Louella Walker 892 2440 On November 1, 1876, the Colorado State Treasury had a balance carried forward from the former Territorial Treasurer of \$4,027.14. In a biennial report to "His Excellency The Govenor" in 1878, the Colorado State Treasurer announced that the total receipts for his office for the period 1876-1878 were \$300,988.53. Disbursements for that period were \$232,842.64 which included \$16,500.00 to cover financial needs at the University of Colorado; \$1,121.09 to pay the salary of the District Attorney; \$600.00 for the rental of the State Library; \$1,713.50 to meet wolf scalp bounty payments; and \$1,870.05 to cover expenses of apprehending fugitives from '76-'78. To insure responsible attention to the discharging of these and other duties, the Treasurer was bonded for \$100,000.

The Treasurer was also charged with management of the Public School Fund which at that time had a balance of \$12,541.45. Investments of the fund totaled \$9,885.42. These same functions and others are now performed by the Treasury.

On June 30, 1975, the Colorado State Treasury had a balance of \$390,715,427 and investments of \$375,901,070. During the year July 1, 1974 to June 30, 1975 the Treasury had receipts of \$2,139,659,739 and disbursements of \$2,139,026,116. In addition, the Treasury provides safekeeping for \$1,017,324,456. On June 30, 1975 the Treasury had interest bearing deposits in 245 of Colorado's banks, and in all 47 of the State's Savings & Loan Associations. The Treasury continues to manage the investments of the Public School Permanent Fund which now totals \$42,868,448.

The 1975 Treasurer's Annual Report discusses the main functions of the Department and provides detail on these functions in the Appendices.

We take pleasure in offering this report to:

His Excellency The Governor Richard D. Lamm, Members of the General Assembly of the State of Colorado:

The Treasury is responsible for the receipt of all State funds and the payment of all warrants drawn upon the State, and for the maintainence of records of all receipts and disbursements. Consequently, one of the main functions of the office is to insure adequate working cash at all times to pay warrants while simultaneously insuring that surplus funds do not lie idle. The volume of receipts and disbursements has been increasing dramatically in recent years and with it the complexity of the relationships between the Treasury and the banking community.

During the course of the year the Treasury received \$2,139,659,739, an increase of 21% over Fiscal Year 1974, and disbursed \$2,139,026,116, an increase of 23% over Fiscal Year 1974, giving a net increase of \$633,623 in the total amount of funds held by the Treasury. On the average \$372,719,000 was on deposit with the State Treasury during Fiscal Year 1975. Of this amount an average of \$14,454,000 was carried in bank balances for daily cash needs. Of these bank balances on the State's books, the majority was either uncollected funds recently deposited but not yet credited to the bank account, or funds needed to cover the previous day's warrant redemption. Our average daily investments were \$358,265,000 which was 96.1% of average daily total State funds. (See Appendix A for detail).

As a result of a demand deposit competitive bid procedure initiated this year with technical assistance from a cash management grant from the State legislature, average daily collected balances maintained in bank accounts next year will be reduced even further resulting in increased availability of funds for investment.

In order to manage the State's investments, the Treasury operates two separate, but coordinated programs.

To maintain the working cash of the State and to assure that adequate highly-liquid resources are available to pay the obligations of the State, the Treasury manages a portfolio of short term instruments and working cash. As of June 30 this protfolio held investments of \$245,535,390 of the State funds. (Appendix B).

At the same time the State had placed time deposits in Colorado banks and Savings and Loans totaling \$130,365,680. (Appendix I). As a result of the cash management study in progress, we expect to increase these investments in Colorado banks and Savings and Loans to approximately \$160,000,000 during Fiscal Year 1975-76. From these investment programs the State last year earned a record \$28,611,360 for an average rate of return on working cash invested of 7.99%. (See Appendix A).

Apart from cash and investment management, the Treasury performs a number of on going administrative activities. The State Treasury provides custodial and safekeeping functions for a number of departments. As of June 30th the State Treasury held custody and safekeeping items totaling \$1,017,324,456. (Appendix D). The State Treasury apportions various funds to the proper agency or political subdivision. Last year the Treasury apportioned \$459,130,838 in

IN THE PEOPLEWE IRUST A COMMODITY CILL CALLEN CALLEN CALLEN COMMODITY CILL CALLEN CALLEN CALLEN COMMODITY CILLON

accordance with the law. (Appendix E). The Treasury provides accounting of fund balances; for receipts and transfers; and of issued, paid, and outstanding warrants drawn on the Treasury. (Appendices F and G). In addition, the Treasury receives and pays escheats and services the debt of various State subdivisions. (Appendix H).

Finally, the State Treasury invests and accounts for a part of the investments of the State Public School Fund. During the past year the Treasury made new investments totaling \$6,126,077. That portion of the Public School PermanentFund now managed by the Treasury had a total value of \$43,099,807 as of June 30, 1975. Last year interest income of \$2,612,107 was received by the Fund from the investments managed by the Treasury. (Appendix C).

In addition to the on going activities summarized above, a series of administrative and policy changes has been initiated within the Treasury.

The demand deposit accounts of the State have been placed at bid in a competitive fashion among four interested banks. The result of that bid process is that as of November 1st, the State's main service account will remain at the United Bank of Denver with an average daily collected balance of \$2,438,000 to compensate the bank for its services. The unemployment compensation clearing account which is currently maintained as a lock box at the First National Bank of Denver will be moved to the United Bank of Denver and an average daily balance of \$403,000 collected funds will be maintained in the account to pay for services of the lock box function of this account.

Seventeen additional lock boxes which are currently located at the United Bank of Denver will remain there. In addition, the Public Employees' Retirement Association lock box will be moved from the Colorado National Bank to the United Bank of Denver and an average daily balance of \$153,000 will be maintained to compensate the bank for the services of these eighteen lock boxes.

Finally the investment transactions account which is now maintained at the Colorado National Bank of Denver will be moved to the First National Bank of Denver as of November 1st and, an average daily collected balance of \$151,000 will be maintained to compensate the bank for services provided.

The consequence of this bid process is that these major functions of the State's bank business which last year required an average daily balance of \$4,967,000 will be maintained next year with an average daily collected balance of \$3,146,000. This savings of \$1,821,000 in average daily collected balances should result in a net increase in earnings to the State of approximately \$180,000 over the 18 months of the contract.

This bid process was accomplished as a result of the expenditure of a small portion of the \$50,000 grant received by the Treasury from the legislature to improve cash management.

Criteria for the deposit of long term interest-earning funds in Colorado banks and savings and loan associations have been developed in cooperation with the Treasurer's Advisory Committee chaired by Mark Hogan. As of December 1st, 1975 funds will be placed in Colorado banks under these new criteria.

Criteria for deposit of funds were developed in order to encourage banks to make certain types of loans within their communities. Although, in some cases, the rate of interest received by the State on such bank deposits may be lower than that which would have been received if investments were placed only at the highest available rate, the flow of funds into the communities through the banking system should generate additional State revenues through the tax system equal to approximately three per cent of the total amount of funds so deposited in these Colorado banks. The criteria specifically encourages lending in those areas of housing, agriculture, and business development which will result in the greatest reinvestment of funds in the community and the largest resultant tax revenues to the State.

A contract to perform a cash management study for the State has been granted through competitive bid to Management Services Consultants of Boulder in cooperation with Boettcher and Company and C. Raymond Clark, a private consultant in Denver. This study is now under way and tangible results in addition to those achieved on the demand deposit bid will be available during Fiscal Year 1975-76. As phases of the cash flow study are completed they will be examined and where appropriate, implemented by this office.

In addition, the State Auditor's office conducted an audit of this office for the first time since 1973. Hearings were held before the Legislative Audit Committee and many of the recommendations of the auditor have already been undertaken by this office. The other audit suggestions agreed to by this office will be undertaken shortly.

Finally, in cooperation with the Controller, we are evaluating State accounts held by various branches of the State Government but not directly deposited with the State Treasurer and will be closing or consolidating these accounts as appropriate. In the months ahead additional demand deposit accounts, specifically including the Employment Benefits Account currently managed by the State Department of Employment, will be bid through the State Treasurer's Office.

The appendices to this report represent continuation of the practice established by this office of disclosing all relevant facts about bank deposits and investments including terms and rates. Additional information and records in this office are available not only to you but to the interested citizens of Colorado.

Very respectfully, your obedient servant,

Sam Brown State Treasurer
