The General Assembly
State Capitol Building
Denver, Colorado 80203

Dear General Assembly Member:

This report provides information regarding the operation of the telephone high cost support mechanism during calendar year 1998. Also, included are sections reporting the current estimate of the mechanism's operation for calendar year 1999 and its proposed operation for calendar year 2000.

As you recall, House Bill 95-1335 was enacted on May 4, 1995. This initiated a new era in Colorado telecommunications law. The act declared that the policy of the State is to encourage competition in the basic local exchange telecommunications market and to strive to ensure that all Colorado consumers benefit from such increased competition. The bill directed that the Commission should seek the furtherance of universal basic service, toward the ultimate goal that basic service be available and affordable to all citizens of the State of Colorado. In order to accomplish that goal of universal basic service, the Commission was to create a system of support mechanisms to assist in the provision of such services in high cost areas. The bill modified the high cost support mechanism portion of the law to ensure that all providers of basic local exchange service in high cost areas would be fully reimbursed for the difference between the costs incurred in making basic service available to customers within a rural, high cost geographic support area and the affordable price for such service.

Senate Bill 98-177, enacted on May 18, 1998, further modified the high cost support mechanism section and required, among other changes, that a report be prepared by the Colorado Public Utilities Commission accounting for the operation of the high cost support mechanism and that the report be submitted to the general assembly on or before December 1 of each year. Senate Bill 98-177 placed a cap of \$60 million on the high cost support mechanism for calendar years 1998 and 1999. The cap is repealed on December 31, 1999. Distributions from the high cost support mechanism for calendar year 2000 are estimated to be approximately \$72 million. Pursuant to the statute, the increase will be suspended until March 31, 2000.

If I can be of further assistance to you, please let me know.

Very truly yours,

Bruce N. Smith
Director

Enclosure

cc: M. Michael Cooke, Executive Director
Department of Regulatory Agencies

Annual Report of the Colorado High Cost Support Mechanism to the Colorado General Assembly

I. Introduction

A commitment to promote universal service has become a cornerstone of telecommunications policy. The expressed purpose of the Communications Act of 1934 was:

...to make available, so far as possible, to all the people of the United States, without discrimination on the basis of race, color, religion, national origin, or sex, a rapid, efficient, Nation-wide, and world-wide wire and radio communication service with adequate facilities at reasonable charges....¹

The concept of universal service as a public policy goal means ubiquitous availability of a specified set of telecommunications services delivered at a specified level of quality and at an affordable price so that every household is able to connect to the telephone network if it chooses to do so.

The goal of universal telephone service is being supported through a number of explicit mechanisms. Explicit mechanisms provide targeted support to specific geographic areas, companies, or households. These include:

- Lifeline Assistance and Link Up America - programs to assist qualifying low-income households by providing for reduced monthly rates and reduced initial charges;
- Telecommunications Relay Services - to enable speech or hearing impaired individuals to use the voice telephone network;
- Rural Utilities Service Loans - to support rural local exchange company's construction budgets;
- Federal and State Universal Service Funds - to support high-cost local exchange companies.

¹ Communications Act of 1934, Title I, Section 1 (47 U.S.C. 151).

The Colorado Public Utilities Commission adopted its first explicit support mechanism in 1990. The Commission adopted Rules Prescribing the Standard Procedures for Separating Telecommunications Property Costs, Revenues, Expenses, and Reserves for Access Charges for Small Local Exchange Telecommunications Service Providers ("Small LECs") and established the Colorado High Cost Fund

Annual Report of the Colorado High Cost Support Mechanism
December 1, 1999
Page 2

(CHCF). Senate Bill 92-16 was enacted on April 16, 1992 amending Article 15 of Title 40, Colorado Revised Statutes , by the addition of a new section § 40-15-208, C.R.S. The new section codified the creation of the CHCF and authorized Commission administration of the fund.

On May 24, 1995, House Bill 95-1335 was enacted. The Colorado Act, in part, modified the statutory definition of Basic Service, amended the section establishing the Colorado High Cost Fund and added a new Part 5 to Article 15 of Title 40 providing for local exchange service competition.

The Colorado Act gave an expression of state policy that:

The Commission shall require the furtherance of universal basic service, toward the ultimate goal that basic service be available and affordable to all citizens of the state of Colorado. ... The commission shall have the authority to regulate providers of telecommunications services to the extent necessary to assure that universal basic service is provided to all consumers in the state at fair, just, and reasonable rates. § 40-15-502(3), C.R.S.

The Commission was given further instruction by the expression of state policy that:

In order to accomplish the goals of universal basic service . . . the commission shall create a system of support mechanisms to assist in the provision of such services in high-cost areas. These support mechanisms shall be funded equitably and on a non-discriminatory, competitively neutral basis through assessments on all telecommunications service providers in Colorado . . . § 40-15-502(5), C.R.S.

The bill modified the high cost support mechanism portion of the law, section 40-15-208 C.R.S., to ensure that all providers of basic local exchange service in high-cost areas would be fully reimbursed for the difference between the costs incurred in making basic service available to customers within a rural, high-cost geographic support area and the affordable price for such service.

The Commission has adopted specific rules implementing these statutory guidelines. The Commission conducted Rulemaking in Docket Nos. 95R-558T and 97R-043T regarding the CHCF.

In the CHCF Rule the Commission has required that all telecommunications service providers collect and remit the rate element receipts. The CHCF Rules provide for a transition from the existing method of contributions to the CHCF to the rate element methodology. This transition provides for the termination of the collection via the imposition of a per access line charge per month and the bulk billing of

Annual Report of the Colorado High Cost Support Mechanism
December 1, 1999
Page 3

interexchange carriers, to the imposition of a rate element contribution method based upon end-user intrastate telecommunications service revenues.

Senate Bill 98-177, enacted on May 18, 1998 further modified Section 40-15-208(2)(d)(I), C.R.S., changed the name of the program to the "Colorado High Cost Support Mechanism" (CHCSM), and required that the CHCSM should not exceed \$60,000,000 during each of the calendar years 1998 and 1999. Further, SB 98-177 requires that a report be prepared by the Colorado Public Utilities Commission accounting for the operation of the high-cost support mechanism and that the report be submitted to the general assembly on or before December 1st of each year. The Commission adopted interim implementing Rules and subsequently, permanent Rules implementing SB 98-177.

During 1999, in conjunction with the proceeding conducted by the Commission to review the definition of Basic Local Exchange Service as required by Section 40-15-502(2), the Commission further addressed CHCSM Rule issues. The Commission reiterated its decision to support only the primary residential line and the first business line in non-rural high cost areas, and on an interim basis to continue support to all access lines in rural high cost areas.

II. Report of Operations - 1998

Calendar Year 1998. The Commission determined that for calendar year 1998, the Colorado High Cost Fund would support only small (rural) eligible telecommunications service providers, and the budget would be set at \$1,485,185.03. The Commission issued various decisions in Docket No. 90M-766T implementing the CHCF.

In 1998, contributions to the Colorado High Cost Fund came from two sources. Approximately one half of the total was collected via a two cent per access line per month assessment by each local exchange service provider. For calendar year 1998, \$301,416.96 was contributed by this form of assessment. The remaining contributions, \$272,775.03 were ordered to be contributed by Interexchange Carriers. Each carrier was assessed on the basis of its share of the intrastate toll market.

Annual Report of the Colorado High Cost Support Mechanism
December 1, 1999
Page 4

Benchmarks were not used in 1998 in determining the amount of support each provider would receive. The Commission continued to use the accounting cost methodology contained in its High Cost Fund Rule, the method used since 1991.

The Commission determined that the Colorado High Cost fund should distribute \$1,432,028 in support to rural eligible telecommunications service providers in calendar year 1998. Included in that amount, the Commission ordered that the previously unexpended Fund reserve amount of \$910,993 be encumbered for payment to authorized rural providers by June 30, 1998. The Commission expended \$53,157.03 administering the CHCF during fiscal year 1997/1998. This included amounts for personal services, expenditures for the acquisition of computer hardware and software and the training of technical personnel.

1998 Colorado High Cost Fund Disbursements

Authorized	Support per	Access
------------	----------------	--------

	<u>Local Exchange Provider</u>	<u>Disbursements</u>	<u>Line</u>
1	CenturyTel (Universal)	\$78,324	\$11.14
2	Delta County Tele-Comm. Inc.	\$161,520	\$19.80
3	Eagle (CenturyTel)	\$803,033	\$11.15
4	Eastern Slope Rural Tele.	\$12,900	\$2.93
5	Farmers Telephone Co., Inc.	\$6,960	\$19.23
6	Nucla-Naturita Tele Co.	\$90,348	\$65.95
7	Peetz Coop. Telephone Co.	\$2,286	\$11.26
8	Pine Drive Telephone Co.	\$147,537	\$218.57
9	Plains Cooperative	\$39,006	\$27.96
10	Rico Telephone Co.	\$37,512	\$256.93
11	Sunflower Telephone Co.	\$9,288	\$28.32
12	Wiggins Telephone Assoc.	\$37,242	\$26.39
13	Willard Telephone CO.	<u>\$6,072</u>	<u>\$101.20</u>
		\$1,432,028	\$14.68

The Commission determined the amount of support that each provider received by separate order in individual dockets for each recipient using the accounting cost methodology. Application of the methodology calculates the amount of support that may be necessary to support an individual provider's high cost loops (the facilities

Annual Report of the Colorado High Cost Support Mechanism
December 1, 1999
Page 5

connecting the customer to the first point of switching), high cost switching, and high cost local **exchange trunking**. The rule methodology contains an automatic annual reduction in the amount of support a provider receives if the provider does not formally re-apply to have its support amount reset by the Commission.

The full amount of any support received by any provider was used to prevent local rates from being unaffordable. If the disbursements in the table above had not made, monthly rates for basic local exchange service customers would have increased for each company by the amount shown in the column labeled "Support per Access Line".

IV Report of Operations - 1999

Calendar Year 1999. The Commission determined that, for the first time, both rural and non-rural eligible telecommunications service providers who served customers in high cost geographic areas would receive support. The 1999 budget for the Colorado High Cost Support Mechanism (CHCSM) is set at \$31,026,338. The Commission issued a number of decisions in Docket No. 98M-236T implementing the CHCSM.

In 1999, contributions to the CHCSM are being made via a rate element assessed on end-user telecommunications service revenues by each provider. The specific amount of the rate element may be adjusted by the Commission quarterly. The rate element assessment was set at 0.2% for the first two quarters of 1999, producing \$1,883,405 in contributions. This was done to continue the support being provided to the small, rural telephone companies. The rate element was set at 3.1% for the last two quarters of 1999, producing an estimated \$31,069,595 in contributions. This was necessary to begin providing support to the non-rural eligible providers, in this case U S WEST.

The revenue benchmarks established by the Commission for use in determining support levels per access line in non-rural high cost areas in 1999 averaged \$20.34 per month for primary residential customers, and \$44.69 for first line business customers. The Commission determined that the engineering cost studies called Proxy Cost Models which utilize the revenue benchmarks were suitable for use by the Commission for setting support amounts for non-rural eligible providers beginning July 1, 1999. However, the Proxy Cost Model is not adequately developed for use in setting support amounts for rural eligible Providers.

Annual Report of the Colorado High Cost Support Mechanism
 December 1, 1999
 Page 6

During 1999 the Commission continued to use the accounting cost methodology for determining support amounts for rural eligible providers.

The Commission has ordered that the CHCSM will distribute \$30,874,186 in support to eligible telecommunications service providers in calendar year 1999. The Commission expended \$152,152 during fiscal year 1998-1999 in administering the CHCSM. This includes amounts for personal services, data entry, auditing and compliance activities, expenditures for the acquisition of computer hardware and software, Proxy Cost Model development and the training of technical personnel.

1999
 Colorado High Cost Support Mechanism
 Disbursements

<u>Local Exchange Provider</u>	Authorized <u>Disbursements</u>	Amount per Supported	<u>Access Line</u>
--------------------------------	------------------------------------	----------------------------	--------------------

1	CenturyTel (Universal)	\$39,164	\$5.57
2	Delta County Tele-Comm. Inc.	\$127,256	\$15.60
3	Eagle (CenturyTel)	\$1,376,628	\$18.71
4	Nucla-Naturita Tele Co.	\$55,600	\$40.58
5	Peetz Coop. Telephone Co.	\$762	\$3.75
6	Pine Drive Telephone Co.	\$229,612	\$340.17
7	Plains Cooperative	\$13,000	\$9.32
8	Rico Telephone Co.	\$30,320	\$207.67
9	U S WEST	\$28,987,406	\$87.49
10	Wiggins Telephone Assoc.	\$12,414	\$8.80
11	Willard Telephone CO.	<u>\$2,024</u>	<u>\$33.73</u>
		\$30,874,186	\$72.59

Pursuant to the Commission's CHCSM Rule, U S WEST as the non-rural provider filed to reduce its jurisdictional rates concurrently with the receipt of initial support. These rate reductions were effective on July 1, 1999. The reductions, totaling almost \$58 million in annual revenues, were applied in equal proportion to business services, switched access services and intrastate toll services. These rate reductions removed implicit support that was being provided by these services to maintain affordable basic local exchange service rates in high cost areas. This support is now explicitly shown on a consumer's monthly bill as a separate line item.

Annual Report of Colorado High Cost Support Mechanism
December 1, 1999
Page 7

IV Report of Operations - 2000

Calendar Year 2000. Support is projected to be provided to both rural and non-rural eligible telecommunications service providers who served customers in rural high cost geographic areas for the first full calendar year in 2000. The budget for the Colorado High Cost Support Mechanism (CHCSM) is estimated at \$72,884,654. Distributions to eligible telecommunication service providers are budgeted at \$72,750,194. This is a projected 21% increase over the \$60 million statutory limit that was in place on distributions for calendar year 1999. There is no longer a statutory limit in place with respect to the amount of the distributions permitted via the CHCSM. The size of the projected increase is the result of two main factors. First, the revenue benchmarks have gone down significantly. The residential benchmark dropped from \$ 20.34 per month in 1999 to a projected \$20.00 for 2000. The business revenue benchmark has decreased from \$44.69 per month in 1999 to a projected \$41.50. These decreases are

the result of the Commission ordered rate decreases as part of its decision to grant U S WEST (the largest non-rural provider in the state) certain pricing and regulatory flexibility beginning in 1999, and the offsetting rate decreases U S WEST implemented July 1, 1999 when CHCSM support was first authorized for the company. As revenues decrease, the amount of support received from the CHCSM must increase to cover the difference between revenues and costs. Second, the number of access lines being supported in high cost areas is projected to increase by 11.9 percent from 1999 to 2000. This seemingly large increase is due to the natural growth in lines in the geographic area (3-6% per annum) plus the additional lines being supported because the revenue benchmarks decreased (6-9%).

Any new support received in 2000 above the amount received in 1999 by an eligible provider must be offset by a contemporaneous decrease in retail rates of services that were providing implicit support to high cost areas.

In 2000, budgeted contributions to the CHCSM will be made via a rate element assessed on end-user telecommunications service revenues as billed by each provider. The specific amount of the rate element may be adjusted by the Commission quarterly during the year to meet fluctuations in support and billed revenue. At full authorization, it is estimated that the rate element assessment would be set at 3.70% for the first three Annual Report of the quarters of 2000, producing \$5,046,220 in contributions, and the rate element would be set at 3.8% for the last quarter of 2000, producing an estimated \$18,868,692 in contributions.

Colorado High Cost Support Mechanism
December 1, 1999
Page 8

Section 40-15-208(2)(c) C.R.S. provides that if the Commission proposes that the total amount of the distributions to be made for support in high cost areas is to be increased above the amount contained in the previous calendar year's report, that such increase shall be suspended until March 31 of the budget year. Accordingly, the Commission will plan on limiting distributions during at least the first quarter of 2000 to \$15,000,000 and continuing the rate element assessment at 3.1%.

The revenue benchmarks proposed to be used by non-rural providers in 2000 for use in determining support levels per access line in high cost areas is projected to average \$20.00 per month for primary residential customers, and \$41.50 for first line business customers. The Commission has determined that the engineering cost studies called Proxy Cost Models which utilize the revenue benchmarks were suitable for use for setting support amounts for non-rural eligible providers beginning July 1, 1999. However, it is estimated that during 2000 the Proxy Cost Model will still not be adequately developed for use in setting support amounts for rural eligible providers. A Rural Task Force, an independent advisory panel appointed by the Federal-State Joint Board on Universal Service, has been established to provide guidance to the Federal Communication Commission and the Joint Board on the topic of the suitability of proxy cost models in rural settings. This panel has not yet made its recommendation. The Commission will continue to use the accounting cost methodology for determining support amounts for Rural Eligible Providers.

The Commission estimates that the CHCSM will distribute \$72,750,194 in support to eligible telecommunications service providers in calendar year 2000. The Commission is authorized to expend \$134,461 during fiscal year 1999-2000 in administering the CHCSM. This includes amounts for personal services, data entry, auditing and compliance activities, legal services, expenditures for the acquisition of computer hardware and software, Proxy Cost Model development and the training of technical personnel.

**2000
Colorado High Cost Support Mechanism
Disbursements**

<u>Local Exchange Provider</u>	<u>Authorized Disbursements</u>	<u>Amount per Supported Access Line</u>
1 Delta County Tele-Comm. Inc.	\$78,312	\$ 8.22
2 CenturyTel of Eagle	\$1,256,174	\$16.36
3 Nucla-Naturita Telephone Co.	\$27,800	\$18.73
4 Pine Drive Telephone Co.	\$216,217	\$270.27
5 Rico Telephone Co.	\$21,584	\$138.36
6 U S WEST	\$70,645,566	\$190.57
7		
8 Forecasted (Undesignated)	<u>\$504,540</u>	<u> </u>
	\$72,750,194	\$158.34

Pursuant to the Commission's CHCSM Rule, U S WEST as the non-rural provider is required to file to reduce its jurisdictional rates concurrently with the receipt of any new support. It is anticipated that these rate reductions would continue to remove implicit support that is being provided by services to maintain affordable basic local exchange service rates in high cost rural areas.
