REPORT OF THE EXECUTIVE DIRECTOR

This forty-sixth annual report of the Department of Revenue is submitted in fulfillment of Section 24-35-102(3) C.R.S. which requires that the Executive Director inform the Governor and the General Assembly of "the efficient discharge of all responsibilities assigned by law or directive." The report covers the period between July 1, 1986, and June 30, 1987. It is with great pleasure that I report that to the best of my knowledge, all statutorily and administratively assigned responsibilities have been carried out faithfully and well.

The report, in addition to fulfilling the statutory requirement, is the significant source of information on Colorado state taxes. The report includes a detailed review of the Department of Revenue's organization structure, a digest of all relevant tax legislation passed at the 1987 General Assembly session and the latest values for the many statistical series which comprise the heart of this report.

This annual report contains for the first time a review of the Department of Revenue's major accomplishments and initiative for the fiscal year. It was an interesting and productive year. The review illustrates well the many and varied ways in which Revenue employees serve the people of the state.

The letter of the Revenue Director included in last year's annual report expressed the hope that the 1987 legislative session would produce simplification of this state's income tax laws. I am pleased to call your attention to the discussion on page 4 of this report concerning the passage during the 1987 session of the so-called "flat tax." Income tax simplification on the state level was indeed achieved.

INTRODUCTION

On March 14, 1941, then Colorado Governor Ralph L. Carr signed legislation that authorized the creation of the Department of Revenue effective July 1, 1941.

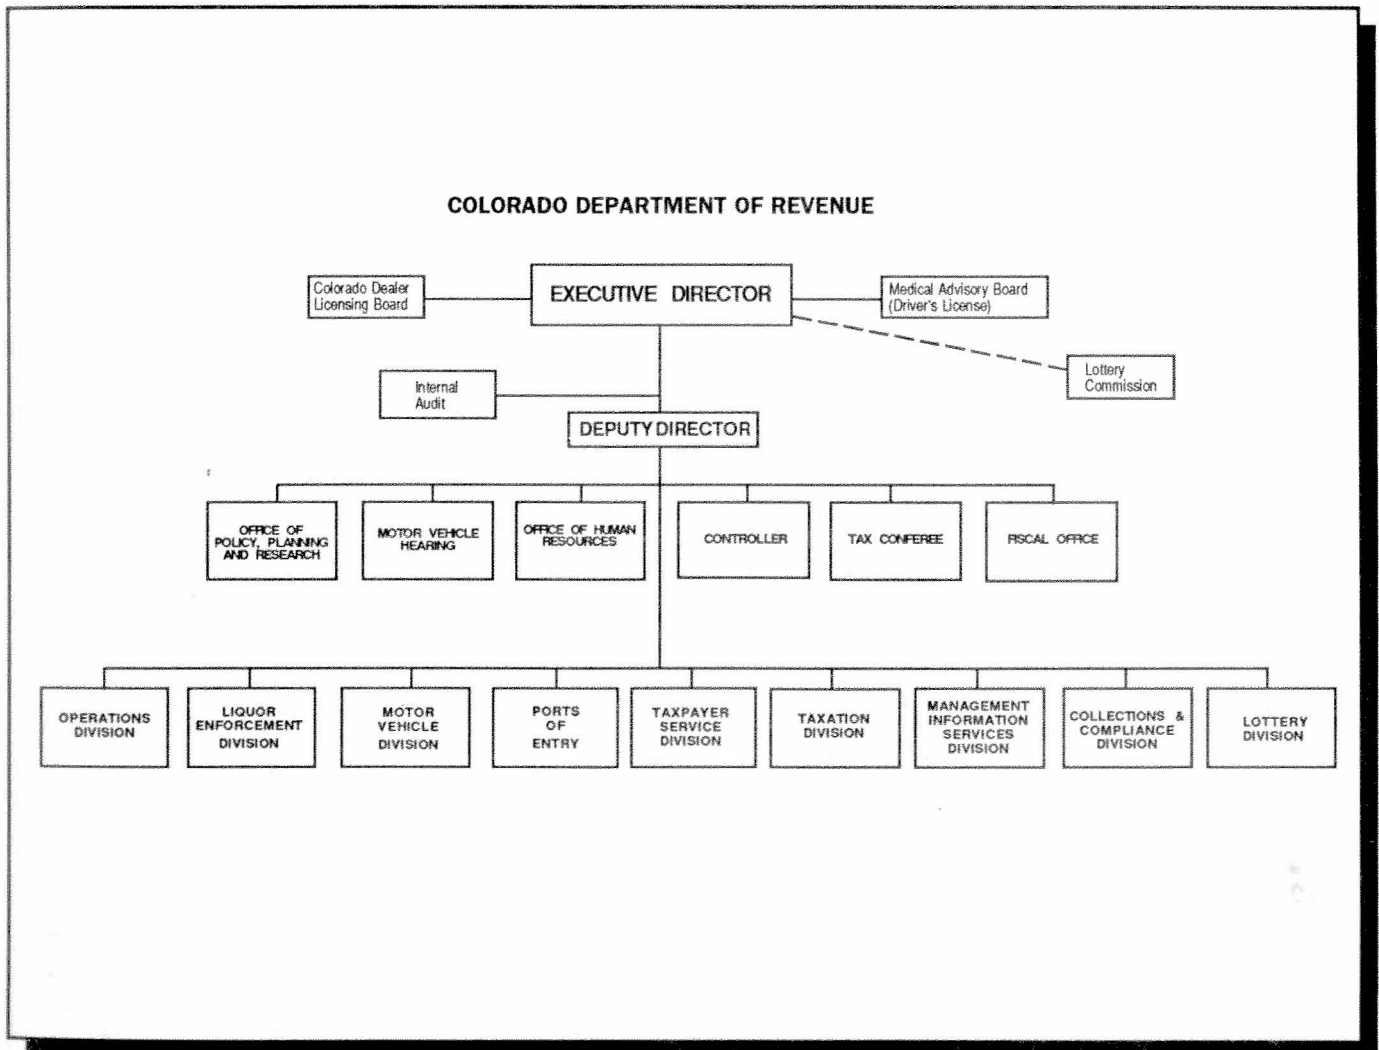

Farrington R. Carpenter, a Harvard-educated lawyer and cattle rancher from Hayden, was appointed the first Executive Director of the new department. At that time, there were 242 employees.

Since then, the revenue collected by the department has increased from \$33 million in 1942 to more than \$2.9 billion in fiscal year 1986-87.

Today, the department employs more than 1,500 employees. And, in addition to administering and collecting more than 94 percent of the state's revenue, the Department of Revenue also is responsible for:

- The Colorado Lottery.
- Licensing and regulation of alcoholic beverage manufacturers, importers, wholesales and retailers.
- The issuance and regulation of driver licenses.
- Motor vehicle registrations and titles.
- Enforcement of commercial truck safety requirements.
- Regulation of motor vehicle dealers.

The department long ago outgrew its headquarters building at 1375 Sherman, which was built in 1939 and remains the center for administrative personnel. Significant portions of the department's staff are now located in three other Denver facilities. The department also maintains: nine Collection and Compliance offices; four Lottery offices; 89 full- and part-time driver license offices; permanent ports of entry and mobile units in 16 cities; nine Taxpayer Service District Offices; and four Taxation District Offices statewide plus out-of-state audit offices in New York and Chicago.

Record Revenue Collected

During the 1986-87 fiscal year, the department collected a record \$2.9 billion in revenue while the costs of administration actually went down from the previous fiscal year

Year of Tax Compliance

Through extraordinary employee effort, the department was able to fulfill its promise to follow-up its successful 1985-86 Tax Amnesty/Fair Share effort with a "Year of Tax Compliance" as evidenced by:

- Fair Share collections of more than \$10 million in 1986-87.
- A 20.9 percent increase in delinquency collections.
- A record \$66.7 million in assessments resulting from audits.

Automation and Progressive Management Boost Productivity

In fact, almost every aspect of the department's operations showed record achievements due to the ingenuity and dedication of the workforce which was often boosted by improved use of automation:

- A statewide computer network to automate motor vehicle registrations was installed ahead of schedule and under budget .
- A computerized telephone dialing system improved phone collection of delinquent taxes by 180 percent.
- Another special phone system enabled the department to answer 704,105 taxpayer questions--an increase of 71,000 callers over the previous year.
- All preparatory work was completed for implementation on July 1, 1987 of a computerized vehicle emissions test that is tied into the state's vehicle registration program--the first such program in the nation.

New management tools and methods were used to find better ways to do "more with less." Among the biggest successes was the intro-

duction of a comprehensive Quality Improvement Program in the Operations Division, which included establishing statistical process controls in all sections and creating quality circles. The program was so successful that it will be replicated in all other divisions in coming years.

"Squeaky Clean" Lottery Exceeds Sales Projections

The Colorado Lottery exceeded its own sales projections by selling \$113.3 million in tickets and cut administrative expenses \$4.4 million . An eight-month legislative audit found the Lottery to be "squeaky clean" and resulted in a vote to continue the Lottery for another 10 years.

Flat Tax Bill Passes

The department's fiscal year ended on a high note with passage of House Bill 1331, which represents the most significant reform to Colorado's income tax laws in more than 20 years. The tax reform measure was both a response to the federal Tax Reform Act of 1986 and a response to the public's demand for a simpler state income tax structure. Under the new state law, which is effective January 1, 1987, Colorado's individual income tax went from graduated tax rates based on modified federal adjusted gross income to a single rate of 5 percent based on federal taxable income.

State Collects \$16.9 In Tax Cheater Crackdown

DENVER (AP) — Colorado has collected \$16.9 million in its crackdown on tax cheaters and a Denver man has gone to jail during the year-long drive, says Alan Charnes, the state's revenue director.

Charnes said on Monday his department's "Fair Share" program to track down would-be tax evaders raised \$10.5 million in the year that ended July 31. That's \$1 million more than he promised legislators last year.

The state Legislature approved a

themselves in when they had the chance.

Last year's amnesty raised \$6.4 million from tax evaders.

Charnes said Monday that the crackdown also led to a three-year prison sentence last Friday against Donald Dean Russell, of Denver.

Russell pleaded guilty to one count of forgery and one count of fraud against the state Department of Revenue, plus a theft charge in an unrelated case, according to Charnes.

PUBLIC SERVICE ALWAYS A PRIORITY

Another "No-Interest" Income Tax Season

In addition to answering a record number of taxpayer questions during the 1986-87 income tax filing season, the department processed a record 1.66 million income tax returns with fewer people than were used to process 1.2 million returns in 1976. Taxpayers who were entitled to refunds also received them faster than in any previous year. In fact, all error-free returns were processed within the legal time limit. This resulted in no interest being paid by the state on refunds for the second consecutive year.

Handicapped Residents Respond Favorably to New Hangtags

The department introduced the use of plastic "hangtags" for display on rearview mirrors or dashboards in vehicles parked in spaces reserved for the handicapped. The hangtags, which fit easily into a purse or pocket, are easier to transfer from vehicle to vehicle than the metal placards that used to be issued to handicapped residents. About 37,000 Coloradans qualify for handicap parking and many have responded favorably to the hangtags. The hangtags cost the department 10 cents each as compared to \$1.05

for metal placards resulting in significant cost savings to the state.

Port of Entry's Role Increases

The Port of Entry Division's safety and hazardous material inspection program grew to encompass nine full-time inspectors, 34 part-time inspectors and a full-time coordinator. Legislation passed during the 1986-87 fiscal year expanded the Port of Entry Division's authority to inspect and regulate highway transportation of nuclear waste materials.

In 1986-87, Port of Entry personnel conducted more than 13,000 safety and hazardous materials inspections during which more than 56,000 violations were detected. Fifty-three percent of all trucks inspected were placed out-of-service for major violations. Unsafe brakes topped the list of safety violations cited.

Motor Vehicle Case Law Compiled for First Time

The Motor Vehicle Hearing Section created the first-ever compendium of all motor vehicle case law as a reference for use by attorneys, police agencies, prosecutors and judges, in addition to depart-

ment hearing officers. The compendium is divided into two sections: (1) a digest that allows research by topic and (2) a case summary section which contains a one-page summary of each case. In cooperation with the Distributive Data Processing System staff, the Motor Vehicle Hearing Section also developed a computer program that monitors the progression of appeals through the courts and automatically generates reports on the status of appeals in response to requests for this information.

Filing of Withholding Returns Made Easier for Employers

In January Colorado employers received "coupon books" containing all the forms needed to maintain their wage withholding accounts for an entire year. The decision to begin sending the coupon books once a year in lieu of separate returns each filing period was based on a cost-benefit analysis conducted the previous year. Additional cost savings were realized by using in-house desktop publishing in the booklet's design. Experience in other states that use coupon books indicated that the books are more convenient for taxpayers because they know in advance the types of forms they need to file.

QUALITY IMPROVEMENT PROCESS PROVES THAT GOOD IDEAS ARE CATCHING

In the 1985-86 fiscal year, the Operations Division implemented a comprehensive Quality Improvement Process (QIP) that proved so successful in 1986-87 that the department decided to replicate the program in all divisions in the coming years.

QIP objectives were to improve the quality of services, establish process controls to better meet workload demands and solve problems that arise within a given work unit or group.

Today, every section within the Operations Division has established statistical process controls, i.e., statistical analyses of tasks and processes that provide ongoing evaluations of performance. The goal of these process controls is to prevent errors rather than identify

them after the fact. Among other reports, performance on all major tasks are graphed monthly to provide "bare-bone" facts in a manner that presents a clear diagnosis of production problems. The graphs also compare projected versus actual performance and workload capacities.

Quality circles form the other major component of QIP. Participation in the circles is voluntary. More than 75 employees in the Operations Division have been trained in problem solving, data collection and statistical reporting through their involvement in quality circles. Improved quality is the primary goal of the quality circles, although improved productivity is often a by-product of quality improvements. Equally significant is the improved morale and self-esteem among employees for whom quality circles provide higher degrees of control over their jobs.

MAJOR INCOME TAX REFORM BILL PASSED

5% Flat Tax Results in Simpler Form for Individuals

On June 22, 1987, Governor Roy Romer signed House Bill 1331, which represents the most significant reform of Colorado's state income tax laws in more than 20 years. The bill's major accomplishment is to streamline the Colorado income tax structure by establishing a single "flat" tax rate of 5 percent for individuals effective for tax years that began on or after January 1, 1987.

As a result of the flat tax bill, Coloradans can expect a shorter, simpler state income tax form. Because the 5 percent flat tax is based on federal taxable income, many modifications and calculations that required space on the form are no longer needed.

The flat tax bill represents the Colorado General Assembly's response to changes in the federal tax structure as a result of the Tax Reform Act of 1986, as well as to ongoing public demand for simplification.

How the 1987 Colorado individual income tax differs from 1986 tax provisions:

Fair Share Nets \$10 Million

In its fourth year, Colorado's Fair Share Program continued to prove itself an effective means to generate revenue and discourage tax evasion through innovative projects to detect non-compliance with state tax laws. Total collections were over \$10 million for the fiscal year.

Fair Share projects that proved successful in past years were continued, such as the computerized match of federal against state income tax records for consistency in the amount of income reported and other factors. New projects, using data matching were developed to find underreporters and nonfilers.

Public information and taxpayer education projects are also important components of the Fair Share effort. The department began issuing monthly news releases to publicize stepped up property seizures of businesses that fail to remit one or more "trust fund" taxes, such as retail sales and income withholding taxes. The releases serve to educate the public that such businesses have violated a trust with customers who paid sales tax and

employees from whom withholding was deducted from their paychecks. Such negative publicity also deters other businesses from falling behind in their tax responsibilities.

Delinquency Collections Soar

The 1986-87 fiscal year also saw a 20.9 percent increase in collection of overdue taxes, penalties and interest by the Tax Collections and Compliance Division which was created in early 1986. Total collections for 1986-87 were \$49,939,157 as compared with \$41,292,763 the previous year.

Much of the increased production was due to the addition of "Auto-dialer" to the department's arsenal of computerized tax debt detection and collection tools. Auto-dialer is a computerized telephone dialing system that enables the six-person Phone Power Unit to place 5,000 calls a day to delinquent taxpayers compared to 375 calls placed manually before installation of this new equipment.

Concurrent with the installation of Auto-dialer was a new policy of contacting taxpayers by telephone

earlier in the collection process to help them find ways to satisfy their tax debts and avoid stiffer consequences. Earlier resolution is also less costly to the state. The net result was a 180 percent increase in Phone Power Unit productivity for the fiscal year.

The Tax Collections and Compliance Division also liberalized its policy toward installment payments of tax debts. A review of past policy showed that most requests for an "agreement to pay" were denied resulting in escalation of the collection process. The hardline, "all-or-nothing" approach often yielded nothing. Since expanding the agreement to pay program, collections resulting from installment payments now average \$175,000.

Audit Activity Sets New Record

Revenue agents in the Taxation Division posted a record \$66.7 million in assessments resulting from audits.

The computerized math audit and reasonability check of income tax returns identified an additional \$3.3 million in assessments.

Property seizures for back taxes net \$134,900 in March

By **JOHN SANKO**

Rocky Mountain News Capitol Bureau

A crackdown on tax evaders last month netted more than \$134,900 in back taxes, penalties and interest after property seizures in 15 Colorado cities, state revenue officials said yesterday.

Since the start of the fiscal year on July 1, Revenue Department officials have seized more than 300

properties in the program known as "Fair Share." In the previous

REVENUE AUTOMATES TO INCREASE PRODUCTIVITY

DDP Passes First Full Year of Use With Flying Colors

The 1986-87 fiscal year was the first full year of operation for the Motor Vehicle Division's Distributed Data Processing (DDP) System.

DDP is a statewide computer network that connects 60 of the state's 63 counties directly to the state's centralized computer records of motor vehicle titles and registrations. The system, which was implemented within budget and six months ahead of schedule, processed more than 5 million records, renewed about 3.5 million vehicle registrations and issued 1.5 million title certificates.

Most of this work was done manually before DDP. And those counties that had computer systems were not compatible with one another nor with the state. These factors combined with the 30,000 possible combinations of variables that exist in Colorado vehicle registration fee requirements produced an average of 17,500 paperwork errors a month for Department of Revenue employees to correct. This created a six-month lag in updating county account information, which caused special problems for law enforcement officers who need current vehicle registration information for investigations.

Today, the number of errors averages 20 per month. All county records are updated within 30 days. And information "on-line" enables counties to provide law enforcement agencies with current vehicle registration information within 24 hours in most cases.

Technological Advances Aid Taxpayers Who Need Help

Despite budget-driven staff cutbacks and the closure of a district office in Salida, the Taxpayer Service Division provided direct assistance to a record 879,977 taxpayers.

Installation of a computerized system to manage in-coming telephone inquiries played a large role in enabling a lean staff to answer 704,105 calls—71,000 more than in 1985-86. The new system automatically directs calls to open lines and provides detailed management reports to allow for optimal use of personnel resources.

Expanded efforts to recruit, train and place volunteers who help low-income elderly and handicapped taxpayers complete their tax forms supplemented employee efforts to provide walk-in assistance to 175,872 taxpayers—30,000 more than in 1985-86.

Colorado First to Computer-Link Emissions and Registrations

During the 1986-87 fiscal year, the Motor Vehicle Division also completed all preparatory work needed to implement on July 1, 1987 a new requirement that vehicles subject to emissions standards pass the emissions test in order to be registered.

A key component of this project was installation of automated emissions testing equipment at all test locations. The equipment greatly reduces the potential for

human error and fraud in the testing process. Computerized records of test results and stickers issued enabled Colorado to become the first state in the nation using a fully computerized testing system linked to the registration process.

Automation Improves Internal Programs

Automation was also used to improve the efficiency of many aspects of the department's day-to-day functions. For example, a study conducted during the year revealed that 40,889 staff hours were time displaced through expanded use of PCs and mini-computers under the Office Automation Program. The introduction of desktop publishing in the Graphics Section provided the department with more control over the quality of its forms and publications. The Taxation Division programmed a personal computer to automate the audit selection process as a means to concentrate resources more effectively. A new software program installed in the Mailroom enabled the department to enhance its use of postage discounts. Overall, automation has allowed the department to produce more work in less time, often handling increased volumes of work without additional resources.

LEGISLATIVE DIGEST

LEGISLATIVE DIGEST

Summary of Senate (S.B.) and House Bills (H.B.) pertaining to taxes collected and/or administered by the Department of Revenue. All bills were enacted by the Fifty-Sixth General Assembly, 1987 First Regular Session. Statutory references are from the Colorado Revised Statutes.

ADMINISTRATION:

S.B. 50 Financial responsibility requirements - regulated commercial activities - alternatives - liens to secure taxes. Alters the form of financial responsibility that is required for various types of licensees and agents as a condition to licensure or authority to conduct business or perform duties in this state. Depending upon the particular type of licensee or agent, offers the following alternatives to the requirement of filing a bond as evidence of financial responsibility: Evidence of a savings account, deposit, or certificate of deposit or an irrevocable letter of credit. Specifies certain criteria for an irrevocable letter of credit. Eliminates the requirement of any form of evidence of financial responsibility for other types of regulated entities. Provides for the imposition of liens for nonpayment of excise taxes on alcoholic beverages, fermented malt beverages, gasoline, and special fuels. Creates the licensed agent recovery reserve to replace the bond requirement for licensed lottery sales agents. Specifies that reserve shall be financed by a fee assessed upon each licensed sales agent, the amount of the fee and the frequency with which it shall be collected to be established by the Colorado lottery commission's rules and regulations. Provides that payments be made from the licensed agent recovery reserve to the lottery fund when a licensed sales agent has failed to remit moneys owed to the lottery. Permits the director of the state lottery division to initiate license revocation proceedings against the licensee if a payment is made out of the fund. Permits the distributor or refiner of gasoline or the distributor of special fuel who has been licensed for a specified number of years and who, during that time period, has not been delinquent in the payment of the excise taxes imposed on him to forego filing a bond or other evidence of financial responsibility as a condition of licensure. Reinstates the requirement for a form of financial responsibility if such license becomes delinquent in his tax payments. Effective July 1, 1987. Adds 11-35-101.5; 12-46-111.5; 12-47-127.5; 12-51.5-202(9); 12-60-112(2.5); 24-35-219; 39-27-104(2.5); 39-27-105.5; 39-27-204(4.5), (6); 39-27-205.5. Amends parts of Title 10, Title 11, Title 12, Title 24, Title 33, Title 35, Title 37, Title 39, and Title 42. Repeals and reenacts 42-3-126(4). Repeals 12-46-111(8); 12-47-127(7); 12-55.5-105(1)(d); 35-14-109(2); 42-3-125(4).

H.B. 1036 Delinquent taxes - collection from Colorado residents - contracts for collection services. Authorizes the executive director of the department of revenue to contract with 2 or more debt collection agencies or attorneys for collection of taxes, penalties, and interest from Colorado residents whose taxes are more than 12 months overdue. Requires the collection agency to file a bond of between \$100,000 and \$500,000, with a fidelity and surety insurance corporation as surety, to guarantee compliance with the terms of the contract. Effective July 10, 1987. Adds 39-21-114(8)(b.5). Amends 39-21-114(8)(b), (8)(c), (8)(d).

H.B. 1362 Regional transportation district - department of revenue to retain moneys for costs of collecting and administering sales tax. Provides that the net cost to the department of revenue of collecting and administering any sales tax imposed by the regional transportation district shall be retained by the department from the moneys collected from any such sales tax. Specifies that the cost of collecting and administering such sales tax shall be the audited net incremental cost thereof reduced by the amount of interest earned on such sales tax collections prior to distribution to the district. Effective January 1, 1988. Amends 32-9-119(2)(c)(II).

ALCOHOLIC BEVERAGES

S.B. 94 Wine - interstate shipment to adult Colorado residents. Allows an adult resident of another state or a holder of an alcoholic beverage license in another state to ship not more than 2 cases of wine per month (not exceeding 9 liters per case) for personal use to any adult in Colorado if the state in which such adult or licensee is a resident allows similar wine shipments to its adult residents from Colorado. Provides that such shipments of wine to Colorado do not constitute a sale in Colorado. Requires that shipping containers of such wine shipments into or out of Colorado shall be labeled to forbid delivery to minors or intoxicated persons.

ESTATE TAX

The Colorado Inheritance Tax, a tax on the right to receive property by descent or testamentary gift, shall by statute continue in full force and effect until all of the taxes collectible from the estates of decedents dying on or before December 31, 1979, have been collected.

The Colorado Gift Tax, a tax on the gratuitous transfer of property, has been abolished for transfers occurring on or after January 1, 1980. The Colorado Gift Tax shall by statute continue in full force and effect until all of the taxes collectible as a result of transfers of property by gifts occurring on or before December 31, 1979, have been collected.

The Colorado Estate Tax replaces the Inheritance Tax for decedents with a date of death on or after January 1, 1980. The Estate Tax provides for the pickup of the state death tax credit allowable on the United States Estate Tax Return. This credit results in a reduction in the federal tax equal to the amount paid to the state.

If the decedent died during the 1987 calendar year, representatives of the estate would not be required to file a Colorado Estate Tax Return unless the gross estate exceeded \$600,000 the figure that triggers the filing requirement for the United States Estate Tax Return. Currently there is an unlimited marital deduction.
