(n) recommendations as to what if any changes should be made to the current rules of the Commission.

There is currently one (1) active Notice of Proposed Rulemaking (NOPR) that pertains to the Transportation Section (21R-0180TO). This rulemaking addresses the maximum rates towing carriers can charge for various services, including charges for storage, after hours release, drops, and law enforcement ordered tows. The maximum rates for nonconsensual tows are currently adjusted annually, based on the Consumer Price Index (CPI), as determined in a recent rulemaking (19R-0709TO). The current NOPR is attempting to bring other tow rates in line with this approach.

Transportation Staff intends to initiate another substantial rulemaking, addressing numerous issues within current transportation rules. Ideally, this rulemaking will result in significantly simplified requirements and language, which will benefit Transportation Staff, the transportation industry, and the public. It is believed that such modifications can be incorporated, while retaining the primary safety features captured by current rules. Specific areas of interest include various reporting requirements (i.e. insurance, medical certification, vehicle inspections, etc.), vehicle fees, tariffs, and the vehicle registry.

In the interim, a more targeted rulemaking will be necessary, based on recent statutory changes. These changes, as outlined in SB20-118, HB21-1206, and SB21-260, affect various transportation rules pertaining to Hazardous or Nuclear Materials (HAZMAT) carriers, Medicaid Client Transport (MCT) carriers, and Transportation Network Companies (TNC), respectively. In response, these rules will need to be amended and/or removed, in order to comply with the modified statutes.

(o) recommendations as to the priority for the type of enforcement actions for the next year.

Transportation Staff recommends continuing its efforts to identify and address illegally operating carriers (i.e. those without authorities or permits and no insurance on file with the PUC) and to remain focused on towing industry violations. Typically, towing complaints comprise a significant percentage of all complaints received at the PUC, as compared to all other types of transportation.

In addition, since 2020 presented numerous challenges for the Investigations and Compliance Unit, as it pertains to field work, inspections, and safety audits, new strategies and approaches to these safety duties are being explored and implemented, to ensure a safe and effective approach for both Transportation Staff and the transportation industry.

It should be noted that the Transportation Section is still operating at reduced staffing levels, as has been the case for the past few years. This has been due to budgetary issues, resulting from stagnant funding mechanisms and increased expenses. We are planning to address these issues, with the support of the Executive Director's Office (EDO), in the next legislative session. In the meantime, appropriate enforcement still remains a priority. We are also taking pertinent factors into consideration, such as the current socio-economic climate. Recent challenges and unique circumstances have given us an opportunity to review our current regulatory framework and best practices, in regards to safety.
