

Medicare Drug Insurance and You Colorado Options 2009

Printed October 2008

Dora
Department of Regulatory Agencies
Division of Insurance

Who is eligible?

Do you receive Medicare benefits (Part A and/or Part B)? If so, you qualify for Medicare prescription drug coverage, also known as Medicare Part D. Enrollment is voluntary; however, you will pay a penalty if you do not enroll when you are first eligible unless you have drug coverage that is as good as or better than that offered by Medicare. Part D coverage is provided by private insurance companies.

Anyone who has been approved for Medicare can enroll in drug coverage during the same period they can enroll in Medicare, usually the three months before and after their 65th birthday month. There are additional Special Enrollment Periods for people with specific circumstances.

Prescription drug plans and drugs covered can vary. It's in your best interest to shop and compare for the plan that best covers your prescriptions. SHIP (Senior Health Insurance Assistance Program) counselors are available throughout Colorado to assist you in selecting the best prescription drug plan to fit your needs. SHIP counselors provide unbiased information on Part D plans at no charge to consumers. Call **1-888-696-7213**.

I already have Part D. Do I need to enroll again or make a change?

If you have a Part D plan in 2008 and you take no action, your plan will continue into 2009. There may be new premiums, copays, and drugs that are covered in 2009. We recommend you evaluate your prescription drug coverage each year to determine which plan best fits your needs for the coming year. Plans can, and do, make changes each year. Premiums change and the list of drugs covered by a plan change, so we advise you to review the changes in your plan and the changes in your prescription needs to see if another plan better suits you.

Your Part D insurance provider is required to mail an "Annual Notice of Change" to you during October of each year. This notice from your plan will give you information on the premium for the next year along with general changes, but the plan is not required to mail you a complete "formulary" — the list of drugs it covers. It's up to you to find out if the prescription drugs you take will be covered by the plan from year to year. If you have not received your Annual Notice of Change by November 15, call your plan for details.

You can check coverage on the Medicare website, call **1-800-MEDICARE**, call the plan or check the formulary on the plan's website.

Annual Election Period – November 15 through December 31, 2008

This is the time to enroll in Medicare prescription drug coverage, or to switch from one plan to another. Your plan will be effective on January 1, 2009, and you will generally have to stay in that plan until the next annual enrollment period, so it's important to review your plan and make sure you have the best one for you. To allow time for your enrollment to be recognized and membership materials to reach you in time for use on January 1, it is best if you complete your enrollment by December 8, 2008.

Special Enrollment Periods

Those who become eligible for Medicare during 2009, or who have certain special circumstances (such as moving from one coverage area to another, moving in or out of a nursing home, or losing employee coverage), will have a Special Enrollment Period to choose a plan at other times during the year. Additionally, you can make one change in a plan involving a Medicare Advantage/Health Plan between January and March.

How does Medicare Part D coverage work?

In Colorado, there are 53 stand-alone plans (plans that only cover drugs) provided by 22 private companies approved by Medicare. In addition, there are 89 Medicare Advantage (HMO, PPO and PFFS plans) or other Medicare Health Plans that provide prescription drug coverage in conjunction with health coverage. Each plan has a different list of covered drugs, premiums, deductibles, co-pays and pharmacy networks. Each company must offer a standard plan, but can also offer enhanced plans with additional coverage. Some offer a plan with no annual deductible, but the drug copays may be higher.

This publication gives you details on all Colorado plans offering prescription drug coverage and the cost of the top drugs taken by those on Medicare. The plans can provide more detailed coverage information.

Will I be able to change Medicare Part D plans whenever I want to?

Once you have enrolled, you will not be able to change plans at will unless you have both Medicare and Medicaid or you have other special circumstances. It is important that you choose the plan that provides the best coverage for you. You will be able to change your Part D plan only during the Annual Election Period (November 15 – December 31) each year, unless you're making a change that involves a Medicare Advantage/Health Plan and then you will have the opportunity for one change between January and March. After that you will be locked into that plan until the end of the year.

Can I get help paying for the cost of my drugs?

You may qualify for "Extra Help" to pay some of your Part D costs if your income and assets, or resources, are limited. For additional information, see page 8 of this publication.

**For more help in comparing prescription drug plans,
call the Colorado SHIP at 1-888-696-7213.**

Choosing a Medicare Prescription Drug Plan

What is the Medicare Part D standard plan?

Congress created the Medicare Part D standard plan and each company offering drug insurance must offer a standard plan. Companies can offer enhanced coverage as well. Under the standard plan, you pay a monthly premium, a deductible before the plan starts paying (\$295 in 2009), and then 25% of the total cost of your drugs during the initial coverage period until you reach the coverage gap, or “donut hole”, when the total cost of the drugs you have purchased equals \$2,700. After you reach the coverage gap, you pay the full cost of your drugs until you have spent \$4,350 in drug costs. Then catastrophic coverage begins. (See chart below.)

Are your prescription drugs on the plan’s formulary?

Formularies are lists of drugs for which a Medicare drug insurance plan will pay. Drugs not on the formulary are not covered. Each plan will pay for some brand-name and generic drugs in each therapeutic category, but will not pay for all drugs. You will need to see if your current drugs are on the formulary for the plans you are considering. If not, you will have to pay all of the costs out of your pocket. You should eliminate plans that don’t cover the majority of your prescriptions, especially more expensive brand-name drugs, or consider asking your doctor to switch your prescriptions to those covered by a plan formulary.

2009 Standard Medicare Prescription Drug Benefit

The amounts below do not include monthly premiums.

DEDUCTIBLE
BENEFICIARY PAYS 100% OR \$295

COVERAGE ZONE
BENEFICIARY PAYS 25% OR \$601.25
PLAN PAYS 75%

COVERAGE ZONE ENDS WHEN TOTAL DRUG COST = \$2,700

COVERAGE GAP (“DONUT HOLE”)
BENEFICIARY PAYS 100% OR \$3,453.75

GAP ENDS WHEN TOTAL DRUG COST = \$6,153.75
BENEFICIARY HAS PAID \$4,350

CATASTROPHIC COVERAGE
BENEFICIARY PAYS NO MORE THAN 5%
PLAN PAYS 15%, MEDICARE PAYS 80%

What is the copay for covered drugs?

Several plans may cover your drugs, but copays vary from plan to plan. Most insurers use a “tiered” copay system where payment varies depending on whether it is a generic, preferred brand-name, or non-preferred brand-name drug for that insurer. A few insurers will charge you a set percentage of their costs — such as 25%.

What are the premiums and deductibles?

Medicare drug insurance plan premiums vary widely. In Colorado, stand-alone drug plan premiums for 2009 range from \$18.40 to \$112.70. Plans also have different annual deductible amounts, ranging from \$0 to \$295. Medicare Advantage and Health Plans have monthly premiums that include both health and prescription drug coverage. Those plans have premiums from \$0 to \$244.80 per month.

What coverage gap costs will you pay?

Most Medicare drug insurance plans have coverage gaps where you will have to pay all of the cost of drugs until catastrophic coverage begins. Companies may offer different coverage gaps in plans other than their standard plan.

Which pharmacies do you use?

Each insurer has a network of pharmacies where you can use your drug insurance. It is important to ensure that your preferred pharmacy is part of the network for the plan you choose. Drug purchases in out-of-network pharmacies cost more and may not count toward your true out-of-pocket expenses. Generally, most prescription drug plans are accepted at large pharmacy chains. If you use an independent pharmacy, you should ask the pharmacy which Medicare prescription drug plans they accept. Most Medicare drug insurers also offer a mail order pharmacy option.

What a Consumer Pays With the Standard Plan

| | |
|--|------------|
| Deductible Before Plan Pays – Consumer pays 100% of total cost of drugs until deductible is met. | \$ 295.00 |
| Initial Coverage Period – Consumer pays 25% of \$2,405 in total drug costs. (\$2,700 cost of drugs to Coverage Gap minus \$295 = \$2,405) | \$ 601.25 |
| Coverage Gap – Consumer pays 100% of the total cost of drugs to Catastrophic Coverage. (\$4,350 – \$601.25 – \$295.00 = \$3,453.75) | \$3,453.75 |
| Total Consumer Pays Through Coverage Gap (\$295.00 + \$601.25 + \$3,453.75 = \$4,350.00) | \$4,350.00 |
| Catastrophic Coverage – Consumer pays the greater of 5% or \$2.40 for generic drugs/\$6.00 for brand-name drugs after reaching Catastrophic Coverage. | |

If consumer reaches the Catastrophic Coverage level in a year, the total cost of the drugs will total \$6,153.75, but the Consumer will have paid \$4,350.

How Does Medicare Drug Insurance Affect You?

If you have employer or retiree drug insurance

If you have good drug benefits through your or your spouse's current employer plan, or with a retiree plan, you may keep your current coverage. If Medicare considers your employer retiree coverage to be as good as Medicare coverage (creditable coverage), you will not pay a higher premium if you choose to enroll in a Medicare prescription drug plan later. You should receive a notice regarding your prescription drug coverage from your employer plan before November 15. If not, you should contact your benefits administrator to find out if your drug coverage is creditable. Keep that information so you can use it to document your current coverage.

IT IS IMPORTANT THAT YOU CONTACT YOUR BENEFITS ADMINISTRATOR BEFORE MAKING ANY DECISIONS REGARDING YOUR PRESCRIPTION DRUG COVERAGE. IF YOU CHOOSE A MEDICARE PART D PLAN OUTSIDE YOUR EMPLOYER COVERAGE, YOU MAY LOSE YOUR EMPLOYER COVERAGE AND MAY NOT BE ABLE TO GET IT BACK.

If you have coverage through FEHBP, TRICARE for Life or VA

If you have prescription drug benefits through Federal Employees Health Benefits Program (FEHBP) or TRICARE for Life, you may enroll in Medicare prescription drug coverage, if you choose. However, the drug coverage through these plans is better than the Medicare prescription drug plan coverage.

You might want to enroll in a Medicare drug plan if you are eligible for Extra Help in paying your prescription drug costs. You cannot receive the Extra Help through your FEHBP or TRICARE for Life. Extra Help may provide lower drug copays than your retiree plan.

If you have coverage through Veteran's Affairs (VA), you have the option of getting your prescriptions through the VA **and** enrolling in a Medicare prescription drug plan. You **cannot** use both VA coverage and Medicare coverage at the same time. However, you can use your Medicare prescription drug coverage to receive Extra Help and to fill prescriptions at pharmacies outside the VA system.

If you currently have little or no drug costs

If you currently have little or no drug costs, you may be asking yourself why you should enroll in a Medicare prescription drug plan. It is important to remember that Medicare drug coverage is an insurance program designed to protect you now and in the future.

Insurance is something that cannot be purchased only when you need it and you cannot predict your future prescription needs. The longer you delay, the more it will cost. The penalty is a monthly surcharge of 1% for each month that you are eligible and do not enroll. The 1% is based on the national average premium for all prescription drug plans, which is \$30.36 for 2009. It's not as simple as 1% per month, because there are times that you cannot enroll in Part D, as the Annual Election Period is only at the end of each year.

As an example, if you become eligible for Medicare in April of 2009, you would have up to three months (through July) after your month of eligibility to enroll in Medicare Part D with no penalty. If you chose not to enroll then and decided to enroll during the next Annual Election Period at the end of the year, you would have a five month – or 5% of the 2010 national average premium – penalty for as long as you have prescription drug coverage. This would show up as a surcharge to your monthly premium. If you wait another year, your penalty would be the 5% for this year, plus another 12% for next year, or 17% when your plan starts.

If you don't take many prescriptions at this time, ask yourself if you may need prescription drug coverage in the future. If you don't sign up during this Annual Election Period and you are diagnosed with a disease in February that will require extensive and expensive drugs, you will have to wait until the end of that year to enroll in prescription drug coverage to begin the first of the following year.

If you have drug coverage through a Medigap plan

Prior to January 1, 2006, some Medicare Supplement Insurance or "Medigap" plans (H, I and J) offered drug coverage. Effective January 1, 2006, no Medigap plans are allowed to include drug coverage, but people who already had plans are allowed to keep the drug coverage. If they change their minds and want to take Part D, they must enroll during the Annual Election Period (November 15 through December 31) and pay the 1% per month surcharge for every month they didn't have Part D coverage.

If you have drug coverage through a Medigap plan, you will generally save money and get better coverage with Medicare Part D. If you have Medigap drug insurance, you will be required to drop it prior to enrolling in a Medicare prescription drug plan. **YOU WILL NOT BE ALLOWED TO KEEP BOTH.**

Chart 1: Colorado Medicare Rx Stand-Alone Plans

Data was obtained from the Medicare website and prescription drug plan websites in October 2008. This information is subject to error. Please confirm all information with drug plan.

- Medicare drug insurance plans with no other health coverage
- For people with Original Medicare or Medicare Health Plans that do not include prescription drug coverage

NOTE: Plans in **bold green print** have no premiums, deductibles, or coverage gaps for people with Medicare and Medicaid, and low cost for other “Extra Help” recipients.

Gs = Generics
P-Gs = Preferred Generics

Copayments – the amount the consumer pays to receive a drug. In the copayment column the first figure is for Tier 1 drugs – generics. Second for Tier 2 drugs – common brand-name drugs. Third for Tier 3 drugs – higher price brand-name drugs. Fourth for Tier 4 drugs – specialty drugs.

Efforts have been made to ensure the accuracy of data contained in this chart; however, the data is subject to transcription or other error and consumers should check with the plan to verify accuracy of the data.

Prior authorization, step therapy and quantity limits

In order to assure the safety of the consumer’s health and to control drug costs, Medicare drug plans are allowed to place restrictions on drugs. Prior authorization means that the doctor must ask the plan’s permission before prescribing the drug. Step therapy means the doctor must demonstrate that a lower cost generic drug does not work for you before prescribing a higher cost brand-name drug. Plans can also place quantity limits on the amount of any drug you can get in one month. The patient and his/her doctor must consider those restrictions when deciding on a drug therapy. Sometimes it is better for an individual to choose a higher cost plan without drug restrictions than to choose a lower cost plan with multiple restrictions.

To determine if there are restrictions on your drugs, you may visit the Medicare website (www.medicare.gov), call **1-800-MEDICARE** or ask a SHIP counselor for assistance.

NOTE: Gs = Generics P-Gs = Preferred Generics

Copayments – the amount the consumer pays to receive a drug. In the copayment column the first figure is for Tier 1 drugs – generics. Second for Tier 2 drugs – common brand-name drugs. Third for Tier 3 drugs – higher price brand-name drugs. Fourth for Tier 4 drugs – specialty drugs.

Total monthly premium includes drug premium.

NOTE: Chart contains only those Medicare Advantage/Health Plans with drug coverage, not a comprehensive list of all plans marketed in Colorado. The availability of plans varies by counties. Please check with Medicare, the individual companies or SHIP to determine the plans available in your county.

Efforts have been made to ensure the accuracy of data contained in this chart; however, the data is subject to transcription or other error and consumers should check with the plan to verify accuracy of the data.

Chart 3: Colorado Special Needs Plans

Plans for People with Special Needs

Special Needs plans are for people who are on both Medicare and Medicaid or who have a chronic or disabling health condition. The monthly premiums, deductibles and co-payments for drugs depend upon the level of Medicaid for the member and if the member lives in an institutional setting (nursing home). Please check with the plan for information on plan costs and the types of health conditions that might qualify for membership in a Special Needs Plan.

Low Cost Prescription Drug Plans For those with Medicaid, Medicare Savings Program, or Extra Help

People with both Medicare and Medicaid

If you have both Medicare and Medicaid, you will qualify automatically for a special low cost Medicare drug plan, and you are allowed to switch plans any month of the year, for coverage to begin the first day of the following month.

If you are receiving both Medicare and Medicaid, or have a Medicare Savings Program (QMB, SLMB or QI) that pays your Medicare Part B premium, you should compare and actively choose a drug plan that includes the majority of your prescription drugs, especially the most expensive drugs. If you do not choose a plan yourself, Medicare will randomly assign you to a plan. If you are already enrolled in a prescription drug plan and there are changes to that plan for 2009, you will receive a letter by November 15 that will explain your options.

Medicare does not evaluate your drugs to determine which plan would be best for you; automatic enrollment is done at random.

You should use the Medicare plan finder at www.medicare.gov, call **1-800-MEDICARE**, or contact a SHIP counselor at **1-888-696-7213** for assistance in determining which plan is best for you.

In addition, standard plans will not cover over-the-counter drugs, cosmetic drugs, weight control drugs, vitamins, and two classes of drugs known as benzodiazepines and barbiturates that are excluded from coverage by Congress. Medicaid will help with the costs of some of these drugs.

For those with Medicaid, Medicare Savings Plans, or SSI, the cost of the prescription drug plan is reduced. If you choose one of 8 prescription drug plans listed below you will pay no monthly premium, no deductible and low drug copays (\$1.10 or \$3.20 for generics, \$2.40 or \$6.00 for brand-name drugs). Additionally, there is no coverage gap. If you find that your prescriptions are better covered under a prescription drug plan other than the 8 listed below, you may choose that one and you will pay a partial premium.

The 8 plans that are no-premium plans for those with Medicaid, a Medicare Savings Program, or on SSI for 2009 are:

- First Health Part D - Premier
- SilverScript Value
- Fox Value Plan
- SierraRx

- HealthSpring Prescription Drug Plan Reg 27
- MedicareRx Rewards Standard
- Prescriba Rx Bronze
- WellCare Classic

If you lose eligibility for Medicaid or a Medicare Savings Program during 2009, you may choose to remain in the plan in which you are enrolled or change to another plan. You will have to pay the full premium and regular co-pays unless you qualify for Extra Help. You should check into the income/asset limits for Extra Help, as they are higher than those for Medicaid and Medicare Savings Programs.

“Extra Help” paying for the cost of drugs for those with limited income and resources

Congress created Extra Help for people who have limited resources. Extra Help means you will: pay little or no premium, have a low deductible, have no gap and have low co-payments for each of your prescriptions. You can choose from the 8 prescription drug plans listed on this page to have little or no monthly premium or choose another plan and pay a partial premium.

Income limits for 2008:

| | |
|----------------------|-----------------------------------|
| Single Person Income | \$1,320/month (\$15,840 annually) |
| Couple Income | \$1,770/month (\$21,240 annually) |

Note that these income limits are for 2008 and will probably increase in 2009. The 2009 limits will be announced in February of 2009.

Asset/Resource limits for 2009:

| | |
|-------------------------|----------|
| Single Assets/Resources | \$12,510 |
| Couple Assets/Resources | \$25,010 |

Asset/Resource limits include cash, savings and stocks, but do not include your house, the land on which your home sits, your personal possessions and your vehicles.

If you think you may qualify, contact the Social Security Administration (SSA) for assistance. **You cannot get Extra Help unless you apply.** Apply on line at www.ssa.gov, call SSA at **1-800-772-1213** between 7 am and 7 pm, or apply in person at an SSA office.

Medicare Advantage/Health Plans – additional enrollment opportunities

There is an additional opportunity between January and March to enroll or disenroll in Medicare Advantage/Health Plans. You cannot add or drop prescription drug coverage during this period, but you can add or drop a Medicare Advantage/Health Plan. You can make **ONE** change during the period from January 1 through March 31; after that, you are generally locked into the choice you make until the end of the year.

This is rather confusing, so here are some examples of what you can do during this Medicare Health Plan Open Enrollment Period:

- If you have Original Medicare **WITH** a stand-alone prescription drug plan, you can enroll in a Medicare Health Plan **WITH** prescription drug coverage.
- If you have Original Medicare and **NO** drug coverage, you can enroll in a Medicare Health plan with **NO** drug coverage.
- If you have a Medicare Health Plan **WITH** prescription drug coverage you can switch to another Medicare Health Plan **WITH** prescription drug coverage. You can also go back to Original Medicare, but you will have to enroll in a stand-alone prescription drug plan so that you continue to have drug coverage.
- If you have a Medicare Health Plan with **NO** prescription drug coverage you can switch to another plan with **NO** drug coverage or back to Original Medicare with **NO** drug coverage.

Where do I get more information and assistance?

The **Colorado SHIP** (Senior Health Insurance Assistance Program) includes Colorado organizations that can help you with questions and can provide one-on-one assistance. **SHIP materials are developed by people who do not market Medicare prescription drug plans** and materials are financed by Medicare grants to the Colorado Division of Insurance. Call the Colorado SHIP at **1-888-696-7213**.

Medicare can provide information on how drug plans cover your current prescriptions. You can get this information at their website - www.medicare.gov - or by calling **1-800-MEDICARE** (1-800-633-4227) 24 hours a day, 7 days per week. Medicare can provide information for residents of any state.

The **Social Security Administration** (SSA) takes applications and determines eligibility for the Extra Help program. Contact SSA from 7 am to 7 pm weekdays at **1-800-772-1213**. You may obtain more information and/or complete an on-line application at www.ssa.gov.

The **National Access to Benefits Coalition** has a helpful website at www.accesstobenefits.org. Additionally, the **BenefitsCheckUp** website at www.benefitscheckup.org can help you determine whether you may be eligible for other assistance programs.

Consumer protection: How do I protect myself when choosing a Medicare drug plan?

The Colorado SMP Medicare Fraud Program provides the following advice to protect you from Medicare fraud or from making a hasty choice that might be hard to undo.

Please **do not do business with** representatives of Medicare prescription drug plans who:

- Come to your home uninvited. It's against the Medicare marketing rules.
- Say they represent Medicare, that Medicare wants you to buy their plan, or that Medicare recommends their product. Medicare does not sell Medicare Part D. Private insurance companies do.
- Ask you for your Social Security number, Medicare number, banking and credit card information, or similar information as part of their marketing. Never give your personal information or bank routing information to anyone until you are sure that you are dealing with a representative of a valid prescription drug or Medicare health plan. Check this publication for a listing of companies providing plans.
- Want to enroll you over the phone – unless you called them first. To enroll over the phone, you should use the plan phone number listed in Chart 1, Chart 2 or Chart 3 of this publication. Don't use a different number given to you by someone who says they represent the plan.
- Asks for payment over the telephone or over the Internet. You have the option of having the premiums deducted from your Social Security check or paying the plan directly.
- Want you to sign up for the plan without sufficient information about the plan, especially plans that include health coverage in addition to prescription drug coverage. If you're choosing a stand-alone prescription drug plan, make sure to check the list of covered drugs to see if your prescriptions are covered. If you're choosing a Medicare Advantage plan, or other plan that includes health coverage in addition to drug coverage, make sure you get complete information and take the time to read about the plan's coverage. Check with your doctor and medical facilities to see if they are willing to accept this insurance or you may have to find another healthcare provider.

If you suspect fraudulent marketing activities by a Medicare prescription drug insurance provider or insurance sales representative, please call the Colorado SMP, part of the Colorado Division of Insurance, at 303-894-2290, or toll free at 1-800-930-3745, ex. 2290 (outside of the Denver metro area.)

This publication was produced by the Colorado Division of Insurance with financial assistance from the Centers for Medicare and Medicaid Services (the federal agency that administers Medicare) and the Administration on Aging (the federal agency that administers the SMP program). The Colorado Division of Insurance is solely responsible for its content. Inquiries should be directed to SHIP at 303-894-2946 or SHIP@dora.state.co.us.
