Statewide Transportation Improvement Program

SELF-CERTIFICATION OF THE FY2018 – FY2021 STIP

The Colorado Department of Transportation is responsible for carrying out the statewide transportation planning process. This planning process is carried out in accordance with the following requirements:

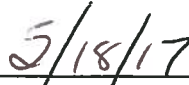

- 23 U.S.C. 134 and 135, 49 U.S.C. 5303 and 5304;
- Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d–1) and 49 CFR part 21;
- 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- Section 1101(b) of the MAP-21 (Public Law 112-141) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in USDOT funded projects;
- 23 CFR part 230, regarding implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 *et seq.*) and 49 CFR parts 27, 37, and 38;
- The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- Section 324 of title 23 U.S.C., regarding the prohibition of discrimination based on gender; and
- Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.
- Sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93;

The Denver Regional Council of Governments, North Front Range Metropolitan Planning Organization (MPO), Grand Valley MPO, and the Pueblo Area Council of Governments FY2018 – FY2021 TIPs have been incorporated into the STIP. The PPACG FY2017 – FY2022 TIP is still current per federal regulations. If they should update their TIP during FY18, CDOT will incorporate it into the FY2018 – FY2021 STIP once it is adopted.

I hereby certify that the FY2018 – FY2021 STIP has met all of the above requirements.

Shailen P. Bhatt, Executive Director
Colorado Department of Transportation

Date

Overview

Statewide Transportation Improvement Program

INTRODUCTION

Federal Regulations require State Departments of Transportation to develop a Statewide Transportation Improvement Program (STIP). The STIP contains capital and non-capital transportation projects and programs proposed for funding under Title 23 (highways) and Title 49 (transit) of the U.S. Code as well as all regionally significant transportation projects requiring an action by the Federal Highway Administration (FHWA) or the Federal Transit Administration (FTA).

This update of the STIP has been developed per the requirements included in the transportation authorization bill, Fixing America's Surface Transportation Act (FAST Act), which requires a new STIP at least every four years, containing a minimum four-year listing of Federal-Aid Projects, for FHWA and FTA approval.

While rules and guidance for implementing the FAST Act are adopted at the federal level, states are allowed time to modify processes and implement the new requirements. CDOT will continue to work with their regional and local planning partners to integrate the FAST Act requirements into their planning structure and begin a process to reach compliance with the Final Planning Rule by May 27, 2018.

To that end, CDOT has already begun to implement the use of performance targets. Current performance targets may be found in Tab 10 – 2040 Program Distribution. Within the Program Distribution document, there are targets outlined in Appendix A, Policy Directive 14, *Policy Guiding Statewide Plan Development*. This policy provides guidance for the planning process as a whole which includes the long-range Statewide Plan, as well as the STIP.

This STIP for the state of Colorado is submitted for FHWA and FTA approval for state fiscal years 2018-2021, following approval by the Colorado Transportation Commission. The STIP will be in effect from July 1, 2017 through June 30, 2020 unless requirements change. In accordance with federal rules, the Colorado Department of Transportation (CDOT) developed a STIP for all areas of the state and provided timely public notice and a reasonable opportunity for comment on the proposed STIP (23 CFR 450.210 and 450.216). The STIP includes Transportation Improvement Programs (TIPs) from Colorado's five Metropolitan Planning Organizations (MPOs). The MPOs and ten rural Transportation Planning Regions (TPRs) were closely involved in the development of the Colorado STIP.

OVERVIEW

The STIP, however, is only one piece of the overall transportation financial and planning picture for Colorado. The planning and budgeting process begins with the development of long-range transportation plans. Once the long-range plans are developed and projects selected through the planning process, the STIP is developed in order to program the funds needed for those transportation projects. After a project has been included in the STIP, it may be budgeted within the appropriate fiscal year.

Overview

Statewide Transportation Improvement Program

In the past STIP development has been done concurrently with, or subsequently to, the development of the long-range Statewide Transportation Plan (SWP). This is because all projects in the STIP must be aligned with the goals, objectives, and priorities articulated in the Statewide Plan. This is still true to an extent. The SWP is still updated every four years, along with Revenue Forecasts and Program Distribution. Similarly, the STIP goes through a more rigorous update every four years to incorporate these other updates. STIP development includes more detailed discussions with local planning partners, as well as with the TPRs and MPOs. The next long-range Statewide Plan is slated to take effect in early 2019. However, in the interim years, CDOT is now updating the STIP annually, based on the current 2040 Statewide Plan.

For each annual update the STIP drop the first year from the current adopted STIP and adds one year for the fourth year. For example, in the spring of 2017 the FY 2017-2020 STIP will be updated and become the FY 2018-2021 STIP. This update will include a public review and comment period, a public hearing with the Transportation Commission and, finally, Transportation Commission adoption and approval by FHWA and FTA. The annual update approach ensures that there are always four approved STIP years available for advancing construction projects. The maintenance of a full four year STIP period allows CDOT to better manage transportation revenues and the scheduling of projects based on readiness and the availability of funds.

REVENUE FORECAST and PROGRAM DISTRIBUTION

At the start of each long-range Statewide Plan update cycle, revenue forecasts are developed for the SWP time horizon. For the 2040 SWP the forecast time period is 2016-2040. Revenue forecast options are developed based on varying potential future estimates and assumptions. These options are reviewed and discussed with the Transportation Commission and with the Statewide Transportation Advisory Committee (STAC) at meetings that are open to the public. A single forecast option is adopted by the Transportation Commission, in cooperation with the planning partners, for purposes of developing the long range plan and the 4 year STIP. This Baseline Revenue Projection for the 2040 SWP was adopted by the Transportation Commission in April 2013.

Revenues are updated each year in order to provide current numbers for the CDOT Annual Budget for the upcoming fiscal year. These updates only apply to the upcoming fiscal year and not to remaining years in the 2040 Program Distribution. However, overall revenues may be updated to reflect significant changes, such as a new transportation authorization bill. For more detailed information on Revenue Forecasts and Program Distribution, please see Tab 10.

The assignment of funds to various programs for planning purposes is called Program Distribution. Colorado's transportation program is funded through a variety of federal, state, and local revenue sources. Federal law, state statute, and the Colorado State Constitution restrict how the Department can use the various funding sources. The large majority of CDOT's

Overview

Statewide Transportation Improvement Program

budget appropriation is allocated and directed primarily by the eleven-member Transportation Commission. Distributions for some programs, such as Surface Treatment, On System Bridge, Maintenance, and Operations are based on performance systems, allowing CDOT to allocate the funds to the areas where it is needed most. The preceding programs are funded with a mixture of “flexible” federal apportionments such as National Highway Performance Program and Surface Transportation Program funded as well as state Highway User Tax Funds. Other federal programs, such as Transportation Alternatives (TAP), STP-Metro, and Congestion Mitigation and Air Quality (CMAQ), and Highway Safety Improvement (HSIP) are based on “inflexible” apportionments that must be used for designated purposes per federal authorization act requirements and often receive local funds for match. Program Distribution provides a baseline for financial constraint of the SWP, RTPs, STIP, and MPO TIPs. The 2040 Program Distribution was adopted by the Transportation Commission in February 2015.

The state is required under 23 USC 450 to provide MPOs with an estimate of available federal and state funds which the MPOs may utilize in development of RTPs and TIPs. Planning estimates were developed for each MPO and outline estimated federal and state funds that might be reasonably anticipated to be available for transportation purposes within the MPO area for the time period of the TIP and Plan.

Distributions for Asset Management and Maintenance programs are based on performance systems and the funding required to achieve or make progress towards established performance objectives. Funding levels for these programs are established by the Transportation Commission based on performance objectives identified in the 2040 SWP and the Risk-Based Asset Management Plan. These programs include:

- Maintenance
- Surface Treatment
- Structures On-System
- Rockfall Mitigation
- Capital Expenditures- Road Equipment, Property, Capitalized Operating Equipment
- ITS Maintenance

Many programs are tied to a dedicated state or federal funding source. While the Transportation Commission could elect to supplement the funding in these programs with additional funds, or approve limited transfers, in general, the funding level is determined by the level of state or federal funding for that program.

These programs include:

- Highway Safety Investment Program (HSIP)
- Railway-Highway Crossings Program
- FASTER Safety
- Safety Education
- Strategic Projects (Senate Bill 228)
- Aeronautics
- Transportation Alternatives Program (TAP)
- Surface Transportation (STP)- Metro
- Congestion Mitigation and Air Quality (CMAQ) Improvement Program
- Metropolitan Planning
- Bridge Off-System

Overview

Statewide Transportation Improvement Program

- Federal Transit Administration (FTA) programs
- FASTER Transit
- FASTER Bridge
- High Performance Transportation Enterprise (HPTE)

Other programs are primarily Transportation Commission directed programs with funding levels established by the Transportation Commission. These programs include:

- Hot Spots
- Traffic Signals
- Transportation Systems Management & Operations (TSM&O)
- Congestion Relief
- Regional Priority Program
- ITS Investments
- Transportation Commission Contingency
- Program Delivery/Administration
- Infrastructure Bank

Additional information on Revenue Forecast and Program Distribution can be found in Tab 10 of this document. The SWP can be accessed at www.coloradotransportationmatters.com. Additional information on the annual CDOT budget, including detailed information about individual funding programs can be accessed at <https://www.codot.gov/business/budget>.

ADVANCE CONSTRUCTION

CDOT effectively manages the limited amount of federal transportation dollars it receives by employing Federal Advance Construction provisions on virtually every federally authorized project. Projects are initially authorized by FHWA under Advance Construction provisions. Through the CDOT Federal Aid Billing System these authorized projects may incur expenses and state funds are paid to contractors. Federally eligible expenses are recorded as an accrued unbilled receivable in the state's accounting system. These receivables are reviewed on a regular basis by CDOT Office of Financial Management and Budget (OFMB) staff and through the federal Fiscal Management Information System (FMIS) transactions, they initiate partial Advance Construction "conversion" actions until over the life of the project the federal funds are fully obligated and qualifying expenditures are fully reimbursed to the state by FHWA. During the obligation of these projects OFMB will prioritize the appropriate federal fund types to utilize the oldest and least flexible apportionments first in order to avoid any potential lapse of funds and ensure full obligation of all Federal funds by Federal Fiscal Year end. The Table below demonstrates how Federal programs feed into various CDOT funding programs based on flexibility.

Overview

Statewide Transportation Improvement Program

FHWA Apportionment Type	Fund Type	Designation	CDOT Programs Associated
National Highway Performance Program	NHPP	Flexible	Asset Management, Regional Priorities, Debt Service and other state programs
Surface Transportation Program			
Any Area	STP	Flexible	Asset Management, Regional Priorities, Debt Service and other state programs
Small Urban Areas 5,000<200,000	STP	Flexible	Asset Management, Regional Priorities, Debt Service and other state programs
Rural Areas <5,000	STP	Flexible	Asset Management, Regional Priorities, Debt Service and other state programs
Large Urban Areas >200K	STP	Inflexible	STP-Metro
Bridge Off System	BRO	Inflexible	Bridge Off System
Transportation Alternatives Program	TAP	Inflexible	TAP and Safe Routes to School
Congestion Mitigation Air Quality	AQC	Inflexible	CMAQ and Alternative Fuel Vehicles
Highway Safety Improvement Program	HSIP	Inflexible	Highway Safety Improvement Program
Metropolitan Planning Program	PL	Inflexible	Metro Planning Highways
Railway-Highway Crossings Program	RRC	Inflexible	Rail At-Grade and Rail Grade-Separation
Recreational Trails	RCT	Inflexible	Recreational Trails
State Planning and Research	SPR	Inflexible	Planning and Research and Pool Fund Studies

Asset Management programs include: Surface Treatment, On System Bridge, Walls, Tunnels, Culverts, Signals, etc

PROGRAM DEVELOPMENT

To develop the STIP, CDOT follows an established set of guidelines laid out in the STIP Development Guidance and Project Priority Programming Process (4P). This guidance details the process for setting project priorities, the process for STIP development and adoption, and for public review and comment. A copy of this guidance is included under Tab 4 of this document.

A full 4P process is completed every four years, with a more limited process for the annual update. During the full 4P, CDOT coordinates with all 15 TPRs, which includes five MPOs. Together, CDOT and the MPOs/TPRs agree upon a timeline for identifying priorities on a regional and statewide level. CDOT Regions conduct county level meetings, TPR meetings, and joint TPR meetings to arrive at a draft list of projects for the STIP. For the annual update, CDOT Regions met with each TPR and MPO to discuss projects remaining in fiscal years 2018 through 2020, as well as those being added for FY2021.

Projects selected for the STIP are required to be consistent with the SWP. In March of 2015, the Transportation Commission adopted the 2040 SWP. The projects selected for the FY 2018 – FY 2021 STIP are consistent with the goals, objectives, and priorities that were developed in the 2040 SWP. The consistency of the STIP and the SWP is achieved in several ways. The 2040 SWP includes goals, objectives, and performance measures for the transportation system. These goals, objectives, and performance measures guide the distribution of resources in Program Distribution and the annual budget. For applicable programs, such as Surface Treatment, Bridge, and Maintenance, funding levels are established based on the estimated funding needed to reach performance objectives. Specific projects for these programs are identified and included in the STIP. The SWP incorporates Regional Transportation Plans, including MPO

Overview

Statewide Transportation Improvement Program

Plans, as well as modal (i.e. transit, bicycle and pedestrian, aviation) and functional (i.e. operations, safety, asset management) plans. The SWP and these component plans also articulate priorities for corridors and projects. The development of the STIP follows the development of the SWP and is informed by the priorities articulated in the SWP and component plans.

TIP Development

The five MPOs in Colorado are in urban areas having populations greater than 50,000. Colorado's MPOs are: Denver Regional Council of Governments, Denver Metro Area (DRCOG); Grand Valley MPO, Mesa County (GVMPO); North Front Range MPO, Fort Collins/Loveland/Greeley (NFRMPO); Pikes Peak Area Council of Governments, Colorado Springs area (PPACG); and Pueblo Area Council of Governments, Pueblo area (PACOG).

Of the five MPOs, DRCOG, NFR, and PPACG are designated as Transportation Management Areas (TMAs), having urban populations greater than 200,000. The TMA designation applies to the entire metropolitan area boundary. These three TMAs are also designated as air quality nonattainment/maintenance areas, and must comply with special requirements regarding congestion management systems, project selection, and project certification. For more information on viewing specific MPO TIPs, please see Tab 9, page 7.

Federal regulations require the five MPOs in Colorado to develop (TIPs), which are incorporated into the STIP. TIP project selection at the MPO level follows a formal process adopted by each individual MPO. Each MPO uses its technical and policy committees and Boards as a forum for TIP project selection. People living or working within the boundaries of the MPO have the opportunity for involvement in the MPO TIP development process. Federal regulations require that the TIPs be incorporated into the STIP without modification. The STIP and the TIPs will show the same projects; however, funding is sometimes shown in grouped total in a TIP document where it is shown individually in the STIP, or vice versa. Though each MPO follows its own specific process for TIP development, the projects selected are required to be consistent with their long-range RTPs and the SWP.

Since the STIP is now updated annually, Colorado's MPOs are have been working through the establishment of processes and timelines to similarly transition to an annual update or semi-annual update cycle.

STIP Projects and Programs

Based on federal regulation, and in partnership with the MPOs and TPRs in the state, the FY 2018 - FY 2021 STIP includes Regionally Significant Projects STIP Programs Pools, and STIP Pools. These are defined as:

- A ***Regionally Significant project*** is a project serving regional transportation needs and of significant scale to be typically included in transportation demand modeling or air quality emissions modeling and identified individually in the STIP.

Overview

Statewide Transportation Improvement Program

- A **STIP Program Pool** is a logical grouping of projects, typically based on a CDOT funding program, such as Surface Treatment, that includes non-regionally significant projects grouped under that program.
- A **STIP Pool** is an assigned STIP number for grouping projects. Most of the STIP Pools correlate to larger projects within a CDOT Region or MPO. For example, the I-25 North project in Region 4. This specific projects is a Regionally Significant Project, but it also lists the various phases as sub-projects, which are part of the whole. Thus, it is a STIP Pool.

Those projects which are identified in a TIP, and determined to be Regionally Significant, will also be included in the STIP. Non-regionally significant projects will be included within STIP Programs or STIP Pools.

The STIP often requires changes outside of those made during the SWP and STIP development process. STIP Amendments will be processed twice per year in June and December, while Administrative Modifications will be processed on an as needed basis. Changes to non-regionally significant projects within STIP Programs may be made more frequently. Additional information on STIP Amendments and Administrative Modifications can be found in Tab 5.

Fiscal Constraint and Annual Budget

Once the Draft STIP has been developed, CDOT verifies fiscal constraint. Fiscal constraint is the analysis of expected forecasted revenues and the total amount of transportation projects programmed in the STIP against that total. To be constrained, the programmed total cannot exceed the revenues expected. For Colorado, fiscal constraint is determined for each fiscal year in the STIP. CDOT staff has determined that this FY2018 – FY2021 STIP is fiscally constrained. Detail can be found in Tab 8 of this document.

The Transportation Commission typically adopts the CDOT annual budget in April of each year. The annual budget process results in updated funding levels for programs based on more current revenue information, and updated analysis of system performance and meeting performance objectives. For STIP purposes, the annual budget supersedes the Program Distribution funding levels for the year of the budget. This results in a modification to fiscal constraint. Corresponding changes to projects or programs in the STIP to account for the modified fiscal constraint are made through the STIP Amendment or Administrative Modification procedures, respectively.

MAJOR PROJECTS IN DEVELOPMENT

During the course of the FY 2018-2021 STIP, the Colorado Department of Transportation, in conjunction with applicable planning partners, will continue construction and implementation on three unique projects. These projects, distinguished by their size and complexity, utilize funding mechanisms unlike any major project CDOT has attempted in the past. For this reason,

Overview

Statewide Transportation Improvement Program

the Central 70 (Reconstruction of the I-70 Viaduct through Denver and Aurora), C-470 (Tolled Express Lanes), and RoadX projects merit the detailed descriptions that follow.

Central 70 – Reconstructing the I-70 Viaduct through Denver and Aurora

I-70 through Denver was completed in 1964 and over the decades, has grown to be the state’s critical central east-west transportation corridor. Today, it ties together Denver International Airport, the city’s central business district, and mountain resorts and communities from the Eastern Plains to the Western Slope. The I-70 Viaduct segment, located between I-25 and Colorado Blvd, carries approximately 140,000 vehicles a day and is well past its design life. It requires extensive reconstruction or replacement in order to remain in service into the future. This facility has been the subject of extensive public involvement through the development of an Environmental Impact Study, which includes design and financing options.

The Project

CDOT plans to replace the viaduct while also planning for growth in the future. CDOT and its planning partners intend to move forward with Phase 1 of the preferred alternative detailed in the 2017 Record of Decision. This alternative proposes that a section of the highway between Brighton Blvd. and Colorado Blvd. be constructed below grade and a 4 acre cover placed over a portion of the depressed section of the highway to reconnect local neighborhoods. This alternative, known as the Partially Covered Lowered (PCL) alternative, would provide new community space for the surrounding neighborhoods. The project includes the addition of one Express Lane in each direction between I-25 and Chambers Road to address congestion as well as overall safety enhancements along the corridor.

Project Funding

The total project cost is estimated at \$1.17 billion. Current funding is expected to be as follows:

- Prior Funding - \$73 million in FYs 12-15
- Bridge Enterprise - \$260 million in FYs 16-19
- SB-228 - \$178.3 million in FYs 17 - 21
- DRCOG CMAQ - \$25 million in FY16-19 STIP; \$25 million in Future Years
- Bridge Illustrative - \$574 million in Future Years
- Other Sources - \$37 million local funding contribution and other sources such as TIFIA loan in Future Years.

In FY2017 CDOT received a transfer from SB-228 for a total of \$199.2 million. Of that, ten percent plus \$1 million was allocated to transit. The remaining balance of \$178.3 million is allocated to the Central 70 project. These funds are shown as Bridge Illustrative dollars in fiscal years 2019 through 2021 in this STIP report as a placeholder for the upcoming years. The Bridge Illustrative funding program is also utilized as a placeholder for future year’s revenue and/or funding that has yet to be secured or identified.

Overview

Statewide Transportation Improvement Program

CDOT will continue to work with DRCOG to ensure that the DRCOG TIP and STIP show identical funding throughout the life of the project. This includes any future amendments deemed necessary as funding becomes available or changes over the life of the project.

C-470 – Tolled Express Lanes

C-470 is a 26-mile four-lane freeway in the southwestern portion of the Denver metropolitan area through Arapahoe, Douglas and Jefferson Counties, connecting Interstate 70 (I-70) on the west, in Golden, to Interstate 25 (I-25) on the south, in Centennial. In 2004, C-470 was congested, carrying 80,000 vehicles per day. Today it is even more congested, carrying over 115,000 vehicles daily. By 2035, traffic is projected to increase by another 40 percent, and a commuter traveling during peak times could experience nearly 70 minutes of delay each day on C-470.

C-470 is critical for regional mobility and connects people to major employment centers and economic opportunities. This project provides the opportunity to reintroduce bus service on the corridor which was stopped due to unreliable travel times created by the severe congestion. The resulting travel time improvement equates to as much as \$435 million in economic benefits. This project also addresses aging infrastructure by replacing two bridges and widening 16 others, as well as reconstructing over 7 miles of pavement that has poor substructure.

The project will also improve safety on the corridor. A 33 percent reduction of accidents is expected as a result of the improvements, equating to a \$47.4 million net present value to the region. As part of these totals, the I-25 and C-470 interchange direct-connect ramps are projected to reduce rear-end crashes by 52 percent and sideswipe crashes by 44 percent, providing \$8 million in crash-cost savings over the next 20 years.

The Project

The Project will include the following design features and corridor enhancements:

- Adding one Tolled Express Lane eastbound from Wadsworth Boulevard to I-25
- Adding two Tolled Express Lanes westbound from I-25 to Colorado Boulevard and one Tolled Express Lane from Colorado Boulevard to Wadsworth Boulevard
- Adding auxiliary lanes in select locations
- Adding new direct-connect ramps at the I-25 / C-470 Interchange to enable motorists to access the Tolled Express Lanes without having to merge across several lanes of congested traffic
- Replacing two bridges built in 1968 across the South Platte River with new bridges that accommodate the toll lanes and improve substandard design of a major regional greenway trail that crosses beneath them
- Widening 16 other structures to reduce throw away and prepare for future phases/expansion
- Correcting roadway geometry to address safety concerns
- Reconstructing approximately seven miles of pavement due to poor substructure

Overview

Statewide Transportation Improvement Program

- Capitalizing on previous investments in the C-470 multi-use trail by providing grade separations at two interchanges where the trail crosses arterial streets at grade
- Providing required noise mitigating sound barriers per federal regulations
- Installing Intelligent Transportation Systems (ITS) technology to monitor and enhance traffic flow

It is important to note that the existing four lanes of C-470 are free, general purpose lanes and will remain so.

Project Funding

The total project cost is estimated at \$327 million, and is expected to be funded from fiscal years 2017 through 2019. Project funding includes appropriate local contributions and the following proposed funding sources:

- \$40M – Responsible Acceleration of Maintenance and Partnerships (RAMP)
- \$188M – Private Activity Bonds (PAB) (USDOT)
- \$109M – Transportation Infrastructure Finance and Innovation Act (TIFIA) (USDOT)

The STIP report shows \$273 million in funding in fiscal years 2018 and 2019; all other funding has been STIP'd and budgeted prior to this updated STIP cycle.

RoadX

RoadX is a fast paced progressive program intended to deliver upon CDOT's vision to transform Colorado's transportation system into one of the safest and most reliable in the nation by harnessing emerging technologies. Through partnerships with public and private industry partners, this program will fulfill CDOT's mission to become a leader in safety and reliability with one of the most technologically advanced transportation systems in the nation. The current 5-year Draft Work Plan will allocate \$90 million into the following categories:

- Projects - \$54 million
- Infrastructure - \$30 million
- Planning and Policy - \$6 million

Current plans and projects include:

- Deploy peak demand managed corridors that will use precise, real time data to relieve congestion.
- Implement application technologies, via cellular and DSRC, to warn motorists of hazards, road closures, weather advisories, etc.
- Prepare CDOT's infrastructure for connected vehicles (V2V) and vehicle-to-infrastructure (V2X) technologies, promote economic growth and reduce fatalities.

Overview

Statewide Transportation Improvement Program

Project Funding

Road X is funded through annual Transportation Commission allocations of state highway funds with federal reimbursement for eligible expenditures. Funding allocations thus far total \$47.8 million.

- FY2016 - \$10 million
- FY2017 - \$25.7 million
- FY2018 - \$12.1 million

PUBLIC REVIEW OF THE STIP

Once fiscal constraint is verified, the draft document is released by the Transportation Commission for public review and comment. The review period is conducted for a minimum of 30 days and includes a public hearing with the Commission. Any comments received during this period are incorporated, where appropriate, into the STIP prior to final adoption by the Commission. Once the STIP is adopted, it is forwarded to the FHWA and FTA for final approval.

Copies of the draft STIP are made available at the CDOT Headquarters and Engineering Region offices, and at the offices of FHWA, FTA, and TPR offices. The draft STIP is also available on the CDOT website: <https://www.codot.gov/business/budget>. In addition, an e-mail notification is sent to those people who have requested such notification for STIP development and amendment matters. Currently, there are over 700 recipients of this information. Public notices are also placed in local newspapers and county clerk offices.

The Transportation Commission conducts a public hearing to present information and to receive public comments on the draft STIP at the CDOT Headquarters Auditorium, during a regular Transportation Commission workshop or meeting. Written comments can be submitted via mail, e-mail, or through the CDOT website. After the public review and comment period closes, the Commission takes action to adopt the STIP. Once adopted by the Commission and approved by both FHWA and FTA, the FY 2018 – FY 2021 STIP will go into effect on July 1, 2017 and remain in effect to June 30, 2021, unless superseded by federal regulations or Transportation Commission direction requiring an earlier update.

Tab 3 of this document provides additional information on public involvement activities related to the development of the FY 2018 – FY 2021 STIP.

AMENDING THE ADOPTED STIP

Once adopted and approved, the STIP may be amended as needed. CDOT has developed amendment guidelines to provide consistency across the CDOT Regions. There are two types of changes that apply to the STIP: STIP Amendments and Administrative Modifications. Each type of change has a different set of criteria and requirements.

Overview

Statewide Transportation Improvement Program

Adding a year to the STIP to maintain the four official STIP years recognized by the FHWA also constitutes a STIP update and will require re-adoption of the STIP by the Transportation Commission, FHWA, and FTA. This will occur concurrently with the June STIP Amendment process.

STIP Amendment

A STIP Amendment is any major change to a Regionally Significant project, including addition to or deletion from the STIP, major change to cost, initiation dates, or scope, or a major change to STIP Program or Regional Sub-Program amounts. This type of change requires public review, re-demonstration of fiscal constraint and Transportation Commission approval.

STIP Amendments will be processed twice per year in June and December, while Administrative Modifications will be processed on an as needed basis. Off-cycle STIP Amendments can occur if there is a compelling need to modify the STIP in between the regular cycle.

Administrative Modification

A STIP Administrative Modification is any minor change to a Regionally Significant project, including a minor change to cost, initiation dates, or scope, or a minor change to STIP Program or Regional Sub-Program amounts. This type of change does not require public review, re-demonstration of fiscal constraint, or Transportation Commission approval.

Changes to Non-Regionally Significant projects constitute neither a STIP Amendment nor STIP Administrative Modification. Program Lists identify the Non-Regionally Significant projects included within STIP Programs or Regional Sub-Programs.

TIP Amendments and Administrative Modifications

A TIP amendment to a Regionally Significant project or to a STIP Program or Regional Sub-Program is processed as either an Amendment or Administrative Modification, depending on guidance set in place by the MPO where the project is located. All Amendments and Administrative Modifications processed by an MPO are then incorporated administratively into the STIP.

Reconciliation of the STIP

The Department will consult with the FHWA, FTA, and MPOs as needed to reconcile the STIP, to show updated project and program information, as well as to verify that fiscal constraint has been maintained. A quarterly reconciliation report will also be provided to FHWA, FTA, and the MPOs.

Public Involvement

Statewide Transportation Improvement Program

PUBLIC INVOLVEMENT

Public Involvement for the development of the FY2018 – FY2021 STIP is carried out in accordance with 23 CFR 450.210. Public involvement plays a large part in STIP development. CDOT's Project Priority Programming Process, or 4P, has been established to meet and support federal requirements regarding public involvement in the development of the STIP.

In January 2016, CDOT adopted both the Guide to the Transportation Planning and Programming Public Involvement Process that describes the processes and techniques CDOT employs to comprehensively solicit information from stakeholders and the public. Additionally, CDOT has developed the Non-Metropolitan Local Officials Consultation Guide outlining the goals for conducting a comprehensive consultation process for non-metropolitan local officials. The STIP is consistent with both of these public involvement documents and was developed in a way that was inclusive of all stakeholders. The Public Involvement Guide may be found here:

<http://coloradotransportationmatters.com/other-cdot-plans/public-elected-official-involvement/>

Development of the Statewide Transportation Plan begins at the local level with business persons, residents and local officials in the Transportation Planning Regions (TPR). Of the 15 TPRs, ten are considered non-urban TPRs and five located in urban areas are considered Metropolitan Planning Organizations (MPOs). Each TPR is comprised of the municipalities and counties within its established boundaries. State law enables elected officials from the counties and municipalities in the non-urban TPRs to form Regional Planning Commissions (RPCs) through an intergovernmental agreement. The RPCs and MPOs develop and adopt Regional Transportation Plans (RTPs), which are then integrated into the Statewide Transportation Plan and approved by the Transportation Commission.

The CDOT Regions meet with their TPRs during the 4P for the Annual STIP Update. CDOT staff present projects proposed for inclusion in the STIP for comment, and discuss with the TPRs priorities for flexible funding sources. The TPRs, in turn, confer with their constituents and stakeholders and provide feedback to CDOT on the priorities identified in the STIP. Each Region holds a meeting of all the TPRs within its boundaries to finalize the proposed plan of projects from that Region for inclusion in the Draft STIP.

Federal regulations outline specific processes for Transportation Improvement Program (TIP) development in MPO areas. Once an MPO has adopted a final TIP, it is incorporated into the STIP. It should be noted that all meetings associated with the TIP and STIP development process in both the MPOs and rural TPRs are open to the public.

The Transportation Commission releases the Draft STIP for public comment and review. Copies of the Draft STIP are available online at CDOT's website (<https://www.codot.gov/business/budget>) and at various locations around the state, including CDOT Headquarters and Region offices, FHWA and FTA offices, TPR offices and State Depository Libraries. Notification of the draft is sent via e-mail to a statewide distribution list comprised of over 700 public entities and private individuals interested in transportation issues.

While the draft is open for comment and review, a public hearing is held with the Transportation Commission to gather more input on the STIP. Notice is once again sent via e-mail to the statewide distribution list, and public notices printed in local papers statewide.

Public Involvement Statewide Transportation Improvement Program

Any comments that are received are shared with the Transportation Commission prior to their adoption of the final STIP. Where feasible, comments are incorporated into the STIP document or project list. After the Transportation Commission adopts the STIP, it is forwarded to FHWA and FTA for final approval. After approval, the FY2018 – FY2021 STIP will go into effect July 1, 2017 through June 30, 2021, unless requirements change.

To improve transparency CDOT has also made an effort to enhance its public outreach by updating the STIP pages of the CDOT website. New features include a STIP Blog, and updated links to planning partners and relevant documents. The detailed STIP information pages may be accessed here: <https://www.codot.gov/business/budget/statewide-transportation-improvement-program-stip-reports-information>

Additional information on STIP public involvement processes can be found on the following pages and include:

Hearing Set for Statewide Transportation Improvement Plan

DENVER - Colorado's Transportation Commission will be holding a public hearing later this month regarding the proposed Fiscal Year 2018 - 2021 Statewide Transportation Improvement Plan (STIP).

The hearing will be held on Thursday, April 20, at the Colorado Department of Transportation's (CDOT) headquarters, 4201 E. Arkansas Ave. in Denver. It will be conducted in conjunction with the Commission's monthly meeting at a time still to be determined. As part of the hearing, information regarding the STIP will be presented and public comments received.

"It's part of our short-term and long-term planning process," said Colorado Transportation Commissioner Chairman Gary Reiff. "The STIP not only specifies the projects CDOT plans to fund over the next four years but it also identifies the year each project will be funded, based on available revenues."

A planning and budgeting process begins with the development of long-range transportation plans. After the long-range plans are developed, the STIP is created in cooperation with local governments statewide, including the 10 rural Transportation Planning Regions and five Metropolitan Planning Organizations.

The STIP normally is prepared right after, or in conjunction with, the development of the long-range Statewide Transportation Plan (SWP). This allows all STIP projects to be aligned with the visions, goals and strategies in the SWP. Following a project's inclusion in the STIP, it can be budgeted within the appropriate fiscal year.

Individuals wishing to speak at the hearing should RSVP by Friday, April 14. Those unable to attend can view a draft STIP at: www.codot.gov/business/budget/statewide-transportation-improvement-program-stip-reports-information. Comments regarding the STIP must be submitted by April 28, 2017. Questions, comments and RSVP information should be submitted to Jamie Collins via email at jamie.collins@state.co.us, phone at (303) 757-9092, or mail at: CDOT, Office of Financial Management and Budget - 4201 E. Arkansas Avenue, Room 212, Denver, CO 80222.

Information gathered from the public hearing and during the comment period is reviewed and incorporated to finalize the STIP. The Plan then will be submitted to the Commission at its May 2017 meeting for consideration and approval. If approved, the STIP is sent to the Federal Highway Administration and Federal Transit Administration for final approval. If the federal agencies consent, the STIP becomes effective on July 1, 2017.

Public Involvement
Statewide Transportation Improvement Program

Summary of Comments Received on *DRAFT FY2018 – FY2021 STIP* during Public Review and Comment Period

Todd Cottrell, Denver Regional Council of Governments
Dean Bressler, Grand Valley MPO
Medora Kealy, North Front Range MPO
Kevin Rayes, Pikes Peak Area Council of Governments

Each of these metropolitan planning organizations submitted technical corrections to the funding portion of the STIP. Most of these comments pertained to correcting funding between the TIP and the STIP, or verifying projects included in the *Added, Deleted, and Completed* reports. These corrections have been made.

Aaron Bustow, Federal Highway Administration, Colorado Division
Larry Squires, Federal Transit Administration, Region 8

Submitted several technical corrections to CDOT on May 2. Staff has updated and corrected the STIP document to reflect these corrections.

General Public

No comments were received from the public.

Summary of Comments Received on *DRAFT FY2018 – FY2021 STIP* during the Public Hearing held with the Transportation Commission on April 20, 2017

The Transportation Commission opened the Public Hearing at 9:05 a.m. on April 20, in conjunction with their regular meeting. No one from the public requested to speak during the Public Hearing. The Hearing was officially closed at the end of the Transportation Commission's regular meeting.

STIP Development Guidance and 4P Process Statewide Transportation Improvement Program

STIP DEVELOPMENT GUIDANCE and PROJECT PRIORITY PROGRAMMING PROCESS

(4P) March 2015

I. Introduction

This guidance document provides a framework for the development and amendment of the Statewide Transportation Improvement Program (STIP) as required by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) for the programming of regionally significant transportation projects, within fiscal constraint and consistent with the CDOT Development Program and the Statewide Transportation Plan (SWP), for a period of at least four years. This guidance is consistent with Policy Directive (PD) 703.0 Annual Budget, Project Budgeting and Cash Management Principles, Part V., Section F, which outlines the general policy foundation for the STIP. This guidance reflects current regulations and policies and supersedes the 4P and STIP Development Guidelines adopted in September 2009.

II. Definitions

“Development Program” shall mean a 10 year program of Regionally Significant projects and other major projects consistent with the Long-Range Statewide Transportation Plan (SWP). Projects included in the Development Program will move into the STIP if/when funding is identified.

“Fiscal Constraint” for the STIP means that it includes sufficient financial information for demonstrating that projects in the STIP can be implemented using committed, available or reasonably available revenue sources, with reasonable assurance that the federally supported transportation system is being adequately operated and maintained. Financial constraint applies to each program year.

“Four Year Work Plan” shall mean a detailed plan for approved transportation projects scheduled for implementation over a four-year time frame including project locations, descriptions, detailed schedules, and estimated expenditures that can be used to track progress and for cash management purposes.

“Non-Regionally Significant Project” shall mean projects that are not considered to be of appropriate scale for individual identification in the STIP in a given program year, and which are grouped in the STIP under a STIP Program or Regional Sub-Program.

“Program List” shall mean a list of Non-Regionally Significant projects corresponding with STIP Programs or Regional Sub-Programs.

“Regionally Significant Project” shall mean a project serving regional transportation needs and of significant scale to be typically included in transportation demand modeling for air quality emissions analysis and identified individually in the STIP.

STIP Development Guidance and 4P Process

Statewide Transportation Improvement Program

“Regional Sub-Program” shall mean a subdivision of a program in the STIP based on Region or MPO (i.e. Region 4 RPP).

“STIP” shall mean Statewide Transportation Improvement Program – A federally required, fiscally constrained statewide prioritized listing/program of transportation projects covering a period of four years that is consistent with the long-range statewide transportation plan, metropolitan transportation plans, and TIPS, and required for projects to be eligible for funding under title 23 U.S.C. and title 49 U.S.C. Chapter 53.

“STIP Administrative Modification” shall mean a minor revision that includes minor changes to a Regionally Significant project, including costs, funding sources, initiation dates, or design concept or scope or minor revision to a program amount.

“STIP Amendment” shall mean a revision to a Regionally Significant project, including addition or deletion, major change to cost, initiation dates, or design concept or scope; a major change to a program fund amount; and the addition of a year into the STIP.

“STIP Program” shall mean a logical grouping of projects, typically based on a CDOT funding program, such as Surface Treatment, that may include Non-Regionally Significant projects grouped under that program and included in the ‘program list’.

“TIP” shall mean Transportation Improvement Program – A federally required, fiscally constrained prioritized listing/program of transportation projects covering a period of four years that is developed and formally adopted by an MPO as part of the metropolitan transportation planning process, consistent with the metropolitan transportation plan, and required for projects to be eligible for funding under title 23 U.S.C. and title 49 U.S.C. Chapter 53.

III. Regulatory Guidance

The statutory and regulatory framework for the STIP and STIP development processes includes:

- 23 United States Code (U.S.C.) 134 and 135, and its implementing regulations;
- 49 United States Code (U.S.C.) 53 and its implementing regulations;
- 23 Code of Federal Regulations (CFR) Part 450
- 49 Code of Federal Regulations (CFR) Part 613
- § 43-1-106(8)(a), Colorado Revised Statutes (C.R.S.) Transportation Commission;
- § 43-1-1101-1104, C.R.S. Transportation planning.

IV. Planning and Programming Process

The Planning and Programming Process includes the development of a 20+ year Statewide Transportation Plan (SWP), a 10 year Development Program, and a 4 year Statewide Transportation Improvement Program (STIP). A new planning cycle occurs every four years and includes the development or update of the SWP and Regional Transportation Plans (RTPs) for each of the state’s Metropolitan Planning Organizations (MPOs) and Transportation Planning Regions (TPRs), the 10 Year Development Program and the STIP. The development of these plans/programs requires extensive coordination with each MPO and TPR. The process begins with the identification of projected transportation conditions and needs, forecast revenues, performance objectives, and policies. Corridor needs, visions, strategies, priorities, and improvements are identified. The 10 year Development Program includes potential projects

STIP Development Guidance and 4P Process

Statewide Transportation Improvement Program

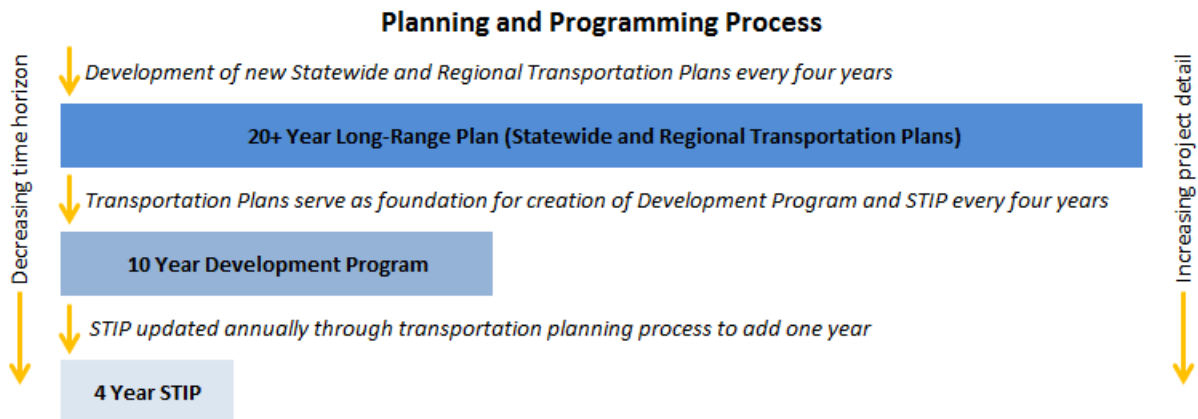

within revenue scenarios for the mid-range timeline, and the 4 year STIP lists projects to be implemented within fiscal constraint by year. The development of the STIP follows the Project Priority Programming Process (4P) described in section VIII.

V. Statewide Transportation Plan

The Statewide Transportation Plan (SWP) is a vision document that outlines transportation needs, and goals and objectives over the next 20 years and provides a roadmap for transportation investments. It incorporates other long range plans including the Regional Transportation Plans (RTPs), modal plans (i.e. Transit, Bicycle/Pedestrian, Aviation, etc.), topical plans (Freight, Operations, Safety, etc.) as well as the Transportation Commission planning policies, performance goals and objectives, revenue projections, system and demographic data analysis, the results of the coordination with TPRs and MPOs, corridor visions, strategies, priorities, and improvements, and the results of public involvement and comments. The Statewide Plan is web-based and is interactive.

VI. Development Program

The purpose of the Development Program is to bridge the gap between the 4-year Statewide Transportation Improvement Program (STIP) and the 20+ year Statewide Transportation Plan (SWP), and to identify the needs for major investments and the priorities over a 10 year timeframe (through 2025). Major investment needs were identified based on a statewide inventory of documented needs from planning and development studies. These major investment or corridor needs are also identified in the RTPs for the TPRs and MPOs. The Development Program is not intended to capture every potential project identified to date. It is intended to, at a minimum, capture major projects as defined by each Region, as well as priorities for transit, bike/ped, and operations. Less detailed information is also being collected on other regionally important projects identified in Regional Transportation Plans, but not included in the inventory of major investment needs.

VII. STIP

A. Framework

The STIP will be a rolling four year plan which meets federal guidelines and regulations per 23 U.S.C. 134 and 135, and 23 CFR, Part 450. The STIP will identify all Regionally Significant projects,

STIP Development Guidance and 4P Process

Statewide Transportation Improvement Program

STIP Programs, and Regional Sub-Programs. Non-Regionally Significant projects will be grouped under STIP Programs or Regional Sub-Programs and identified outside of the STIP on Program Lists corresponding with those STIP Programs or Regional Sub-Programs. The STIP will be developed once every four years, with an annual update to include the addition of a year to maintain a full four year STIP period. STIP Amendments will be processed twice per year, while Administrative Modifications will be processed on an as needed basis. Changes to Program Lists can be made administratively on a quarterly basis.

Year	1	2	3	4	5	6	7	8	9	10	11 - 25
2016					(FY 2017-2020)						Long-Range Plans
2017					(FY 2018-2021)						
2018					(FY 2019-2022)						
2019					(FY 2020-2023)

2020					(FY 2021-2024)						Long-Range Plans
2021					(FY 2022-2025)						
2022					(FY 2023-2026)						
2023					(FY 2024-2027)						

	Official STIP Years
	Development Program Years
	Long-Range Plan Projects

B. Four Year Work Program

The four year work program is an internal project management tool that includes detailed, current schedules and projected expenditures for the projects included in the STIP. The Work Program will be used by the CDOT Office of Program Management to conduct risk assessment, to track progress on all of the projects or programs, and to support cash management efforts.

C. Regionally Significant Projects

Regionally Significant projects shall be defined as those projects serving regional transportation needs and of sufficiently significant scale to be typically included in transportation demand modeling for air quality emissions analysis. Regionally Significant projects are defined federally in 23 CFR 450.104:

Regionally significant project means a transportation project (other than projects that may be grouped in the TIP and/or STIP or exempt projects as defined in EPA's transportation conformity regulation (40 CFR part 93)) that is on a facility which serves regional transportation needs (such as access to and from the area outside the region; major activity centers in the region; major planned developments such as new retail malls, sports complexes, or employment centers; or transportation terminals) and would normally be included in the modeling of the metropolitan area's transportation network. At a minimum, this includes all principal arterial highways and all fixed guideway transit facilities that offer a significant alternative to regional highway travel.

MPO's may have their own definition of Regionally Significant projects for the development of their TIP. Each TIP will be included within the STIP directly or by reference without change according to federal guidelines.

STIP Development Guidance and 4P Process

Statewide Transportation Improvement Program

Regionally Significant projects are identified individually in the STIP showing expected costs laid out by year on an expenditure basis. The Region or division of CDOT administering the project is responsible for identifying Regionally Significant projects for STIP purposes. Questions on regional significance may be directed to the CDOT Multimodal Planning Branch.

D. Non-Regionally Significant Projects

Per Federal regulations, non-Regionally Significant projects are projects that are not considered to be of appropriate scale for individual identification in the STIP in a given program year, and which are grouped under a STIP Program or Regional Sub-Program. These types of projects typically include Surface Treatment, Bridge, asset management projects, FASTER Safety projects, and many of the projects funded through suballocated programs such as CMAQ and TAP. Non-Regionally Significant projects will be identified on Program Lists corresponding with the appropriate STIP Program or Regional Sub-Program. Funding in the STIP for STIP Programs or Regional Sub-Programs will reflect revenues expected for each Program over the years of the STIP rather than for individual projects. This will allow flexibility to match funding with those projects that are ready to implement. Program Lists will be easily accessible from the STIP.

E. STIP Amendments and STIP Administrative Modifications

There are two types of changes that apply to the STIP: STIP Amendments and STIP Administrative Modifications.

A STIP Amendment is any major change to a Regionally Significant project, including addition to or deletion from the STIP, major change to cost, initiation dates, or scope, or a major change to STIP Program or Regional Sub-Program amounts. This type of change requires public review, re-demonstration of fiscal constraint and FHWA/FTA approval. Adding a year to the STIP to maintain the four official STIP years recognized by the FHWA also constitutes a STIP Amendment.

A STIP Administrative Modification is any minor change to a Regionally Significant project, including a minor change to cost, initiation dates, or scope, or a minor change to STIP Program or Regional Sub-Program amounts. This type of change does not require public review, re-demonstration of fiscal constraint, or FHWA/FTA approval.

Changes to Non-Regionally Significant projects including adding or deleting projects, major or minor changes to cost, scope, or initiation constitute neither a STIP Amendment nor STIP Administrative Modification. As noted previously, Program Lists identify the Non-Regionally Significant projects funded within STIP Programs or Regional Sub-Programs. While accessible from the STIP, these Program Lists are not subject to the provisions of STIP Amendment or Administrative Modifications.

A TIP amendment to a Regionally Significant project or to a STIP Program or Regional Sub-Program is processed as either a STIP Amendment or STIP Administrative Modification, depending on the type of change. A TIP Amendment to a Non-Regionally Significant project is

STIP Development Guidance and 4P Process

Statewide Transportation Improvement Program

incorporated by reference, and as such does not constitute either a STIP Amendment or STIP Administrative Modification.¹

STIP Amendments will be processed twice per year in June and December, while Administrative Modifications will be processed on an as needed basis. Off-cycle STIP Amendments can occur if there is a compelling need to modify the STIP in between the regular cycle. The addition of a year to the STIP will occur once per year, as part of the June STIP Amendment, and will require a 30 day public review and comment period.

The Department will consult with the FHWA, FTA, and MPOs as needed to reconcile the STIP, and verify that fiscal constraint has been maintained. A quarterly reconciliation report will also be provided to FHWA, FTA, and the MPOs.

Type of Change	Cycle	Regionally Significant Projects	Non-Regionally Significant Project
STIP Amendment	June and December	<ul style="list-style-type: none"> · Adding or deleting projects <i>Example:</i> -Adding a new interchange construction project · Major changes to cost, scope, or initiation <i>Example:</i> -Significant extension of project limits on a roadway capacity project 	<ul style="list-style-type: none"> · Major changes to program amounts <i>Example:</i> -Receiving \$20m in Obligation Redistribution from FHWA
STIP Administrative Modification	As needed	<ul style="list-style-type: none"> · TIP Amendments (incorporated directly) <i>Example:</i> -Adding a project in an MPO area that has been amended into the TIP · Minor changes to cost, scope, or initiation <i>Example:</i> -Extending project limits on a Surface Treatment project 	<ul style="list-style-type: none"> · Minor changes to program amounts <i>Example: Minor increase in program amount based on updated revenue projections</i>
Other Non-STIP Changes	Monthly	<ul style="list-style-type: none"> · N/A 	<ul style="list-style-type: none"> · TIP Amendments (MPO TAP, STP-M, and CMAQ projects incorporated by reference) · Adding or deleting projects to Program Lists · Major or minor changes to cost, scope, or initiation

F. Emergency Procedures

STIP Administrative actions are declared an emergency as defined by the Emergency Relief Program 23 CFR 668.105, the Governor, the Transportation Commission, or the Executive

¹ Non-regionally significant projects funded through suballocated TAP, STP-M, or CMAQ are incorporated by reference. Other Non-Regionally Significant projects (i.e. Surface Treatment, Region TAP, etc.) will be identified on Program Lists corresponding with the appropriate STIP Program or Regional Sub-Program.

STIP Development Guidance and 4P Process

Statewide Transportation Improvement Program

Director (based on an emergency event); or require an expedited action for special circumstances agreed to by CDOT Executive Director and FHWA Colorado Division Administrator or the FTA Regional Administrator. This action will go through an abbreviated public involvement process concluding with Transportation Commission action.

G. Other Non-STIP Changes

Changes to Non-Regionally Significant projects do not constitute a STIP Amendment or STIP Administrative Modification. A change to a Non-Regionally Significant project does not occur in the STIP, but in the Program List corresponding to the parent STIP Program or Regional Sub-Program. Changes to Program Lists can be made administratively on a quarterly basis.

VIII. STIP Development - 4P Process

The Transportation Commission (TC), in cooperation with Colorado Counties Incorporated (CCI), the Colorado Municipal League (CML) and the Metropolitan Planning Organizations (MPOs) established the “Project Priority Programming Process” (4P). It was first adopted by the TC on August 18, 1994 and last updated and adopted by the TC in September 2009. This guidance maintains the 4P and supersedes the Guidelines adopted in September 2009.

A. TPR Coordination

CDOT will update the STIP at least once every four years as part of the planning process. Each CDOT Region shall offer the opportunity for county meetings to review transportation needs and fund availability developed as part of the regional plans. These countywide meetings may include county and municipal officials and Transportation Planning Region (TPR) representatives, as well as Transportation Commissioner(s). After the county meetings, if held, the CDOT Region shall hold at least one meeting, open to the public, with each of its TPRs to discuss project prioritization for the STIP within that TPR. In CDOT Regions that include an MPO, these TPR meetings will be coordinated with the MPO Planning Process to ensure consistency and avoid duplication of effort (see MPO coordination).

The purpose of the TPR meeting is to review the projects in the Statewide Plan, Development Program and current STIP and consider project priorities for the 4 year period. All projects included in the STIP must be consistent with the goals and strategies laid out in the financially constrained portion of the Statewide Plan (SWP). If projects are identified that are not consistent with the SWP, an amendment to the SWP must be processed and approved before they can be included in the STIP. After meeting with each of their TPRs, the CDOT Region shall hold a joint meeting with all of their TPRs to select and prioritize projects for the entire CDOT Region (in applicable programs when funding is available). During the prioritization process, some TPRs/MPOs not wholly contained in one CDOT Region may choose to plan and conduct a TPR/MPO wide prioritization meeting. Following these meetings, the CDOT Region shall submit their list of prioritized projects for the Draft STIP to the CDOT Headquarters STIP Manager. A statewide list of projects is compiled for submittal to the TC and inclusion in the Draft STIP.

Note that per 24-6-402 C.R.S., all meetings held per the above guidelines are considered public meetings and must be open to the public. Also, reasonable accommodations must be made for all individuals in accordance with Title VI of the Civil Rights Act of 1964 (Title VI, 42 U.S.C. § 2000d et seq.).

STIP Development Guidance and 4P Process

Statewide Transportation Improvement Program

B. MPO Coordination

Federal statute and regulation establishes MPOs for urbanized areas over 50,000. These areas in Colorado are the Denver Regional Council of Governments (DRCOG) MPO, the Pikes Peak Area Council of Governments (PPACG) MPO, the North Front Range MPO (NFRMPO), the Pueblo Area Council of Governments (PACOG) MPO and the Grand Valley MPO (GVMPO). MPOs are responsible for the development of the Transportation Improvement Program (TIP) for the MPO area. Anyone interested in participating in TIP development may contact their MPO directly. Projects identified for funding by CDOT are forwarded to the appropriate MPO for review and consideration for inclusion in the TIP.

Federal regulations require the Governor to approve all TIPs and TIP amendments. When an MPO has a TIP that is ready for the Governor's approval, it submits the approved TIP to CDOT for review of fiscal constraint and adherence to planning regulations. Once fiscal constraint and adherence to planning regulations are verified, CDOT will prepare a packet for the Governor's review and signature to approve the TIP and transmit approval to FHWA and FTA. The submittal of the TIP to CDOT should include a resolution of the MPO Board adopting the TIP, an Air Quality Control Commission (AQCC) conformity determination finding (if applicable), and a signed statement certifying the planning process was followed in the development of the TIP.

Once TIPs are approved by the MPO and the Governor, they are incorporated into the Draft STIP without change, either directly or by reference. Exceptions include projects that are funded exclusively with local or private funds with no CDOT involvement in the project. Detail may vary from TIPs to the STIP with regard to programs and project descriptions.

Likewise, Federal regulations require the Governor to approve TIP amendments. In Colorado, the Governor has delegated authority for approving TIP amendments to the CDOT Executive Director. TIP amendments should be forwarded to the CDOT Region and CDOT Headquarters STIP Manager where a packet is prepared for the Executive Director's signature. Once the signature is obtained, a copy of the approval and packet is forwarded to FHWA/FTA for their concurrence.

C. Tribal Coordination

There are two tribes responsible for transportation planning within Colorado: the Southern Ute and the Ute Mountain Ute. Tribal governments develop a Tribal TIP (TTIP). Once the TTIP is approved by the Tribal Council it is included in the Draft STIP either directly or by reference in order to meet requirements for those projects requiring action by FHWA or FTA.

D. Air Quality Requirements

In areas designated by the Environmental Protection Agency (EPA) as air quality non-attainment or maintenance areas, Regionally Significant (S)TIP projects must be modeled to demonstrate that their construction will not degrade air quality below the standards set forth in the Clean Air Act (CAA) Amendment of 1990 (et sub). The modeling results and other analyses are reviewed to assure the (S)TIP is in conformance with the relevant State Implementation Plan (SIP); this process is referred to as demonstrating conformity. Currently, three of the MPOs are in non-attainment/maintenance for one or more pollutants (DRCOG, PPACG, and NFR), as is a portion of Upper Front Range (UFRTPR). A multi-party intergovernmental agreement addresses air

STIP Development Guidance and 4P Process

Statewide Transportation Improvement Program

quality and conformity responsibilities in the DRCOG, NFR, and UFR ozone non-attainment area.

E. STIP Approval Process

1. Draft STIP Approval

The result of the STIP development process and MPO TIP development is a completed Draft STIP. CDOT staff verifies that the Draft STIP is fiscally constrained by year. CDOT staff verifies that it is consistent with the SWP and prepares a certification that the required planning process and opportunities for public involvement have been adequately followed. The Draft STIP is then forwarded to the TC for review and for authorization to release to the public for review and comment.

2. Public Notice and Comment Period

When the TC releases the Draft STIP, CDOT posts an electronic copy of the draft on its external website. An e-mail notification is sent to recipients statewide explaining the purpose of the STIP, where to view a copy of the draft, how to submit comments on the STIP, and the length of the comment period. Additional public notice is provided via flyers, brochures, and social media. Hard copies of the draft are available for review at CDOT Headquarters, CDOT Region Headquarters, FHWA Colorado Division, and FTA Region 8 and TPR offices. The Draft STIP is available for public review and comment for a minimum of 30 days. During the public comment period, a public meeting is held in conjunction with a monthly TC meeting where members of the public can provide input on the Draft STIP. Notification for the Public Hearing is posted on CDOT’s external website, as well as sent via e-mail to a statewide distribution list. Public Hearing notices are also posted at all CDOT Region Headquarters offices, FHWA and FTA offices located in Lakewood, Colorado, and TPR offices. Advertisements for the hearing are placed in local newspapers across the state. Comment on the draft STIP can be submitted on the CDOT website, or to the Headquarters STIP Manager via mail, phone or e-mail. A hard copy of the Draft STIP can also be requested by contacting the CDOT Headquarters STIP Manager via mail, phone, or e-mail.

3. Adoption of the STIP

Following the public comment period and any revisions needed due to those comments, the Draft STIP is submitted to the TC for adoption. Once the STIP has been adopted by the TC, it is forwarded to the FHWA and FTA for their approval, and goes into effect at the beginning of the State fiscal year on July 1.

4. Distribution of the Adopted STIP

Once the STIP is adopted by the TC and approved by FHWA and FTA, the document is posted on CDOT’s external website www.coloradodot.info.

F. Schedule for the Four Year STIP Update Cycle

STIP Development/4P Schedule	
MONTH	ACTIVITY
May through September	CDOT Regions begin Project Priority Programming Process (4P)

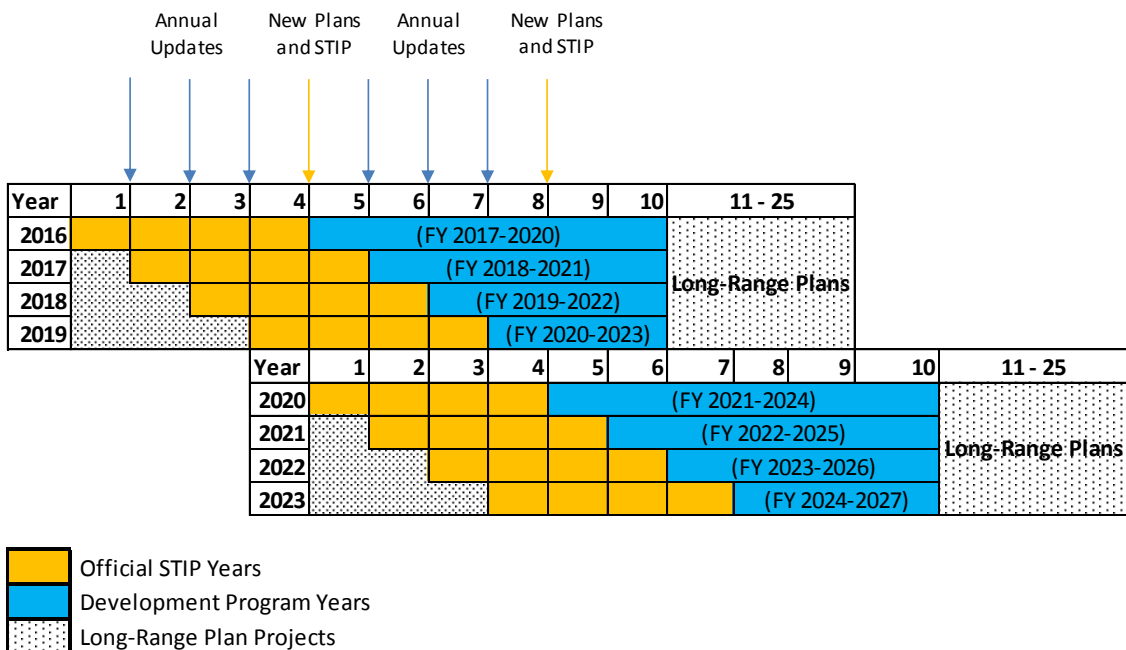

STIP Development Guidance and 4P Process

Statewide Transportation Improvement Program

December	CDOT Regions conclude 4P
January	CDOT Regions submit Draft STIP requests and MPOs submit draft TIP requests
February through May	CDOT distributes Draft STIP for public review and comment
March/April	MPOs and Governor approve TIPs
April	TC holds a statewide public hearing on the Draft STIP
May	TC adopts the Draft. Once adopted, the STIP is released to FHWA/FTA for their review and approval
June	FHWA and FTA approve STIP

IX. Annual STIP Update Process

The STIP will be updated annually in order to add one year and maintain a full four years in the STIP. This update will be accomplished through a STIP Amendment. The Statewide Plan and the 10 year Development Program will be consulted and considered in identifying the projects to be amended into the STIP. The addition of a year to the STIP will be coordinated through the planning process with each TPR. The TC will adopt the updated STIP at a regular meeting, and the STIP will then be forwarded to the Governor and to FHWA and FTA for approval. This annual update will coincide with the annual STIP Amendment process.

CDOT Guidance for Processing TIP/STIP Amendments, Administrative Modifications and the Annual STIP Update

Statewide Transportation Improvement Program

The Statewide Transportation Improvement Program (STIP) is frequently amended due to changes in available funding, project cost, scope or schedule, or the addition or deletion of projects. The public involvement process and approval process is described below:

I. STIP Amendments

STIP Amendments require Transportation Commission approval and will occur on a semi-annual basis. Below is a description of what constitutes an Amendment and the timeline for approval.

A. Regionally Significant Projects

A revision to the STIP is considered to be a STIP Amendment when:

1. A regionally significant project is added to or deleted from the STIP.
 - a) Regionally significant projects are defined here as stand-alone projects that are regionally significant to that specific area or are not eligible for inclusion in a STIP Pool. For more specifics on what is considered to be a regionally significant project, please refer to the Project Priority Programming Process (4P) Guidelines.
2. There is a major scope change to a project. A major scope change may be described as:
 - a) Adding a travel lane at least one centerline mile in length;
 - b) Adding a new intersection or a major improvement to existing intersections (excluding turn lanes, auxiliary lanes or median improvements);
 - c) Adding new interchanges and grade separated intersections;
 - d) Major improvements to existing interchanges excluding drainage improvements and ramp widening;
 - e) A modification to a project that results in a re-evaluation of a NEPA document (NOTE: STIP amendments *documented* during NEPA re-evaluation public involvement do not require further public involvement during STIP process);
 - f) A modification to a project that requires air quality conformity determination, if applicable;
 - g) Adding or deleting federal or state funding for any project by more than \$5 million (cumulative) over the four years of the STIP.

3. Timeline for Processing STIP Amendments

Amendments will be processed for approval by the Transportation Commission in December and May of each fiscal year. This includes the public involvement process as detailed in III. A, below. Off-cycle Amendments will be processed when deemed necessary by the Transportation Commission or the CDOT Executive Management Team.

B. Non-Regionally Significant Projects and Program Pools

Adding a new program pool or implementing substantial changes to program pool totals due to action by the Transportation Commission or the US DOT. Projects that are listed in 23 CFR 771.117 (c) & (d) are pool eligible and will follow the Administrative Modification guidance in section II.

CDOT Guidance for Processing TIP/STIP Amendments, Administrative Modifications and the Annual STIP Update

Statewide Transportation Improvement Program

1. Adding funds to a STIP program pool that results in a change of the program pool balance of 15% or more than was originally pushed via Program Distribution or the Annual Budget funding adjustment, based on updated revenue projections.
2. Other amendments determined by CDOT.

II. STIP Administrative Modifications

- A. STIP Administrative Modifications include revisions which:
 1. Do not meet the STIP Amendment criteria as listed in Section I A or I B; or
 2. Result from voter initiatives; or
 3. Are declared an emergency as defined by the Emergency Relief Program 23 CFR 668.105, the Governor, the Transportation Commission, or the Executive Director (based on an emergency event); or
 4. Require an expedited action for special circumstances agreed to by CDOT Executive Director and FHWA Colorado Division Administrator or the FTA Regional Administrator. This action will go through an abbreviated public involvement process concluding with Transportation Commission action.
- B. Roll-forwards from prior STIPs
 1. Includes projects that are STIP'd in a previous STIP cycle, but were not obligated in that cycle. These projects will be added to the current STIP in one of the following manners:
 - a) Beginning with FY2016, Region Business Office will undo the original budget action so that the funds may be rolled into the next current fiscal year and re-STIP'd with the original funds, or
 - b) Projects will be STIP'd in the current STIP utilizing the funding program UNO for Unobligated. This funding program is solely used for the purpose of demonstrating those projects previously budgeted and not yet obligated. This option will be phased out as CDOT moves forward with Cash Management principles and those older projects – from FY2015 and earlier - are processed for obligation.

III. Public Involvement and Approval Procedures for STIP Amendments and STIP Administrative Modifications for Rural, non-TIP Areas

A. STIP Amendments:

1. Prior to STIP Amendment approval for rural non-TIP areas:
 - a) Regional STIP Administrator will notify OFMB of STIP Amendment
 - (1) OFMB verifies if project is an Amendment.
 - (2) OFMB verifies financial constraint.
 - (3) Region Planner verifies the amendment for consistency with the long-range Regional and Statewide Plans. If a Plan amendment is needed, the Region Planner will initiate it and work with DTD to complete.
 - b) OFMB develops public notice and posts proposed STIP Amendment on external website for a 30-day review and comment period

CDOT Guidance for Processing TIP/STIP Amendments, Administrative Modifications and the Annual STIP Update

Statewide Transportation Improvement Program

- c) OFMB distributes electronic notice of proposed STIP Amendment using appropriate TPR distribution list. This mailing list is derived from the DTD Statewide Planning Mailing List and will be updated periodically with the electronic list managed by OFMB.
 - d) CDOT Region Planner contacts TPR representative and requests that a TPR meeting be conducted to discuss any pending STIP Amendments no later than the end of the written comment period, identified in the notice. If the TPR already has a meeting scheduled during the public involvement period, they should discuss any pending STIP Amendments for their area.
 - e) All written comments are sent to OFMB STIP Manager who will, in turn, forward copies to the appropriate CDOT Region Planner within 3 business days after receiving comments.
 - f) CDOT Region Planner responds to the commenter within 5 business days before the scheduled Transportation Commission meeting.
 - g) CDOT Region Planner provides a copy of the response to OFMB for documentation.
 - h) OFMB coordinates with the Transportation Commission office on the required agenda item and the Chief Financial Officer, or designee, leads the Transportation Commission discussion with the CDOT Region Planner or appropriate region staff in attendance, if necessary.
 - i) Transportation Commission takes action on the STIP Amendments.
 - j) If Commission approves STIP Amendments, OFMB submits Transportation Commission approved STIP Amendments with signature from the OFMB Director to FHWA/FTA.
 - k) FHWA/FTA sends its approval of STIP Amendments to OFMB.
 - l) OFMB endorses the FHWA approved amendment list in the STIP and informs DTD-MPO & Regional Planner, STIP Administrator and CDOT Region Planner of FHWA/FTA approval.
 - m) OFMB posts approval for STIP Amendments on external website.
 - n) If Transportation Commission or FHWA/FTA **does not** approve STIP Amendments, process will start over with updated information.
- B. Administrative Modifications**
- 1. OFMB verifies and approves revision as administrative modification.
 - 2. OFMB compiles the administrative modification report at the end of the month and sends it to FHWA.
 - 3. OFMB posts approved administrative modification information on CDOT external website.

IV. Public Involvement and Approval Procedures for TIP Amendments

A. MPO TIP Areas

CDOT will rely on Metropolitan Planning Organization (MPO) Transportation Improvement Program (TIP)'s public involvement process as structured in the signed Memorandum of Agreement with each MPO. TIP projects are included in the STIP without modification.

CDOT Guidance for Processing TIP/STIP Amendments, Administrative Modifications and the Annual STIP Update

Statewide Transportation Improvement Program

1. CDOT acknowledges MPO's TIP public involvement process and obtains MPO TIP resolutions from the MPO board.
2. CDOT Regions will ensure projects are in the TIP before amending the STIP.
3. OFMB drafts a letter for signature from Executive Director, who has signature authority from the Governor to approve incorporating TIP amendments into the STIP.
4. OFMB sends the signed letter and supporting documentation to FHWA/FTA for subsequent modifications/amendments to the STIP. Supporting documentation includes:
 - a) Verification of fiscal constraint
 - b) Verification of air quality conformity
 - c) Resolution from MPO
 - d) Explanation for the amendment
5. After forwarding the information to FHWA/FTA, OFMB endorses the amendment list in the STIP and informs DTD-MPO & Regional Planner, STIP Administrator and CDOT Region Planner of the STIP approval.
6. OFMB will approve TIP amendments on a weekly basis.

V. Annual STIP Update

The steps below outline the process for the Annual STIP Update. This process is used to maintain an active 4-year STIP window to align with the CDOT principles of Cash Management. This process has been developed with input and concurrence from the FHWA Colorado Division and the FTA Region 8.

The Annual STIP Update will coincide with the timing and execution for the May STIP Amendment cycle. The update will include projects identified for funding in the year being added to the STIP, including any Regionally Significant projects, and projects in non-regionally significant program pools. This includes any projects that have been identified for asset management program pools, such as Surface Treatment, Bridge, FASTER Safety, etc.

A. Annual STIP Update Process

1. Region Planners will meet with each TPR or MPO to review projects being added to the new fiscal year in the STIP. These meetings may be set with each individual TPR/MPO or conducted as a joint meeting. These meetings must be concluded by the end of February each year.
2. Region Planners will enter the additional projects into SAP by March 5. (If March 5 falls on a weekend, projects must be entered by the Friday prior to the 5th.)
3. OFMB will then publish the list for a minimum of 30 days for public review and comment.
 - a) The Transportation Commission will release the Draft STIP for public comment and review at its March meeting. The comment period will run through the end of April.

CDOT Guidance for Processing TIP/STIP Amendments, Administrative Modifications and the Annual STIP Update

Statewide Transportation Improvement Program

- b) Any comments received by the OFMB STIP Manager will, in turn, be forwarded to the appropriate CDOT Region Planner within 3 business days after receiving comments.
 - c) CDOT Region Planner responds to the commenter within 5 business days before the scheduled commission meeting.
 - d) CDOT Region Planner provides a copy of the response to OFMB for documentation.
4. OFMB coordinates with the Transportation Commission office on the required agenda item and the Chief Financial Officer, or designee, leads the Commission discussion with the CDOT Region Planner or appropriate region staff in attendance, if necessary.
 5. Transportation Commission takes action on the Annual Update at its May meeting.
 6. Once approved, CDOT will forward a copy of the updated STIP, along with a copy of the Transportation Commission resolution, an updated self-certification, and verification of fiscal constraint with signature from the Chief Financial Officer to FHWA/FTA.
 7. FHWA/FTA will conduct a final review and approval of the updated STIP. Final approval will be sent back to the CDOT Executive Director and Chief Financial Officer.

STIP Report

Statewide Transportation Improvement Program

OVERVIEW OF THE STIP REPORTS

The STIP may also be accessed online at <https://www.codot.gov/business/budget>. An updated web-based version of the STIP is being developed which will allow for additional interactivity including project mapping and the ability to search the STIP.

As mentioned in the Overview in Tab 1, there three types of projects included in the STIP – Regionally Significant projects, Program Pool projects, and STIP Pool projects. Regionally Significant projects are stand-alone projects that meet specific federal criteria as projects serving regional transportation needs. The addition, deletion, or major changes to Regionally Significant projects require a STIP Amendment which includes public review and approval by the Colorado Transportation Commission. Minor changes can be made administratively via a STIP Administrative Modification. Program Pool projects are projects that do not meet criteria for identification as Regionally Significant, and are grouped together based on the primary source of funding for that project, such as Surface Treatment funds. STIP Pool projects are generally larger projects that show various phases of a project as sub-projects. All of the smaller projects complete the whole of one project.

Regionally Significant projects and Program projects are differentiated by the naming convention used. Regionally Significant projects appear in the STIP as: SXX____. The “S” stands for STIP, the XX represents a Transportation Planning Region (TPR) or CDOT Region designation, followed by a four digit project number. STIP Programs are similar, however, a three digit extension is added to designate the projects within the program (i.e. SR15215.073). Regionally Significant projects are identified individually and include information on funding amounts and programmed years. Program projects are “grouped” under the relevant Program (i.e. Surface Treatment) without detailed information on funding amounts or year. This allows more flexibility in funding projects which are ready to move forward in the design and construction process without triggering a STIP Amendment or Administrative Modification.

The STIP is organized by CDOT Region. Statewide projects and programs appear in the Statewide Section of the STIP at the end of the STIP document. All dollars identified in the STIP are in thousands.

Fields in the STIP include the following:

- CDOT Region
- STIP ID – The unique identifier for Regionally Significant projects or STIP Programs
- STIP ID Description – A description of either a Regionally Significant project or STIP Program
- STIP WBS ID – A three digit extension of the STIP ID. Regionally Significant projects are identified by .999, STIP Programs and Pools are identified by .000, and sub-projects within STIP Programs and Pools are identified by .001, .002, etc.
- STIP WBS Description – Includes the same information as STIP ID field for Regionally Significant projects and STIP Programs, or descriptions of specific sub-projects within STIP Programs and STIP Pools.
- Funding Program – Represents the CDOT funding program associated with a Regionally Significant project or STIP Program.
- STIP Phase – Represents the phase for the projects, such as Design, Construction, Right of Way, Environmental, Utilities, or Miscellaneous.

STIP Report

Statewide Transportation Improvement Program

- **Fund Type** – Identifies the specific federal and state programs the funding is tied to. For example, federal programs will show in this column as NHPP (FHWA’s National Highway Priority Program), 5307 (FTA’s USC Section 5307 Program), and SHF (Colorado’s Highway User Tax Fund, or gasoline tax). All of these fund types are detailed in the Acronym List in Tab 11.
- **Years** – Identifies the funding (in thousands) by State Fiscal Year.

STIP Report Variants

Additionally, this report is split into three variant reports. These different reports provide different snapshots of the data included in the STIP. The Regionally Significant Projects report and the Transit Report show data that is also included in the full STIP report in Tab 6.1. These reports should not be utilized for determining fiscal constraint. For Fiscal Constraint, please refer to the reports provided in Tab 8.

Below is a description of the three STIP project reports:

- **The FY2018 - FY2021 STIP – Fiscal Years 18-21.** This variant lists all of the projects included in the current FY2017 - FY2020 STIP that will continue in the FY2018 - FY2021 STIP, as well as those projects being added for FY2021. This report is found under Tab 6.1.
- **The Regionally Significant Projects report.** This report shows all of the stand-alone, major projects across the state. This report is found under Tab 6.2.
- **The Transit Projects report.** This report details all Federal transit projects, as well as CMAQ (Congestion Mitigation and Air Quality) or STP-Metro projects that qualify to be Flexed to FTA for transit. Also included are those projects funded by Colorado’s FASTER Transit dollars and SB-228. This report may be found under Tab 6.3.

CDOT Region	STIP ID	STIP ID Description	STIP WBS ID	STIP WBS Description	Funding Program	Fund Source	Fund Type	STIP Phase	2018	2019	2020	2021	Future

Added and Deleted / Completed Report

Statewide Transportation Improvement Program

Reading the Added and Deleted/Completed Reports

What follows are reports that demonstrate the comparison between the FY2017 – FY2020 STIP and the Draft FY2018 – FY2021 STIP. The FY2017 – FY2020 STIP became effective July 1, 2016 and will remain effective until June 30, 2017.

Added Projects

This report shows projects that are included in the FY2018 – FY2021 STIP, but were not programmed in the FY2017 – FY2020 STIP. These projects are considered “Added” as they are now qualified to receive funding in this new STIP cycle.

Deleted/Completed

This report shows projects that were included in the FY2017 – FY2020 STIP, but are not programmed in the FY2018 – FY2021 STIP. The reason for not including these projects in the new STIP is primarily because the project has been completed. However, there are some projects that were unable to receive all the funding necessary for completion or are no longer a priority in that corridor. Those projects are considered deleted.

Fiscal Constraint Report

Statewide Transportation Improvement Program

Reading the Fiscal Constraint Report

The Fiscal Constraint Report shows how the STIP meets Fiscal Constraint for each Fiscal Year that is included in the STIP. This report summarizes all revenues expected, and calculates constraint based on what is programmed. The formula for determining Fiscal Constraint is shown in the Summary section on the report as follows:

<i>Revenue Projections</i>	Funds that CDOT has a reasonable expectation of receiving
<i>minus</i>	Specific Deductions that are included in Revenue Projections, but not in the STIP
<i>plus</i>	Specific Additions that are included in the STIP, but not in Revenue Projections
<i>minus</i>	Amount Programmed, or eligible to be programmed, in the STIP
<i>= Total Balance</i>	Balance shows any remaining un-programmed funds

NOTE:

Revenue Projections include funds from FHWA, the Colorado HUTF, plus several other dedicated funding streams as directed by the Colorado Legislature. More detail on revenues may be found in Tab 10.

Deductions are those items that are accounted for in Revenue Projections, but are not included in the STIP. This includes items such as administrative overhead costs for the Department, CDOT Maintenance, etc.

Additions are those items that are included in the STIP, but are not included in Revenue Projections. This includes items such as FTA allocations, and RAMP, which are not included in the Revenue Projection Model that CDOT employs. FTA funds come as dedicated allocations from the Federal Transportation Authorization bills; RAMP is the program to spend-down CDOT's cash balance reserves.

RAMP – Please note that RAMP is split into two categories in the Additions section. The RAMP Ops and Partnership line refers to those RAMP projects included in the call for partnership projects in CY2013. These projects will be ongoing through the end of FY2019.

The other RAMP line refers to RAMP dollars assigned to CDOT Asset categories, such as Surface Treatment, Bridge maintenance activities, and FASTER Safety projects. This portion of the RAMP program will retire after FY2018.

The Fiscal Constraint Report on the following pages shows constraint by fiscal year for each year included in the FY2018 – FY2021 STIP.

Appendix C: 2040 Revenue Projections	
Appendix D: Detailed Assumptions and Methodology	

Introduction

CDOT's investment strategy is reflected in the Program Distribution process. Program Distribution is a part of the Statewide Transportation Plan (SWP) and outlines the assignment of projected revenues to various program areas for the time period of the Plan (FY 2016-2040).

Revenues are updated and programs are funded annually through the annual budget process. However, Program Distribution provides a long-term view of what revenues are likely to look like, and how they will likely be allocated among programs in the future. Program Distribution reflects an investment strategy based on the policies and priorities established as part of the development of the SWP (See Appendix A: Policy Directive 14).

Program Distribution is for planning purposes only and does not represent a budget commitment by the Colorado Transportation Commission (TC). Final numbers for each year will be a result of updated revenue estimates and annual budget adoption.

The SWP can be found at www.coloradotransportationmatters.com. Additional information on the annual CDOT budget, including detailed information about individual funding programs can be found at <https://www.codot.gov/business/budget>.

Background

In February 2014, the TC adopted the 2040 Program Distribution (See Appendix B: 2040 Program Distribution TC Approval). Program Distribution, formerly referred to as Resource Allocation, outlines the assignment of projected revenues to program areas for the time period of the long-range SWP (FY 2016-FY 2040). Program Distribution provides a baseline for financial constraint of SWP, Regional Transportation Plans (RTPs), and the Statewide Transportation Improvement Program (STIP) and Metropolitan Planning Organization (MPO) TIPs.

Revenues for Program Distribution are based on the Baseline Revenue Projection for the 2040 SWP adopted by the TC on April 18, 2013 (See Appendix C: 2040 Revenue Projections). In the Baseline, federal revenues are projected to peak in 2025 and decline each year following. Senate Bill (SB) 228 revenue is projected in years 2016-2020. Since the April 2013 adoption, gas tax revenues have trended slightly downward and motor vehicle registrations have trended slightly upward. It should be noted that in the time since the adoption of Program Distribution, the forecast of SB 228 revenues has been reduced significantly.

Program Areas

Program Distribution assignments illustrate for planning partners and the public the intended emphasis areas given projected revenue expectations. Individual funding programs in Program Distribution are organized in the following program areas:

- Restricted Programs
- Asset Management

- Other TC Directed Programs (Flexible)
- Bridge Enterprise
- High Performance Transportation Enterprise (HPTE)

Restricted Programs are programs that are tied to a dedicated funding source (i.e. the funding is “restricted,” and pre-assigned to that program by federal or state statute.) While the TC could elect to supplement the funding in these programs with additional funds, in general the funding level is determined by the level of federal funding for that program.

Asset Management programs include Maintenance and other asset programs such as Surface Treatment and Structures. Funding levels for asset management programs are determined by the TC. Recommended funding levels are provided to the TC based on the results of an asset management budget setting process. Funding levels are determined through this process based on current and predicted condition, tradeoff analysis between programs, and objectives for assets identified by the TC in Policy Directive (PD) 14. (See Appendix A: Policy Directive 14).

Other TC Directed Programs include other categories of “flexible” funding not currently included in asset management programs. These are programs established by the TC with funding levels determined by the TC. Examples include Hot Spots, Traffic Signals, and Regional Priority Program (RPP).

Although functionally part of Asset Management, Bridge Enterprise funding is separated to reflect its distinct enterprise status. Funding for Bridge Enterprise is primarily based upon dedicated Bridge Enterprise revenues provided through 2009 FASTER legislation. In recent years the TC has provided supplementary funding. This practice is continued in Program Distribution.

The High Performance Transportation Enterprise (HPTE) is similarly separated to reflect its enterprise status. HPTE funding levels in Program Distribution reflect program delivery and administrative costs and does not include funding for infrastructure projects.

Summary

FY 2016-FY 2025

Revenues are sufficient to fund estimated levels needed to meet asset management performance objectives for Maintenance, Surface Treatment and Structures. RAMP asset management funds supplement Surface Treatment and Structures in FY 2016 and 2017 thereby allowing for lower Program Distribution allocations in those years.

Other asset management programs, as well as “Other TC Directed” programs, are held at FY 15 budget levels with no increases. Any positive variance remaining is directed to TC Contingency. In years 2018-2024 some contingency funds would be available for assignment to program needs based on the assumption that the forecast amount plus contingency roll forward from previous years is more than sufficient to meet the five percent contingency target.

Allocations to “restricted programs” are based on the adopted revenue projection and the anticipated revenue level for each program.

Bridge Enterprise allocations are based on projected Bridge Enterprise revenue, plus the continuation of an annual \$15 million transfer from CDOT. HPTE allocations are based on projected HPTE revenues.

FY 2025-FY 2040

Revenues are no longer sufficient to meet estimated levels needed to support the asset management objectives for Maintenance, Surface Treatment and Structures.

Other asset management programs and ‘other TC restricted’ programs remain at FY 15 budget levels with no increases.

Allocations to “restricted programs” are based on the adopted revenue projection and the anticipated revenue level for each program.

Bridge Enterprise allocations are based on projected Bridge Enterprise revenue, plus the continuation of an annual \$15 million transfer from CDOT. HPTE allocations are based on projected HPTE revenues.

Revenues are forecast to be fairly flat in the latter years. This along with the decline in purchasing power will result in a noticeable effect on programs

Statewide Program Distribution and Planning Estimates

Program Distribution outlines the distribution of revenues to programs over the FY 2016-2040 time period. Program Distribution in Year of Expenditure (YOE) or nominal dollars appears on page 5. A deflated version of Program Distribution in FY 2016 dollars appears on page 6 and reflects a 3% annual deflation factor.

The state is required under 23 USC 450 to provide MPOs with an estimate of available federal and state funds which the MPOs may utilize in development of Metropolitan Transportation Plans and Transportation Improvement Programs (TIPs). Planning Estimates have been developed for each MPO and outline estimated federal and state funds that might be reasonably anticipated to be available for transportation purposes within the MPO area for the time period of the TIP and Plan. Nominal and deflated Planning Estimates for each Region and MPO appear on pages 10 through 29.

Region planning estimates reflect only those programs with a “true” region allocation or target (i.e. Hot Spots, Traffic Signals, RPP, FASTER Safety, TAP, and CMAQ.)¹ MPO planning estimates

¹ In the case of RPP, FASTER Safety, and TAP, the MPO estimate includes an assumed share of the Region allocation for those programs.

reflect those programs with a “true” MPO suballocation (i.e. TAP, STP-M, CMAQ, Metro Planning) as well as estimates of what might reasonably be expected to be expended within the MPO boundaries for other programs (i.e. Maintenance, Surface Treatment, Structures, Congestion Relief, RPP, HSIP, FASTER Safety, and Bridge Enterprise). Programs of a more statewide nature have not been estimated at the MPO level (i.e. Rockfall, Capital Expenditures, ITS Maintenance, TSM&O Programs and Services, Contingency, HSIP, Rail-Highway Crossings, Safety Education, Strategic Projects, Program Delivery/Administration, Aeronautics, Bridge-Off System, transit programs, Infrastructure Bank, Debt Service, and HPTA.)²

Program amounts at the Region and MPO level were calculated according to adopted formulas for programs where an adopted formula exists. For other programs, a method for allocating for Planning Estimates purposes was developed in consultation with Program Managers, Asset Managers, and the MPOs.

Detailed assumptions and methodology associated with the allocation of resources in Program Distribution and in the assignment of funds to MPO areas in Planning Estimates can be found in Appendix D: Detailed Assumptions and Methodology.

² FASTER Transit funds have been estimated at the MPO level only for those MPOs (NFR MPO, DRCOG, and PPACG) which have an identified allocation to direct recipient agencies.

Appendix A: Policy Directive 14

COLORADO DEPARTMENT OF TRANSPORTATION		<input checked="" type="checkbox"/> POLICY DIRECTIVE <input type="checkbox"/> PROCEDURAL DIRECTIVE	
Subject			Number
Policy Guiding Statewide Plan Development			14.0
Effective	Supersedes	Originating Office	
2.27.15	14.0: 3.20.08 13.0: 12.14.06	Division of Transportation Development	

I. PURPOSE

This Policy Directive provides an overall framework for the transportation planning process through which a multimodal, comprehensive Statewide Transportation Plan will be developed and implemented. With limited funding available, the Colorado Department of Transportation (CDOT) has developed a vision for the Statewide Transportation Plan that guides investment for Colorado's multimodal transportation system and that balances:

- Preservation and maintenance, and incorporation of risk-based asset management,
- Efficient system operations and management practices,
- Capacity improvements, and
- Incorporation of safety in all areas

Policy Directive 14.0 performance objectives will guide the distribution of resources in the Statewide Transportation Plan, the Statewide Transportation Improvement Program, and the annual budget. This Policy Directive will be revised, as needed, to update performance objectives or incorporate additional goal areas.

II. AUTHORITY

23 United States Code (U.S.C.) 134, 135 and 450, PL 112-141 ("Moving Ahead for Progress in the 21st Century" or "MAP-21"), and its implementing regulations.

§ 43-1-106(8)(a), C.R.S. Transportation Commission

§ 43-1-1103, C.R.S. Transportation planning

Transportation Commission Rules Governing the Statewide Transportation Planning Process and Transportation Planning Regions (2 CCR 601-22)

III. APPLICABILITY

This Policy Directive applies to all CDOT Divisions and Regions involved in implementing the Statewide Transportation Plan in cooperation with CDOT's planning partners: the 10 rural Transportation Planning Regions and the five Metropolitan Planning Organizations.

Policy Guiding Statewide Plan Development	Number 14.0
--	-----------------------

IV. DEFINITIONS

“Aspirational Objectives” are those objectives, or targets, toward which CDOT may strive if CDOT receives revenues beyond those projected.

“Drivability Life” is an indication in years of how long a highway will have acceptable driving conditions based on an assessment of smoothness, pavement distress, and safety. Drivability Life implements traffic volume based categories, and associated category drivability condition standards and allowed pavement treatments. Unacceptable driving condition is specific to each traffic volume based category and means drivers must reduce speeds to compensate for poor conditions, navigate around damaged pavement, or endure intolerably rough rides. The Risk-Based Asset Management Plan identifies three categories of Drivability Life: High (greater than 10 years of Drivability Life remaining); Moderate (4-10 years); and Low (3 or fewer years).

“Geohazards” are geologic hazards that affect the transportation system and include debris flow, embankment distress, landslides, rockfall, rockslides, and sink holes.

“National Highway System” (NHS) is a federally designated system of roadways important to the nation's economy, defense, and mobility. The NHS includes Interstate highways as well as other roadways. Not all NHS roadways are part of the state highway system.

“Maintenance Level of Service” (MLOS) is a qualitative measure describing operational conditions on the roadway. Overall maintenance level of service is a combined grade for nine maintenance program areas. For snow and ice control, the LOS B level includes maintaining high levels of mobility as much as possible, and proactive avalanche control.

“Performance Measures” are the ways that direction toward a goal is measured.

“Performance Objectives” are the specific targets for a performance measure that an organization intends to meet to make progress toward a goal.

“Planning Time Index” (PTI) is a measure of travel time reliability. For this performance measure it is defined as the 95th percentile travel time divided by travel time at free-flow speed. In general terms, it identifies the extra time needed to arrive on-time for a trip 19 times out of 20. For example, for a PTI₉₅ of 1.5, a worker should plan 45 minutes for a trip that takes 30 minutes in free flow conditions (30 minutes x 1.5 = 45 minutes) to be on-time 19 out of 20 times (which would mean the worker would be late only one of the 20 work days in a month).

“Revenue Service Miles” are the miles of service operated by transit vehicles and available to the general public.

“Serious Injuries” are evident incapacitating injuries which prevent injured persons from walking, driving or normally continuing the activities they were capable of performing before being injured in traffic crashes.

Policy Guiding Statewide Plan Development	Number 14.0
--	-----------------------

“Vehicle Miles Traveled” (VMT) is a measurement of miles traveled by vehicles obtained by multiplying the Annual Average Daily Traffic (AADT) count by the length of the roadway segment.

V. POLICY

1. Policy. It shall be the policy of CDOT that the Statewide Transportation Plan and statewide performance objectives stated herein will guide distribution of financial resources to meet or make progress toward objectives in four goal areas: safety, infrastructure condition, system performance, and maintenance. Financial resources should be directed toward achieving the objectives within the first 10 years of the planning horizon (2016-2025). Projects should be selected to support the goals and objectives and will be included in the Statewide Transportation Improvement Program (STIP). Annual budget decisions will be guided by these performance objectives as well as CDOT’s Risk Based Asset Management Plan. Prior to funding new initiatives, funds should be directed to achieving the objectives in each area while recognizing constraints on some funding sources. Aspirational objectives guide the use of funds received that are above baseline revenue projections.

2. Goals. PD 14.0 goals guide development of the multimodal Statewide Transportation Plan and of performance objectives. The goals are:

- SAFETY – Moving Colorado toward zero deaths by reducing traffic-related deaths and serious injuries by one-half by 2030.
- INFRASTRUCTURE CONDITION – Preserve the transportation infrastructure condition to ensure safety and mobility at a least life cycle cost.
- SYSTEM PERFORMANCE – Improve system reliability and reduce congestion, primarily through operational strategies and secondarily through the addition of capacity. Support opportunities for mode choice.
- MAINTENANCE – Annually maintain CDOT’s roadways and facilities to minimize the need for replacement or rehabilitation.

PD 14.0 and Statewide Plan Goals are in alignment with the MAP-21 National Goals. For the Statewide Plan, goals are expressed in more public-friendly terms and include: Safety, Mobility (System Performance in PD 14.0), Economic Vitality (not yet identified in PD 14.0), and Maintaining the System (Infrastructure Condition and Maintenance in PD 14.0).

3. Performance Measures and Objectives. Performance measures describe how statewide success will be evaluated and performance objectives establish statewide achievement levels which are used to direct investment decisions primarily focused on a 10-year planning horizon (2016-2025). Explanations of how the objectives will be measured and budget categories-

Policy Guiding Statewide Plan Development	Number 14.0
--	-----------------------

Maintain, Maximize, Expand, and Pass-Through Funds/Multi-Modal Grants- that fund the four goal areas are listed below with the appropriate goals.

a) HIGHWAY SAFETY:

The highway safety objectives (with the exception of the economic impact of crashes objectives) were set after studying trends from 2008 through 2013. Safety measures and objectives apply to *all* roads in the state. The other safety measures and objectives in this section are subsets of the highway measures and objectives. The budget categories that fund Safety are Maintain, Maximize, and Expand.

(1) All Highways

MEASURES:

- Number of fatalities
- Fatalities per vehicle miles traveled (VMT)
- Number of serious injuries
- Serious injuries per VMT
- Economic impact of crashes

OBJECTIVES:

- Reduce fatalities by 12 per year from 548 in 2008 to 344 in 2025.
- Reduce the fatality rate per 100 million VMT by 0.02 per year from 1.03 in 2013 to 0.79 in 2025.
- Reduce serious injuries by 90 per year from 3,200 in 2013 to 2,120 in 2025.
- Reduce the serious injury rate by 0.2 per 100 million VMT per year from 6.86 in 2013 to 4.46 in 2025.
- Reduce the economic impact of crashes annually by 1% over the previous calendar year.

ASPIRATIONAL OBJECTIVE:

- Reduce the fatality rate per 100 million VMT to 0.75 in 2025.

(2) Bike and Pedestrian

MEASURES:

- Number of bicyclist and pedestrian fatalities involving motorized vehicles
- Number of bicyclist and pedestrian serious injuries involving motorized vehicles

OBJECTIVES:

- Reduce the number of bicyclist and pedestrian fatalities involving motorized vehicles from 67 in 2013 to 47 in 2025.
- Reduce the number of bicyclist and pedestrian serious injuries involving motorized vehicles from 469 in 2013 to 311 in 2025.

Policy Guiding Statewide Plan Development	Number 14.0
--	------------------------------

b) INFRASTRUCTURE CONDITION:

The infrastructure condition objectives for highways and bridges are intended to be achieved or maintained over the first 10 years of the planning horizon (2016-2025). The budget category that funds Infrastructure Condition is Maintain, except for Transit which is funded with Pass-Through Funds/Multi-Modal Grants.

(1) Bridges**MEASURES:**

- Condition of National Highway System (NHS) bridges
- Condition of state highway bridges
- Risk-Based Asset Management Plan measures for bridges (See Appendix A for additional bridge measures.)

OBJECTIVES:

- Maintain the percent of NHS total bridge deck area that is not structurally deficient at or above 90%.
- Maintain the percent of state highway total bridge deck area that is not structurally deficient at or above 90%.
- Meet bridge objectives in the Risk-Based Asset Management Plan. (See Appendix A for additional bridge objectives.)

ASPIRATIONAL OBJECTIVES:

- Achieve the percent of NHS total bridge deck area that is not structurally deficient at or above 95%.

(2) Highways**MEASURES:**

- Pavement condition of the Interstate System
- Pavement condition of the NHS, excluding Interstates
- Pavement condition of the state highway system

OBJECTIVES:

- Achieve 80% High/Moderate Drivability Life for Interstates based on condition standards and treatments set for traffic volume categories.
- Achieve 80% High/ Moderate Drivability Life for NHS, excluding Interstates, based on condition standards and treatments set for traffic volume categories.
- Achieve 80% High/Moderate Drivability Life for the state highway system based on condition standards and treatments set for traffic volume categories.

ASPIRATIONAL OBJECTIVES:

- Achieve 90% High/Moderate Drivability Life for Interstates based on

Policy Guiding Statewide Plan Development	Number 14.0
--	-----------------------

condition standards and treatments set for traffic volume categories.

- Achieve 90% High/ Moderate Drivability Life for NHS, excluding Interstates, based on condition standards and treatments set for traffic volume categories.

(3) Other Assets

MEASURE:

- Risk-Based Asset Management Plan measures for other assets (See Appendix A for measures for buildings, Intelligent Transportation Systems (ITS) equipment, roadway fleet, culverts, geohazards, tunnels, traffic signals, and walls)

OBJECTIVE:

- Meet objectives in the Risk-Based Asset Management Plan (See Appendix A for objectives for buildings, ITS equipment, roadway fleet, culverts, geohazards, tunnels, traffic signals, and walls)

(4) Transit

MEASURE:

- Transit Asset Condition

OBJECTIVES:

- Maintain the percentage of vehicles in the rural Colorado transit fleet to no less than 65% operating in fair, good, or excellent condition, per Federal Transit Administration definitions.
- Ensure that all CDOT transit grantees have Asset Management Plans in place for state or federally funded vehicles, buildings and equipment by 2017.

ASPIRATIONAL OBJECTIVE:

- Increase the percentage of vehicles in the rural Colorado transit fleet to no less than 70% operating in fair, good, or excellent condition, per Federal Transit Administration definitions.

c) SYSTEM PERFORMANCE:

The system performance objectives for Interstates, NHS and State Highway system are intended to be achieved within the first 10 years (2016-2025) of the planning horizon. The system performance objectives for transit begin in 2012 either for a five-year rolling average or as the baseline year. The budget categories that fund System Performance are Maximize, Expand, and Pass-Through Funds/Multi-Modal Grants.

(1) Interstates, NHS and State Highway system

Policy Guiding Statewide Plan Development	Number 14.0
--	-----------------------

MEASURES:

- Interstate Performance – Planning Time Index (PTI)
- NHS Performance excluding Interstates – PTI
- Colorado Freight Corridors Performance – PTI

OBJECTIVES:

- Prevent the spread of congestion by maintaining a PTI of 1.25 or less on 90% or greater of Interstate centerline miles.
- Prevent the spread of congestion by maintaining a PTI of 1.08 or less on 90% or greater of NHS centerline miles, excluding Interstates.
- Prevent the spread of congestion by maintaining a PTI of 1.25 or less on 90% or greater of Colorado Freight Corridor centerline miles.

(2) Transit**MEASURES:**

- Transit Utilization – Ridership statewide for small urban and rural “transit grantees”
- Transit Connectivity – Revenue service miles provided

OBJECTIVES:

- Increase ridership of small urban and rural transit grantees by at least an average of 1.5% statewide over a five-year period beginning with 2012.
- Maintain or increase the total number of revenue service miles of regional, inter-regional, and inter-city passenger service over that recorded for 2012.

ASPIRATIONAL OBJECTIVES:

- Increase ridership of small urban and rural transit grantees by at least an average of 1.7% statewide over a five-year period beginning with 2012.
- Increase the statewide total number of revenue service miles of regional, inter-regional, and inter-city passenger service by at least an average 1.7% over a five-year period beginning with 2012.

d) MAINTENANCE:

Maintenance objectives are established based on annual funding levels and measured annually. The budget category that funds Maintenance is Maintain.

MEASURES:

- Level of Service (LOS) for snow and ice removal
- Overall Maintenance Level of Service (MLOS) for the state highway system

OBJECTIVES:

- Maintain a LOS B grade for snow and ice removal.

Policy Guiding Statewide Plan Development	Number 14.0
--	-----------------------

- Maintain an overall MLOS B minus grade for the state highway system.

ASPIRATIONAL OBJECTIVES:

- Achieve a LOS B+ grade for snow and ice removal.
- Achieve an overall Maintenance LOS B grade for the state highway system.

VI. DOCUMENTS REFERENCED IN THIS POLICY DIRECTIVE

Appendix “A” “CDOT Risk-Based Asset Management Plan Performance Measures and Objectives”

VII. IMPLEMENTATION PLAN

Additional measures and objectives are planned or currently under development. As additional measures and objectives are finalized they will be brought forward for consideration of incorporation into PD 14.0. This includes measures and objectives in the following areas: Bike and Pedestrian, Truck Freight, Freight Rail, Economic Vitality, and Environmental Sustainability.

This Policy Directive will be implemented by the Division of Transportation Development, with the Office of Financial Management and Budget, the Division of Transportation Systems Management & Operations, and the Division of Transit & Rail, and in collaboration with other CDOT Divisions and CDOT Regions. Funds will be directed to budget categories to support accomplishment of the objectives. The Division of Transportation Development will report annually on performance of the transportation system to track progress toward objectives. At a minimum, the Division of Transportation Development will review and update or reaffirm this Policy Directive with each Plan update cycle in collaboration with the Office of Policy and Government Relations, Office of Financial Management and Budget, Division of Transportation Systems Management & Operations, Division of Transit & Rail, and other CDOT Divisions and CDOT Regions.

VIII. REVIEW DATE

This directive shall be reviewed on or before February 2018.

Herman J. Steuking III
Secretary, Transportation Commission

2-27-15
Date of Approval

Appendix A: CDOT Risk-Based Asset Management Plan Performance Measures and Objectives

Asset	Measure	Current Performance	Objective (Target)	Aspirational Objective (Target)
Bridges	Percentage of state highway total bridge deck area that is not structurally deficient	94%	90% ^a	95% ^a
	Percentage of NHS total bridge deck area that is not structurally deficient	95%	90% ^a	95% ^a
	Percentage of CDOT-owned bridges over waterways that are scour critical	7.1%	5%	1%
	Percentage of bridge crossings over Interstates, U.S. routes and Colorado state highways with a vertical clearance less than the statutory maximum vehicle height of 14 feet-6 inches	0.4%	0.4%	0%
	Percentage of bridge crossings over Interstates, U.S. Routes and Colorado state highways with a vertical clearance less than the minimum design requirement of 16 feet-6 inches	4.8%	4.8%	2%
	Percentage of CDOT-owned bridges posted for load	0.1%	0%	0%
	Percentage of CDOT-owned bridges with a load restriction	2.6%	3%	1%
	Percentage of leaking expansion joint by length on CDOT-owned bridges	18.8%	15%	5%
	Percentage of CDOT-owned bridge deck area that is unsealed or otherwise unprotected	31%	30%	5%
Pavement	Percentage high-moderate drivability life for Interstates based on condition standards and treatments set for traffic volume categories	89%	80% ^a	90% ^a
	Percentage high-moderate drivability life for CDOT-owned NHS, excluding Interstates based on condition standards and treatments set for traffic volume categories	78%	80% ^a	90% ^a
	Percentage high-moderate drivability life for the State highway system based on condition standards and treatments set for traffic volume categories	73%	80% ^a	90%
Maintenance	Statewide Letter Grade	B-	B- ^a	B ^a
Buildings	Statewide Letter Grade	86% C or Better	90% C or Better	100% C or Better
ITS	Average Percent Useful Life	126%	90%	85%
Fleet	Average Percent Useful Life	103%	70%	50%
Culverts ^b	Percentage Critical Culverts	2.9%	5%	2%
Geohazards	Number of Sites with letter grade C or better	47%	60%	90% ^c
Tunnels	Key components of fire/life safety must not exceed 100% of useful life, based on manufacturer's specification, condition inspections and maintenance history.	TBD ^d	100%	100%
Traffic Signals ^e	Percent intersections with at least one component beyond 100% Useful Life	52%	15%	0%
Walls ^f	Percentage of CDOT-owned walls, by square foot, that are in condition state 3 or 4 (poor or severe).	1%	1%	0.5%

Highlighted measures and objectives are those that are identified specifically in the Infrastructure Condition section of PD 14.

^a These measures and objectives are from the Infrastructure Condition section of PD 14.

^b Culverts are minor structures between 4' and 20'.

^c Some sites will always remain in the D category due to traffic volume. And at some sites, to effectively eliminate or significantly reduce the likelihood is beyond the scope of the Geohazards Program.

^d Objective pending data collection.

^e Overall signal infrastructure includes signal assemblies, cabinets and controllers.

^f The walls inventory and condition are being collected under a 2 year project, so the information in this table is based on estimates.

Appendix B: 2040 Program Distribution TC Approval

Resolution #TC-3139

FY 2016 – 2040 Program Distribution

Approved by the Transportation Commission on: February 20, 2014

WHEREAS, the Colorado Transportation Commission (the Commission) has statutory authority pursuant to §43-1-106 C.R.S. to approve, accept, and amend various planning documents resulting from Section 135 Title 23 of the U.S.C. and §43-1-1101 through 1105 C.R.S.; and

WHEREAS, the Commission adopts Program Distribution assignment of anticipated state and federal transportation revenues for use in development of the long range Statewide Transportation Plan and the Regional Transportation Plans; and

WHEREAS, the Commission adopts Program Distribution to reflect planned levels of funding to various programs based on the limited revenue expected for the period 2016-2040; and

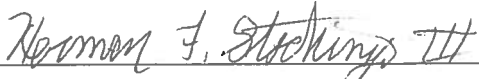

WHEREAS, a forecast of revenues upon which Program Distribution is based was adopted by the Commission in April 2013 (TC Resolution 3070); and

WHEREAS, the Commission recognizes that future fund receipts may vary from these estimates, and that the assignment of funds reflected in Program Distribution is for planning purposes and does not represent a future funding commitment, and that the annual CDOT budget may vary from Program Distribution; and

WHEREAS, the FY 2016 – 2040 Program Distribution (Attachment A) reflects the intent to support Policy Directive (PD) 14 asset management performance objectives by funding to estimated levels needed to achieve those objectives, while recognizing that data relating to the outcomes and future needs in various categories will be updated periodically and future funding amounts may be adjusted accordingly; and

WHEREAS, the Commission recognizes that in the latter years of the Statewide Transportation Plan horizon (2026-2040) there are insufficient funds to support the PD 14 asset management performance objectives as well as the FY 15 baseline program amounts due to declining revenues and reduced purchasing power.

NOW THEREFORE BE IT RESOLVED, that the Commission approves the FY 2016 – 2040 Program Distribution (Attachment A) for use in developing the 2016-2040 Statewide Transportation Plan, Regional Transportation Plans, and to guide the development of the 2016 STIP.

Herman Stockinger, Secretary
Transportation Commission of Colorado

Date

Resolution #TC-3156

FY 2016 – 2040 Program Distribution Allocation Methodologies for Formula Programs
Transportation Commission of Colorado

Approved by the Transportation Commission of Colorado on April 17, 2014

WHEREAS, the Colorado Transportation Commission (the Commission) has statutory authority pursuant to §43-1-106 to approve, accept, and amend various planning documents resulting from Section 135 Title 23 of the U.S.C. and §43-1-1101 through 1105 C.R.S.; and

WHEREAS, the Commission adopts long range Program Distribution assignment of anticipated state and federal transportation revenues for use in development of the federally required Statewide Transportation Plan and Regional Transportation Plans; and

WHEREAS, a forecast of revenues upon which Program Distribution is based was adopted by the Commission in April 2013 (TC Resolution 3070); and

WHEREAS, the Commission adopted Program Distribution to reflect planned levels of funding to various programs based on the limited revenue expected for the period 2016-2040 on February 14, 2014 (TC Resolution 3139); and

WHEREAS, the Commission recognizes that future fund receipts may vary from these estimates, and that the assignment of funds reflected in Program Distribution is for planning purposes and does not represent a future funding commitment, and that the annual CDOT budget may vary from Program Distribution; and

WHEREAS, the Commission, as part of Program Distribution, also adopts allocation methodologies for certain programs allocated by formula; and

WHEREAS, federal statute requires the obligation of a portion of Surface Treatment Program (STP) funds in Urbanized Areas with a population greater than 200,000 (Transportation Management Areas (TMAs)) on the basis of population; and

WHEREAS, federal statute requires the allocation of Metropolitan Planning (Metro-PL) funds on the basis of a formula developed by the State DOT, in consultation with the MPOs, and approved by the FHWA Division Administrator; and

WHEREAS, federal statute requires that 50% of Transportation Alternatives Program (TAP) funds be obligated in certain population categories on the basis of population, including to Urbanized Areas with a population greater than 200,000 (TMAs); and

WHEREAS, the Commission elects to allocate by formula the TAP funds remaining after allocation to TMAs to the CDOT Regions; and

WHEREAS, federal statute requires that Congestion Mitigation and Air Quality Improvement Program (CMAQ) funds be spent in air quality non-attainment or maintenance areas, or natural gas refueling stations or electric vehicle charging

stations at any location in the state; and

WHEREAS, a statewide CMAQ funded Colorado Energy Office (CEO) natural gas station/electric vehicle charging station program in Fiscal Years (FYs) 14-17 was approved by the Commission in December 2013 (TC Resolution 3120); and

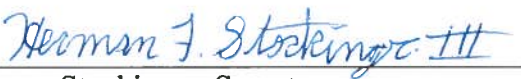

WHEREAS, the Commission elects to allocate by formula remaining CMAQ funds to the eligible recipients (MPOs and TPRs or to CDOT Regions for PM-10 areas) in air quality non-attainment or maintenance areas; and

WHEREAS, the FY 2016-2040 Program Distribution allocation methodologies for these formula programs for use in the next Statewide Transportation Plan and the next Statewide Transportation Improvement (STIP) are as follows:

- 1) Surface Transportation - Metro (STP-M):** Pursuant to federal statute, based on population of Urbanized Areas with a population greater than 200,000;
- 2) Metropolitan Planning (Metro-PL):** Based on population of Urbanized Areas over 50,000, with a minimum dollar base of \$330,000 (federal and local) for Grand Valley MPO and \$350,000 for PACOG, as agreed by CDOT and MPOs and approved by FHWA;
- 3) Transportation Alternatives Program (TAP):** 50% of funds based on population pursuant to federal statute; and 50% of funds based on 45% VMT / 40% Lane Miles / 15% Truck VMT;
- 4) Congestion Mitigation and Air Quality Improvement Program (CMAQ):** Off the top funds to statewide CEO program in FYs 14-17, with remaining funds allocated 80% to Ozone areas, 15% to CO areas, and 5% to PM-10 areas with a minimum base for each rural recipient of \$200,000 (federal and local) (if minimum base is reached, PM-10 funds are split 50% to urban recipients and 50% to rural recipients), with allocations to Ozone and CO areas based on 75% population and 25% on and off-system NHS VMT; and

NOW THEREFORE BE IT RESOLVED, that the Commission approves the FY 2016 – 2040 Program Distribution allocation methodologies listed above for formula programs for use in developing the 2016-2040 Statewide Transportation Plan, Regional Transportation Plans, and to guide the development of the 2016 STIP.

FURTHER BE IT RESOLVED, that the Commission will periodically review the fund allocations that are directed by TC decision to ensure the effectiveness of the use of funds and the Commission reserves the option to alter the allocation of those funds.

Herman Stockinger, Secretary
Transportation Commission of Colorado

Resolution #TC-3160

FY 2016 – 2040 Program Distribution Allocation Methodology for the Regional Priority Program (RPP)

Approved by the Transportation Commission on May 15, 2014

WHEREAS, the Colorado Transportation Commission (the Commission) has statutory authority pursuant to §43-1-106 to approve, accept, and amend various planning documents resulting from Section 135 Title 23 of the U.S.C. and §43-1-1101 through 1105 C.R.S.; and

WHEREAS, the Commission adopts long range Program Distribution assignment of anticipated state and federal transportation revenues for use in development of the federally required Statewide Transportation Plan and Regional Transportation Plans; and

WHEREAS, a forecast of revenues upon which Program Distribution is based was adopted by the Commission in April 2013 (TC Resolution 3070); and

WHEREAS, the Commission adopted Program Distribution to reflect planned levels of funding to various programs based on the limited revenue expected for the period 2016-2040 on February 14, 2014 (TC Resolution 3139); and

WHEREAS, the Commission recognizes that future fund receipts may vary from these estimates, and that the assignment of funds reflected in Program Distribution is for planning purposes and does not represent a future funding commitment, and that the annual CDOT budget may vary from Program Distribution; and

WHEREAS, the Commission, as part of Program Distribution, also adopts allocation methodologies for certain programs allocated by formula;

WHEREAS, the Commission elects to allocate Regional Priority Program (RPP) funds to the CDOT Regions; and

WHEREAS, the Commission previously adopted in April, 2014 allocation methodologies for Surface Transportation – Metro (STP-M), Metropolitan Planning (Metro-PL), Transportation Alternatives Program (TAP), and Congestion Mitigation and Air Quality Improvement Program (CMAQ); and

WHEREAS, the FY 2016-2040 Program Distribution allocation methodology for this formula program for use in the next Statewide Transportation Plan and the next Statewide Transportation Improvement (STIP) is as follows:

- 1) Regional Priority Program (RPP):** Based on 50% Population, 35% state highway Lane Miles, and 15% state highway Truck VMT.

NOW THEREFORE BE IT RESOLVED, that the Commission approves the FY 2016 – 2040 Program Distribution allocation methodology listed above for the Regional Priority Program (RPP) for use in developing the 2016-2040 Statewide Transportation Plan, Regional Transportation Plans, and to guide the development of the 2016 STIP.

FURTHER BE IT RESOLVED, that the Commission will periodically review the fund allocations that are directed by TC decision to ensure the effectiveness of the use of funds and the Commission reserves the option to alter the allocation of those funds.

FY 2016 – 2040 Program Distribution Allocation Methodology for FASTER Safety Mitigation Program

Approved by the Transportation Commission on May 15, 2014

WHEREAS, the Colorado Transportation Commission (the Commission) has statutory authority pursuant to §43-1-106 to approve, accept, and amend various planning documents resulting from Section 135 Title 23 of the U.S.C. and §43-1-1101 through 1105 C.R.S.; and

WHEREAS, the Commission adopts long range Program Distribution assignment of anticipated state and federal transportation revenues for use in development of the federally required Statewide Transportation Plan and Regional Transportation Plans; and

WHEREAS, a forecast of revenues upon which Program Distribution is based was adopted by the Commission in April 2013 (TC Resolution 3070); and

WHEREAS, the Commission adopted Program Distribution to reflect planned levels of funding to various programs based on the limited revenue expected for the period 2016-2040 on February 14, 2014 (TC Resolution 3139); and

WHEREAS, the Commission recognizes that future fund receipts may vary from these estimates, and that the assignment of funds reflected in Program Distribution is for planning purposes and does not represent a future funding commitment, and that the annual CDOT budget may vary from Program Distribution; and

WHEREAS, the Commission, as part of Program Distribution, also adopts allocation methodologies for certain programs allocated by formula;

WHEREAS, the Commission elects to allocate a portion of FASTER Safety funds to the FASTER Safety Mitigation Program to be maintained as a statewide pool with Region Planning Estimates;

WHEREAS, the Commission previously adopted in April, 2014 allocation methodologies for Surface Transportation – Metro (STP-M), Metropolitan Planning (Metro-PL), Transportation Alternatives Program (TAP), and Congestion Mitigation and Air Quality Improvement Program (CMAQ); and

WHEREAS, the FY 2016-2040 Program Distribution allocation methodology for this formula program for use in the next Statewide Transportation Plan and the next Statewide Transportation Improvement (STIP) is as follows:

- 1) FASTER Safety Mitigation Program:** Based on total crash data weighted according to National Safety Council values for crash type.

NOW THEREFORE BE IT RESOLVED, that the Commission approves the FY 2016 – 2040 Program Distribution allocation methodology listed above for the FASTER safety mitigation program for use in developing the 2016-2040 Statewide Transportation Plan, Regional Transportation Plans, and to guide the development of the 2016 STIP.

FURTHER BE IT RESOLVED, that the Commission will periodically review the fund allocations that are directed by TC decision to ensure the effectiveness of the use of funds and the Commission reserves the option to alter the allocation of those funds.

Appendix C: 2040 Revenue Projections

Resolution #TC-3070

Adoption of FY 2016 to 2040 revenue estimate to be used in development of the 2040 statewide plan

Approved by the Transportation Commission on: April 18, 2013

WHEREAS, A long range revenue forecast is prepared to provide an estimate of reasonably expected resources for the Colorado Department of Transportation (CDOT) as a component of the 2040 statewide plan; and

WHEREAS, in preparing this revenue forecast CDOT staff consulted with the CDOT Senior Management Team (SMT), the Statewide Transportation Advisory Committee (STAC), the STAC sub-committee on revenue forecast, the Transportation Commission subcommittee on the statewide plan, and the Commission itself prior to presenting this recommendation to the transportation commission; and

WHEREAS, this revenue forecast is based on current law and current economic assumptions; and

WHEREAS, this revenue forecast assumes average annual gross national product (GDP) increases of 2.5 percent; and

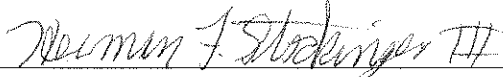

WHEREAS, off-the-top transfers from the State highway users tax fund (HUTF) are based on CDOT projection of historical transfers; and

WHEREAS, revenues generated by the federal highway trust fund (HTF) increase by one percent over MAP-21 levels for fiscal years 2016 to 2020, and are adjusted to reflect the Congressional Budget Office (CBO) forecast for fiscal years 2021 to 2040; and

WHEREAS, this revenue forecast includes the senate bill 09-228 transfer to CDOT in fiscal years 2016 to 2020; and

WHEREAS, this revenue forecast applies only to the fiscally constrained portion of the 2040 statewide plan.

NOW THEREFORE BE IT RESOLVED that the Colorado Transportation Commission adopts this FY 2016 to 2040 revenue estimate to be used in development of the 2040 statewide plan.

Herman Stockinger, Secretary
Transportation Commission of Colorado

4-23-13

Date

DATE: 25 March 2013

TO: Transportation Commission

FROM: Ben Stein, Chief Financial Officer

SUBJECT: Proposed Revenue Scenario for Adoption

Last month's commission mailing included prior Revenue Projection scenarios, an additional scenario, questions for the Commissioners to consider, and a staff recommendation. After discussion in workshop last month, the same staff recommendation, including graph and back up materials, are in the TC mailing for your review and adoption at the April meeting.

The proposed scenario includes the following:

- Based on current law and current economic assumptions
- Average annual GDP increase of 2.5%
- Off-the-top transfers based on CDOT projections
- MAP-21 Revenue (1% increase) 2016-2020
- Federal revenues and General Fund transfers are adjusted 2021-2040 to reflect CBO forecast
- Includes SB09-228 allocation 2016-2020

If you have any questions on either what was presented last month or the information provided, please do not hesitate to contact me.

Appendix D: Detailed Assumptions and Methodology

Program Distribution Assumptions

- Allocations to revenue based programs are based on projected revenues from the 2040 Revenue Projection (See Appendix C: 2040 Revenue Projections) adopted by the TC in April 2013.
- Deflated Program Distribution is deflated 3% annually beginning in FY 2017 to reflect constant FY 16 dollars.
- Asset Management Programs
 - FY 16 amounts for Asset Management programs are based on the results of the FY 16 Asset Management Budget Setting process. The Asset Management Budget Setting process includes Responsible Acceleration of Maintenance and Partnership (RAMP) funds. RAMP funds do not constitute new revenue and are not included in Program Distribution. Asset Management amounts in Program Distribution are for the “baseline” program and do not include RAMP.
 - The partial retirement of \$167 M in TransBond debt in FY 17, and the full retirement of that debt in FY 18, is directed to Asset Management programs (with smaller amounts also directed to Contingency in FY 18-25. See Other TC Directed Programs below).
 - Funding levels for Maintenance, Surface Treatment, and Structures were set in the FY 16 Budget Setting Process and for subsequent years in Program Distribution based on estimates of the level of funding required for each asset in order to meet Policy Directive (PD) 14 objectives (See Appendix A: Statewide Transportation Plan Investment Strategy/Policy Directive 14). Funding was maintained at that level for as long as could be supported by available revenue. Beginning in FY 26, revenues are insufficient to maintain the targeted funding levels for Maintenance, Surface Treatment, and Structures. Maintenance is held constant beginning in FY 2026, while Structures and Surface Treatment decline. Reductions are taken first out of Structures, with Structures falling with revenues each year after 2025 until reaching its FY 15 base in 2036. At that time, Structures remain funded at the FY 15 base level and Surface Treatment falls each year with revenues through 2040.
 - Structures are set at \$60 million through 2025 before beginning a decline to their FY 15 base reached in 2036. Program Distribution allocations in FY 16 and FY 17 are less than \$60 million due to supplemental funding from RAMP.
 - Surface Treatment is set at \$240 million through 2035 before beginning to decline. Program Distribution allocations in FY 16 and FY 17 are less than \$240 million due to supplemental funding from RAMP.
 - Maintenance is increased 3% annually over FY 16 base for years 2017-2025, and then remains flat until 2040.
 - Funding levels for Rockfall Mitigation, Capital Expenditures, and ITS Maintenance are based on the results of the FY 16 Budget Setting Process. Funding levels in subsequent years are based on the FY 15 budget and remain constant through 2040.

- Other TC Directed Programs
 - All excepting Contingency set at FY 15 budget levels through 2040³.
 - TC Contingency reduced from FY 15 budget level in FY 16 to account for higher FY 16 Asset Management Budget Setting amounts.
 - In FY 18-25, retired TransBond funds are in excess of the amount needed to support Asset Management programs. Surplus TransBond funds in these years have been added to TC Contingency.
 - In FY 26-40 TC Contingency maintained at FY 15 Budget level.
- Restricted Programs
 - Restricted Programs are programs tied to a dedicated funding source (i.e. the funding is “restricted,” and pre-assigned to that program by federal or state statute.) As such, funding levels for restricted programs are based on the forecasted revenues for the underlying funding source. The exception is Debt Service, which is based on a schedule of debt payments- the largest being \$167 M in debt payment associated with “TransBonds,” which are partially retired in 2017, and fully retired in 2018.
 - Transportation Alternatives funds do not include an annual transfer of \$1,591,652 to the Department of Natural Resources (DNR) for the Recreational Trails program.
- Bridge Enterprise
 - Based on forecasted revenue
- HPTE
 - Based on forecasted revenue

³ TSM&O: Performance Programs and Services FY 15 base budget level is \$607,619. FY 15 budget reflects an additional TC decision item of \$6,629,176.

Allocation Assumptions – Adopted Formulas for Suballocated Programs

Regional Priority Program (RPP)

- **Program Goal:** Regionally important projects identified through the transportation planning process.
- **Program Overview:** RPP is flexible funding for use in the Regions, in consultation with local elected officials and other stakeholders through the transportation planning process. The program is funded through annual TC allocation.
- **Distribution Methodology:** Based on 50% Population / 35% On-System Lane Miles / 15% On-System Truck VMT.
- **Data:** 2010 U.S. Census; 2013 DTD Highway Statistics

FASTER Safety Mitigation Program

- **Program Goal:** To reduce total highway crashes and the severity of highway crashes (fatality and injury).
- **Program Overview:** FASTER Safety was created by the Colorado General Assembly in 2009 to fund road safety projects. A “road safety project” means a construction, reconstruction, or maintenance project that the Transportation Commission determines is needed to enhance the safety of a state highway. A portion of funds are allocated to safety-related Asset Management programs, with the remainder allocated to the FASTER Safety Mitigation Program.
- **Distribution Methodology:** Based on total crash data weighted according to National Safety Council estimates of average economic cost per death, injury, and other crash.
- **Data:** 2008-2012 CDOT Traffic and Safety On and Off-System Crash Data; National Safety Council Estimating Costs of Unintentional Crashes, <http://www.nsc.org/learn/safety-knowledge/Pages/injury-facts-estimating-cost-of-unintentional-injuries.aspx>

Congestion Mitigation and Air Quality Improvement Program (CMAQ)

- **Program Goal:** Support activities with air quality benefits.
- **Program Overview:** CMAQ is a flexible funding source for transportation projects and programs to help meet the requirements of the Clean Air Act. Funding is available to reduce congestion and improve air quality for non-attainment and maintenance areas (see attached map). In addition, MAP-21 allows funding for natural gas (NG) vehicle refueling stations or electric vehicle (EV) charging stations statewide. In December 2013, the Transportation Commission (TC) approved funding a \$30 M statewide NG/EV program in FYs 2014-2017. The Statewide NG/EV program is funded at \$10 M (federal) in FY 14, \$7 M in FY 15 and FY 16, and \$6 M in FY 17. The remaining funds are allocated to recipients in air quality non-attainment or maintenance areas.
- **Distribution Methodology:** Per federal statute, funds go to air quality non-attainment or maintenance areas, or any location in the state for NG vehicle refueling stations or EV charging stations. The TC directs the allocation of funds to eligible areas. For allocated

funds, funds are allocated 80% to Ozone areas, 15% to CO areas, and 5% to PM-10 areas, consistent with past CMAQ distributions. The 80%/15%/5% weightings identified previously reflect the size of air quality areas, but also reflect a desire to put more emphasis on Ozone areas, which are in non-attainment, as opposed to CO and PM-10 areas, which are maintenance areas. There is a minimum dollar base of \$200,000 (federal and local) for each rural PM-10 recipient. If the minimum dollar base is met, PM-10 funds are divided evenly between urban recipients (DRCOG) and rural recipients. Ozone and CO funds are distributed on the basis of the population of air quality areas (75%) and on and off-system NHS VMT (25%).

- **Data:** 2010 U.S. Census; 2013 DTD Highway Statistics- On and Off-System NHS VMT

Surface Transportation – Metro (STP-Metro)

- **Program Goal:** Address metropolitan area transportation issues.
- **Program Overview:** Flexible funding source to fund transportation improvements in Transportation Management Areas (TMAs), which are defined as urban areas with populations greater than 200,000.
- **Distribution Methodology:** Per federal statute, funds are sub-allocated to MPOs that are TMAs on the basis of the population of the TMA Urbanized Areas (UZAs)
- **Data:** 2010 U.S. Census

Metropolitan Planning (Metro- PL)

- **Program Goal:** Meet federal MPO transportation planning requirements.
- **Program Overview:** The purpose of Metropolitan Planning funds is to carry out federal requirements and provide for a continuing, comprehensive, and cooperative (3-C) metropolitan transportation planning process. Metropolitan Planning funds are made available to each MPO.
- **Distribution Methodology:** Per federal statute, funds are sub-allocated to MPOs. The TC directs the sub-allocation, which is based on the methodology agreed to by FHWA, FTA, CDOT, and MPOs in fall 2012. The methodology is based on the population of MPO Urbanized Areas (UZAs), with a minimum dollar base of \$330,000 (federal and local) for Grand Valley MPO, and \$350,000 for PACOG.
- **Data:** 2010 U.S. Census

Transportation Alternatives Program (TAP)

- **Program Goal:** Implement alternative transportation projects and environmental mitigation activities.
- **Program Overview:** TAP wraps pre-MAP-21 programs into a single, flexible funding source for alternatives to traditional highway construction. Eligible activities include:

facilities for bicycle and pedestrians; overlooks and viewing areas; preservation of historic transportation facilities; environmental mitigation/vegetation management/storm water mitigation; Recreational Trails program; Safe Routes to School program.

- ***Distribution Methodology:*** Per federal statute, 50% of funds can be spent anywhere in the state, and 50% of funds must be spent in areas on the basis of population. As required by federal statute for the population based funds, the Transportation Management Area (TMA) MPOs (defined as having a population greater than 200,000) receive a sub-allocation based on the share of the 50% population-based funds attributable to the population of the Urbanized Area (UZA) associated with each TMA. The TC directs the allocation of the remaining funds. The remaining population-based funds are distributed to the Regions on the basis of population. Funds that can be spent anywhere in the state are allocated to the Regions using 45% VMT / 40% Lane Miles / 15% Truck VMT.
- ***Data:*** 2010 U.S. Census; 2013 DTD Highway Statistics

Allocation Assumptions – MPO Estimates for non-Suballocated Programs

Maintenance

- **Distribution Methodology:** Based on 50% on-system lane miles/50% on-system VMT for each MPO.
- **Data:** 2010 U.S. Census; 2013 DTD Highway Statistics

Surface Treatment

- **Distribution Methodology:** Based on 50% on-system lane miles/50% on-system VMT for each MPO.
- **Data:** 2010 U.S. Census; 2013 DTD Highway Statistics

Structures

- **Distribution Methodology:** Based on percentage of on-system bridge deck area for each MPO.
- **Data:** 2013 DTD Highway Statistics

Hot Spots

- **Distribution Methodology:** 20% to each Regions

Traffic Signals

- **Distribution Methodology:** 2/6 to Region 1, 1/6 to all other Regions.

TSM&O Congestion Relief

- **Distribution Methodology:** 100% to Region 1 and DRCOG, based on current practice of funding Congestion Relief only to the level needed to fund the Courtesy Patrol in the metro Denver area.

Highway Safety Improvement Program (HSIP)

- **Distribution Methodology:** Based on current method of determining Region-level targets for the HSIP program- percentage of total crashes by Region.

- **Data:** 2008-2012 CDOT Traffic and Safety On and Off-System Crash Data

Transit and Rail Local and Statewide Grants

- **Distribution Methodology:** Based on current DTR FASTER Transit program (\$200,000 of \$5 M local program for TransFort, \$700,000 of \$5 M local program for Mountain Metro Transit, and \$6 M of \$10 M statewide program for RTD.)
