

Annual Report

Conservation Easement Tax Credit Certificates

Calendar Year 2023

Effective as of January 10, 2024

COLORADO

**Department of
Regulatory Agencies**

Division of Conservation

Introduction

The Colorado Division of Conservation protects the public by preventing fraudulent conservation easement donations from receiving the state income tax credit for conservation easements. The Division ensures the soundness of state income tax credits issued for donated conservation easements:

- by determining the credibility of appraisals,
- by assuring that deeds of conservation easement protect conservation purposes in perpetuity, and
- by certifying non-profit and government organizations to hold conservation easements for which the landowner will seek a tax credit.

History

Between 2000 and 2008, Colorado's conservation easement income tax credit program was administered by the Department of Revenue (DOR). Between 2009 and 2013, parts of the program's administration were moved to the Division of Real Estate (DRE) within the Department of Regulatory Agencies (DORA). From January 1, 2014 through May 29, 2018, the program was administered entirely within the DRE, although the DOR continued its pre-2014 examination and enforcement activities.

On May 29, 2018, House Bill 18-1291 was signed into law. It created the Division of Conservation (Division) within DORA, and moved administration of the tax credit, certification of conservation easement holders, and the Conservation Easement Oversight Commission (Commission) out of the DRE into the new Division. This was done to keep a firewall between the disciplinary activity in the DRE and the professional evaluation activity in the Division. It also allowed landowners to exercise their private property rights while protecting taxpayers from the fraud and abuse that existed in the tax credit program prior to 2009.

This annual report, in accordance with section 12-15-106(13)(a), C.R.S., includes aggregate information about conservation easement tax credit applications received and approved between January 1, 2023 and December 31, 2023.

Program Process

The Commission and the Division Director approve or deny applications for the state income tax credit for conservation easements. The Commission has the authority and responsibility to determine whether the conservation easement donation associated with the application is a "qualified conservation contribution" under section 170(h) of the Internal Revenue Code and any federal regulations promulgated in connection with this section. The Director determines whether the donation is supported with a credible appraisal prepared by a qualified appraiser. Applications that meet both requirements are approved, and tax credit certificates are issued to the applicant.

Division staff assists the Commission and the Director by reviewing each application for compliance with relevant state statute, federal law, and associated rules and regulations. Specifically, the Division staff examine the appraisal, the conservation easement deed, and other due diligence associated with the donation. The examinations are structured according to objective compliance checklists.

The Division also administers the tax credit cap, an annual aggregate limit on the total dollar amount of conservation easement tax credits available for a given year. For calendar year 2014 and thereafter, the statutory tax credit cap is \$45 million.

In general, the amount of the income tax credit a taxpayer (landowner) can use is limited to the landowner's net tax liability. If the amount of conservation easement tax credit exceeds the landowner's state income tax liability, the excess credit may be carried forward for up to 20 years after the first year it was eligible to be claimed. This means that the Division may continue to receive tax credit applications for conservation easements recorded in prior years, so long as the cap for that prior year has not been met. For example, in 2020, the Division received applications for easements contributed to certified holders in years dating back to 2015.

Conservation easement tax credit certificates also may be transferred, in full or in part, to other Colorado income tax payers and, in TABOR surplus years, the state must issue refunds to tax credit certificate holders.

Pursuant to sections 12-15-106(7)(a) and (10), the Division must complete its review of all tax credit applications within 120 days, either by issuing the tax credit or sending the landowner a notice identifying potential deficiencies with the application (a Request for Additional Information, or RFAI¹).

¹ Since the program began in 2014, this statutory notice has had different names. Irrespective, it offers the landowner 60 days, not counting extensions, to provide the Division with more information about the application. Often, this information consists of a new appraisal. Less often, it consists of a correction to the deed of conservation easement. This process allows the landowner sufficient time to clarify or correct the tax credit application.

Report contents

Section 12-15-106(13)(c), C.R.S., requires the annual report contain the following aggregate information:

- Total number of tax credit applications received, approved and denied, along with average processing times;
- For approved applications:
 - Total acreage under easement summarized by allowable conservation purpose;
 - Total appraised value of the easements;
 - Total donated value of the easements;
 - Total dollar amount of tax credits issued;

As provided for in statute, the annual report also may include additional easement-specific information that would otherwise be publicly available. Accordingly, this report shows, by county, the number of acres protected by easements associated with applications approved in 2023.

HB 18-1291 authorized the Director, after consultation with the Commission, “to share publicly-available information regarding conservation easements with a third-party vendor for the purpose of developing and maintaining a registry of conservation easements in the state with a corresponding map displaying the boundaries of each easement...”. The following year, HB 19-1264 defined “publicly available information” to mean any document recorded by a county clerk and recorder or other information readily available to the public (see section 12-15-106(13)(c), C.R.S.). The same legislation identified the third-party vendor to be the Colorado Ownership, Management, and Protection (COMaP) service administered by the Colorado Natural Heritage Program at Colorado State University.

The Division has consulted with the Commission to determine that the publicly available information to be shared with a third-party vendor shall consist of recorded deeds of conservation easement. The Division has collected all such information for conservation easements that generated a tax credit between January 1, 2011 and today, and the information is shared in real time with the third-party vendor upon the issuance of every new tax credit certificate.

Tax Credit Certificate Applications Received, Approved and Denied, and Average Processing Times

Applications Received

The Division received 50 tax credit applications in 2023 related to conservation easement donations made in two calendar years, representing a 25% decrease in the number of applications received:

<u>Year of Conservation Easement Donation</u>	<u>No. of Applications received in 2022</u>	<u>No. of Applications received in 2023</u>
2021	21	0
2022	45	6
2023	<u>N/A</u>	<u>44</u>
Total tax credit applications received	66	50

Of the 50 applications received in 2023, the Division has completed review of 37 and the applicants have received state income tax credits. The 13 remaining applications were received in the last four months of the year and are pending review.

Applications Approved and Denied

The Division approved 72 tax credit applications in 2023 for conservation easement donations made in two calendar years, representing a 36% increase in the number of applications approved:

<u>Year of Conservation Easement Donation</u>	<u>No. of Applications approved in 2022</u>	<u>No. of Applications approved in 2023</u>
2020	4	0
2021	39	0
2022	10	39
2023	<u>N/A</u>	<u>33</u>
Total tax credit applications approved	53	72

Please note that the total number of applications received and the total number of applications approved do not represent the same set of applications because applications received at the end of the year are approved in the subsequent year.

Processing Times

All applications approved in 2023 were processed within the required 120 days, with an average processing time of 118 days. No applications were denied.

Total Acreage Under Easement Summarized by Allowable Conservation Purpose

The 72 applications approved in 2023 were for easements that protect a total of 112,127 acres, representing a 50% increase in the number of acres protected compared to last year.

Section 170(h) of the Internal Revenue Code (IRC) requires that tax-purposed conservation easements comprise restrictions granted in perpetuity exclusively for conservation purposes. The allowable conservation purposes are defined in four broad categories:

- Preservation of land area for outdoor recreation by, or the education of, the general public (18,819 acres)
- Protection of relatively natural habitat of fish, wildlife, or plants, or similar ecosystem (111,738 acres)
- Preservation of open space,
 - for scenic enjoyment (91,141 acres)
 - farmland and forest land - agriculture (69,763 acres)
- Preservation of an historically important land area or a certified historic structure (6,448 acres)

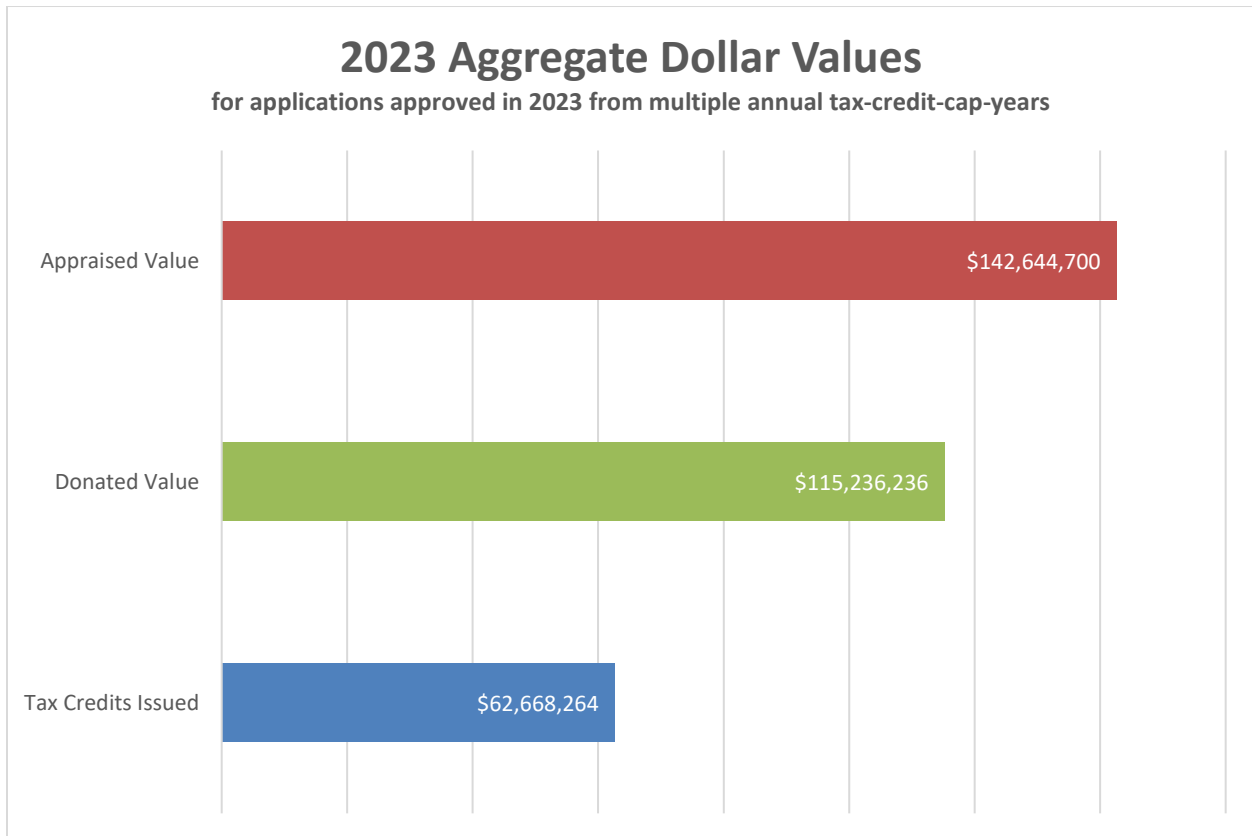

To qualify for a Colorado state income tax credit, the conservation easement must satisfy at least one of these purposes, however most easements satisfy more than one conservation purpose. For this reason, the gross encumbered acreage reported here exceeds the 112,127 acres of actual land area encumbered by easements.

Easement Valuation and Amount of Tax Credits Issued

The 72 applications approved in 2023 were for easements with a combined appraised value of nearly \$142 million. Much of the total, more than \$115 million, was donated value which resulted in almost \$63 million in tax credits, issued from the annual caps for 2022-2027.²

The qualified appraisal submitted with each tax credit application sets forth the appraiser's opinion of the fair market value of the conservation easement. This value opinion is the basis for calculating the amount of the applicant's Colorado income tax credit.

For a conservation easement to qualify for a tax credit, it must have a charitable component.³ Easements where a landowner receives full value in exchange for the easement do not qualify for a Colorado income tax credit. For bargain sale easements, where a landowner receives a portion of the easement, the amount of the bargain sale proceeds must be deducted from the appraised value of the easement before calculating the amount of the tax credit.

² The tax credit is limited to \$45 million each year. In any given calendar year, the Division receives applications for conservation easements donated in the current year and prior years. In addition, once the annual cap is reached, tax credits are issued from future year caps pursuant to 39-22-522(2.5) C.R.S. Moreover, tax credits in excess of \$1.5 million are issued in increments of \$1.5 million pursuant to section 39-22-522(4)(a)(II.5) C.R.S. In other words, the total amount of tax credits issued in a given calendar year is comprised of portions of multiple annual tax credit caps and may exceed \$45 million.

³ Section 12-15-106(1)(a) C.R.S. requires compliance with section 170(h) of the Internal Revenue Code and any federal regulations promulgated in connection with this code section. The landowner's "qualified appraisal" must comply with section 170(f) of the Internal Revenue code and any federal regulations promulgated in connection with this code section. Section 39-22-522(2)(B), C.R.S. specifies that a "...credit shall only be allowed for a donation that meets the requirements of section 170 of the federal "Internal Revenue Code of 1986", as amended, and any federal regulations promulgated in accordance with such section."

Additional Information Otherwise Publicly Available

The 72 applications approved in 2023 were for conservation easements that encumber properties in 37 of Colorado’s 64 counties⁴:

Alamosa	243	Garfield	1,159	Montrose	3,928
Arapahoe	882	Grand	1,479	Otero	9,114
Baca	22,415	Gunnison	3,009	Park	957
Bent	8,720	Hinsdale	182	Pitkin	676
Boulder	419	Huerfano	630	Pueblo	9,114
Chaffee	736	Jefferson	147	Rio Blanco	7,346
Conejos	1,350	La Plata	209	Rio Grande	1,073
Costilla	122	Larimer	584	Routt	743
Delta	248	Las Animas	13,959	Saguache	4,607
Eagle	1,290	Logan	1,347	Washington	1,347
El Paso	509	Mesa	1,599	Weld	463
Elbert	3,000	Moffat	6,837		
Fremont	586	Montezuma	1,100		

⁴ Conservation easements that encumber properties that span county lines have been allocated equally between counties.
