#### PUBLIC WELFARE IN COLORADO

#### 1961

Expenditures for welfare purposes totalled \$91,937,367.84 in 1961 and were up 1.5 per cent over 1960 expenditures of \$90,592,201.79. As a result of increased participation in both money payments to recipients and medical care payments to vendors, the Federal Government, in 1961, became the largest contributor of funds for welfare in Colorado. The State, prior to 1961, had provided the largest portion of funds mainly through the pension program in which money payments were considerably above the Federal matching maximum and in which medical payments were not matchable by the Federal Government prior to October 1960. The distribution of funds expended for welfare purposes during 1961 was: Federal - 44.98 per cent, State - 44.94 per cent, and Counties - 10.08 per cent.

More than two-thirds (67.0 per cent) of expenditures were for the Old Age Pension program. The next two larger programs--Aid to Dependent Children and Aid to the Needy Disabled--accounted for 14.0 per cent and 5.2 per cent of total expenditures, respectively. General Assistance, provided entirely by County funds, required 3.9 per cent of the total. Child Welfare expenditures were 1.5 per cent of the total and Tuberculosis Assistance, Aid to the Blind and miscellaneous other programs accounted for a combined 1.2 per cent.

Administrative expenses in County Departments represented 5.9 per cent of the total cost; State Office administration accounted for 1.3 per cent of expenditures.

To keep expenditures within the \$10 million Constitutional maximum, adjustments in the extent of services became necessary. Effective April 1, 1961 the length of initial hospitalization was reduced from 21 to 18 days, admissions were limited to treatment of emergency medical conditions, payments for transportation were discontinued, and vendor payments for nursing home care were limited to patients admitted on or after April 1, classified as bedfast or semi-bedfast. Effective August 1, 1961 the length of initial hospitalization was reduced to 15 days and admissions were limited to patients certified to as "critical" or "serious" by the attending physician and endorsed by the Admission and Discharge Committee of the admitting hospital or, in smaller hospitals, by the Director, Division of Medical Services. Certain additional admissions were allowed with the prior approval of the Admission and Discharge Committees or the Director, Division of Medical Services.

Monthly charges for care and maintenance of patients, including Class C pensioners, at the Colorado State Hospital in Pueblo were increased from \$94 to \$95 effective July 1, 1961.

Based on cost-of-living increases the State Board of Public Welfare authorized an increase of the basic monthly OAP award to \$108 effective July 1. Patients in nursing homes were permitted to retain \$8 for personal needs.

On July 13, 1961, the State Board of Public Welfare ruled that recipients of Old Age Pension, Aid to the Blind, Aid to the Needy Disabled, and Tuberculosis Assist ance are not subject to the anatomical law and must be buried. Reimbursement for drugs dispensed on or after September 1, by Ave Maria Clinic, all public clinics, and out-patient clinics of public hospitals was set at the wholesale Blue Book price plus 10 per cent.

Liberalized benefits and coverage were available to certain recipients with their September OASDI payment. The age at which men could begin to receive OASDI was reduced from 65 to 62. Minimum OASDI payments were increased to \$40 per month except for women workers who claimed old-age benefits before the age 65. Recipients of secondary benefits received increases of approximately ten per cent.

Effective July 1961 the State Board of Public Welfare, based on an increase to un cost-of-living, increased the maximum Pension payment from \$107 to \$108.

Monthly payments averaged out at \$51.92 for Class A pensioners, \$89.36 for Class B pensioners, and \$93.71 for Class C pensioners. Average payments for 1960 were: Class A - \$82.30, Class B - \$89.85, and Class C - \$93.20. Average monthly payments for all cases combined were \$83.15 in 1960, \$82.81 in 1961.

During February 1961 a total of 20,430 pensioners (39 per cent of the total case load of 52,315) concurrently received OASDI benefits; of the pensioners also receiving OASDI, 19,547 were Class A pensioners, 648 were Class B gensioners, 200 235 were Class C pensioners.

A study of the distribution of payments during October 1961 showed 82 per cent the Class A pensioners, 34 per cent of the Class B pensioners, and 71 per, cent of the Class C pensioners receiving the maximum payment of \$168.

Ten cases received monthly payments of less than \$1; 483 cases received monthly payments of less than \$10 which indicates that medical care provisions are of secondary importance to the money payment for the majority of cases.

Colorado's Class A pensioners, with a median age of 75.2 years, are somewhere younger than their national counterparts. The median age of pension recipience nationally, is 76.4 years. When all Colorado pensioners (Class A, Class B, and

isť

#### OLD AGE PENSION

County Departments received eight per cent fewer applications for Old Age Pension during 1961 than in the preceding year; applications received during 1961 totalled 5,826 as compared to 6,328 received during 1960. Of the 6,414 applications, which includes 588 in process at the start of the year, 4,871 were approved for assistance, 944 were denied as ineligible, 37 were otherwise disposed of, and 554 were in process at the end of the year.

Cases receiving the Pension declined from 52,434 at the start of the year to 51,343 at the end of the year, a net decrease of 1,091 cases. Class A pensioners, those 65 years of age and over, decreased from 47,062 to 46,150; Class B pensioners, those 60 through 64 years of age and with 35 years continuous Colorado residence prior to application, decreased from 3,758 to 3,655, and Class C pensioners in a public non-penal institution, decreased from 1,614 to 1,538. Liberal-ized coverage and benefits for Old Age, Survivors, and Disability Insurance (Social Security) have been primarily responsible both for a reduction in the pension case load and the average monthly payment.

Total expenditures, for money payments and medical care, decreased from \$63,277,397.45 during 1960 to \$61,582,594.64 during 1961 or 2.7 per cent. Money payments to recipients decreased 1.8 per cent from \$52,522,479.41 to \$51,583,112.73; medical care vendor payments decreased 7.0 per cent, from \$10,754,918.04 to \$9,999,481.91. Increased Federal participation, both in money payments and medical care, reduced the State proportion from 60.29 per cent of the total during 1960 to 54.54 per cent of the total during 1961.

Effective July 1961 the State Board of Public Welfare, based on an increase in the cost-of-living, increased the maximum Pension payment from \$107 to \$108.

Monthly payments averaged out at \$81.92 for Class A pensioners, \$89.36 for Class B pensioners, and \$93.71 for Class C pensioners. Average payments for 1960 were: Class A - \$82.30, Class B - \$89.85, and Class C - \$93.20. Average monthly payments for all cases combined were \$83.18 in 1960, \$82.81 in 1961.

During February 1961 a total of 20,430 pensioners (39 per cent of the total case load of 52,315) concurrently received OASDI benefits; of the pensioners also receiving OASDI, 19,547 were Class A pensioners, 648 were Class B pensioners, and 235 were Class C pensioners.

A study of the distribution of payments during October 1961 showed 32 per cent of the Class A pensioners, 34 per cent of the Class B pensioners, and 71 per cent of the Class C pensioners receiving the maximum payment of \$108.

Ten cases received monthly payments of less than \$1; 483 cases received monthly payments of less than \$10 which indicates that medical care provisions are of secondary importance to the money payment for the majority of cases.

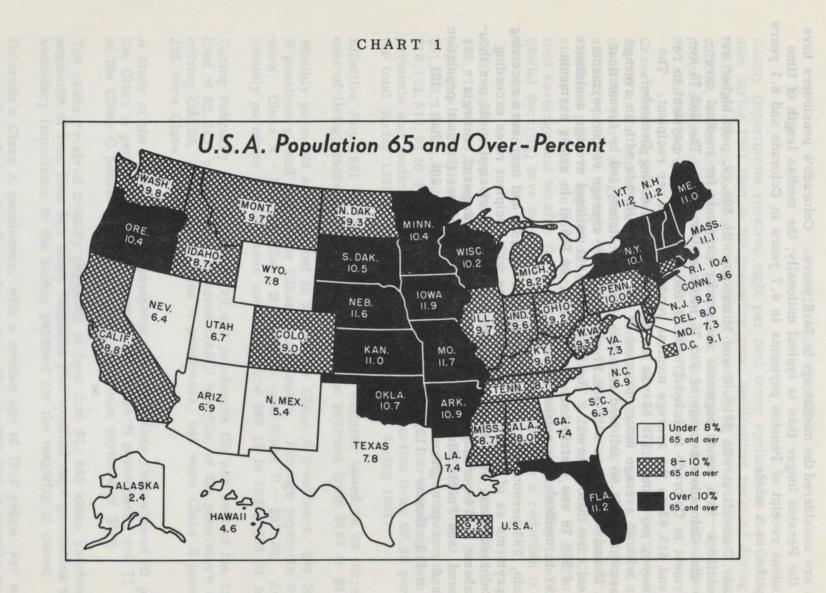

Colorado's Class A pensioners, with a median age of 75.2 years, are somewhat younger than their national counterparts. The median age of pension recipients, nationally, is 76.4 years. When all Colorado pensioners (Class A, Class B, and

Class C) are considered the median age is 74.6 years. Colorado's pensioners have received the Pension longer than is typical nationally; the median length of time for continuous receipt of Pension payments is 6.7 years in Colorado and 6.1 years for the nation as a whole.

Two States, Connecticut with \$110.02 and Minnesota with \$99.19, paid higher average assistance-both money payments and vendor payments for medical care-payments than Colorado's average of \$95.75 in December 1961. The \$95.75 average payment in Colorado included \$79.93 as the average money payment to recipients and \$15.83 as the average medical vendor payment per recipient. The average money payment of \$79.93 was the nation's highest during December. California with an average money payment of \$77.86 and Nevada with an average money payment of \$71.98 followed Colorado. Sixteen states, led by Connecticut with \$65.75 and Washington with \$58.27 showed higher average vendor payments for medical care than Colorado. The December 1961 national average assistance payment of \$68.78 was distributed, theoretically, as \$56.81 in money payments and \$11.97 in medical care vendor payments.

In Colorado, 293 persons per thousand population aged 65 and over were receiving Pension payments as of June 1961. Jurisdictions with recipient rates exceeding that of Colorado were: Louisiana - 508 per thousand, Mississippi - 423 per thousand, Alabama - 374 per thousand, Oklahoma - 348 per thousand, Georgia - 321 per thousand, and Puerto Rico - 301 per thousand. Rates per thousand population aged 65 and over in neighboring States were: New Mexico - 205, Utah - 121 Wyoming - 115, Kansas - 113, and Nebraska - 86.

#### AID TO DEPENDENT CHILDREN

Applications for Aid to Dependent Children during the calendar year 1961 totalled 5,194, of which 371 were carried forward from 1960 and 4,823 were received during the year. Of the total 5,194 applications, 3,666 were approved for assistance, 1,065 were denied as ineligible, 23 were otherwise disposed of, and 440 were in process at the end of the year. Applications were 18.6 per cent greater than the 4,065 received during 1960.

A monthly average of 8,160 families received assistance during 1961 compared to a monthly average of 7,400 during 1960, an increase of 10 per cent. A monthly average of 24,837 children received their financial needs through Aid to Dependent Children during 1961 compared to an average of 22,505 during 1960.

Expenditures for assistance, money payments to recipients and vendor payments for medical care, totalled \$12,881,820.85 or 11.7 per cent above 1960 expenditures of \$11,534,278.13. Money payments to recipients accounted for \$12,543,720.04 or 97.4 per cent of total expenditures. Expenditures for medical care decreased 17.1 per cent, from \$407,849.71 in 1960 to \$338,100.81 in 1961, primarily through reduction in Blue Cross-Blue Shield premiums.

During February 1961 OASDI benefits were received by 434 families which included 1,176 children.

Monthly money payments averaged \$129.07 per case, or \$33.32 per person compared to an average of \$125.30 per family or \$32.32 per person during 1960.

Comparison on a national basis for the month of December 1961 shows a national average assistance payment of \$31.28 per recipient which included \$29.29 as money payment to the recipient and \$1.99 as medical vendor payments. In Colorado the average assistance payment was \$34.68 per recipient which is distributed as \$33.83 in money payments to recipients and \$0.85 in payments to vendors for medical care. Highest assistance payments per recipient were in Connecticut with \$48.61 and Massachusetts with \$48.19.

More than half (53 per cent) of the Colorado Aid to Dependent Children families are of Spanish American origin, 34 per cent are classified as White other than Spanish American, twelve per cent are Negro, and the remaining one per cent are of other ethnic origins.

Thirty-nine per cent of the Aid to Dependent Children families live in Denver; an additional fourteen per cent live in Pueblo and Colorado Springs. Sixty-seven per cent of the families live in the metropolitan areas which include Adams, Arapahoe, Boulder, Denver, El Paso, Jefferson, and Pueblo counties.

Slightly more than one-fourth of the Aid to Dependent Children families have been receiving assistance for less than one year while seven per cent have been receiving assistance for ten years or longer. Sixty-nine per cent of the cases had not received Aid to Dependent Children prior to the most recent approval for assistance.

AID/TOOTHCTNEEDM DISABLED

In seven per cent of the cases the father is deceased, in eighteen per cent the father is incapacitated, and in 73 per cent the father is absent from the home. A variety of other situations cover the remaining two per cent.

Three-fourths of these families have no income other than assistance. The major source of income is through OASDI benefits which are received by one in every sixteen families receiving Aid to Dependent Children.

#### AID TO THE NEEDY DISABLED

Applications for Aid to the Needy Disabled totalled 3,074 of which 368 were carried over from 1960 and 2,706 were received during the year. Applications were seven per cent more numerous than during 1960. Of the total 3,074 applications 1,950 were approved for assistance, 739 were denied as ineligible, 13 were otherwise disposed of, and 372 were in process at the year's end.

Cases receiving Aid to the Needy Disabled increased from 5,664 at the beginning of the year to 5,688 at the end of the year for a net increase of 24 cases. The monthly average number of cases was 5,666.

Assistance payments to Aid to the Needy Disabled recipients totalled \$4,807,362.72, of which, \$4,620,158.85 provided money payments to recipients, \$184,618.28 was expended for drugs, and \$2,591.59 was for the Incentive Budgeting program in Denver County which was discontinued as of June 30. Expenditures for money payments, excluding incentive budgeting, to recipients were 3.1 per cent greater than 1960 expenditures of \$4,489,198.37. Expenditures for drugs were 13.8 per cent above 1960 expenditures.

Monthly payments to Aid to the Needy Disabled recipients averaged \$68.36 or slightly below the 1960 average of \$68.75.

During February 1961, 460 Aid to the Needy Disabled recipients were also receiving OASDI compared to 366 during March 1960.

Colorado Aid to the Needy Disabled recipients received an average assistance payment of \$71.27 (\$68.79 in money payments and \$2.48 in medical vendor payments) during December 1961. The national average assistance payment for December 1961 was \$70.46 which included \$56.11 as money payments to recipients and \$14.35 as medical vendor payments. Massachusetts with \$135.76 and Connecticut with \$124.94 showed the highest average payments for this type of assistance.

#### AID TO THE BLIND

Applications for Aid to the Blind money payments totalled 98, of which, 7 were carried over from 1960 and 91 were received during the year. Fifty-eight applicants were approved for assistance, 25 were denied as ineligible, 1 was otherwise disposed of, and 14 had applications in process at the end of December. Applications for Aid to the Blind Treatment totalled 124 which includes 22 carried over from 1960 and 102 received during the year. Ninety were approved for treatment, 14 were denied as ineligible, and 20 were pending at the end of the year.

Total expenditures decreased from \$304, 804. 34 during 1960 to \$296, 870.14 during 1961, a decrease of 2.6 per cent. Money payments to recipients decreased from \$250, 443. 28 to \$237, 540. 54 (5.2 per cent), medical expenditures for Award cases decreased from \$26, 591.74 to \$25, 727.20 (3.3 per cent), while expenditures for treatment increased from \$27, 769. 32 to \$33, 602. 40 (21.0 per cent).

Money payments to recipients averaged \$72.04 monthly during 1961 compared to \$71.95 during 1960.

A monthly average of 275 cases received money payments, a decrease from the monthly average of 290 cases during 1960. Treatment cases declined from a monthly average of 17 in 1960 to 16 in 1961.

During February 1961 sixteen Aid to the Blind cases received concurrent OASDI payments compared to seven cases during the previous March.

During December 1961 the National average assistance payment was \$74.57, of which, \$67.55 was for money payments and \$7.02 was for medical vendor payments. The average payment of \$79,35 in Colorado included \$71.12 for money payments and \$8.23 for medical vendor payments. The highest average assistance payments during December 1961 were found in Massachusetts with \$118.18 and Connecticut with \$114.14.

#### MEDICAL CARE

#### Program Changes

Adjustments made during 1961 in the Old Age Pension Medical Care Program to hold expenditures within the \$10 million Constitutional maximum were:

- (1) Reduction in the length of initial hospitalization from 21 to 18 days on April 1, and to 15 days on August 1.
  - (2) Discontinuation of vendor payments from the medical care fund for transportation as of April 1.
  - (3) Limitation of vendor payments for care of nursing home patients admitted on or after April 1, for those patients who were classified as bedfast or semi-bedfast.
  - (4) Restriction of hospital admissions on or after August 1, to patients certified to as "critical" or "serious" by the attending physician and endorsed by the Admission and Discharge Committee of the admitting hospital or, in smaller hospitals, by the Director, Division of Medical Services. Certain additional admissions were allowed upon approval prior to admission by the Admission and Discharge Committee or the Director, Division of Medical Services.

#### Old Age Pension

Medical care expenditures for pensioners decreased from \$10,754,918.04 in 1960 to \$9,999,481.91 during 1961. Decreases occurred in hospitalization (from \$6,036,123.78 to \$4,869,585.67), in physicians' services (from \$2,197,443.04 to \$2,053,568.84) and in transportation, which was discontinued (from \$66,704.61 to \$24,097.62) while increases occurred in nursing home care (from \$2,181,093.72 to \$2,679,945.51) and drugs for nursing home patients (from \$273,552.89 to \$372,284.27).

Fewer pensioners were admitted to hospitals for the first time since 1958, the year the program started. Admissions during 1961 totalled 18,796 compared to 22,645 in 1960, 22,113 in 1959, and 16,652 in 1958. The total number of hospital days, down from 262,337 in 1960 to 190,080 in 1961, reflects the decrease in admissions and the reduced length of initial hospitalization. Also reflecting the reduction in the length of initial hospitalization and tighter admission policies is the decrease in the average stay from 11.6 days in 1960 to 10.1 days in 1961 and the reduced average cost per hospital admission from \$266.55 in 1960 to \$264.84 in 1961. The more expensive care during the first few days of hospitalization is mirrored in the increase from \$23.01 to \$26.19 in the average cost per day.

Diseases of the circulatory system accounted for 3,929 admissions followed by diseases of the digestive system with 3,019 admissions, and accidents, poisoning, and violence with 2,993 admissions.

<u>Physicians' Services</u>. Physicians' services to pensioners include in-hospital care, home and office calls, and visits to pensioners in nursing homes. Physicians submitted 34,197 bills for in-hospital services during 1961 at an average of \$42.35 per bill; surgical services averaged \$59.52 while medical services averaged \$41.97. A total of 128,089 home and office calls were provided through the medical care program during 1961.

Nursing Home Care. Payments for nursing home care are made both by the pensioner and through the medical care program. The pensioner pays the first \$100 with the balance, up to a total from both sources of \$195, provided through the medical care program. The number of patients in nursing homes increased from 2,796 during December 1960 to 3,154 during December 1961, an average increase of 30 patients per month. Discontinuation of vendor payments for ambulatory patients admitted on or after April 1, effected a reduction in the number of patients in this classification. The number of patients classified as semi-ambulatory or bedfast continued to increase. Vendor payments for nursing home care increased from \$2,181,093.72 in 1960 to \$2,679,945.51 in 1961, an increase of 22.9 per cent.

Prescription drugs, provided for nursing home patients, cost \$372,284.27 or 36.1 per cent more than expenditures of \$273,552.89 during 1960. A total of 138,110 prescriptions were provided pensioner nursing home patients during 1961.

#### AID TO DEPENDENT CHILDREN

Vendor payments for medical care of children in the Aid to Dependent Children program totalled \$338,100.81 during 1961, a decrease of 17.1 per cent from expenditures of \$407,849.71 in 1960. The reduction is explained by lower premiums for Blue Cross-Blue Shield. Expenditures for drugs were \$48,801.52 or \$2,056.86 greater than during 1960.

#### AID TO THE BLIND

Medical expenditures of \$25,727.20 include \$14,786.24 in Blue Cross premiums, \$4,764.46 in Blue Shield premiums, and \$6,176.50 in vendor payments for drugs. A reduction in total premiums paid for Blue Cross - Blue Shield resulted from a declining case load while drug expenditures were \$243.16 greater than during 1960.

#### AID TO THE NEEDY DISABLED

Drugs were the only medical need of Aid to the Needy Disabled recipients provided through vendor payments; nursing home care costs were included within the money payments to recipients. Drug expenditures totalled \$184,618.28 or 13.7 per cent higher than 1960 expenditures of \$162,381.01.

Ouring 1961, 56 counties participated in the placement of 569 children in adoption

#### 

Child Welfare expenditures during 1961 totalled \$1,368,821.62 which represents an increase of \$247,315.12 or 22.1 per cent over 1960. County expenditures for Child Welfare Services totalled \$748,413.34 (54.68 per cent) and State Expenditures totalled \$620,408.28 (45.32 per cent). During 1961 the Federal Government did not participate in payments for children in foster care.

The State participates in payments for board and room, allowances, personal supplies, and clothing for children in approved foster homes and institutions. Expenditures for transportation, medical care, hospitalization, and care in non-approved foster homes and institutions are made entirely from county funds.

Children in foster homes and institutions received a total of 472,036 days of care during 1961. The average daily expenditure per child was \$2.92 while the average monthly expenditure per child was \$79.74. The following table shows expenditures by items of care provided.

Item of Care	Expenditures	Per Cent of Total
Total	\$1,368,821.62	100.00
Board and Room	1,137,216.99	83.08
Clothing	82,676.83	6.04
Medical Care	41,201.53	3.01
Hospitalization	39,011.42	2.85
Personal Supplies	31,482.90	2.30
Allowance	29,019.02	2.12
Transportation	8,212.93	0.60
and the statement of make		

A total of 7,989 different children received various services under the Child Welfare Program during 1961. The monthly average case load was 4,383 children of whom an average of 1,438 each month were receiving foster care involving the expenditure of funds. A monthly average of 2,386 children were receiving casework services in the homes of parents or relatives. Most of the remaining children were in adoptive homes.

During 1961 an average of 24 homemakers gave care to an average of 113 children per month.

The Child Welfare case load at the end of December 1961 totalled 4,590 children. Of these 2,066 were in the homes of parents, 310 were in the homes of relatives, 2,081 were in foster care -- 1,303 in boarding homes, 419 in adoptive homes, 334 in institutions, and 25 in other types of foster care-- and 133 were in other living arrangements. Protective services to children accounted for 1,876 of the 4,590 children.

During 1961, 56 counties participated in the placement of 569 children in adoptive homes. County departments of public welfare held custody of 563 of the children

and supervised the placement of 6 whose custody was held by other adoption agencies. Nine of the 569 children were removed from the adoptive homes; five were replaced in a second home during the year, making a total of 574 placements.

There were 297 boys and 272 girls placed in adoptive homes in 1961.

Infants under three months of age accounted for nearly 50 per cent of the placements; 6.4 per cent were over 6 years of age.

Approximately 90 per cent of the children placed were White including Spanish American. There were 4.9 per cent Spanish American children, 84.4 per cent Other White, 2.3 per cent Negro, and 8.4 per cent from Mixed Ethnic Origins.

Analysis by birth status of the 569 children shows that 82.0 per cent were born out of wedlock. The majority of the children born in wedlock came from broken homes.

from \$488,099.59 in 1969.to \$388.863,75 in 1961 of will a gver, the sense period assistance in Mindrespenditures increated & T.ner sentation \$594,250,15 in 1975 \$651, 685, 68

A monthly average of 1,703 cases, in addition to mose receiving cash and/on kind, received hospitalization or medical care. Expenditures for hospitalization of General Assistance recipients were \$1,000,439.29, an increase of 16.7 per cent over expenditures of \$857,112.14 during 1960. Supplementation to recipients of categorical assistance programs, primarily Aid to Dependent Children and Aid to the Needy Disabled, accounted for 42.5 per cent or \$424,901.52 of the total General Assistance expenditures for hospitalization. In addition, counties made payments of \$784,971.86 to county hospitals which were not chargeable to individual cases.

Supplementation from General Assistance funds for Aid to Dependent Children cases increased from \$272, 314.94 during 1960 to \$293, 535.75 during 1961. The increase can be attributed almost entirely to hospitalization of mothers which is not provided in the Aid to Dependent Children medical program.

The major proportion of the increase in supplementation to Aid to the Needy Introabled (from \$272,631.14 in 1969 to \$294,415.01 in 1961) can also be attributed to the hospitalization of recipients which is not provided in the Aid to the Needy Disabled medical program.

The following table shows, for the past three years, expenditures as supplement tation to recipients of categorical programs.

#### notigobs rento vol bisd a GENERAL ASSISTANCE remeasing edit besiv reque bas

General Assistance is financed entirely by County Departments through funds derived from local property taxes. Expenditures during 1961 totalled \$3,588,349.38 or 7.0 per cent higher than 1960 expenditures of \$3,352,560.12.

Applications for General Assistance during 1961 totalled 11,042 which includes 398 in process at the start of the year and 10,644 received during the year. Nineteen fewer applications were made during 1961 than during 1960. During the year 9,275 applicants were approved for assistance, 1,146 were denied as ineligible, 27 were otherwise disposed of, and 593 applications were in process at the year's end.

Cash and/or kind assistance was given an average of 1,945 cases per month. Last year (1960) a monthly average of 1,878 cases received cash and/or kind assistance. Expenditures for cash assistance showed a decline of 4.7 per cent, from \$488,099.39 in 1960 to \$388,883.75 in 1961, while over the same period assistance in kind expenditures increased 9.7 per cent, from \$594,250.16 to \$651,685.53.

Expenditures for county doctors, medical care, and drugs were \$693,077.08 during 1961 compared to \$598,919.34 during 1960.

A monthly average of 1,703 cases, in addition to those receiving cash and/or kind, received hospitalization or medical care. Expenditures for hospitalization of General Assistance recipients were \$1,000,439.29, an increase of 16.7 per cent over expenditures of \$857,112.14 during 1960. Supplementation to recipients of categorical assistance programs, primarily Aid to Dependent Children and Aid to the Needy Disabled, accounted for 42.5 per cent or \$424,901.52 of the total General Assistance expenditures for hospitalization. In addition, counties made payments of \$784,971.86 to county hospitals which were not chargeable to individual cases.

Supplementation from General Assistance funds for Aid to Dependent Children cases increased from \$272,814.94 during 1960 to \$293,535.75 during 1961. The increase can be attributed almost entirely to hospitalization of mothers which is not provided in the Aid to Dependent Children medical program.

The major proportion of the increase in supplementation to Aid to the Needy Disabled (from \$272,681.14 in 1960 to \$294,415.01 in 1961) can also be attributed to the hospitalization of recipients which is not provided in the Aid to the Needy Disabled medical program.

The following table shows, for the past three years, expenditures as supplementation to recipients of categorical programs.

homes, \$34 in institutions, and \$5 in other by in other living arrangements. Protociliye ser

CATEGORY SUPPLEMENTED	1959	1960	1961
TOTAL	\$585, 389. 27	\$655,732.33	\$695, 811.44

Tuberculosis Assistance	4,773.45	5,006.82	4, 566.16
Aid to the Blind	4,709.33	2,705.81	2, 528.41

1/ Supplementation to Old Age Pension of \$22,842.22 has been overstated due to erroneous reporting. Actual figures not available at time of publication.

More extensive participation by counties in the Commodity Distribution program increased costs of distribution from \$21,433.60 in 1960 to \$31,847.85 during the 1961 calendar year.

The continued decline in the use of county homes is evidenced by the fact that only El Paso County reported such an expenditure during 1961. As recently as 1958 eight counties made expenditures for county homes.

		1960	

Overal 8,1800 doubs of samples foodstills were distributed to County Departments of during 14981 bottomer County received commodition valued at \$471,548,93 or approximately 30 per cent of the total. Fueldo County with commodities valued at \$398,637.40 and Las Animas County with commodities valued at \$123,126,65 were recipients of the largest dollar value of commodities after Denver County

#### SURPLUS COMMODITIES

At the close of 1961 surplus commodities were being distributed in 23 counties. Eight counties--Bent, Dolores, El Paso, Fremont, Kit Carson, Montezuma, Montrose, Otero, and Weld--began distribution of commodities during 1961. The State Department of Public Welfare acts as the distribution agent for commodities made available by the United States Department of Agriculture. Commodities are distributed to schools, County Departments of Public Welfare, state institutions, private and county institutions, child care centers, and summer camps.

The table below shows, by the recipient of commodities, the wholesale value of foodstuffs distributed during 1960 and 1961.

RECIPIENT	Val	Per Cent of Total		
42.22 has been overstated due	1961	1960	1961	1960

Red Beans, Dried	276 sacks	27,600	3,174.00
Cheese, Process	200 cases	6,000	2,232.00

Over 3,800 tons of surplus foodstuffs were distributed to County Departments during 1961. Denver County received commodities valued at \$471,548.93 or approximately 30 per cent of the total. Pueblo County with commodities valued at \$398,637.40 and Las Animas County with commodities valued at \$123,126.65 were recipients of the largest dollar value of commodities after Denver County.

#### TUBERCULOSIS ASSISTANCE

Applications for Tuberculosis Assistance numbered 193 during 1961, one of which was carried forward from 1960. All applications were acted upon during the year with 188 approved and 5 denied as ineligible.

Recipients in hospitals decreased from 60 at the start of the year to 49 at the close of the year; outpatient recipients declined from 294 in January to 287 in December.

Expenditures for Tuberculosis Assistance increased from \$350,254.43 in 1960 to \$457,762.05 in 1961, an increase of 30.7 per cent. The increase can be attributed to two factors: (1) increases in per diem rates to hospitals effective January 1, 1961, and (2) an increase in the number of recipients receiving care involving the expenditure of funds; during 1960 a monthly average of 199 cases received assistance involving expenditure of funds whereas in 1961 the monthly average increased to 250 cases.

Successful completion of treatment resulted in subsequent discharge from the program of 144 cases or 26.6 per cent of the 542 individuals under the program during the year. Of these 144 individuals, 138 were discharged following outpatient treatment and six were discharged directly from hospitals.

The following table shows, for comparison, reasons for terminating hospital cases during the calendar years 1959, 1960, and 1961.

REASON FOR TERMINATION	A Peyran	Year	
REASON FOR TERMINATION	1959	1960	1961
TOTAL TOTAL	1 = 0	171	170
Transferred to Outpatient Care	98	121	129
Death	14	25	15
Non-tuberculous	7	11	9
Discharged	15	4	6
To another facility	2	6	5
Left against advice	12	2	5
No longer in need	5	2	1

ases during the calendar years 1959, 1960, and 1961.

Of the 188 cases accepted for care during 1961, 16 were children under ten years of age all of whom were diagnosed with primary pulmonary tuberculosis. Thirtyfive cases with far advanced pulmonary tuberculosis were accepted; two of these were under twenty years of age, 21 were past 50 years of age. Moderately advanced pulmonary tuberculosis was found in 53 cases.

#### PERSONNEL

The staff of the Colorado State Department of Public Welfare is appointed under regulations of the State Civil Service Commission. As of December 1961 there were 121 employees in the State Department.

There were 1,034 employees in the 63 county departments of Public Welfare, appointed under a state-wide Merit System; of these employees, 587 were in the professional classes and 447 in the clerical classes. Of the total staff in county departments, 494 (nearly 48 per cent) were employed in the four counties of the Denver Metropolitan area.

The State Department of Public Welfare administers the Merit System for the selection, retention, and promotion of county welfare employees. Through its Personnel Officer the State Department administers the compensation and classification and merit rating plans for county departments; the Personnel and Merit System Offices jointly administer rules and regulations for county employees and audit administrative payrolls. The Merit System Council recruits and examines applicants for county positions, certifies names of eligibles to county welfare departments for appointment and hears appeals.

A total of 114 positions were classified and established by the Personnel Office during 1961, and 58 positions were abolished--resulting in a net addition of 56 positions during 1961.

Effective January 1, 1961 a new six-step compensation plan was adopted for the four Metropolitan counties--Denver, Adams, Arapahoe, and Jefferson--based upon an annual survey of salary rates in the community. For professional social work positions in other county departments (supervisors and case workers with graduate social work training) a six-step salary range was set up; this six-step plan differed from those of prior years in that it was uniform for all counties other than the Metropolitan group. For other (clerical) positions in the counties not Metropolitan, a ten-step plan was established allowing a choice by each county of any six consecutive steps.

Provisions are in effect for salary advancements to employees, based on merit and length of service.

The Merit System Council issued a Biennial Report that describes the recruitment and examination programs for 1959-61.

#### STAFF DEVELOPMENT

Staff development includes orientation of new caseworkers, in-service training and workshops--the purpose being to improve casework techniques in giving service to people, and the stipend program to aid staff members to complete professional training in social work.

The following staff development programs were conducted during 1961:

#### LIBRARY

The Colorado State Department of Public Welfare Library has always played an important role in the development of staff of the county welfare departments. However, as a result of the growing emphasis upon training through a formal staff development program, the use of the Library has greatly increased within the past three years. In 1961 the Library provided services to the 126 employees of the State Department and the 1,034 county department employees.

There is also a steady increase in the use of the Library by Colorado workstudy and stipend students from the University of Denver School of Social Work. During 1961 the Library was used a total of 172 times by these students.

In addition, courtesy reference service was given to numerous local persons and/or agencies. Inter-library loan privileges were granted whenever possible to other social agencies in the community and to other Colorado State Departments.

During 1961 a total of 4,954 items were circulated, of which 2,924 or 59 per cent were loans to the county departments of welfare. The total circulation count shows an increase of 6 per cent over 1960. The county department loans show an increase of 6 per cent over 1960. An encouraging factor in the picture this past year is the fact that numerous small counties greatly increased the total number of items borrowed from the Library. A total of 41 county departments used the Library one or more times.

Reference services play a major part in the work of the Librarian. During 1961 a total of 2,298 reference questions were answered. Of this total, 107 questions were in the category of research which required much additional time to answer. Reference work increased 10 per cent over that of 1960.

The Library contains a small collection of films related to child welfare. These films are used for staff development purposes or for interpretation of child welfare programs to local communities. The county departments are encouraged to obtain bookings with local organizations for the showing of these films. A county worker or a State Department Consultant is required to be present whenever one of these films is shown.

Publications of the Library are:

THE LIBRARY COUNSELOR, which is a quarterly annotated bibliography on subject fields of value to the county departments in implementing the public welfare program. The national demand for the publication has become so great that a fee of \$.50 per copy is now charged to everyone except social agencies, schools of social work, and Federal agencies.

SELECTED LIST OF RECENT ADDITIONS, which is a one page annotated list of recent Library acquisitions. From two to four such lists are released monthly, a copy of each being sent to every county and State welfare employee. Numerous requests are received for books on these lists.
