Annual Report to the House and Senate Judiciary Committees
January 27, 2012

Fiscal Year 2011 (FY11) was the fourth year in which SB318 funds were available. The Legislature appropriated 2.2 million dollars, which was allocated to the districts based on a formula that took into account the number of drug offense filings and population. Each judicial district received a minimum of \$25,000 to implement project plans developed by their local Drug Offender Treatment Board, members of which are located in Attachment A. Attachment B includes the formula for distribution of the funds.

The districts expended 89.8% of the fund, a total of \$1,975,743, in FY11. As seen in Attachment C there were a total of 1,978 treatment admissions through SB318 funded services. Drug Court clients, adult and juvenile, made up 22.1% (434) of all new admissions. Figure 1 displays new client admissions for FY11. Of new admissions, 94.6% (1,872) of services were rendered to adults and 5.4% (106) to juveniles. For adult admissions, 69% (1,293) were male and 31% (579) were female; whereas, 70.7% (75) of juveniles receiving services were male and 29.3% (31) were female.

Figure 1

Success rates by group are displayed in Figure 2. Of all 1,671 completions in FY11 78.7% (1,316) were successful. Adult males had the best success rate (80%) with 857 of 1,070 males successfully completing treatment. Adult and juvenile females had the next best rates at 79% (394 of 499) and 77% (17 of 22), respectively. Although juvenile males did not fare as well, the majority of them still completed their treatment successfully. Of the 80 juvenile male terminations, 48 of them, or 60%, completed their enrollment successfully.

Figure 2

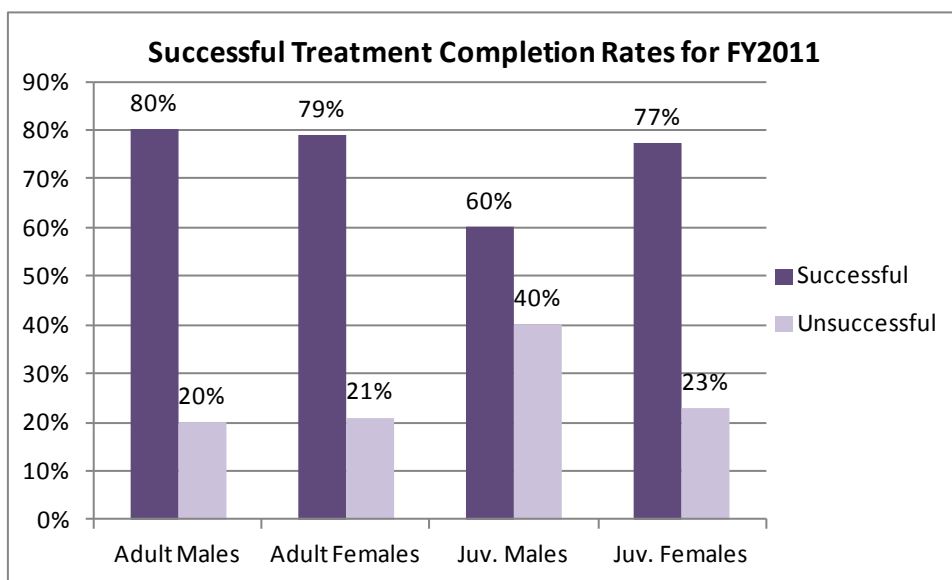

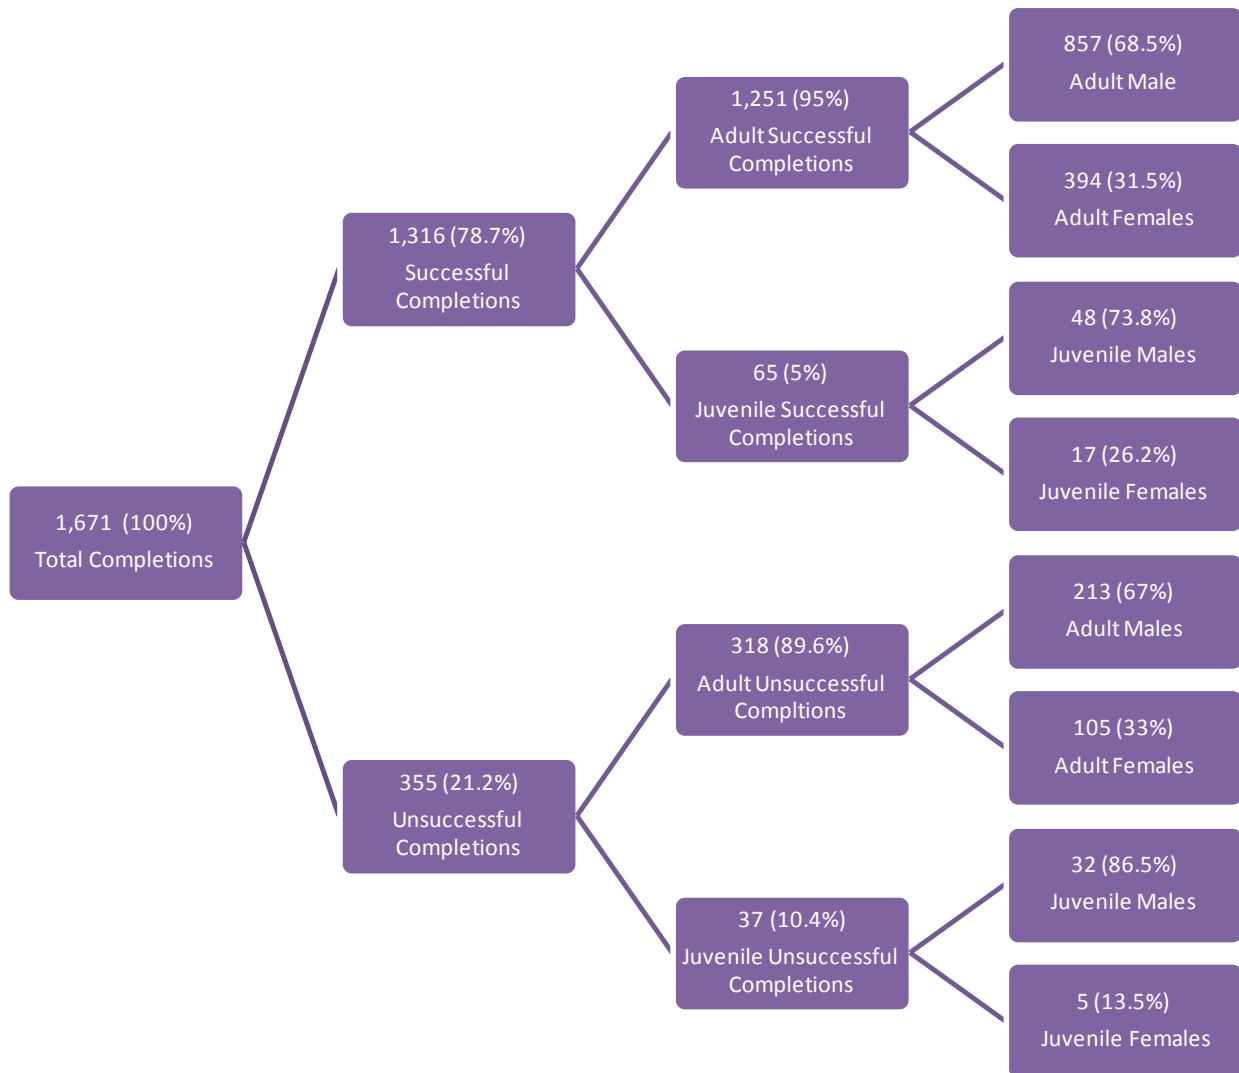

Figure 3 displays the breakdown of the 1,671 total treatment completions this year. Drug Court clients, adult and juvenile, made up 12% (158 not pictured) of all successful completions. Of all completions, 78.7% (1,316) were successful. Within the successful completions, 95% (1,251) were adult and 5% (65) were juvenile. The adult successes consisted of 68.5% (857) male and 31.5% (394) female clients. The juvenile successes included 73.8% (48) male clients and 26.2% (17) female.

As seen in Figure 3, of the total completions, 21.2% (355) were unsuccessful. Within the category of unsuccessful discharges, 89.6% (318) of the clients were adults and 10.4% (37) were juveniles. Of the unsuccessful adults, 67% (213) were male and 33% (105) female. In contrast, 86.5% (32) of the unsuccessful juveniles were male and 13.5% (5) were female.

In addition to all the treatment completions this year, another 307 clients, who were counted as new admissions, remained in treatment at the end of the fiscal year. In other words, there were 1,978 new admissions, of which 1,671 completed treatment and 307 remained in treatment.

Regarding type of treatment, intensive outpatient was used more than any other treatment type. A total of 44.3% of all new admissions accessed intensive outpatient treatment with SB318 funds, while weekly outpatient, enhanced outpatient and intensive residential treatment were accessed the most by the remaining 47.4% of the new admissions. A small percentage of clients (31 of 1,978) utilized SB318 funding to enroll in therapeutic communities or transitional residential placements.

Figure 3

In sum, 1,978 adult and juvenile offenders received treatment that they may not have been able to access without the availability of SB318 funds.

Lastly, as required by statute, Attachment D includes all agencies that received funds from SB318, as well as the amount and the target population, detailed on the “Report to the ITFT and Judiciary Committees” form.
