arrest. Twenty-two percent of assaults resulted in an arrest, but only 3% of marijuana-related incidents resulted in an arrest.

Description of incidents by race/ethnicity

Table 2.14 shows gender by race/ethnicity for those involved in the 4897 incidents. Table 2.15 displays the distribution of age within each racial/ethnic group and Table 2.16 reflects the race/ethnicity distribution within each age category.

Table 2.15 shows age category by race/ethnicity. Table 2.15 shows that the students in the Other/unknown race/ethnicity category were more likely to fall into the 14-15 age category (47%) than the overall (41%) age distribution. Hispanics were more likely (27%) to fall into the 12-13 age category than the overall (23%) age distribution. Whites were more likely (31%) to fall into the 16-17 age category than the overall (28%) age distribution.

Table 2.16 shows race/ethnicity by age category. While White students were involved in 53% of incidents overall, 59% of students in the 16-17 age categories were White. While Hispanic students were involved in 36% of incidents overall, approximately 41% of students in the 12-13 age categories were Hispanics. While Black students were involved in 9% of incidents overall, 14% of students in the 10-11 age category were Black.

Table 2.16: Student age category by race/ethnicity

Age	N	White	Hispanic	Black	Other / Unknown	Total

Table 2.17 shows school level by race/ethnicity. Black and Hispanic students were more likely to be involved in middle school incidents compared to the overall race/ethnicity distribution. Not surprisingly, the majority of incidents occurred in high school (67%).

Table 2.17: School level by race/ethnicity of students

School Level	White	Hispanic	Black	Other / Unknown	Total
N	2,588	1,774	427	108	4,897
High	70%	64%	65%	68%	67%

Table 2.18 depicts the race/ethnicity of students by offense. Of the marijuana offenses, 54% of those charged were White, 38% were Hispanic and 6% were Black. Hispanic students, involved in 36% of incidents overall, were charged with half of the disorderly conduct offenses and 41% of assaults. Black students, involved in 9% of incidents overall, were charged in 28% of public peace offenses, 18% of assaults and 11% of disorderly conduct offenses.

Table 2.19 shows the offense type by the race/ethnicity of students. White and Hispanic students were most frequently involved in marijuana-related offenses (22% for both) and disorderly conduct/fighting (12% and 23%, respectively). Black students were most frequently involved in disorderly conduct/fighting (21%) and assault (23%). Note that those charged with assault were more likely to be arrested rather than issued a ticket (see Table 2.12 above).

Table 2.20 shows incidents involving a weapon by race/ethnicity of students. Note that weapons were involved in 15% (n=739) of incidents, however, as previously discussed, this figure includes 582 instances when the weapon was a leg or fist (personal weapon). Eighty-three percent (83%) of Black students and 82% of Hispanics were involved with personal weapons compared to 79% overall.

Table 2.20: Weapon type by race/ethnicity (n= 739)

Overall Summary. Most incidents (67%) occurred in high schools, and only 9% of incidents resulted in an arrest versus a summons/ticket. However, 22% of assault incidents resulted in an arrest. White students were involved in 53% of incidents overall, and were most likely to be charged with marijuana-related offenses (22%) and disorderly conduct/fighting (12%). Likewise, Hispanic students, involved in 36% of incidents overall, were most likely to be charged with disorderly conduct/fighting (23%) and marijuana-related offenses (22%). Black students, involved in 9% of incidents overall, were most likely to be charged with assault (23%) and disorderly conduct/fighting (21%).

Description of incidents by judicial district

This section presents results by judicial district. No incidents were reported by law enforcement agencies in the 16th judicial district.

Table 2.21 shows the judicial district in which the incidents occurred. Approximately 85% of the incidents reported by law enforcement agencies occurred in the 1st, 2nd, 4th, 8th, 17th, 18th, 19th and 20th judicial districts. The 1st and the 17th Judicial Districts accounted for 17% and 16% of the incidents, respectively.

Table 2.22 provides information about whether the incident involved a summons/ticket or an arrest, by judicial district. Incidents in certain judicial districts, such as the 1st, 2nd, 3rd, 5th, 12th, 18th, 19th and 22nd had higher arrest rates compared to the overall arrest rate for all districts (9%); however, the number of incidents in some of these districts is small. As discussed previously, arrests were more likely to occur when more serious offenses were involved.

Table 2.21: Judicial district by number of incidents

Judicial District	N	%

Table 2.24 shows the weapon type by judicial district for the 739 incidents that involved a weapon. It is important to reiterate that the majority (79%) of weapons reported were “personal,” such as a fist. No incidents involving weapons were reported in the 3rd, 11th, 13th, 14th, 15th and 16th judicial districts.

Table 2.24: Judicial district by weapon type (n= 739)

Total	739	1%	1%	1%	2%	7%	<1%	9%	79%	100%

Note: No incidents involving weapons were reported for the 3rd, 11th, 13th, 14th, 15 and 16th judicial districts.

Summary. Approximately 85% of the incidents reported by law enforcement agencies occurred in the 1st, 2nd, 4th, 8th, 17th, 18th, 19th and 20th judicial districts. Incidents in certain judicial districts had higher arrest rates compared to the overall arrest rate for all districts (9%); however, the number of incidents in some of these locations is small. As discussed previously, arrests were more likely to occur when more serious offenses were involved.

Section Three: Analysis of court records

District and county court records were matched with incidents using Judicial's ICON/Eclipse data system by using student name, date of birth, the arrest/incident number, and arrest date. Of the 4897 incidents analyzed, court records were found for 1119 incidents, or approximately 23% of incidents. However, Denver County Court and all municipal court records are not contained in ICON/Eclipse, so this information is not available for analysis. The majority of lower level offenses are most likely referred to municipal courts but there is no central repository for municipal court data in Colorado. Since the 1119 cases were filed in district or county court, it is likely that these incidents represent more serious offenses, or individuals with prior incidents.

Table 3.1 shows that 41% of incidents that resulted in an identified court filing were convicted and 38% were dismissed/not guilty. Nineteen percent (19%) of the cases found in the ICON/Eclipse data system had not yet been resolved by November 2020 when the case matching analysis occurred.

Table 3.2 shows the case outcome by type of offense. The number of cases in each category is shown rather than percentages, because many of the small numbers would round to 0% and thus provide limited information.

Table 3.1: Case outcome (n= 1,119)

Case outcome	N	%
Convicted	464	41%
Charges Dismissed/Not Guilty	421	38%
No Finding - Case not yet resolved	208	19%
Case closed	26	2%
Total	1,119	100%

Note: Case outcome information was obtained using Judicial's ICON/Eclipse data system that holds district and county (excluding Denver County) court data.

Table 3.2: Offense type by case outcome (frequency) (n=1,119)

Total	1,119	464	421	208	26

Note: Case outcome information was obtained using Judicial's ICON/Eclipse data system that holds district and county (excluding Denver County) court data.

Table 3.3 displays the contact type by court case outcome. Whereas the overall arrest rate for all incidents was 9%, among those cases that were identified with district or county court filing records and found to be convicted, 25% were arrested. For the 421 cases that were eventually dismissed, only about 15% had been arrested.

Table 3.3: Case outcome by contact type (n=1,119)

Case Outcome	N	Summons	Arrest	Other/ Unknown	Total
Convicted	464	58%	25%	18%	100%
Charges Dismissed/Not Guilty	421	81%	15%	4%	100%
No Finding - Case not yet resolved	208	70%	21%	9%	100%
Case closed-No prosecution	26	38%	62%	0%	100%
Total	1,119	68%	21%	10%	100%

Note: Case outcome information was obtained using Judicial's ICON/Eclipse data system that holds district and county (excluding Denver County) court data.

Table 3.4 displays the court case outcome by student race/ethnicity for those incidents that were identified with district or county court records. Convictions occurred less frequently for Black students (30%) compared to the other race/ethnicity groups, however, 31% of the cases where the student was Black were not yet resolved at the time of this analysis. Compared to Whites (40%), charges were dismissed less frequently for students in other/unknown race/ethnicity category (33%), Hispanics (34%), and Blacks (35%) but, as mentioned previously, over one-third of the cases of Black students were not yet resolved.

Table 3.4: Case outcome by race/ethnicity of students (n=1,119)

Case Outcome	White	Hispanic	Black	Other/ Unknown	Total
(N)	726	256	116	21	1,119
Convicted	42%	43%	30%	57%	41%
Case closed-No prosecution	2%	3%	3%	0%	2%
Dismissed/Not Guilty	40%	34%	35%	33%	38%
No Finding - Case not yet resolved	16%	21%	31%	10%	19%
Total	100%	100%	100%	100%	100%

Note: Case outcome information was obtained using Judicial's ICON/Eclipse data system that holds district and county (excluding Denver County) court data.

Of the 464 cases that were convicted, 442 cases had a sentence recorded at the time the data were obtained for analysis. Table 3.5 shows that 69% of the 442 incidents received a sentence to probation/deferred judgment/intensive supervision. Just over twenty percent (21%) received a fine or a fee as the most serious sentence. Three youth were sentenced to the Division of Youth Services.

Table 3.5: Case sentence (n=442)

Sentence	N	%
Probation/Deferred	303	69%
Fines/fees	92	21%
Unsupervised Probation/Deferred	40	9%
Division of Youth Services	3	1%
Community Service	2	<1%
Intensive Supervision	2	<1%
Total	442	100%

Note: Case outcome information was obtained using Judicial's ICON/Eclipse data system that holds district and county (excluding Denver County) court data.

Table 3.6 shows the sentence by type of offense. The number of cases in each category is shown rather than percentages because many of the small numbers would round to 0% and thus provide limited information.

According to the data presented in Table 3.6, the more frequent offenses (e.g., marijuana, assault, dangerous drugs) were more likely to result in a probation/deferred judgment sentence while incidents involving alcohol or traffic were more likely to receive a fine/fee.

Table 3.6: Offense type by sentence (n=442)

Offense \ Sentence	Probation/Deferred Judgment/Int. Supv.	Fines, Fees	Unsupvd Probation/Deferred	Comm. Service	Division Youth Services	Total
Marijuana	59	38	6	2	0	105
Assault	72	4	5	0	1	82

Total	305	92	40	2	3	442

Note: Case outcome information was obtained using Judicial's ICON/Eclipse data system that holds district and county (excluding Denver County) court data.

Table 3.7 displays the original contact type by sentence. Whereas the overall arrest rate for all incidents was 9%, among those cases that were identified with district or county court filing records and had a sentence, 25% were arrested rather than ticketed. For cases sentenced to probation/deferred judgment/intensive supervision, the arrest rate was 34%. For the three cases sentenced to the Division of Youth Services, all three cases arrested.

Table 3.7: Case sentence by contact type (n=442)

Sentence	N	Arrest	Summons	Other/ Unknown	Total
Probation/Deferred/Intensive Supervision	303	34%	40%	26%	100%
Fines/fees	92	1%	99%	0%	100%
Unsupervised Probation/Deferred	40	3%	98%	0%	100%
Division of Youth Services	3	100%	0%	0%	100%
Community Service	2	0%	100%	0%	100%

Total	442	25%	57%	18%	100%

Note: Case outcome information was obtained using Judicial's ICON/Eclipse data system that holds district and county (excluding Denver County) court data.

Table 3.8 displays the court sentence by student race/ethnicity for those cases that were identified with district or county court records. Most cases (69%) received a sentence of probation supervision. Probation/deferred judgment/intensive supervision sentences occurred more frequently for those few cases when race/ethnicity was other/unknown (80%) and for Hispanic students (75%).

Table 3.8: Case sentence by race/ethnicity of student (n=442)

Sentence	White	Hispanic	Black	Other/ Unknown	Total
(N)	298	104	30	10	442
Probation/Deferred/Intensive Supervision	66%	75%	70%	80%	69%
Fines/fees	22%	17%	20%	20%	21%
Unsupervised Probation/Deferred	11%	5%	10%	0%	9%
Division of Youth Services	1%	1%	0%	0%	1%
Community Service	1%	0%	0%	0%	<1%
Intensive Supervision	0%	2%	0%	0%	<1%
Total	100%	100%	100%	100%	100%

Note: Case outcome information was obtained using Judicial's ICON/Eclipse data system that holds district and county (excluding Denver County) court data.

Summary. Court case information was found for a subset of 1119 incidents (23% of the total number of incidents analyzed) that were filed in county (excluding Denver) or district court. Of these 1119 cases, 442 had a sentence recorded in Judicial's data system.

Most often, cases were dismissed/not guilty (38%) or convicted (41%). For 19% of cases there was not yet a finding posted in the judicial data at the time the data were analyzed in November 2020. Although the overall arrest rate for student incidences was 9%, those instances that that resulted in a sentence had an arrest rate of 25%. This suggests that the incidents that resulted in a court sentence were more serious offenses overall.

Of the 442 sentenced cases, 69% received probation/deferred judgment/intensive supervision. Just over twenty percent of the cases (21%) received a fine/fee. Among those sentenced to probation/deferred judgment, 40% had been originally summonsed/ticketed rather than arrested (34%).

Section Four: Analysis of diversion cases provided by district attorney offices

Background. House Bill 15-1273 requires district attorney (DA) offices to annually report to the Division of Criminal Justice (DCJ) specific information about any student who was granted pre-filing juvenile or adult diversion for a ticket, summons or offense that occurred at a public school, in a school vehicle, or at a school sanctioned event. The data required include the student’s full name, date of birth (DOB), race/ethnicity, gender, and the arrest or incident number. DCJ provided a data collection instrument for DA officials to use that would allow for the submission of this information.

Diversion programs give juveniles the opportunity to avoid a criminal conviction. Pre-filing diversion programs means that no charges are filed in court. If the individual successfully completes the program, there will be no record of the offense in the court system. Not all DA offices operate a juvenile diversion program. For those that do, agency officials decide which cases are appropriate for diversion.

DA offices provided data to DCJ regarding cases that were diverted during the 2019-20 academic year. Researchers matched these cases to the incident data submitted by law enforcement agencies for the same period to find the original offense type.

Matches between data sets used name, date of birth (DOB), and a combination of incident number, arrest number or arrest date. Matches were not found for all cases. This could be due to differences in the spelling of names or differences in recorded DOBs. The lack of match may also be due to differences in the interpretation of what constituted a school-based incident or the inability to identify a school-based incident with precision.

Description of diversion cases

Seventeen of the 22 DA offices in Colorado submitted information to DCJ. Four DA offices indicated no pre-file diversion cases. Thirteen offices reported 453 diversion cases. The offices with the most diversion cases reported were from the 8th and 1st Judicial Districts, with 129 and 108 cases, respectively.

Among diversion cases, 4% were Black, 32% were Hispanics and 59% were White; for the remaining 5% of students the race/ethnicity was “other/unknown” (Table 4.1). There was considerable variation in the distribution of race/ethnicity across the DA diversion programs.

Table 4.1: Judicial district pre-file diversion cases by student race/ethnicity (n=453)

Judicial District	N	White	Hispanic	Black	Other/Unknown	Total
1	108	80%	6%	3%	11%	100%
5	37	38%	62%	0%	0%	100%
6	4	25%	75%	0%	0%	100%
8	129	58%	35%	7%	0%	100%
10	11	64%	18%	0%	18%	100%
12	6	67%	33%	0%	0%	100%
14	10	60%	30%	10%	0%	100%
15	10	60%	30%	10%	0%	100%
17	19	63%	32%	5%	0%	100%
19	31	26%	68%	6%	0%	100%
20	62	45%	50%	3%	2%	100%
21	26	73%	4%	0%	23%	100%
Total	453	59%	32%	4%	5%	100%

Table 4.2 shows the ages of the students who participated in diversion programs. Less than one percent (n=1) were under 10 years old and 7% were in the 10-11 year old category. Well over half (62%) were between the ages of 14 and 17.

Table 4.2: Judicial district pre-file diversion cases by student age category (n=453)

Judicial District	N	<10	10-11	12-13	14-15	16-17	Unknown	Total
1	108	1%	4%	31%	49%	15%	0%	100%

Total	453	<1%	7%	30%	40%	22%	<1%	100%

Overall, 67% of diversion cases were male and 33% were female, although this varied considerably by judicial district (Table 4.3).

Table 4.3: Judicial district pre-file diversion cases by gender of student (n=453)

Judicial District	N	Female	Male	Total
1	108	35%	65%	100%
5	37	30%	70%	100%
6	4	0%	100%	100%
8	129	42%	58%	100%
10	11	27%	73%	100%
12	6	17%	83%	100%
14	10	10%	90%	100%
15	10	10%	90%	100%
17	19	47%	53%	100%
19	31	29%	71%	100%
20	62	26%	74%	100%
21	26	23%	77%	100%
Total	453	33%	67%	100%

Offense type (Table 4.4), obtained by matching the case with the submitted law enforcement agency record, was found for 219 cases, about 48% of diversion cases reported. Among these 219 cases, disorderly conduct/fighting was the most common charge (17%), followed by assault (13%). Information by judicial district regarding the crime type associated with diversion cases (when the information was available) may be found in Appendix A.

Table 4.4: Pre-file diversion offense type (n=219)

Offense	N	%
Disorderly Conduct/Fighting	38	17%
Assault	28	13%
Harassing communication	25	11%
Marijuana	23	11%
Sexual Assault/Offense	22	10%
Larceny/Theft	19	9%

Weapon Offense	2	1%
Burglary	1	<1%
Criminal Mischief	1	<1%
Total	219	100%

Summary. Seventeen of 22 district attorney offices submitted information to DCJ for the 2019-20 academic year. Thirteen offices reported 453 pre-file diversion cases of which 33% were females and 67% were males. Black students represented 4% of the group, while 32% were Hispanic and 59% were White. For the remaining 5%, race/ethnicity was “other/unknown.” Offense type was found for 219 cases that were granted diversion. Among these cases, disorderly conduct/fighting was the most common charge followed by assault and harassing communication.

Appendix D

Colorado Judicial Districts and School Populations

2019-20 Academic Year

Colorado is divided into 22 judicial districts, each of which is comprised of between 1 and 7 counties. These 22 judicial districts and their respective counties are listed in Table D.1.

Table D.1: Judicial districts and constituting counties

Judicial District	Counties (in alphabetical order)	Number of Counties
1	Gilpin, Jefferson	2
2	Denver	1
3	Huerfano, Las Animas	2
4	El Paso, Teller	2
5	Clear Creek, Eagle, Lake, Summit	4
6	Archuleta, La Plata, San Juan	3
7	Delta, Gunnison, Hinsdale, Montrose, Ouray, San Miguel	6
8	Jackson, Larimer	2
9	Garfield, Pitkin, Rio Blanco	3
10	Pueblo	1
11	Chaffee, Custer, Fremont, Park	4
12	Alamosa, Conejos, Costilla, Mineral, Rio Grande, Saguache	6
13	Kit Carson, Logan, Morgan, Phillips, Sedgwick, Washington, Yuma	7
14	Grand, Moffat, Routt	3
15	Baca, Cheyenne, Kiowa, Prowers	4
16	Bent, Crowley, Otero	3
17	Adams, Broomfield	2
18	Arapahoe, Douglas, Elbert, Lincoln	4
19	Weld	1
20	Boulder	1
21	Mesa	1
22	Dolores, Montezuma	2

Table D.2: Race/ethnicity of student populations for schools with incidents by judicial district for the 2019-2020 Academic Year

JD	Total	White	Hispanic	African American/ Black	Other
1	46,533	63%	28%	1%	8%
2	38,837	22%	56%	13%	8%

Appendix E

Crimes of Diversion Cases by Judicial District 2019-20 Academic Year

Information by DA office. The following Tables E.1 - E.9 list the offense type for pre-file diversion cases reported by District Attorney (DA) offices. Note that DA offices do not provide offense information. Rather, this was obtained by matching the DA cases with the reports provided by law enforcement. This series of tables provides the frequency of offense types for the cases for which a match was found between the DA record and a law enforcement record. A review of the following tables reflects considerable variation in information available by crime type across the judicial districts.

Table E.1: Offense type for cases reported by the DA office of the 1st Judicial District

Offenses	N	%
Sexual Assault/Offense	18	29%
Disorderly Conduct/Fighting	15	24%
Larceny/Theft	13	21%
Harassing communication	8	13%
Assault	3	5%
Dangerous Drugs	2	3%
Public Peace	1	2%
Tobacco	1	2%
Traffic Offense	1	2%
Total	62	100%

Table E.2: Offense type for cases reported by the DA office of the 5th Judicial District

Offenses	N	%
Assault	1	100%
Total	1	100%

Table E.3: Offense type for cases reported by the DA office of the 6th Judicial District

Offenses	N	%
Traffic Offense	1	100%
Total	1	100%

Table E.4: Offense type for cases reported by the DA office of the 8th Judicial District

Offenses	N	%
Marijuana	16	17%
Harassing communication	14	15%
Assault	12	13%
Disorderly Conduct/Fighting	12	13%
Liquor/Alcohol	12	13%
Dangerous Drugs	6	7%
Larceny/Theft	5	5%
Sexual Assault/Offense	4	4%
Interference with Educ Inst	3	3%
Other	2	2%
Tobacco	2	2%
Burglary	1	1%
Criminal Mischief	1	1%
Damage Property	1	1%
Trespassing	1	1%
Total	92	100%

Table E.5: Offense type for cases reported by the DA office of the 12th Judicial District

Offenses	N	%
Assault	1	33%
Harassing Communication	1	33%
Weapon Offense	1	33%
Total	3	100%

Table E.6: Offense type for cases reported by the DA office of the 14th Judicial District

Offenses	N	%
Kidnapping	1	100%
Total	1	100%

Table E.7: Offense type for cases reported by the DA office of the 17th Judicial District

Offenses	N	%
Other	2	32%
Assault	1	17%
Dangerous Drugs	1	17%
Harassing communication	1	17%
Marijuana	1	17%
Total	6	100%

Table E.8: Offense type for cases reported by the DA office of the 19th Judicial District

Offenses	N	%
Assault	5	50%
Arson	1	10%
Disorderly Conduct/Fighting	1	10%
Extortion	1	10%
Obstruct	1	10%
Weapon Offense	1	10%
Total	10	100%

Table E.9: Offense type for cases reported by the DA office of the 20th Judicial District

Offenses	N	%
Disorderly Conduct/Fighting	10	23%
Marijuana	7	16%
Assault	6	14%
Arson	4	9%
Obstruct	4	9%
Damage Property	3	6%
Dangerous Drugs	2	5%
Harassing communication	2	5%
Trespassing	2	5%
Criminal mischief	1	2%
Other	1	2%
Public Peace	1	2%
Weapon Offense	1	2%
Total	44	100%

Table E.10: Offense type for cases reported by the DA office of the 21st Judicial District

Offenses	N	%
Damage Property	3	33%
Assault	2	22%
Dangerous Drugs	2	22%
Kidnapping	1	11%
Larceny/Theft	1	11%
Total	9	100%
