Workers Compensation and Employers Liability Insurance

Loss Cost Multiplier Report

June 5, 2009

Workers Compensation and Employers Liability Insurance LCM Report, as of May 31, 2009

ABOUT THIS GUIDE

This guide provides an alphabetical insurance company listing of workers compensation and employers liability insurance (Workers Compensation) final loss cost multipliers (LCM) used in Colorado. These multipliers reflect filings closed and effective on May 31, 2009.

The figures presented in this guide were drawn from a June 2009 review of all licensed Workers Compensation insurance companies. The alphabetical listing in this guide is not meant to be an endorsement of any one insurance company.

WORKERS COMPENSATION AND EMPLOYERS LIABILITY INSURANCE

Workers compensation coverage provides employers and employees with medical care, death benefits, and lost wages for work related injuries. Law requires workers compensation insurance for all employers in Colorado. However, certain exceptions to this requirement may include: a sole proprietor or any general working partner; a corporate officer; or a member of a limited liability company.

The LCMs presented in this guide represent a combination of the pure premium rate and each individual insurance company's expense provision. The pure premium rate in the LCM covers the cost to pay and adjust claims. The expense provision in the LCM covers the various operating costs incurred for each insurance company. The LCM, along with the loss costs, is the starting point used with the classification code and employer payroll to develop the initial premium. Classification codes are used to categorize the type of business the employer transacts. Please note that when comparing insurance company LCMs for your business, numerous other factors that impact the final premium must be taken into consideration. These factors include, but may not be limited to:

Underwriting Guidelines – Each insurance company establishes acceptability criteria known as underwriting guidelines. These guidelines determine whether or not the applicant qualifies for coverage with a particular insurance company. Underwriting guidelines vary for each insurance company.

Retrospective Rating Plan – Retrospective rating plan is a type of rating plan evaluated at the end of the policy period. Once the policy period is over, premiums are adjusted to reflect actual loss experience of the insured. Good loss experience will reflect cost savings while poor experience will reflect an adverse result on the final premium charged. Each insurance company determines the availability and eligibility for this type of plan.

Experience Rating – Experience rating is the use of a modification factor that uses past experience, of an individual employer, for the immediate preceding three years, to help determine the premium for the current year of insurance coverage. Eligibility criteria must be taken into consideration prior to this type of rating.

Schedule Rating – Schedule rating is the use of debits and credits with a maximum deviation of +/- 25% to modify the premium based on the special characteristics of the risk. Any debit or credit incorporates factors that are not included within the experience rated premium. Eligibility criteria must be taken into consideration prior to this type of rating.

Premium Dividend for Certified Risk Management Programs – If an insured qualifies for Experience and/or Schedule Rating and has implemented a certified workers compensation risk management program, the insured may be eligible for a premium dividend of 5%. This may be in addition to the maximum schedule rating modification. If the insured does not qualify for Experience and/or Schedule Rating, the insurance company must allow a premium dividend schedule of credits up to 10%.

Participating Policies – Participating policy is an insurance policy in which the insured participates in a dividend declared by the board of directors. Dividends are not guaranteed. Every company does not offer this type of policy.

Deductible Options – Insurance companies are required to offer small deductible policies up to \$5,000. An insurance company may offer other deductible amounts as deemed appropriate. By choosing a deductible, employers are held responsible to reimburse the insurer for the deductible amount of each claim. In return for electing this option, the amount of premium charged is reduced by an amount determined by the insurance company.

Designated Medical Provider – All insurance companies must allow for a 2.5% premium credit if the employer selects a designated medical provider. If the employer is eligible for Experience and/or Schedule Rating, the 2.5% premium credit must be included within the maximum 25% Schedule Rating limitation.

LCM Type – As explained above, this guide presents an alphabetical listing of insurance companies with the LCM listed accordingly. The LCM is calculated in two ways. The first method includes all variable and fixed expenses. The second excludes any fixed expenses and is applied in the same manner as the first. However, it adds an expense constant to the final premium. In this manner, both LCM calculations incorporate the variable and fixed expense provisions.

CONSUMER TIPS

- Shop around. Talk to several agents and companies before purchasing a policy.
- Read your policy and disclosures.
- Identify the various services an insurance company provides.
- Consider a deductible.
- Maintain a good loss history.
