2009 Annual Report of the Colorado High Cost Support Mechanism

Prepared by:

The Colorado Public Utilities Commission Staff

December 1, 2009

Public Utilities Commission Ronald J. Binz, Chairman James K. Tarpey, Commissioner Matt Baker, Commissioner Doug Dean, Director

Bill Ritter, Jr. Governor Greg Ferland Acting Executive Director

December 1, 2009

The General Assembly State Capitol Building Denver, Colorado 80203

Dear General Assembly Member:

The attached report on the Colorado High Cost Support Mechanism (CHCSM) for 2009 is hereby submitted to the House Business Affairs and Labor Committee and the Senate Business, Labor and Technology Committee, in accordance with section 40-15-208, C.R.S. The proposed operations for calendar year 2010 are also included.

The Colorado High Cost Support Mechanism was created in House Bill 95-1335 to provide financial assistance to local exchange providers to help make basic local exchange service affordable and allow such providers to be fully reimbursed for the difference between the reasonable costs incurred in making basic service available to their customers within a rural, high cost geographic support area and the price charged for such service. This also considers any amounts received from the federal government.

Distributions from the High Cost Support Mechanism for calendar year 2010 are estimated to be approximately \$63 million and contributions estimated at \$63 million. Currently, customers are paying a 2.2 percent rate element which may need to increase in subsequent quarters of 2010 to in order to meet the forecasted demand for CHCSM.

If I can be of further assistance to you, please let me know.

Sincerely,

Doug Dean

Annual Report of the Colorado High Cost Support Mechanism To the General Assembly

I. Overview

The Telecommunications Act of 1996 established the framework for universal service. The expressed purpose of the Act is:

 \dots to make available, so far as possible, to all the people of the United States, without discrimination on the basis of race, color, religion, national origin, or sex, a rapid, efficient, Nation-wide, and world-wide wire and radio communication service with adequate facilities at reasonable charges....¹

The concept of universal service as a public policy goal means ubiquitous availability of a specified set of telecommunications services delivered at a specified level of quality and at an affordable price so that every household is reasonably able to connect to the telephone network.

The policy goal of universal telephone service is being supported through a number of explicit federal and state mandated mechanisms. Explicit mechanisms provide targeted support to specific geographic areas, companies, or households. These include:

- <u>Lifeline Assistance and Link Up America</u> programs to assist qualifying low-income households by providing reduced monthly rates and reduced initial charges;
- <u>Telecommunications Relay Services</u> to enable speech or hearing impaired individuals to use the voice telephone network;
- <u>Rural Utilities Service Loans</u> low interest loans to support rural local exchange carriers' construction budgets;
- <u>Federal and State Universal Service Funds</u> to support local exchange carriers that provide service in high cost areas.

¹ Communications Act of 1934, Title I, Section 1 (47 U.S.C. 151).

The Colorado High Cost Support Mechanism (CHCSM) is under the administration of the Colorado Public Utilities Commission (Commission) pursuant to § 40-15-208 and implemented by the Commission rules found at 4 CCR 723-2-2840-2855. The goal of the CHCSM is to promote and support universal service by helping make basic local exchange service available and affordable within high cost areas of the state. The Commission has augmented and strengthened the CHCSM program through the issuance of regulation, rules and other directives.

A local exchange carrier (LEC) must be designated as an Eligible Telecommunications Carrier (ETC) in order to receive Federal Universal Service Funds and be designated as an Eligible Provider (EP) to receive funds from the CHCSM.

The CHCSM provides financial support to local exchange carriers who qualify as EPs so that basic local exchange service may be more affordable to consumers in certain areas where the cost to provide such service is high. The CHCSM disbursements paid to providers are coordinated with support received from other support mechanisms, such as the federal Universal Service Fund (USF) program. That is, any federal High Cost Loop Support received by providers is considered an offset to the CHCSM if the provider allocates its costs between interstate and intrastate.² This is to ensure that no provider receives funds from the CHCSM that, when combined with any other revenue sources, exceeds the cost of providing local exchange service.

As of November 1, 2009, there are four wireless carriers³ that have been granted eligible provider (EP) status. However, only one of these carriers, Northeast Colorado Cellular, Inc., dba Viaero (NE Colorado Cellular), currently receives CHCSM funds. NE Colorado Cellular has a petition pending before the Commission seeking CHCSM support in additional areas of the State where it has been granted EP status. In addition another wireless carrier, NNTC Wireless, LLC, has filed an application that is presently in front of the Commission seeking designation as an ETC and EP. The Commission has not yet made a determination in this docket.

In addition to the one wireless carrier currently receiving CHCSM support, there is one non-rural local

² For "average schedule" companies, all federal revenues offset the total costs of the company.

³ Northeast Colorado Cellular, Inc., dba Viaero, Commnet Four Corners, LLC, Elbert County Wireless, LLC, and Western Wireless.

exchange carrier⁴ and eight rural local exchange carriers⁵ that receive CHCSM support. J.E.D. Inc., dba Pine Drive Telephone Company (Pine Drive) and Roggen Telephone Cooperative Company (Roggen) have petitions currently before the Commission seeking an increase in their CHCSM support. Other rural local exchange carriers have had discussions with Commission staff indicating that they are contemplating filing petitions with the Commission seeking CHCSM support in 2010.

An average of 100 carriers contributed to the CHCSM fund in 2009. The estimated total contribution amount is \$54,411,663. An estimated amount of \$58,679,127 will be distributed by year-end 2009. The Colorado universal service rate element on customer bills is currently 2.2 percent. This 2.2 percent rate element, set to cover required disbursements and the CHCSM fund's target reserve balance of approximately \$12 to \$14 million, has been in effect since July of 2008. It is anticipated that the rate element will need to be increased to 2.7% beginning with the second or third quarter of 2010, should all the applications requesting CHCSM pending before this Commission be granted.

In October 2008, the Commission issued a notice of proposed rulemaking to restructure the CHCSM rules. This proceeding, Docket 08R-476T, is currently open and has received comments from various telecommunications providers and the Office of Consumer Council. The Commission intends to proceed with a new rulemaking docket in the near future and issue proposed rules in the new docket.

In July 2009, the Commission opened an investigatory docket (Docket No. 09I-493T) to consider the revision of the definition of basic local exchange telephone service (basic service). The docket was opened to satisfy the provision of § 40-15-502(2), C.R.S., requiring the Commission to conduct a proceeding no less frequently than every three years to consider any revision to the definition of basic service. Staff is expected to present a report to the Commission before the close of 2009 with its findings. Proposals presented in this investigatory docket included such items as whether to expand the definition of basic service to include broadband, whether to tighten the definition of basic service, or whether to make the local calling area statewide. Any of these proposals, if adopted, would have an impact on the CHCSM.

⁴ Qwest Corporation

⁵ Agate Mutual Telephone Company, Delta County Telecommunications, Inc., Nucla-Naturita Telephone Company, Nunn Telephone Company, Peetz Co-op Telephone Company, Phillips County Telephone Company, Pine Drive Telephone Company, and Roggen Telephone Cooperative.

The Federal Communications Commission (FCC) has been reviewing several proposals it may mandate for intercarrier compensation and its USF program. While the effects of these changes and their impact are currently unknown, any reductions in federal USF support or changes to the intercarrier compensation process could place additional pressure on eligible providers in Colorado to seek new or additional CHCSM support.

In November 2009, U.S. Representatives Rick Boucher (D., Va.) and Lee Terry (R., Neb.) made public a long-awaited discussion draft of their universal service reform bill, a measure that calls for broadening the base of contributors and more tightly controlling distributions through implementation of competitive bidding for wireless providers. The legislation would also allow USF monies to be used to support broadband deployment. The discussion draft calls for the Commission to adopt a competitive bidding process to determine the eligibility of wireless service providers for universal service support. Also, additionally, the discussion draft calls on the FCC to complete an intercarrier compensation reform proceeding within one year of a passed bill becoming law. Any of the proposed changes discussed above could significantly affect CHCSM contributions and disbursements.

Should a version of the universal service reform bill pass, and/or any of these proposed FCC mandated changes occur, and/or additional carriers are granted support and/or the contribution base decreases, the Commission may need to reset the end-user rate element at a different amount than currently projected in order to meet future commitments from the CHCSM fund.

II. History

The Commission adopted its first explicit high cost support mechanism in 1990. The Commission adopted rules that prescribed procedures for separating telecommunications costs, revenues, expenses, and reserves for access charges for LECs and established the Colorado High Cost Fund (CHCF). As discussed in more detail below, the CHCF was later renamed the CHCSM along with other minor modifications.

SB 92-16 was enacted on April 16, 1992, amending Article 15 of Title 40, Colorado Revised Statutes, by the addition of a new section, § 40-15-208, C.R.S. The new section codified the creation of the CHCF and authorized the Commission administration of the fund. To provide direct oversight of activities and performance of the CHCF, the Commission implemented rules, now found at 4 CCR 723-2-2840-2855.

On May 24, 1995, HB 95-1335 (Colorado Act) was enacted. The Colorado Act, in part, modified the statutory definition of Basic Service, amended the section establishing the CHCSM and added a new Part 5 to Article 15 of Title 40, providing for local exchange service competition.

The Colorado Act gave an expression of state policy that:

The Commission shall require the furtherance of universal basic service, toward the ultimate goal that basic service be available and affordable to all citizens of the state of Colorado. . . . The commission shall have the authority to regulate providers of telecommunications services to the extent necessary to assure that universal basic service is provided to all consumers in the state at fair, just, and reasonable rates. 40-15-502(3), C.R.S.

The Commission was given further instruction by the expression of state policy that:

In order to accomplish the goals of universal basic service . . . the commission shall create a system of support mechanisms to assist in the provision of such services in high cost areas. These support mechanisms shall be funded equitably and on a non-discriminatory, competitively neutral basis through assessments on all telecommunications service providers in Colorado 40-15-502(5), C.R.S.

The bill modified the high cost support mechanism portion of the law, § 40-15-208, C.R.S., to ensure that all providers of basic local exchange service in high cost areas are reimbursed for the difference between the costs incurred in making basic service available to customers within a rural high cost geographic support area and the affordable price for such service.

The Commission adopted specific Rules implementing these statutory guidelines. The Commission conducted rulemaking in Docket Nos. 95R-558T and 97R-043T regarding the CHCSM. Non-rural incumbent telecom providers are currently regulated by Commission rules requiring cost estimates based on a proxy cost model estimate. These proxy cost estimates are then compared to a revenue benchmark with the resulting differential funded by the CHCSM for eligible providers. Rural

incumbent telecommunications providers are currently regulated by Commission rules requiring cost estimates based on the actual embedded cost of service demonstration net of relevant revenues. The CHCSM is funded by a customer surcharge on intrastate retail revenues from telecommunication services. The Commission requires telecommunications service providers to collect and remit the surcharge based on its end-user intrastate telecommunications services revenues. Incumbent eligible providers that receive support are net recipients from the CHCSM.

In 1998, Qwest entered into a Stipulation and Settlement agreement with the Commission freezing the annual support for Qwest until a sufficient proxy model could be developed. In 2002, the parties to Docket No. 98M-147T (Regarding the Administration of the Colorado High Cost Fund and the Adoption of a Proxy Cost Model) met and agreed to use the results produced by the Federal Communications Commission's Hybrid Cost Proxy Model (HCPM) to establish wire-center specific cost support for Qwest for calendar year 2003. On August 1, 2003, upon Qwest's receipt of increased high cost support from the implementation of the Commission's Order granting it support for all lines, Qwest eliminated zone charges outside its base serving area for over 225,000 of its Colorado telephone lines. The elimination of Qwest zone charges reduced some residential rates by as much as \$20.00 per line per month and some business rates by as much as \$25.00 per line per month.

On May 18, 1998, SB 98-177 was enacted which further modified Section 40-15-208(2)(d)(I), C.R.S. by changing the name of the program to the "Colorado High Cost Support Mechanism," and required that the CHCSM not exceed \$60 million during each of the calendar years 1998 and 1999. Further, SB 98-177 required that a report be prepared by the Commission accounting for the operation of the high cost support mechanism, and that the report be submitted to the general assembly on or before December 1 of each year. The Commission adopted interim rules⁶ and, subsequently, permanent rules⁷ implementing SB 98-177.

⁶ See PUC Docket No. 98R-334T.

⁷ See PUC Docket No. 99R-028T.

During 1999, in conjunction with the proceeding conducted by the Commission to review the definition of Basic Local Exchange Service as required by § 40-15-502(2), C.R.S., the Commission further addressed CHCSM rule issues. The Commission reiterated its decision to support only the primary residential line and the first business line in non-rural high cost areas, and on an interim basis to continue support to all access lines in rural high cost areas.

In 2003, the Commission adopted Rule 4 CCR 723-41-9.2.3 (recodified 4 CCR 723-2-2848(d)(II), effective April 1, 2006), which extended CHCSM support to all residential and business lines to non-rural providers in this state.

In 2004, the Commission continued its investigation into the adoption of the high cost proxy model (Docket No. 98M-147T). The Commission approved the use of results from the FCC's HCPM, with modifications made to accommodate the specific needs of Colorado telecommunication providers, and to provide wire center-specific cost support to Qwest. The Commission approved a Stipulation which used average monthly costs per line produced from the HAI 5.2 model, including Staff adjustments made in Docket No. 99A-577T, Qwest Corporation's updated 2003 ARMIS data, and updates to the model's line count information. Use of this methodology resulted in CHCSM funding to Qwest in the amount of \$58,386,874 for the calendar year 2005. Following this Stipulation, Docket No. 98M-147T was closed and a new docket was opened to consider future cost methodologies. Docket No. 04M-388T was opened and is ongoing to consider further development of Proxy Cost Models used to establish Qwest's yearly CHCSM draw.

In 2005, NE Colorado Cellular became the first wireless carrier to begin drawing CHCSM support. NE Colorado Cellular is eligible to receive CHCSM support on a per line basis, based on the amount the underlying incumbent carrier receives in support for that wire center and on the number of NE Colorado Cellular's lines.

In 2005, the Commission opened an investigatory docket (05I-431T) for the purpose of examining the CHCSM process. Seven workshops were conducted where parties discussed in detail their views on issues. An Administrative Law Judge that attended the workshops issued a report to the Commission that outlined the discussions that took place during the workshops.

During its regular 2005 session, the Colorado General Assembly enacted House Bill 05-1203 which became effective on July 1, 2005. This bill added two clarifying definitions to the statutes:

a) "Distributed Equitably" to mean a distribution of funds that is accomplished using regulatory principles that are neutral in their effect, that do not favor one class of providers over another, and do not cause any eligible rural telecommunications provider to experience a reduction in its high cost support mechanism requirement based on commission rules that are not applicable to other telecommunications providers.

b) "Non-discriminatory and competitively neutral basis" refers to distributions that are made by the commission shall be made using regulatory principles that are neutral in their effect, do not favor one class of providers over another, and do not impose regulatory requirements or costs on only one class of customers.

The Commission adopted emergency rules in Docket No. 05R-381T in response to the passage of HB 05-1203. The Commission took this emergency action to ensure that high cost support be made in a nondiscriminatory manner and that regulatory requirements are not imposed on one set of carriers without having them imposed on all. The emergency rules eliminated the provision for rural carriers which would phase-down CHCSM support over a seven-year period, from 100 percent in the first and second year, to zero during the seventh year.

The Commission adopted permanent rules⁸ to address the implementation of the new statutory language the Colorado General Assembly had enacted in HB 05-1203 in 2006. The purpose of the legislation was to eliminate any inequitable treatment in the distribution of CHCSM support and to ensure that the CHCSM be implemented in a manner that is nondiscriminatory and on a competitively neutral basis. The rules adopted eliminated the long standing practice of applying a general rate case filing process to establish earning requirements as the basis for setting the initial or increased CHCSM draw. Going forward the initial level of support and any increases in support are determined using streamlined data and analysis requirements as set forth by the Commission's Decision No. C07-0919.

Additionally, under the new rules once the CHCSM support amount is set, the petitioning company will continue to receive the support each year unless modified by the Commission or the company requests a modification. A simple single page form was created and implemented that incorporates

⁸ See Docket 05R-529T.

available provider information for the purpose of monitoring the earnings of these rate-of-return regulated companies once support is established. Should a concern arise, or indications that an overearnings situation may exist, the Commission Staff may initiate a formal complaint and bring this matter before the Commission. After an opportunity for hearing on any formal complaint, the outcome of this proceeding could result in the re-setting of CHCSM support for a provider.

In February 2006, the Commission opened an investigatory docket (Docket No. 06I-084T) to consider the revision of the definition of basic local exchange telephone service (basic service). The docket was opened to satisfy the provision of § 40-15-502(2), C.R.S., requiring the Commission to conduct a proceeding no less frequently than every three years to consider any revision to the definition of basic service. The Commission found that the existing definition of basic local exchange telephone service continued to meet the goal of maintaining the affordability and quality of basic local exchange service.

In June, 2006, the FCC issued an order in its IP Enabled Services and Universal Service Fund dockets that established universal service contribution obligations for providers of interconnected Voice over Internet Protocol (VoIP). While the FCC acknowledged VoIP as a mixed use service (i.e. interstate and intrastate) and concluded that VoIP providers are telecommunications providers⁹ the FCC has not yet defined VoIP as a telecommunications service or an information service. The FCC has declared that interconnected VoIP providers have three options to determine their interstate revenues for which they can assess the USF rate: 1) they may use the interim safe harbor provision established by the FCC at 64.9 percent interstate, 2) they may report their actual interstate telecommunications revenues; or 3) they may rely on traffic studies to allocate interstate revenues. In this same order the FCC raised the interim safe harbor percentage for USF contributions from 28.5% to 37.1% for wireless providers.

In 2008, the Commission opened a rulemaking docket to comprehensively examine the CHCSM rules prescribing the implementation of CHCSM. Docket 08R-476T is currently an open and active docket. Comments have been received from various telecom providers and the Office of Consumer Council. It is anticipated that this docket will be closed prior to the close of 2009, and the Commission will issue proposed rules in a new rulemaking docket in the near future.

⁹ See Report and Order and Notice of Proposed Rulemaking, FCC 06-94, released June 27, 2006.

Pursuant to SB 09-272, signed by Governor Bill Ritter on May 1, 2009, and SB 09-279, signed by Governor Bill Ritter on June 1, 2009, the Staff of the Commission, as Administrator of the CHCSM fund transferred \$15,000,000 (fifteen million) to Fund 227, the Colorado High Cost Administration Fund, and that money was then moved to the State of Colorado General Fund. This transfer occurred in June 2009.

III. Administration

As Administrator, the Commission administers billing, collection and disbursement functions for the CHCSM. It also collects information regarding contributing entities and end-user intrastate telecommunications revenues, submits projections of demand, determines benchmarks used, determines the amount of distributions made from the CHCSM, and records the cost of administrative expenses.

The functions of the Administrator also include, but are not limited to, development of applications and associated instructions as needed for the CHCSM, administering the process to ensure compliance with the Commission rules and regulations, updating the web site for such processes, and development and implementation of other processes unique to the CHCSM.

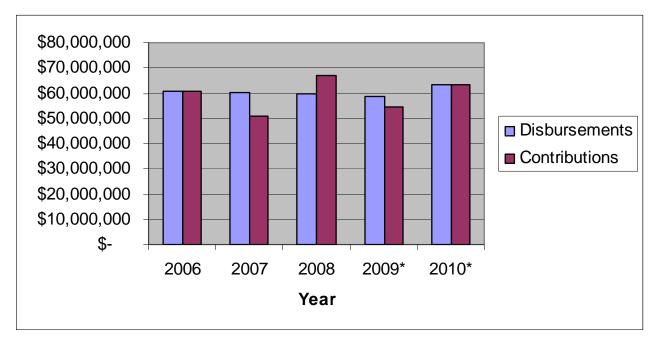

The Commission, as the Administrator, continues to take enforcement actions (complaint dockets) against certain delinquent telecommunications service providers who are not in compliance with the Commission rules and continues to conduct audits of data submitted by providers. Due to the rapidly changing fortunes of telecommunications service providers, the Commission must take these actions to ensure that each provider is contributing to the CHCSM amounts that the provider has collected from its customers or should have collected.

On August 6, 2002, the Commission entered into a Memorandum of Understanding (MOU) with CenturyTel, Inc. (CenturyTel) to become the Custodial Receiver of certain contributions to the CHCSM and be required, under direction from the Commission, to transfer funds to eligible high cost support recipients each quarter. Under the terms of the MOU, CenturyTel established a separate segregated account (Escrow Account) at Regions Morgan Keegan Trust (Regions). Regions provides

banking and investment management services. Prior to CenturyTel, Qwest Corporation was the Custodial Receiver of the CHCSM funds.

Regions provides to the Commission a monthly report which identifies receipts (contributor, date of receipt, amount received), disbursements, transfers, and the current balance of the Escrow Account. All costs related to the Escrow Account are satisfied by the interest earned from the Escrow Account. In accordance with the MOU, payments made to CenturyTel for managing the Escrow Account for 2009 will be \$275,000. The payments to CenturyTel will be made from previous year's interest earned.

The following chart summarizes the dollar value of distributions from and contributions to the CHCSM fund for calendar years 2006 through 2010.

Summary of Contributions and Disbursements

* Contributions for years 2009 and 2010 are estimated.

* The year 2009 contains actual information for the first nine months.

IV. Coordination of State and Federal Universal Service Support

The CHCSM is coordinated with the federal Universal Service Fund. As a result of the USF offset, the rural carriers receive proportionally more support from the USF fund than from the CHCSM. Conversely, Qwest receives more support from the CHCSM than it does from the USF.

Federal USF consists of five components of support:

1) High Cost Loop with two subcomponents – Safety Valve Support and Safety Net Additive Support;

a) High Cost Loop Support – available to rural ETCs and to competitive ETCs - provides support for the "last mile" of connection for rural companies in service areas where the cost to provide this service exceeds 115% of the national average cost per line. Qwest and Rico are the only ETCs that do not receive this support.

b) Safety Net Additive Support - is intended to provide carriers with additional incentives to invest in their networks. To qualify, a rural carrier must show that growth in telecommunications plant in service (TPIS) per line is at least 14% greater than the study area's TPIS per line in the prior year. Six rural ETCs (Agate, Blanca, Nunn, Peetz, Plains, Rye, and Willard) receive this support as well as Western Wireless and NE Colorado Cellular.

c) Safety Valve Support – additional support for carriers that buy or acquire exchanges and make substantial post-transaction investments to enhance network infrastructure. There are no ETCs in the state of Colorado that receive this support.

2) High Cost Model Support - support intended to keep the cost for telephone service comparable in all areas (urban and rural) of a state. HCM support is distributed at the wire center level and is targeted to carriers serving wire centers with forward-looking costs that exceed the national benchmark. There are no ETCs in the state of Colorado that receive this support.

3) Interstate Access Support (IAS) – available to non-rural ETCs and to some competitive ETCs. This support was established when the FCC removed implicit support from interstate access charges and established an explicit component for price-cap carriers. El Paso, Qwest, NECC, and Western Wireless receive this support.

4) Interstate Common Line Support (ICLS) – available to rural ETCs and some competitive ETCs to help offset interstate access charges and is designed to permit each rate-of-return carrier to recover its common line revenue requirement, while ensuring that its subscriber line charges (SLCs) remain affordable to its customers. All carriers receive this support with the exception of El Paso and Qwest.

5) Local Switching Support (LSS) – available to rural ETCs and some competitive ETCs to reimburse some high switching cost in order to provide service to fewer customers. All carriers receive this support with the exception of CenturyTel of Eagle and Qwest.

The following tables summarize the federal and state universal service distributions paid to eligible providers for calendar years 2008 and 2009. Table 1 shows actual federal and state universal service distributions to ETCs for 2008. Table 2 shows projected federal and state universal service distributions to ETCs for 2009 using nine months of actual data and three months of projections.

V. Operations - 2009

CHCSM support was provided to rural and non-rural incumbent eligible providers who served customers in high cost geographic areas in the calendar year 2009, and to one wireless carrier.

Net distributions from the CHCSM fund for 2009 are estimated to be \$45,628,355 while the amount collected and retained by eligible providers is estimated to be \$12,930,696. These two amounts total \$58,559,051 and is the estimated amount to be distributed by year-end 2009. Also, by year-end, a projected \$117,118 will be expensed by the Commission to administer the CHCSM.

The method of calculation by which the non-rural carrier, Qwest, and the wireless carrier, NE Colorado Cellular, receive CHCSM support results in varying distribution amounts on a quarterly basis. CHCSM distributions for theses two carriers are dependent on the number of access lines or customers each carrier was able to acquire in a specific wire center in a high cost area. The amount of high cost funding is based on the actual residential and business access line counts multiplied by the support per access line in that wire center. This contrasts with the manner in which the rural companies receive funding which is a fixed yearly dollar figure set by the Commission.

In 2009, a total of ten eligible providers received support from the CHCSM. The support ranged from less than \$0.25 per supported access line for a Qwest exchange to over \$515.00 per supported access line for Pine Drive Telephone Company.

Phillips County Telephone Company filed a petition in 2008 seeking a CHCSM draw in the amount of \$30,847 per year and that it be made effective January 1, 2009. After evaluating the carrier's petition, the Commission approved the request.

NE Colorado Cellular filed a petition in February 2009, seeking CHCSM support in additional areas where it has been granted EP status. Docket 09A-107T is pending before the Commission. The Office of Consumer Counsel (OCC) has intervened in this docket and is seeking a ruling concerning the way that support is calculated for wireless carriers.

In September 2009, Pine Drive Telephone Company filed a petition with the Commission seeking to increase its CHCSM draw from \$450,076 to 681,059. The OCC has intervened in this docket and the Commission has scheduled it for a hearing.

Roggen Telephone Cooperative also filed an application in September seeking to increase its CHCSM draw by \$13,581 for a total annual draw of \$51,716. The application is pending before the Commission.

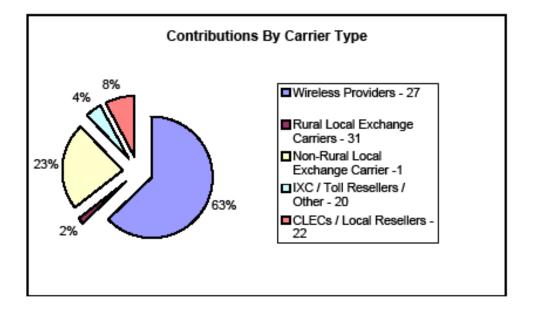

NNTC Wireless, LLC, a subsidiary of Nucla-Naturita Telephone Company filed an application seeking ETC designation and EP designation in the southwest corner of Colorado including a portion of the State where the parent company's exchanges are located. A hearing has been held but the order granting or denying the application has not yet been issued by the Commission.

Union Telephone Company, dba Union Wireless, filed an application with the Commission seeking designation as an ETC in its wireless territory. The application was filed on October 28, 2009 and is before the Commission. Union Telephone is not seeking funding from the CHCSM.

Section 40-15-208(2)(c), C.R.S., provides that if the Commission, through this report, proposes an increase above the amount contained in the previous calendar year's report in any of the following: (1) the proposed benchmark; (2) the contributions to be collected through a rate element; or (3) the total amount of distributions to be made for support in high cost areas, then such increase shall be suspended until March 31 of the budget year.

Contributions in 2009 to the CHCSM were made via an assessment on end-user intrastate telecommunications service revenues as billed by each qualifying telecommunications service provider. The rate element has been 2.2 percent since July 1, 2008. The 2.2 percent rate element is expected to be sufficient through 2009, and into the first part of 2010, if the regulatory environment remains status quo.

At the beginning of 2009, a total of 100 telecommunication providers contributed to the fund. The chart below depicts the approximate 2009 average breakdown by carrier type and the percentage of contributions to the fund.

In 2009, contributions from wireline providers have maintained at a steady level. Comcast continues to voluntarily pay into the fund on its bundled VoIP services. Wireless providers revenues remained consistent from 2008 to 2009 and represent approximately 63 percent of the revenues to the fund.

In 2008, HB 08-1227 amended the law with respect to the maximum price a telecommunication carrier may charge for residential basic local exchange service. Before this amendment, the rates for basic local exchange service, including any zone charges, if any, could not rise above the levels in effect on May 24, 1995. Qwest's Colorado consumers have not had an increase in basic local exchange service rates for thirteen years. Qwest was the first carrier to file an application under the provisions of HB 08-1227. After a hearing on the matter, the Commission allowed Qwest's residential cap to increase from \$14.88 to \$16.52. The Commission further ordered that the cap rise to \$17.00 in 2010. The increase in the rate cap may affect Qwest's revenues in the future which may affect future CHCSM draws.

SB 08-215 directed the Chief Information Officer of the Governor's Office of Information Technology to create an inventory of broadband service areas within Colorado. The Bill authorized the payment of up to \$100,000 from the CHCSM Fund to assist in paying the expense for the development of the broadband map. The Governor's Office of Information Technology has informed the Commission that it will not request the transfer of funds.

VI. Projected Operations – 2010

Calendar Year 2010 Projections. Distributions from the fund will continue to be provided to both rural and non-rural EPs, including wireless carriers, who serve customers in high cost geographic areas. Based on the current CHCSM applications before the Commission and anticipated future applications, it is forecasted that an additional \$3,694,564 in distributions will be authorized. The total distribution for 2010 is estimated at \$63,309,162 as identified below.

San Isabel has ETC designation, but not EP designation.

The CHCSM distribution for Qwest will remain at the same level of support as 2009 for 2010 as a result of the negotiated Stipulation and Settlement Agreement¹⁰ between Commission Staff and Qwest. The Agreement adopted a procedure similar to that used to determine the 2004 through 2009 high cost support amounts. The Agreement involves the use of average monthly per line costs produced by the HAI Consulting, Inc.'s ("HAI") model used in Docket No. 99A-577T (HAI Model 5.2a) and updating the Qwest expense and investment figures with Qwest's 2007 ARMIS data and line count information. Based on these adjustments, Qwest's 2010 CHCSM authorized support would be \$56,174,188. For 2010, the average revenue benchmarks for Qwest will be \$18.99 per month for residential and \$34.79 for business.

Expenditures for administering the CHCSM in year 2010 are estimated to increase slightly over 2009, due to the normal increase in personnel service costs. The projected Commission administration cost

^{**} Qwest line counts from 2010 Qwest Draw Stipulation.

requirement is \$126,618 (or 0.2% of total disbursements). Personnel service costs include a percentage of employee wages, data processing, auditing, compliance activities, legal services, expenditures for the acquisition of computer software, and proxy cost model development and review.

In 2010, budgeted contributions to the CHCSM will again be made via an assessment on end-user intrastate telecommunications service revenues as billed by each telecommunications service provider. The desired level of reserve balance for the CHCSM Fund is approximately \$12 to \$14 million based on current distributions made to eligible providers. The target reserve balance is equal to one quarter of net distributions to eligible providers. The goal is to maintain a moderate reserve amount in the CHCSM fund so that the Commission, as Administrator, is prepared to make future CHCSM distributions from the fund to eligible providers. The rate element has been set at 2.2 percent in order to maintain the CHCSM fund reserve at a minimum level and meet distribution requirements. It is projected that the end-user rate element may need to be reset to 2.7 percent sometime after the first quarter of 2010 should a version of the universal service reform bill pass, and/or any of these proposed FCC mandated changes occur, and/or additional carriers are granted support and/or the contribution base decreases. The end-user rate element should only be increased if, at any time after the first quarter in a given year, the funds reserve balance is projected to fall below the quarterly net disbursement amount. It is anticipated that there will be additional eligible providers applying for funding that are not currently authorized to draw from the CHCSM fund.

VII. Pending Activities, Legislation, and Rulemaking that Could Impact the CHCSM

On May 2, 2008, the FCC released an order that places an "interim emergency cap" on the amount of high cost universal service funding available to competitive eligible telecommunications carriers ("CETCs"). The order, which came in response to a Recommended Decision by the Federal-State Joint Board on Universal Service, caps the amount of universal support for CETCs at the amount available in each state as of March 2008, on an annualized basis. The FCC's action effectively eliminates the identical support rule, because wireless carriers will no longer receive the identical per-line support available to the incumbent LEC unless the wireless carrier can demonstrate the need for additional universal support based on its own costs. This difference will increase over time as

¹⁰ See PUC Docket No. 04M-388T.

supported wireless subscribers continue to grow relative to wireline customers. The interim cap is still in place and will remain in place until the FCC "adopts comprehensive high cost universal service reform". Rural cellular operators have asked a federal appeals court to review the FCC's action of placing a cap on the high cost universal service funding available to competitive eligible telecommunications carriers.

In November 2009, U.S. Representatives Rick Boucher (D., Va.) and Lee Terry (R., Neb.) made public a long-awaited discussion draft of their universal service reform bill, a measure that calls for broadening the base of contributors and more tightly controlling distributions through implementation of competitive bidding for wireless providers. The legislation would also allow USF monies to be used to support broadband deployment. The Universal Service Reform Act of 2009, the introducing lawmakers said, will continue the viability of the more than \$7 billion program. Once the proposed legislation is introduced, the Commission will monitor it.

As mentioned previously, the Commission will be addressing proposed CHCSM rule changes in 2010. It is not currently known what effect this rulemaking may have on the CHCSM fund. VIII. Summary and Supporting Schedules
