## 2001 Colorado Insurance Industry Statistical Report

The 2001 Colorado Insurance Industry Statistical Report is prepared annually by the Colorado Division of Insurance and serves as a guide for consumers and industry personnel.

The mission of the Division of Insurance is consumer protection. This is our focus as we regulate companies as well as those individuals engaged in the transaction of insurance in Colorado. Each year the Division undertakes efforts to increase consumer education and conduct effective enforcement activities. The Division performs market conduct and financial examinations, and issues corporate and producer licenses. We conduct in-depth analyses of insurance companies and ensure legislative compliance of insurers doing business in Colorado. We also respond to over 62,000 phone inquiries annually and open over 9,800 investigations on behalf of Colorado consumers.

The primary focus of this report is to document the financial status of companies engaged in the insurance business in Colorado. The report includes commercial insurers, health maintenance organizations, non-profit organizations, captives and self-insurance pools. With the exception of a few non-traditional companies, data contained in this report represents figures as of December 31, 2001, the last complete year for which data is available. All figures quoted are extracted from information filed by each company with the Division of Insurance, and much of the data is filed electronically with the National Association of Insurance Commissioners (NAIC). This greatly simplifies our data-gathering process. During 2001, Colorado citizens paid over \$19 billion in premium to approximately 1,657 companies; yet, only 37 companies accounted for over fifty percent (50%) of that total.

The Statistical Report is also used to determine which lines of business account for the largest payments of premiums by consumers. As the summary table on page 257 indicates, accident and health insurance premiums accounted for the largest insurance expenditure, representing 29% of the total insurance premiums paid in Colorado. The second largest premium volume was for annuities with 14%, followed by private passenger auto with 13%. The premium volume for other major lines of business are as follows: life insurance, 9%; deposit-type funds, 6%; workers' compensation, 5%; homeowners, 4%; other liability, 3%; and commercial multiple peril, 2%.

These percentages together account for more than 85% of the total insurance premiums in Colorado.

The report also provides the market share percentages and the loss ratios for individual companies. A **loss ratio** compares the total losses or benefits provided to the total premiums, and is usually expressed as a percentage of losses incurred to premiums earned. **Premiums earned** are those premiums allocated to the specific period for which insurance is provided. The amounts necessary to pay or provide covered financial losses or other policy benefits resulting from an event for which the company was responsible are known as **losses incurred**. A higher loss ratio means that more of the premium dollar went towards claims and benefits, and less to overhead and profit.

Please note that all dollar amounts are reported in thousands. Due to rounding, a zero in a table could actually represent a value anywhere from -499 to 499 dollars. For this reason, a loss ratio may be printed, even though both the losses incurred and the premiums earned appear to be zero. If the premium earned is exactly zero, the loss ratio will show a value of “n/a.”

This report is available in printed format and online at the Division’s website:

A limited number of printed copies are available from the Division at a cost of \$30.
