PUBLIC WELFARE IN COLORADO

1959

Effective January 1, 1959, the \$85.00 per month ceiling was removed in the Aid to the Needy Disabled program. Payments to Aid to the Needy Disabled recipients were increased to reflect 100 per cent of the budgeted need less any income received.

Assistance payments to some recipients were reduced through increases in Old Age, Survivors, and Disability Insurance benefits effective with the OASDI payment received during February, 1959. Provisions which reduced the public assistance payments were: (1) Payments were made to dependents of disability insurance benefit recipients, (2) OASDI could be paid to dependent parents even though other eligible surviving dependents were involved, and (3) Increases in payments were made to all OASDI recipients.

Adoption Statutes were amended to require prospective adoptive parents to file a petition to adopt not more than 30 days after placement in the adoptive home. Hearings on the petitions were fixed at not less than 30 days following filing of the petition. Under the revised statutes final adoption decrees could be obtained in 31 days following placement.

Home and office calls for Old Age Pension recipients were included in the Pension Medical Program effective July 1, 1959. Pensioners were entitled to a total of two of any combination of home and office calls within a calendar quarter. A maximum payment of \$3.00 for an office call and \$5.00 for a home call was established.

The Division of Services to the Blind was transferred to the Department of Rehabilitation effective July 1, 1959. The transfer included services and funds for services. Aid to the Blind Assistance remained with the Welfare Department.

A state-wide monthly food allowance was established in the Aid to Dependent Children, Aid to Needy Disabled, and Aid to the Blind programs with a monthly food allowance of \$12.00 for a child under six, \$15.00 for a child six through twelve, and \$20.00 for a child 13 through 17 and adults. Allowances for clothing, household supplies, personal needs and fuel were adjusted and allowances were increased for electricity and education (for children under 18 years of age attending school) for the three programs.

Effective September 25, 1959 rates for hospitals and sanatoriums caring for Tuberculosis Hospitalization patients were increased \$2.00 per day.

Included in the Old Age Pension Medical Care program November 1, 1959 were

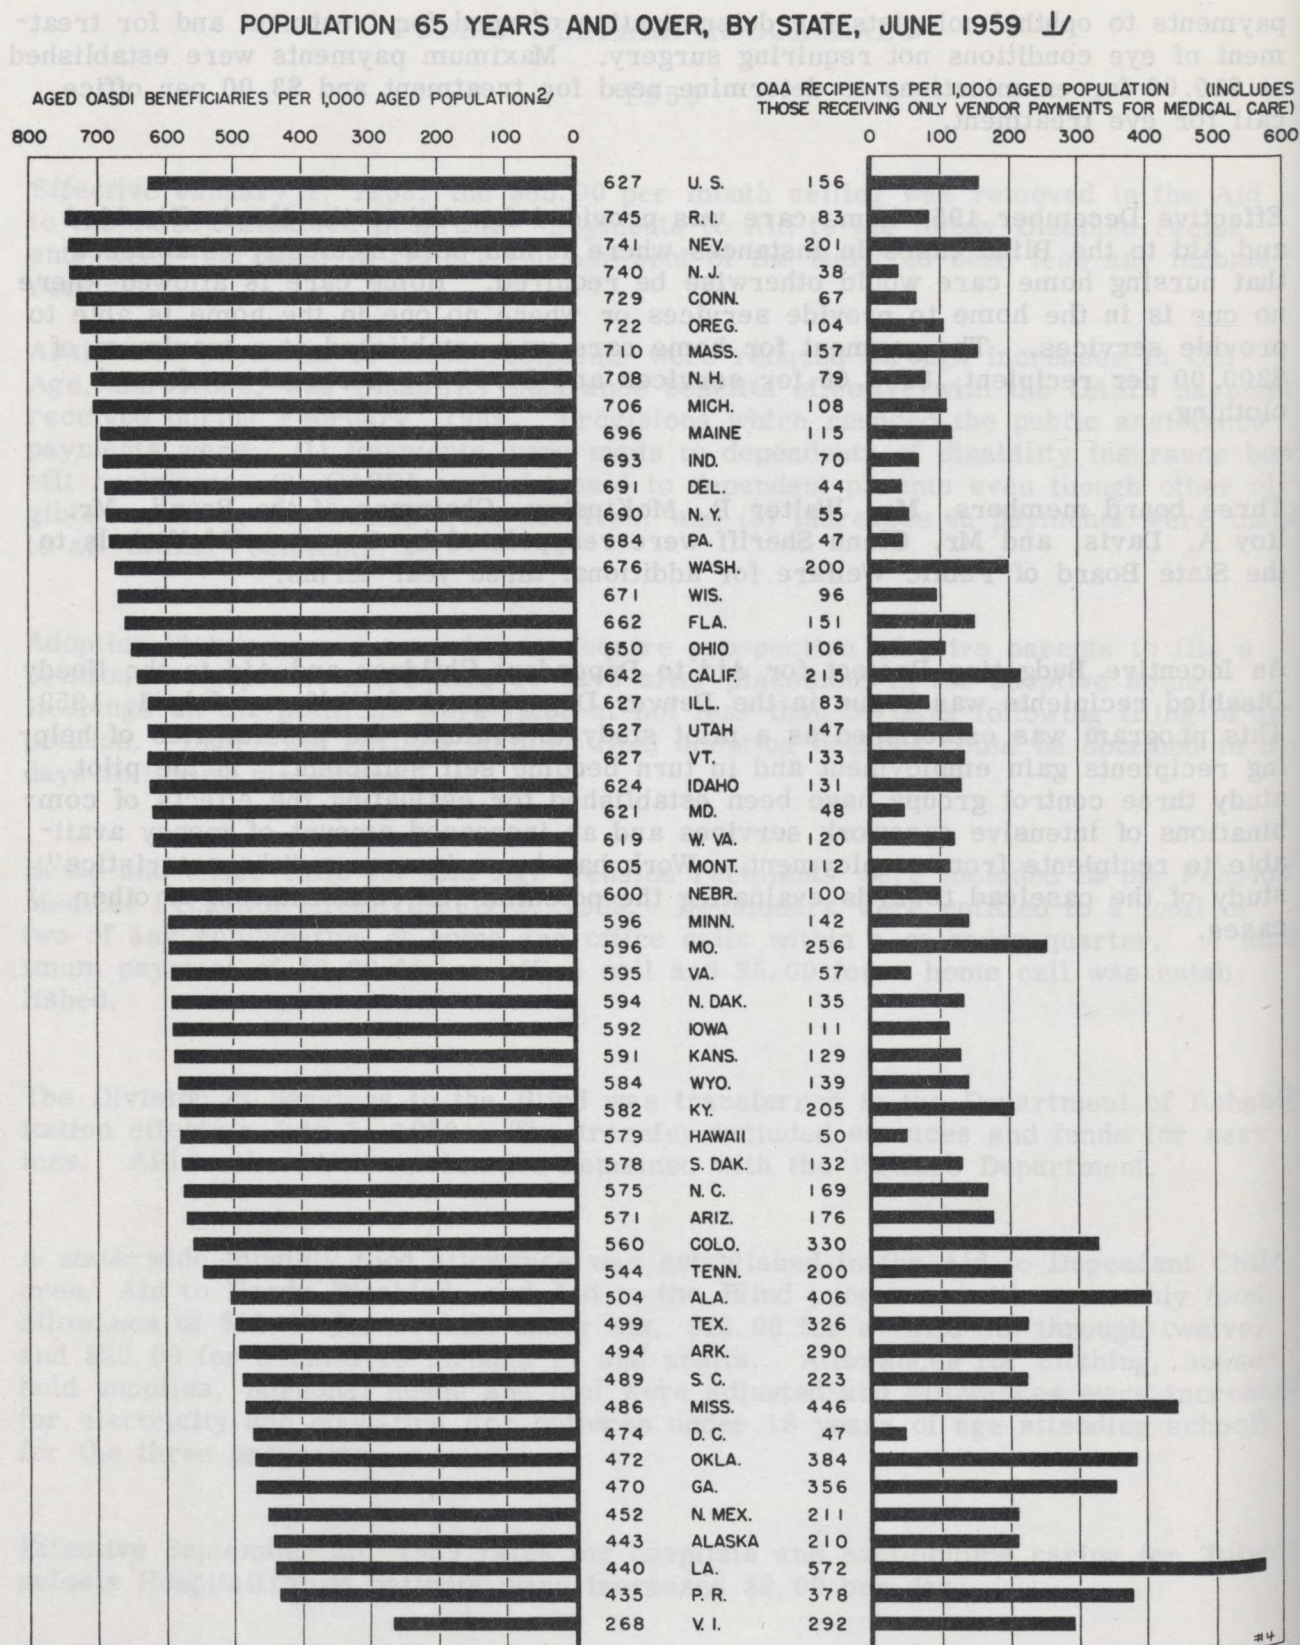

payments to ophthalmologists for determination of need for treatment and for treatment of eye conditions not requiring surgery. Maximum payments were established at \$10.00 for examinations to determine need for treatment and \$3.00 per office call for eye treatment.

Effective December 1959 home care was provided for Aid to the Needy Disabled and Aid to the Blind cases in instances where it had been medically established that nursing home care would otherwise be required. Home care is allowed where no one is in the home to provide services or where no one in the home is able to provide services. The payment for home care was established at a maximum of \$200.00 per recipient, \$195.00 for services and \$5.00 for personal needs and clothing.

Three board members, Mr. Walter R. McKinstry, Chairman of the Board, Mr. Roy A. Davis, and Mr. Glenn Sheriff were reappointed by Governor McNichols to the State Board of Public Welfare for additional three year terms.

An Incentive Budgeting Project for Aid to Dependent Children and Aid to the Needy Disabled recipients was begun in the Denver Department of Welfare, July 1, 1959. This program was established as a pilot study to evaluate the possibilities of helping recipients gain employment and in turn become self-sufficient. In the pilot study three control groups have been established for evaluating the effects of combinations of intensive casework services and an increased amount of money available to recipients from employment. Work has been done on a "characteristics" study of the caseload towards evaluating the potential for rehabilitation of other cases.

OLD AGE PENSION

During 1959 the Old Age Pension caseload showed a decrease from 53,952 cases at the beginning of the year to 53,168 cases at the end of the year. This was a net decrease of 784 cases or a decrease of 1.5 per cent. The number of Class A pensioners (aged 65 and over) decreased from 48,169 to 47,691, Class B pensioners (aged 60-65) decreased from 4,071 to 3,807 and Class C pensioners (aged 60 and over and institutionalized) decreased from 1,712 to 1,670.

Applications for Old Age Pension totalled 6,936, of which 644 were carried forward from 1958 and 6,292 were received during 1959. Of these applications 5,272 were approved for assistance, 1,057 were denied as ineligible, 53 were otherwise disposed of, and 544 were in process at the end of 1959.

Payments for assistance and burial totalled \$53,570,095.50 for 1959. This was an increase of 0.62 per cent from \$53,241,492.12 expended during 1958. Vendor payments for Medical Care increased from \$5,705,897.25 during 1958 to \$8,718,528.78 during 1959, an increase of 52.80 per cent. The increase in vendor payments was due to several factors: medical care was begun during February 1958 and has been expanded to include various medical needs of pensioners at intervals since; billings for utilizations of drugs and physicians' services for pensioners in nursing homes, which were begun during December 1958 appear during 1959, home and office calls (a total of 2 per calendar quarter per pensioner) began July 1, 1959, and utilization of programs initiated during 1958 showed a continued increase. (For further information see Medical Care, page 14.)

Of the total expenditure of \$62,288,624.28 for Old Age Pensioners, \$24,488,607.95 (39.31%) was provided through federal funds, \$37,800,016.33 (60.69%) was provided through state funds.

A maximum monthly payment of \$105.00 per pensioner was in effect for the full year 1959. The average money payment was \$83.54. Average payment during 1958 was \$82.34. Three states--Connecticut (\$110.70), New York (\$107.02), and Massachusetts (\$102.63)--showed a higher average payment to recipients of Old Age Assistance than Colorado (\$97.20) during December 1959; average payment for the United States was \$65.86 per case. The average payment includes vendor payments for medical care. Exclusive of vendor payments for medical care, the average money payment of \$82.35 in Colorado during December 1959 was exceeded only by Connecticut with an average money payment of \$95.28.

The following table shows the distribution of expenditures by type of payment.

Type of Expenditure	Amount	Per cent of Total
Total	\$62,288,624.28	100.00
Money Payments and Burial	53,570,095.50	86.01
Hospitalization	5,209,851.23	8.36
Nursing Home Care	1,804,723.75	2.90
Physicians' Services	1,381,304.91	2.22
Medical	182,942.85	0.29
Cataract Surgery	80,561.39	0.13
Transportation	59,144.65	0.09

During June 1959 the recipient rate was 330 per 1,000 population aged 65 years and over. Recipient rates per thousand population age 65 years and over were higher in Louisiana with 572, Mississippi with 446, Alabama with 406, Oklahoma with 384, Puerto Rico with 378, and Georgia with 356.

Transfer between counties totalled 1,058 cases.

During February 1959 a total of 17,720 Class A pensioners received Old Age and Survivors Insurance. Old Age and Survivors Insurance payments were received by 36.95 per cent of the Old Age Pension, Class A, caseload and averaged \$46.02 per recipient.

During June 1959 in Colorado of every 1,000 persons 65 years of age or over, 330 were receiving Old Age Pension payments, 560 were receiving Old Age Survivors and Disability Insurance.

AID TO DEPENDENT CHILDREN

For the year 1959, the Aid to Dependent Children program (including Incentive Budgeting cases) averaged 7,054 cases and 21,285 children. The caseload increased from 6,983 cases in December 1958 to 7,101 cases in December 1959. This reflects a net increase of 118 cases, a percentage increase of 1.7 per cent. Over the same period the number of children under the program increased from 21,051 to 21,560. This was an increase of 2.4 per cent or a net increase of 509 children.

Applications for Aid to Dependent Children totalled 3,850 of which 263 were carried forward from 1958 and 3,587 were received during 1959. Of these applications 2,779 were approved for assistance, 762 were denied as ineligible, 21 were otherwise disposed of, and 288 were in process at the end of the year. The number of applications made for Aid to Dependent Children decreased 4.37 per cent from 1958.

Expenditures, including vendor payments for medical care, totalled \$10,541,096.34. This was an increase of 6.86 per cent over 1958 when total expenditures were \$9,864,737.71. Money payments to recipients were \$10,047,186.44 (95.31 per cent of the total). Expenditures for assistance were 7.11 per cent above 1958. Expenditures for medical payments were 2.01 per cent above 1958. Aid to Dependent Children monthly assistance payments averaged \$119.44 per case and \$30.96 per person.

A special study of characteristics of Aid to Dependent Children cases during August 1959 and projected to December 1959 showed the 21,560 children included in the program were distributed by age as follows: 7,022 were under six years of age, 9,540 were six through twelve years of age, 3,603 were 13 through 15 years of age, 1,395 were 16 or 17 years of age. More than three-fourths of the children on Aid to Dependent Children are under 13 years of age, one-third are under 6 years of age.

About one in five cases have been receiving Aid to Dependent Children six months or less. More than half have been on Aid to Dependent Children less than three years.

There were, during 1959, more short term cases. Although the over-all caseload increased by 118 cases the number of cases for whom assistance was discontinued increased from 2,342 during 1958 to 2,662 during 1959. The 13.66 per cent increase in discontinuations, while the total caseload increased, indicates that Aid to Dependent Children is received by a substantial number of families only long enough to make an adjustment in their economic circumstances.

Expenditures for incentive budgeting cases totalled \$14,960.45. Payments to Aid to Dependent Children cases included in the pilot program for incentive budgeting were made without Federal participation. Funds for incentive budgeting are provided on a ratio of 80 per cent from the State, 20 per cent from the County.

AID TO THE NEEDY DISABLED

The Aid to the Needy Disabled program showed an average caseload of 5,583 during 1959. The total caseload increased from 5,486 in December 1958 to 5,582 during December 1959. This was a net increase for the year of 96 cases or 1.7 per cent. A peak caseload for the year was shown in May with 5,633 cases.

Applications for Aid to the Needy Disabled totalled 2,660, of which 291 were carried forward from 1958 and 2,369 were received during 1959. Of these applications 1,727 were approved for assistance, 581 were denied as ineligible, 18 were otherwise disposed of, and 334 were in process at the end of the year.

Payments for Aid to the Needy Disabled totalled \$4,388,496.59, an increase of 11.2 per cent over the 1958 expenditures of \$3,946,724.18. The increase in payments came primarily from the removal of the \$85.00 ceiling on Aid to the Needy Disabled requirements effective January 1959. Payments were made during 1959 on the basis of budgeted need less income.

The average payment increased from \$58.37 during December 1958 to \$65.40 in December 1959.

About seven per cent of Aid to the Needy Disabled recipients received benefits under the provisions of Old Age, Survivors, and Disability Insurance.

Assistance payments were 12.0 per cent higher in 1959 (\$4,245,207.01) than in 1958 (\$3,791,482.74). However, payments for medical care decreased 7.7 per cent from \$155,241.44 in 1958 to \$143,289.58 in 1959.

Expenditures for incentive budgeting cases totalled \$2,733.85. Payments to Aid to the Needy Disabled cases included in the pilot program for incentive budgeting were made without Federal participation. Funds for incentive budgeting are provided on a ratio of 80 per cent from the State, 20 per cent from the County.

AID TO THE BLIND

Total expenditures for Aid to the Blind were \$331,114.31, a decrease of \$75,734.76 or 18.6 per cent from the \$406,849.07 spent during 1958. Payments for assistance decreased from \$260,308.46 to \$251,075.81. Medical payments decreased from \$30,910.25 to \$28,139.12. Treatment decreased from \$115,630.36 to \$51,899.38.

The average monthly caseload for Aid to the Blind (award cases only) in 1959 was 306 or a decrease of 4.97 per cent over 1958, while for treatment cases the monthly average in 1959 was 30 compared with 66 in 1958. The decrease in treatment cases was primarily due to inclusion of hospitalization and/or surgery for treatment of eye conditions in the Old Age Pension Medical Care Program.

The monthly average assistance payment increased from \$68.13 during December 1958 to \$69.63 during December 1959.

As of July 1, 1959 the Division of Services for the Blind was transferred to the newly created Department of Rehabilitation. Aid to the Blind now includes payments for assistance and/or medical care for Aid to the Blind payment recipients, and treatment for the restoration of sight or prevention of blindness for persons other than those included in the Old Age Pension Program.

Applications for Aid to the Blind money payments in process during 1959 totalled 67; 53 were received during the year, 14 were in process at the beginning of the year. Forty-five were approved for assistance, 14 were denied as ineligible, and eight were in process at the end of the year. There were 70 money payment cases discontinued during 1959, only one less than in 1958.

Applications for treatment totalled 180. Fifty applications were in process at the start of 1959, 130 were received during the year. Of the 180 applications 122 were approved for treatment, 37 were denied as ineligible, five were otherwise disposed of, and 16 were in process at the end of the year. Aid to the Blind Treatment cases discontinued during 1959 totalled 414, an increase of 29.78 per cent over 1958.

Expenditures for incentive budgeting were totalled \$14,880.45. Payments to dependent children cases included in the pilot program for incentive budgeting were made without Federal participation. Funds for incentive budgeting are provided on a ratio of 50 per cent from the State, 50 per cent from the County.

TUBERCULOSIS HOSPITALIZATION

Expenditures for Tuberculosis Hospitalization totalled \$395,999.15. This was a decrease of \$68,140.46 or 14.7 per cent from the \$464,139.61 spent during 1958.

Applications for Tuberculosis Hospitalization during 1959 totalled 187. Seven applications were pending at the close of 1958. During the year 185 were approved for various types of care, six were not approved, three were in process at the end of the year.

The monthly average caseload was 203 during 1959; 217 during 1958.

At the close of 1959, 68 cases were in sanatoria, 120 cases were in clinic care, and 108 cases were receiving outpatient care. At the end of 1958, 92 cases were in sanatoria, 100 cases were under clinic care, and 95 cases were receiving outpatient care.

The following table shows a comparison by reason for terminating sanatoria cases during 1958 and 1959.

Reason	1959		1958
	Total	153	173
Transferred to Clinic Care	50		54
Transferred to Outpatient Care	48		53
Discharged	15		20
Death	14		14

Non-Tuberculous	7		7
Disciplinary	-		2
No Longer in Need	5		1
To Another Facility	2		6

MEDICAL CARE

Colorado's medical care program began with hospitalization and physicians' services for Aid to Dependent Children and Aid to the Blind recipients and drugs for Aid to Dependent Children (children only), Aid to the Blind, and Aid to the Needy Disabled recipients in September 1957. Hospitalization and physicians' services were provided under a contract with Blue Cross - Blue Shield which was essentially the same as other contracts written by Blue Cross - Blue Shield. Medical Care provisions in these categories have remained unchanged since the beginning with the exception of removal of the mother or other adult relative from benefits under Blue Cross - Blue Shield due to a high rate of utilization.

Medical care for Old Age Pension recipients began January 20, 1958 with vendor payments for nursing home care and transportation. Transportation was limited to travel to and from outpatient clinics of a hospital for nursing home patients and to obtain medical care when necessary, in a hospital. Hospitalization and physicians' services were provided as of February 1, 1958 through an arrangement with Blue Cross - Blue Shield. After experience was gained to predict costs of various phases of medical care and funds became available physicians' services and drugs for patients in nursing homes, transportation for physicians rendering services in nursing homes, cataract surgery, and home and office calls were provided under the provisions of the medical care program.

The effect of the medical care program upon supplementation to categorical recipients from General Assistance funds can be noted under General Assistance, pages 16 and 17.

Old Age Pension

One or more phases of the pension medical program was utilized by 32,733 of the 58,393 persons who received Old Age Pension payments during 1959. Fifty-six per cent of the recipients of Old Age Pension during 1959 benefited from the medical care program.

Expenditures for medical care of pensioners totalled \$8,718,528.78 compared to \$5,705,897.25 during 1958. The increased expenditure is due to increased utilization of hospitalization, physicians' services, nursing home care, and transportation, and due to utilization of physicians' services and drugs for nursing home patients which began in December 1958 and home and office calls which began in July 1959.

Hospitalization Expenditures for hospitalization increased from \$3,784,783.26 in 1958 to \$5,209,851.23 during 1959, an increase of 38 per cent. Admissions during 1959 totalled 22,113 an increase of 5,461 admissions over 1958. Days of hospitalization during 1959, totalled 261,328 compared to 189,749 days of hospitalization during 1958. The average length of hospitalization increased from 11.4 days during 1958 to 11.8 days during 1959.

The hospital admissions, by sex, were 8,591 male and 13,522 female. The ratio of hospital utilization by male pensioners is somewhat higher than for female pensioners; male pensioners comprised about one-third of the total cases but accounted for nearly two-fifths of the hospital admissions.

Diseases of the circulatory system, primarily heart diseases, accounted for nearly one-fourth of all hospital admissions.

Physicians' Services Expenditures for physicians' services, which includes physicians' services in hospitals and nursing homes and home and office calls, totalled \$1,381,304.91 during 1959. Physicians' services in hospitals were the only items reflected in 1958 expenditures which were \$696,633.06. Physicians' services in hospitals during 1959 totalled \$1,192,324.81, an increase of 71 per cent over 1958. Physicians' services to pensioners in nursing homes totalled \$29,256.60.

Payments totalling \$159,723.50 were made for 46,718 home and office calls from July through December 1959.

Nursing Home Care The pensioner, from his monthly payment, paid \$100.00 per month towards his nursing home care. The additional charge, up to a maximum vendor payment of \$95.00 was supplemented from the medical care program. Payments from the medical care fund for nursing home care of pensioners were \$1,804,723.75 during 1959, an increase of 52 per cent over 1958.

Other Transportation increased 47 per cent, from \$40,324.05 in 1958 to \$59,144.65 in 1959. Drug expenditures for pensioners in nursing homes during 1958 were \$56.15 (one county submitted billings for the program begun in December 1958). Drug expenditures amounted to \$182,942.85 during 1959. Cataract surgery paid from the medical care fund during 1959 totalled \$80,561.39.

Aid to Dependent Children

Blue Cross premium payments to Aid to Dependent Children were \$338,181.30 in 1959 compared to \$319,416.28 during 1958. Blue Shield premium payments were \$111,035.30 during 1959, \$115,788.42 during 1958. Payments for drugs for children totalled \$44,693.30 during 1959 compared to \$48,995.37 during 1958. Expenditures for drugs decreased 8.8 per cent.

Aid to the Needy Disabled

Medical care for Aid to the Needy Disabled recipients provides drugs only. Expenditures for drugs during 1959 were \$143,289.58, a decrease of 7.7 per cent from expenditures of \$155,241.44 during 1958.

Aid to the Blind

The medical care program provides for Blue Cross - Blue Shield premium payments and drugs for Aid to the Blind recipients. Premium payments were \$16,533.00 for Blue Cross and \$5,327.30 for Blue Shield. Payments for drugs during 1959 were \$6,278.82.

GENERAL ASSISTANCE

Expenditures for General Assistance come entirely from county funds provided through local property taxes. Expenditures decreased 13.17 per cent from \$3,180,577.13 in 1958 to \$2,761,562.25 in 1959. The decrease is due largely to the reduced need for supplementing categorical recipients for medical care. The expanded Old Age Pension medical care program has greatly reduced the necessity for General Assistance supplementation for medical care.

Applications for General Assistance received during 1959 totalled 9,434, a 12.87 per cent decrease from 1958. In process at the beginning of the year were 324 applications. During the year 8,222 applications were approved for assistance, 1,210 were denied as ineligible, and 31 were otherwise disposed of, and 295 applications were in process at the end of 1959.

An average caseload of 1,775 cases received cash and/or kind assistance during 1959 compared to an average of 2,129 during 1958. This was a decrease of 16.63 per cent. The average monthly payment for recipients of cash and/or kind assistance was \$44.16.

The following table shows the distribution of General Assistance expenditures by type of assistance for 1959 and 1958 and a percentage change comparison.

	<u>1959</u>	<u>1958</u>	<u>Percentage Change 1959 from 1958</u>
Total Expenditures	\$2,761,562.25	\$3,180,577.13	- 13.17
Hospitalization	675,019.15	822,695.57	- 17.95
Assistance in Kind	551,514.27	574,592.98	- 4.02
Doctors and Drugs	539,537.06	571,285.96	- 5.56
County Hospitals	491,249.21	630,313.98	- 22.06
Cash Aid	388,944.95	473,033.18	- 17.78
County Homes	74,407.19	80,360.54	+ 7.41
Commodity Distribution ...	26,034.05	16,282.54	+ 59.89
Burials	14,856.37	12,012.38	+ 23.68

Payments from General Assistance to supplement categorical assistance payments are shown below for 1959 and 1958 with a percentage change comparison.

	<u>1959</u>	<u>1958</u>	<u>Percentage Change 1959 from 1958</u>
Total Costs for Supplementation \$	585,389.27	\$ 779,781.37	- 24.93
Aid to the Needy Disabled ..	274,669.67	362,949.53	- 24.32
Aid to Dependent Children ..	272,569.10	245,181.18	+ 11.17
Old Age Pension	28,667.72	160,428.15	- 82.13
Tuberculosis Hospitalization..	4,773.45	6,154.09	- 22.43
Aid to the Blind	4,709.33	5,068.42	- 7.08

Supplementation to categorical assistance programs declined 24.93 per cent from 1958 to 1959. Most pronounced was the decrease in supplementation to Old Age Pension recipients. The Old Age Pension Medical Care Program was initiated early in 1958 and has been expanded so that most of the pensioners medical needs are provided through the Medical Care Program. Supplementation to Aid to Dependent Children cases showed the only increase in supplementation. This increase was primarily for dental care and glasses for children and medical care for the Aid to Dependent Children mothers who were excluded from the medical care program early in 1958 because of a high rate of utilization. The decrease in supplementation to Aid to the Needy Disabled is mainly a result of the removal of the \$85.00 ceiling on payments effective January 1959.

The table below shows a comparison of 1959 with 1958 on the types of supplementation to Old Age Pension recipients exclusive of payments for burial.

	<u>1959</u>	<u>1958</u>	<u>Percentage Change 1959 over 1958</u>
Total Cost for Supplementation \$	28,622.72	\$ 160,423.75	- 82.16
Medical Care	13,179.77	37,084.98	- 64.46
Hospitalization	12,624.76	88,623.45	- 85.75
Nursing Home Care	2,818.19	34,715.32	- 91.88

CHILD WELFARE

Child Welfare expenditures during 1959 totalled \$905,202.68. This was an increase of \$141,449.46 or 18.5 per cent over 1958. The average monthly expenditure per child in foster care was \$72.39.

The monthly average caseload was 3,330 children of whom an average of 1,042 children each month were receiving foster care involving the expenditure of funds. A monthly average of 1,569 children were receiving casework services in the homes of parents or relatives. Most of the remaining children were in adoptive homes.

A total of 5,888 different children received various services under the Child Welfare Program during 1959.

The Child Welfare caseload at the end of December 1959 totalled 3,293 children. Of these 1,463 were in the homes of parents, 192 were in the homes of relatives, 1,520 were in foster care--955 in boarding homes, 329 in adoptive homes, 198 in institutions, and 38 in other types of foster care. Protective services to children cases accounted for 1,317 of the total 3,293 children.

County expenditures for Child Welfare Services totalled \$496,747.66 (54.88 per cent), State expenditures totalled \$395,327.05 (43.67 per cent) and Federal expenditures totalled \$13,127.97 (1.45 per cent). Payments for care of children in approved foster homes and institutions is shared equally by the State and County. Care includes a rate per day paid to the foster home or institution and allowances, personal supplies, medical care, hospitalization and transportation as needed by the child. Expenditures for transportation, medical care, hospitalization, and care in non-approved foster homes and institutions are made entirely from county funds.

Children in foster homes and institutions received a total of 339,792 days of care during 1959. The average cost per day was \$2.68. The following table shows obligations by items of care provided. (Figures shown have not been adjusted for cancellations or refunds).

<u>Item of Care</u>	<u>Obligations</u>	<u>Per Cent of Total</u>
Total	\$911,316.96	100.00
Foster Care Payments	765,467.18	84.00
Clothing	56,066.48	6.15
Medical Care	25,140.04	2.76
Hospitalization	22,782.55	2.50
Allowance	20,415.16	2.24
Personal Supplies	15,026.44	1.65
Transportation	6,419.11	0.70

During 1959 an average of 18 homemakers gave care to an average of 64 children per month.

LIBRARY

The Library plays an important role in the staff development programs of the State and county departments of public welfare. Material is mailed to an average of twenty-five different counties per month. Some county departments use the Library many times in the course of a month. In the course of the year, 46 different counties used the Library one or more times.

The book and pamphlet collection of the Library is comprehensive in the subject areas closely related to the administration of a public welfare program. The major subjects covered are public welfare and public assistance administration and supervision, casework, community organization, aged, medical care, child welfare, child study, juvenile delinquency, etc. There are also numerous books helpful to the clerical staff in the performance of their duties.

Courtesy reference and loan service is given to numerous local private social agencies and to other State departments. Many social work students also use the Library. Reference service in 1959 was given to a total of 150 students.

The county use of the Library increased almost 37 per cent in 1959. The over-all increase in the use of the Library was 14.5 per cent, which indicates the trend toward greater use of the Library by the county departments of welfare.

The Librarian answered a total of 1969 reference questions in 1959, which is an increase of 24 per cent over 1958.

The Library publications are:

1. Library Counselor, which is a quarterly annotated bibliography of material in the Library in a specific subject area. The 1959 issues covered "Social Casework," "Recreation for Senior Citizens," "Community Organization and Group Work," and "Public Assistance Services to Multi-Problem Families."
2. Selected List of Recent Additions, which is a one sheet, briefly annotated list of new acquisitions that is released two or three times per month.
3. Pre-Vue, a newsletter covering film library information, which is issued infrequently.

PERSONNEL

The staff of the Colorado State Department of Public Welfare is appointed under regulations of the State Civil Service Commission. As of December 1959, there were 110 employees in the department.

Employees of the sixty-three county departments of public welfare are appointed under a state-wide merit system. The State Department of Public Welfare establishes and administers the merit system for the selection, retention and promotion of county welfare employees. Through its Personnel Officer, the State Department of Public Welfare administers the compensation and classification plans for county departments; and the Personnel and Merit System offices jointly administer rules and regulations for county employees and audit administrative payrolls. The Merit System office examines applicants for county positions and certifies names of eligibles to county welfare departments for appointment.

Filled positions in county departments, December 1959	937
(This is an increase of 45 since December 1958)	
Total clerical employees	355
Filled positions in the Denver Department of Welfare only	370
(This continues to be approximately 40 per cent of total county positions)	
Non-status county employees, December 1959:	
Provisional	14
Emergency	14

A total of 123 positions were classified and established by the Personnel Office during 1959, while 68 positions were abolished, a total of 55 positions added during 1959.

Effective January 1959, a new six-step compensation plan was adopted for the four metropolitan county welfare departments--Denver, Adams, Arapahoe and Jefferson, based upon an annual survey of salary rates in the community. For positions in other county departments, a six-step range was set up for supervisors and case-workers with graduate social work training. A nine-step plan was established allowing a choice of any six consecutive steps for other positions in these county departments. At the end of the year, in addition to the four counties on the metropolitan plan, twenty-two counties were paying salaries to all or part of their employees under the highest possible series of steps adopted from the nine-step plan.

Provisions are in effect for salary advancements to employees, based on merit and length of service; in June 1959, 702 out of 939 county employees were above the minimum step. Of these, 84 were at the "seniority" step.

During the calendar year, 1959, the Merit System scheduled three examinations. These were given in February, May and October. Totals by category for this period were as follows:

	Number Applications Received by Position	Number Applications Received by Individual	Number Applications Accepted by Position	Number Applications Accepted by Individual	Positions Placed on Registers	Number Individuals Placed on Register
Feb.	562	295	472	265	233	147
