Annual Report to the House and Senate Judiciary Committees
January 28, 2011

Fiscal Year 2010 (FY10) was the third year in which SB318 funds were available. The Legislature appropriated 2.2 million dollars, which was allocated to the districts based on a formula that took into account the number of drug offense filings and population. Each judicial district received a minimum of \$25,000 to implement project plans developed by their local Drug Offender Treatment Board, members of which are located in Attachment A. Attachment B includes the formula for distribution of the funds.

The districts expended 90.1% of the fund, a total of \$1,938,028, in FY10. As seen in Attachment C there were a total of 2,315 treatment admissions through SB318 funded services. Drug Court clients, adult and juvenile, made up 12.1% (279) of all new admissions. Figure 1 displays new client admissions for FY10. Of new admissions, 93.5% (2,164) of services were rendered to adults and 6.5% (151) to juveniles. For adult admissions, 69.0% (1,493) were male and 31.0% (671) were female; whereas, 77.5% (117) of juveniles receiving services were male and 22.5% (34) were female.

Figure 1

Success rates by group are displayed in Figure 2. Of all 2,101 completions in FY10 84.9% (1,784) were successful. Adult males had the best success rate (86.9%) with 1,216 of 1,400 males successfully completing treatment. Adult and juvenile females had the next best rates at 85.9% (498 of 580) and 74.1% (20 of 27), respectively. Although juvenile males did not fare as well, the majority of them still completed their treatment successfully. Of the 94 juvenile male terminations, 50 of them, or 53.2%, completed their enrollment successfully.

Figure 2

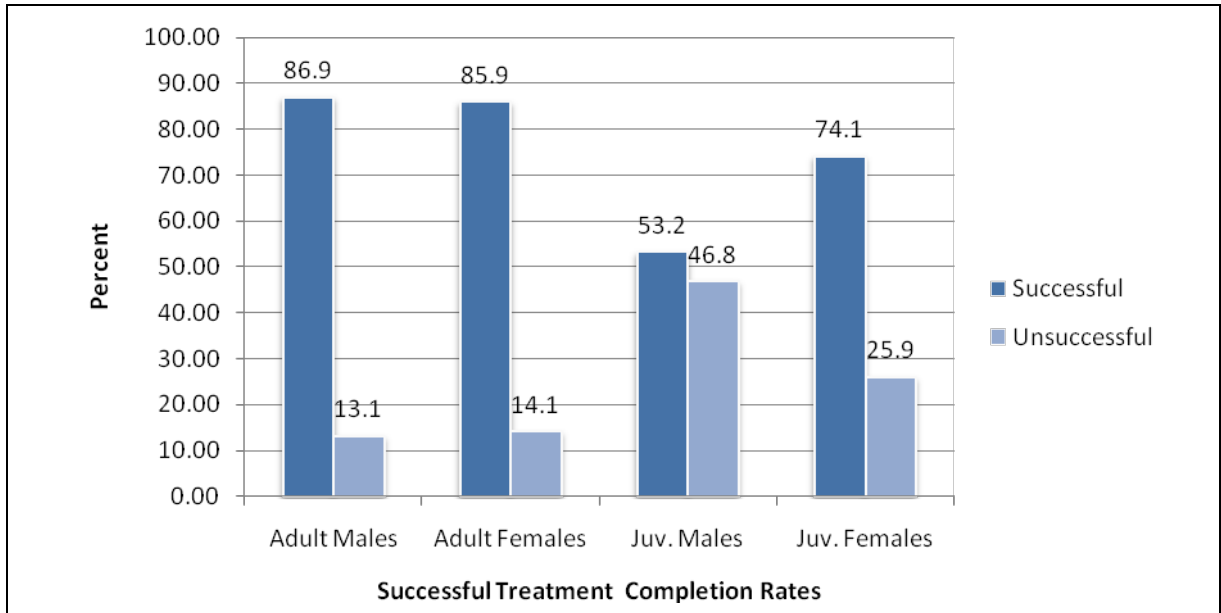

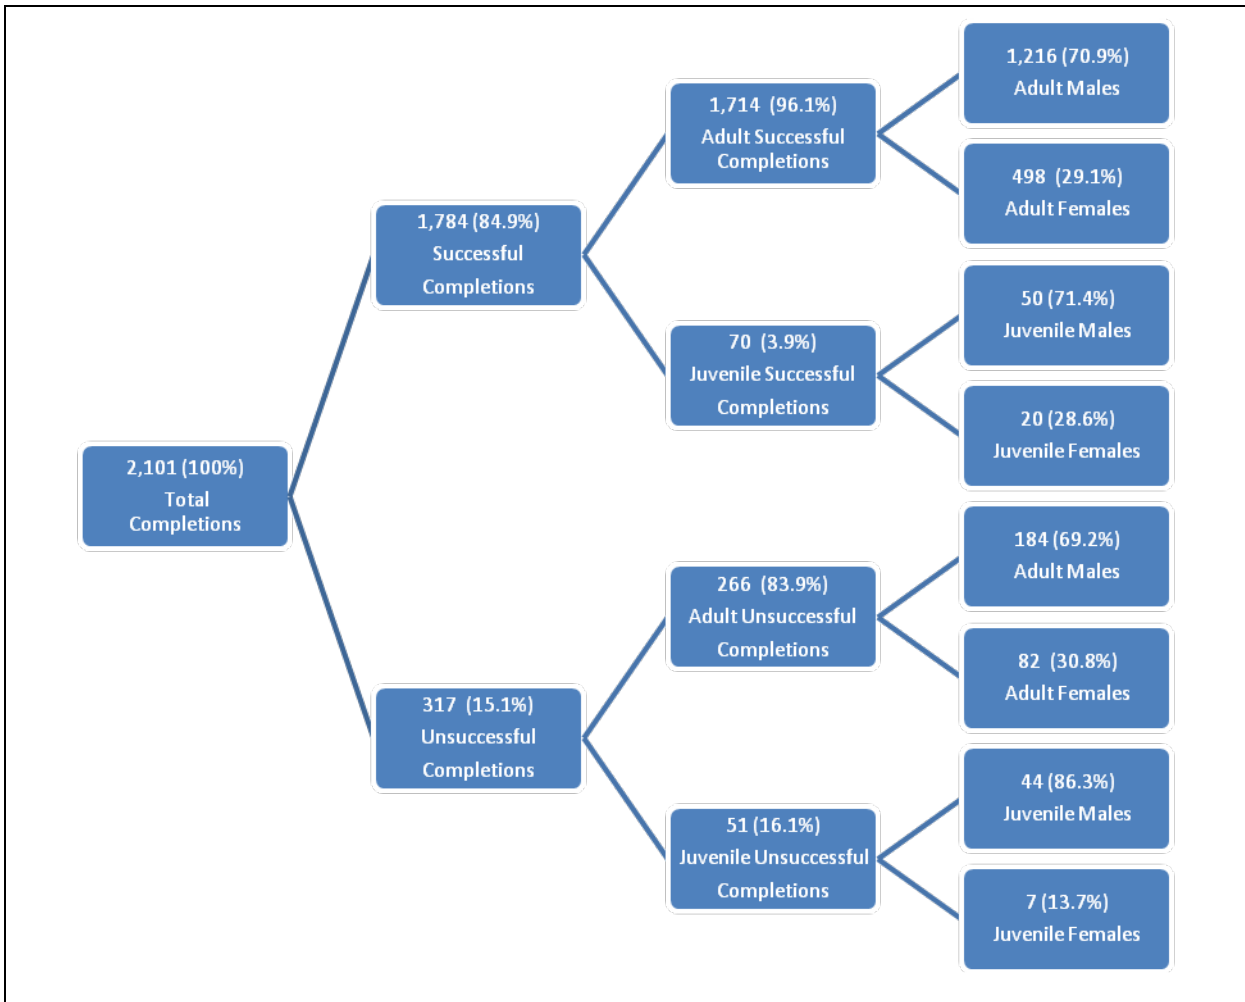

Figure 3 displays the breakdown of the 2,101 total treatment completions this year. Drug Court clients, adult and juvenile, made up 5% (86 not pictured) of all successful completions. Of all completions, 84.9% (1,784) were successful. Within the successful completions, 96.1% (1,714) were adult and 3.9% (70) were juvenile. The adult successes consisted of 70.9% (1,216) male and 29.1% (498) female clients. The juvenile successes included 71.4% (50) male clients and 28.6% (20) female.

As seen in Figure 3, of the total completions, 15.1% (317) were unsuccessful. Within the category of unsuccessful discharges, 83.9% (266) of the clients were adults and 16.1% (51) were juveniles. Of the unsuccessful adults, 69.2% (184) were male and 30.8% (82) female. In contrast, 86.3% (44) of the unsuccessful juveniles were male and 13.7% (7) were female.

In addition to all the treatment completions this year, another 214 clients, who were counted as new admissions, remained in treatment at the end of the fiscal year. In other words, there were 2,315 new admissions, of which 2,101 completed treatment and 214 remained in treatment.

Regarding type of treatment, weekly outpatient was used more than any other treatment type. A total of 65.1% of all new admissions accessed weekly outpatient treatment with SB318 funds, while intensive residential, enhanced outpatient and intensive outpatient treatment were accessed the most by the remaining 34.9% of the new admissions. A small percentage of clients (31 of 2,315) utilized SB318 funding to enroll in therapeutic communities or transitional residential placements.

Figure 3

In sum, 2,315 adult and juvenile offenders received treatment that they may not have been able to access without the availability of SB318 funds.

Lastly, as required by statute, Attachment D includes all agencies that received funds from SB318, as well as the amount and the target population, detailed on the Report to the ITFT and Judiciary Committees form.

19th Judicial District

Agency: North Range Behavioral Health
Amount: \$71,704.00

Target Population: The 19th Judicial District has a significant jail overcrowding problem. We believe that utilizing funding for substance abuse can help reduce the jail as well as the prison population. We plan to target defendant's who are currently or at risk to be incarcerated. Due to the increase in Methamphetamine use in this district, we anticipate a large number of methamphetamine users. We will also use this funding for drug court clients.
